

# Sunflower Systems Training

**Department of Commerce**

December 2009

# Table of Contents

1. Introduction
2. Sunflower System Basics
3. Acquisition and Asset Creation
4. View Property Records
5. Changes and Updates
6. Passes and Loans
7. Transfer Assets
8. Manage a Review Campaign (PMO and PAO)
9. Conduct a Review Campaign (PC)
10. Dispose (Excess) Assets
11. Retire Assets (Lost, Damaged and Destroyed)
12. Mass Uploads
13. Review & Sunflower Help
14. Appendix

## Chapter 1: Introduction

Sunflower Assets 4.5

## Course Objectives

- After this course you should be able to:
  - Explain Sunflower System's functionality
  - Create assets using the Maintain Inventory Assets form
  - View property record history and information
  - Update property record information
  - Place assets on pass
  - Transfer property
  - Create and conduct an inventory campaign
  - Create and withdraw excess requests
  - Retire assets with appropriate final events
  - Define Administrator duties

## Lesson Objectives

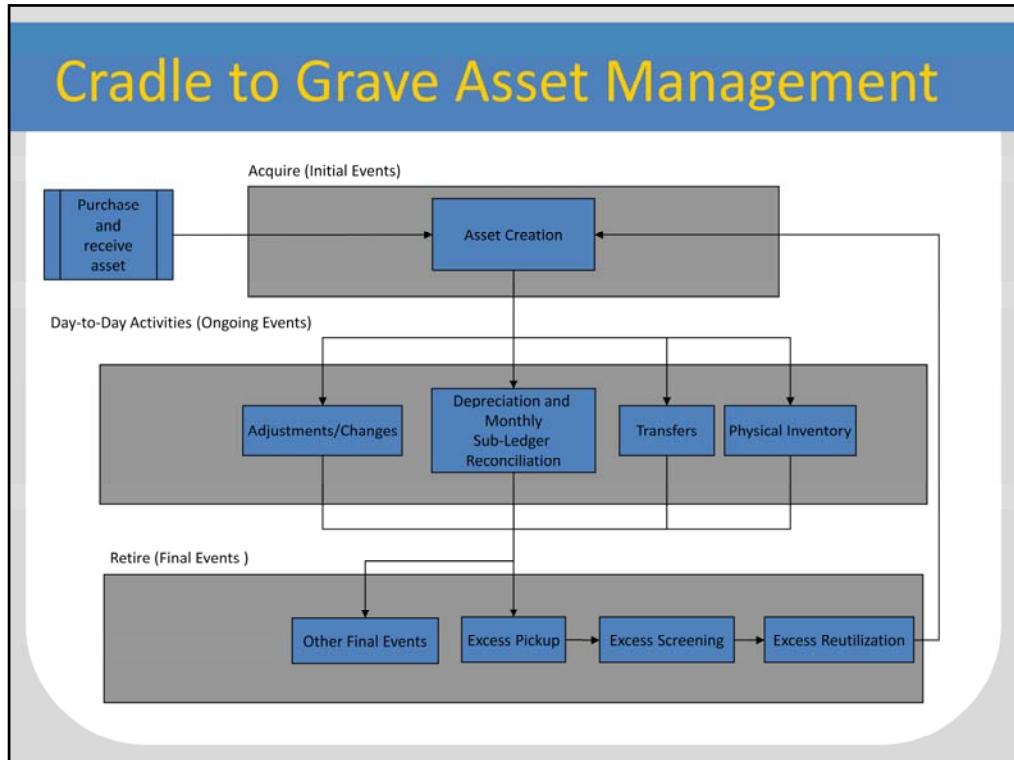

- After this lesson you should be able to:
  - Describe the use of Sunflower Systems at DOC.
  - Explain the DOC property roles as they relate to Sunflower Systems.
  - Explain how the Student Guide is organized.
  - Explain the common elements of each Lesson.
  - Describe the purpose and function of Navigations.
  - Describe Labs.
  - Login to Sunflower Systems

## DOC and Sunflower Systems

- Tracks all property assets
- Currently used by multiple Bureaus at DOC, including NOAA, OS, ITA and NTIS

Sunflower Systems enables asset management utilizing a cradle-to-grave process. Users are able to account for and manage their assets from the time of acquisition through disposal. A complete history is maintained as records are easily updated to reflect any changes (location, user, value, etc.). Users may also generate reports to view assets. Once assets are disposed and a final event is created, a history of the assets remain in the system for reporting purposes in the future.

