

U.S. Patent and Trademark Office

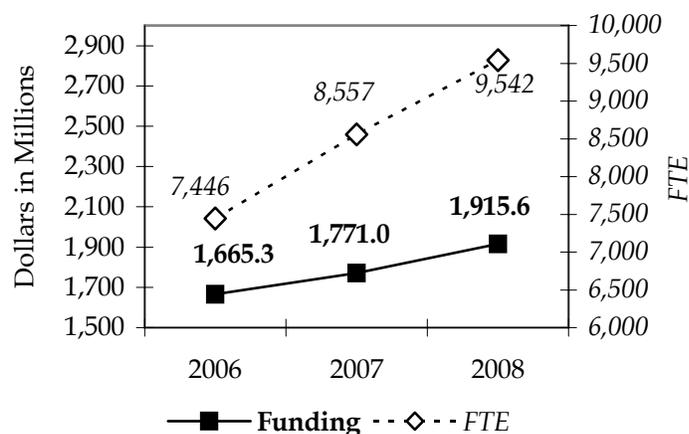

The mission of the U.S. Patent and Trademark Office (USPTO) is to foster innovation and competitiveness by providing high quality and timely examination of patent and trademark applications, guiding domestic and international intellectual property policy, and delivering intellectual property information and education worldwide. This mission is accomplished by the USPTO through its two distinct business lines, Patents and Trademarks, which administer the patent and trademark laws [15 U.S.C. 113 and 35 U.S.C. 41 and 376]. These laws provide protection to inventors and businesses for their inventions and corporate and product identifications, and encourage innovation and scientific and technical advancement of American industry through the preservation, classification, and dissemination of patent and trademark information.

In addition to the examination of applications for patent grants and trademark registrations, the USPTO

provides technical advice and information to Executive Branch agencies on intellectual property matters and trade-related aspects of intellectual property rights, and assists governments of other countries in establishing regulatory and enforcement mechanisms to meet their international obligations relating to the protection of intellectual property.

Increases requested for FY 2008 focus on improving the quality and timeliness of Patent and Trademark processes.

The increase requested for FY 2008 will fund the hiring of 1,210 new patent examiners to address an increased patent examination workload. Resources also are requested for the Board of Patent Appeals and Interferences to address a greater than fifty percent increase in continuations with notices of appeal. The increase would also implement changes to the qualifications required to represent parties on patent matters. These changes will improve USPTO's performance in reaching its quality and timeliness targets.

The increases requested for FY 2008 will implement the strategic initiatives contained in the updated USPTO FY 2007-2012 Strategic Plan that contribute to achieving quality and timeliness targets.

USPTO Performance Measures

The USPTO supports the Department's strategic goal to foster science and technological leadership by protecting intellectual property. The USPTO's strategic goals and corresponding initiatives enable us to optimize patent and trademark quality and timeliness, and improve intellectual property protection and enforcement domestically and abroad in concert with our focused management priorities that encompass:

Permanent Fee Legislation/Sustained Funding Stream — Permanent enactment of the fee changes made with the Consolidated Appropriations Act of 2005 is necessary to provide a stable and predictable funding stream for the agency.

Resolute Emphasis on Quality and Productivity — Quality and productivity are the most important components of USPTO's draft strategic plan for FY 2007-2012.

Timeliness — In order to meet applicant needs, USPTO is continuing to address the challenges of rising workloads and the shift of applications from traditional arts to more complex technologies by hiring additional examiners and exploring process changes. Additionally, in FY 2006, the Patent Business implemented an accelerated examination process for those applicants who desire a final disposition of their application within 12 months.

Electronic Workplace – The Patent and Trademark operations are rapidly moving to eliminate paper documents from their processes. Electronic communications will continue to be improved, encouraging more applicants to do business electronically with the delivery of Web-based text and image systems.

Strengthen Intellectual Property (IP) Protection Worldwide – As contained in the USPTO draft strategic plan for FY 2007-2012, the USPTO continues to work as a member of the Strategy Targeting Organized Piracy (STOP!) initiative and the National Intellectual Property Law Enforcement Coordinating Council (NIPLECC) to improve IP protections and enforcement. USPTO will also continue to work with its IP partners and other IP offices to improve the efficiency of processing systems and streamline the IP system.