Currently, several Bureaus at the Department of Commerce (DOC) are using Sunflower Systems.

The Sunflower Property system uses **Event Types** to describe the methods by which accountable property is acquired, disposed of, and maintained throughout their life. Event Types are categorized as either initial, ongoing, or final events. Once created, the event type (e.g. initial and final event types) displays on screens such as the Asset Summary and History screen for their respective fields. The Event Types are associated with journal entries, so it is important that the correct Event Type be chosen each time.

**Initial Events** – e.g. ***Purchase***

**Ongoing Events** – Ongoing events enable you to keep a historical record of reoccurring events that can be associated with assets. For example, if the User or location of the asset changes, you can track these changes. Or, if the asset is transferred from one custodial area to another these records will be kept as well.

**Final Events** – e.g. Loss or Destroyed, Excess

**Note:** Once an asset is retired, the property record remains in Sunflower and shows the appropriate final event. Any retired asset can be reinstated at a later date, if appropriate.

## Course Role and Responsibilities

<b>DOC Role:</b>	Property Management Officer (PMO) Property Accountability Officer (PAO) Property Custodian (PC)
<b>Sunflower System Responsibilities</b>	Inventory Clerk Agreement Clerk Administrator Review Manager Review Clerk

The **Property Management Officer (PMO)**, **Property Accountability Officer (PAO)**, and **Property Custodian (PC)** are the Department of Commerce roles responsible for maintaining the DOC's property records.

To perform these business functions, PMOs, PAOs and PCs use the **Sunflower System Responsibility** called **Inventory Clerk**, **Agreement Clerk**, **Administrator**, **Review Manager** and **Review Clerk** and the computer system called **Sunflower Assets**, or **Sunflower** for short.

This course is designed to teach you the software and business processes to perform the role of PMO, PAO and PC.

## Student Guide Organization

Each chapter or lesson in the Student Guide follows a consistent pattern. It contains the common elements below, which we will look at in this chapter.

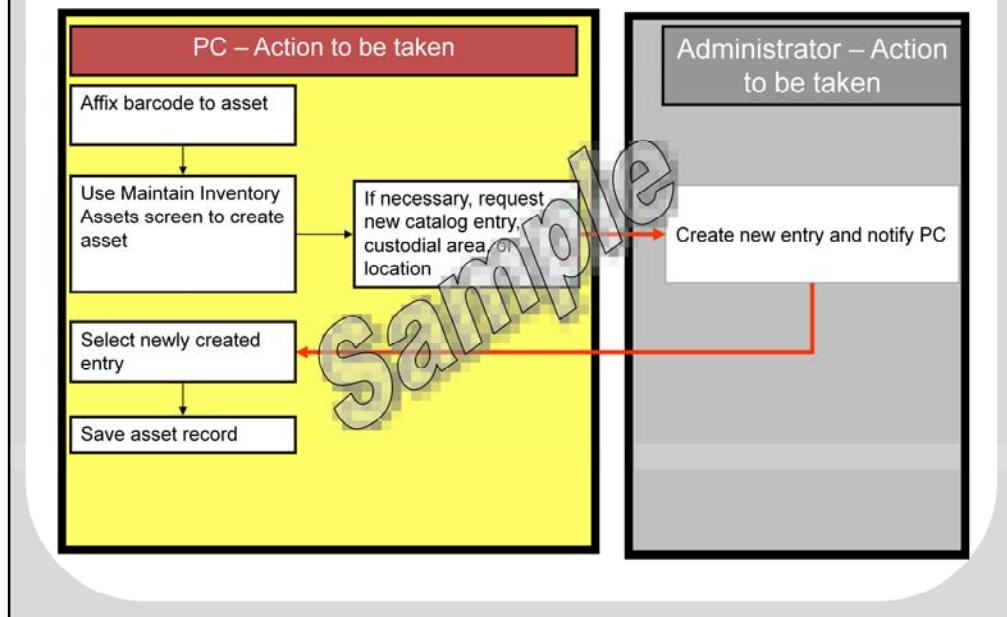

1. Lesson Objectives
2. Business Processes
3. Sunflower Content
4. Navigations
5. Labs
6. Lesson Summary

## 1. Lesson Objectives

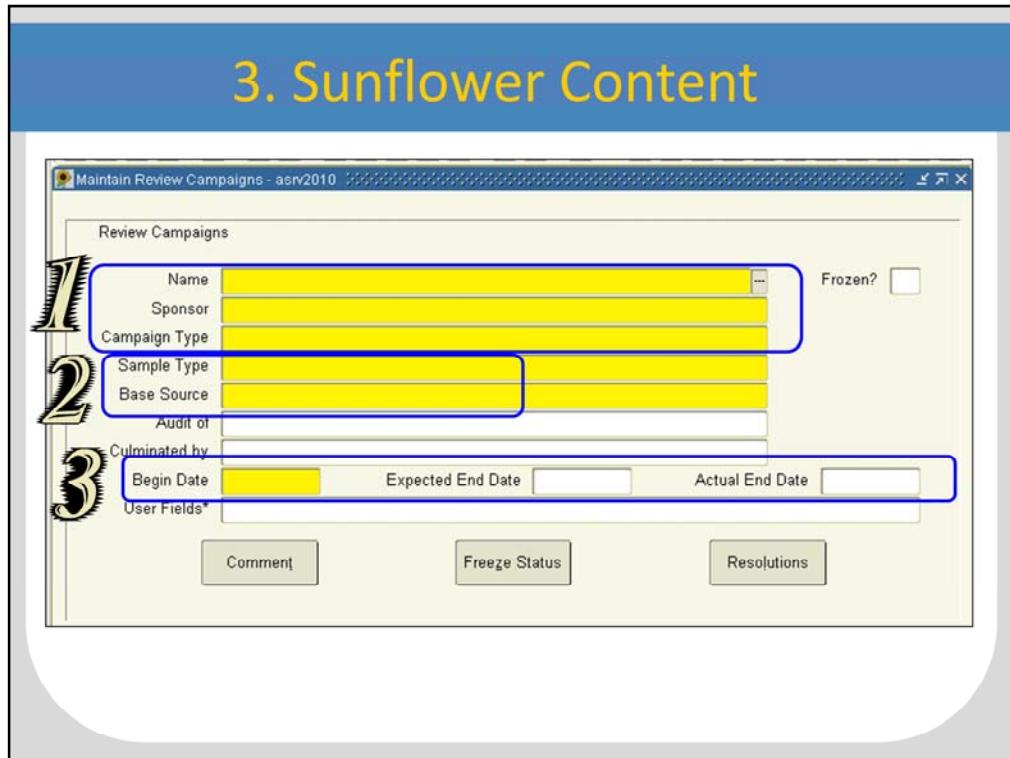

- After this lesson you should be able to:
  - Explain the Sunflower System's forms (windows)
  - Define key terms
  - Use the toolbar and shortcut keys
  - Describe Sunflower's Location relationships
  - Explain user defined and complex fields
  - Describe the Sunflower System's Catalog
  - Explain how to manage errors
  - Explain how to conduct wildcard searches
  - Insert comments, pictures and attachments

Each lesson begins with a set of **Lesson Objectives**. These bulleted items list the basic tasks to be accomplished in the chapter.

## 2. Business Processes

Here we see a flowchart describing a high level business process. Before actually looking into the Sunflower applications screens, we prefer to try to get the “big picture” from a business perspective.

Often we include screenshots of Sunflower with particular regions of the screen circled for further discussion.

Note: Some Sunflower content will not be covered in the class, but is included for *reference purposes only*. A good example is a Sunflower function that is only used by a very small handful of users at the DOC. In this case, information is included on this topic which can be referred to at a future date.

## 4. Navigations

The symbol above indicates that you are “entering” a Navigation. What is a Navigation?

Navigations are step-by-step instructions on how to perform a specific task in Sunflower. They appear throughout the student guide, and are always preceded by the compass symbol. They are called “Navs” for short.

Let's take a look at a sample Nav...

**Sample Navigation (“Nav”)**

The screenshot shows a software interface titled "Asset Creation". At the top left, there is a breadcrumb trail: "Inventory Clerk", "M > Mgmt > Maintain Inventory Assets", and "Maintain Inventory Assets". The main area is a form titled "Inventory Assets" with various fields. A large watermark reading "Sample" diagonally across the page. Four numbered callouts point to specific parts of the screen:

1. Points to the breadcrumb trail at the top left.
2. Points to the "Barcode #", "Manufacturer", and "Value/Type" fields in the main form.
3. Points to the first instruction below the form: "1. Enter the mandatory property information in the fields below, and Tab through the screen as you go."
4. Points to a table below the instruction, titled "Field" and "Description".

Field	Description
Barcode #	Enter the new Barcode Number for the asset.
Manufacturer	Enter the name of the manufacturer of the asset. If a list of values exists, select the applicable standard manufacturer name.

Below are some comment elements of a Nav:

*Note: Navs may be preceded by a section called Purpose or a Before You begin.*

1. May contain a Navigation Box. More instruction on this to follow.
2. Will contain a picture of the starting screen.
3. Contain step-by-step numbered instruction.
4. May contain Nav tables of fields available for data entry.

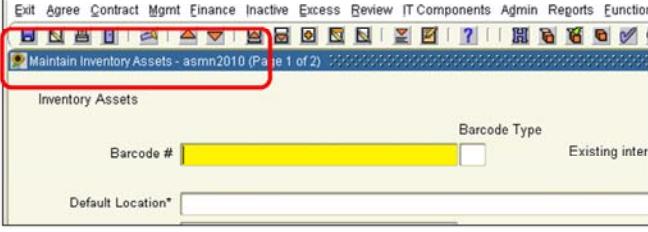

## Nav Boxes

Nav Boxes identify the information related to beginning a specific task. We will now examine the Nav box from the preceding page.

Inventory Clerk → Sunflower Responsibility

M > Mgmt > Maintain Inventory Assets → Navigation Path

Maintain Inventory Assets → Screen Name

**Nav Boxes** are ordered as follows:

**1. Sunflower Responsibility**

- The responsibility gives you access to a specific set of Sunflower windows, menus, reports and data.

**2. Navigation Path**

- The directions on how to get to the appropriate starting window.
- The letter **M** stands for Menu item and **B** for Button. In these cases the first step will be to select a menu item or button, respectively.

**3. Screen Name**

- Identifies the title of the screen as displayed in the header bar (see circled area).

## Bold Letters in Navs

If you want to search by barcode number, **goto task #1**. Otherwise, **goto task #4**.

1. Enter the barcode number in the **Barcode #** field.
2. **Tab** out of the field.

1

2

**Bold** letters in Navs can mean one of two things:

1. You have been given a choice. These statements are all or partly in bold, and they usually require you to make a decision.
2. Single words in bold type indicate an actual field, window or button name that is visible on the screen.

## Nav Tables

Field	Description
Barcode #	Enter the new <b>Barcode Number</b> for the asset.
Manufacturer	Enter the name of the manufacturer of the asset. If a list of values appears, select the applicable standard manufacturer name from the list.
Model Number	Enter the model number for the asset. If a list of values appears on the screen, select the applicable standard model number from the screen. Once you <b>Save</b> , the <b>Catalog Number</b> and <b>Official Name</b> fields will automatically populate (based on the Manufacturer and Model Number combination.)
Serial Number	Enter the serial number of the asset, if known. Otherwise leave it blank.

Nav Tables contain a block of fields available for data entry. A few comments:

- The **non-shaded** fields (with white background) indicate that an entry is required.
- The **shaded** fields (with gray background) indicate the entry is optional or a default value.
- If a screen field is not referenced in a table, it is not needed.

## 5. Labs

- Labs are required activities designed to reinforce lesson objectives with hands-on practice.
- You will need the corresponding Navigation to complete a particular Lab.

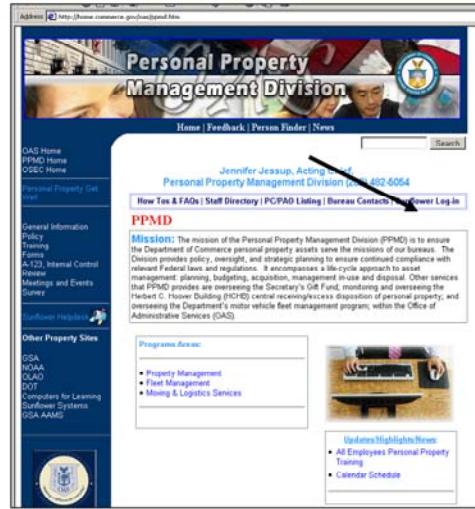

## 6. Lesson Summary

- You should now be able to:
  - Explain the Sunflower System's forms (windows)
  - Define key terms
  - Use the toolbar and shortcut keys
  - Describe Sunflower's location relationships
  - Explain user defined and complex fields
  - Describe the Sunflowers System's Catalog
  - Explain how to manage errors
  - Explain how to conduct wildcard searches
  - Insert comments, pictures and attachments

Each lesson concludes with a **Lesson Summary** which recaps the learning objectives for that chapter.

## Login to Sunflower

- On line application
- Enter through DOC website:  
<http://www.osec.doc.gov/oas/ppmd/>
- Click the Sunflower Log-in link
- Use your login credentials
  - User Name
  - Password
- Select from the menu options

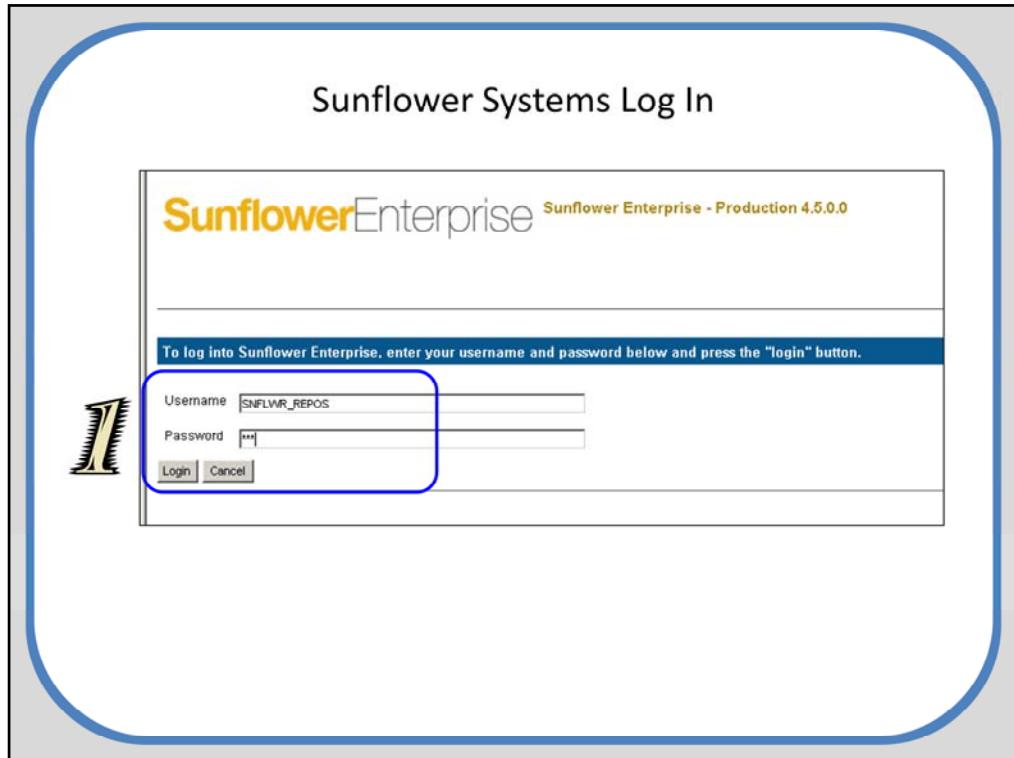

Sunflower Systems is a web-based application and may be accessed with your assigned user name and password. Your user name will be assigned to you. Please check with your instructor for your user ID and password.

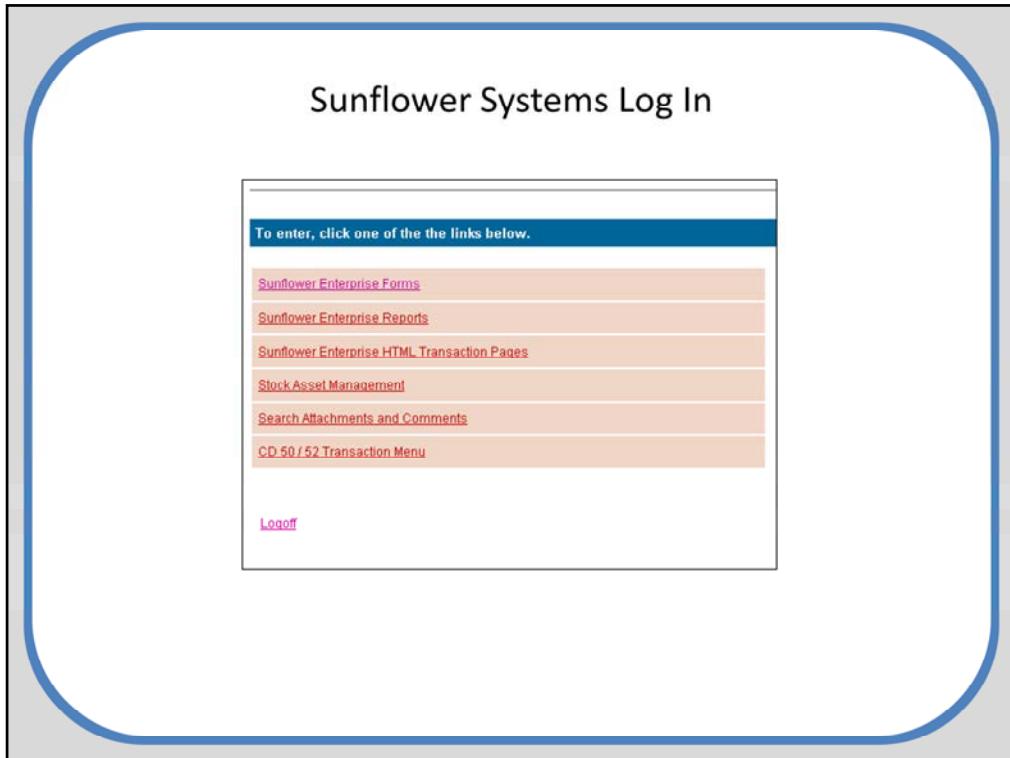

Use the DOC website <http://www.osec.doc.gov/oas/ppmd/> to access Sunflower.

There are certain system requirements for using Sunflower. Please work with your IT Support to verify that the following is installed on your computer:

- Java
- Internet Explorer web browser
- Jinitiator
- Allow pop-ups

Provide your username and password for access to the system. Then select the login button.

You will then need to select one of the links to launch Sunflower Systems.

**Sunflower Enterprise Forms** opens the windows used for data entry.

**Sunflower Enterprise Reports** opens a screen to run Adobe Acrobat reports.

**CD 50 / 52 Transaction Menu** is used to request and approve/deny retirement of assets.

*Note:* This screen is also used to **Logoff** the application.

## Lesson Summary

- You should now be able to:
  - Describe the use of Sunflower Systems at DOC.
  - Explain the DOC property roles as they relate to Sunflower Systems.
  - Explain how the Student Guide is organized.
  - Explain the common elements of each Lesson.
  - Describe the purpose and function of Navigations.
  - Describe Labs.
  - Log in to Sunflower Systems.

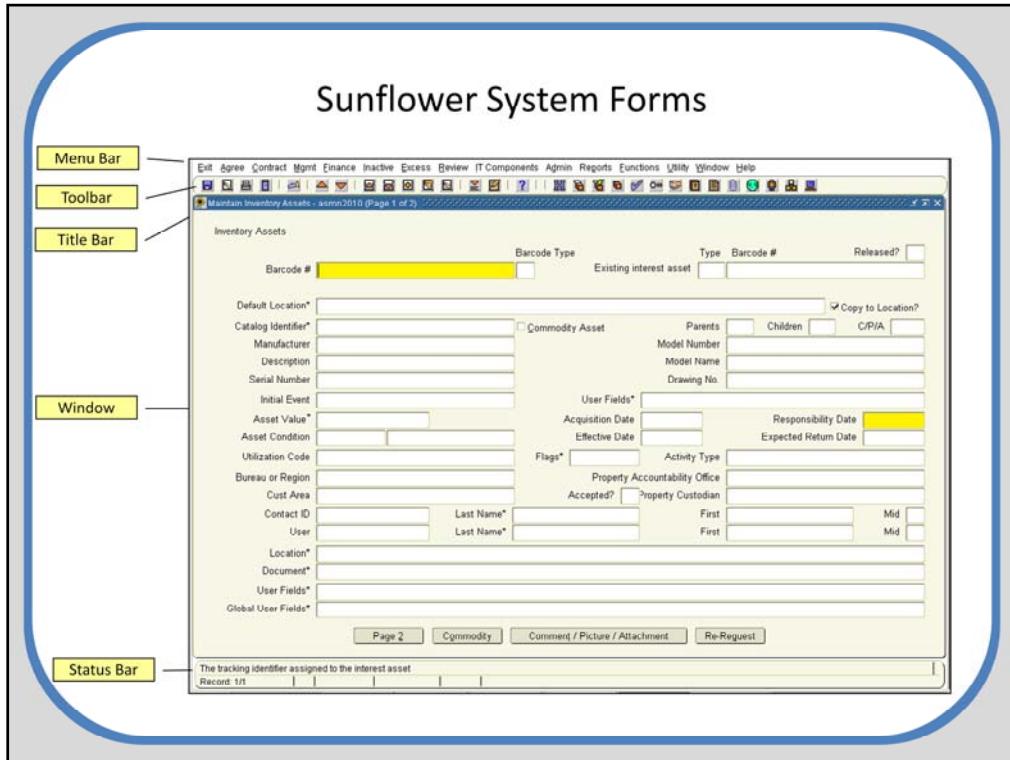

## Chapter 2: Sunflower Systems Basics

Sunflower Assets 4.5

## Lesson Objectives

- After this lesson you should be able to:
  - Explain the Sunflower System's forms (windows)
  - Define key terms
  - Use the toolbar and shortcut keys
  - Describe Sunflower's Location relationships
  - Explain user defined and complex fields
  - Describe the Sunflowers System's Catalog
  - Explain how to manage errors
  - Explain how to conduct wildcard searches
  - Insert comments, pictures and attachments

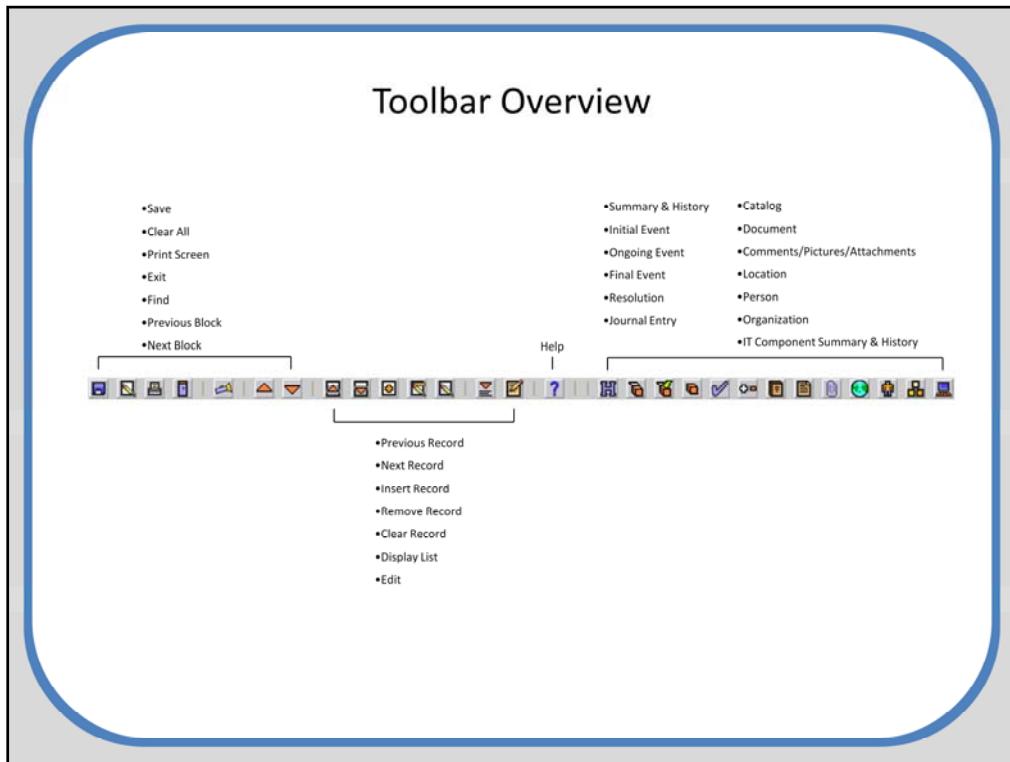

Sunflower Assets, is designed to operate in a Web-enabled environment. It is important to understand the terminology of the components within the Sunflower Assets application forms. The window (screen, page, panel, etc.) is commonly referred to as a form. Other common terms are listed on the following page.

**Note:** It is recommended that you 'maximize' the window to enhance the viewing of each screen. This will allow you to see all the information on the Status Bar at the bottom of the screen.

## Key Terms and Definitions

TERM	DEFINITION
Asset	An accountable property item that has been barcoded and entered into Sunflower.
Item	A line item record (e.g. a piece of property that has not been barcoded or entered into the system); or a non-accountable piece of property.
Button	A graphic element or icon that initiates a predefined action when you click it.
Field	An area in a window that displays data or allows you to enter data.
Menu Bar	A pull-down list of menus used to navigate to other forms or perform actions within a form.
Status Bar	Displays any status information and other information related to form processing. Also works in conjunction with the "Tool Tips" to provide button (or icon) information.
Title Bar	Indicates the name of the window, context information pertinent to the information in that window, and provides page information (i.e. Page 1 of 2).
Toolbar	Buttons (or icons) used to navigate to other forms or perform actions within a form.
Tool Tips	Help information created by moving your mouse over the top of an icon or button. Used to determine the function of an icon or button on the toolbar or form.
Window	A form. An area where you, the user, interact with the application. Many windows can be open at one time and you can access these "overlapping" windows to perform data entry or data search activities.

The tool bar is a collection of buttons (or icons) that perform specific actions when you select them. Each tool bar button replicates a menu bar action. Depending on the context of the current field or window, a tool bar button may be active or inactive. Display help, or a tool tip for an active tool bar button, by placing your mouse over the button.

Refer to the following page for a quick reference list of toolbar icons and shortcut (hot) keys.

## Toolbar Buttons and Shortcuts

Page Down	Scroll Down
Page Up	Scroll Up
Return	Return
Show Keys	Ctrl+K
Update Record	Ctrl+U

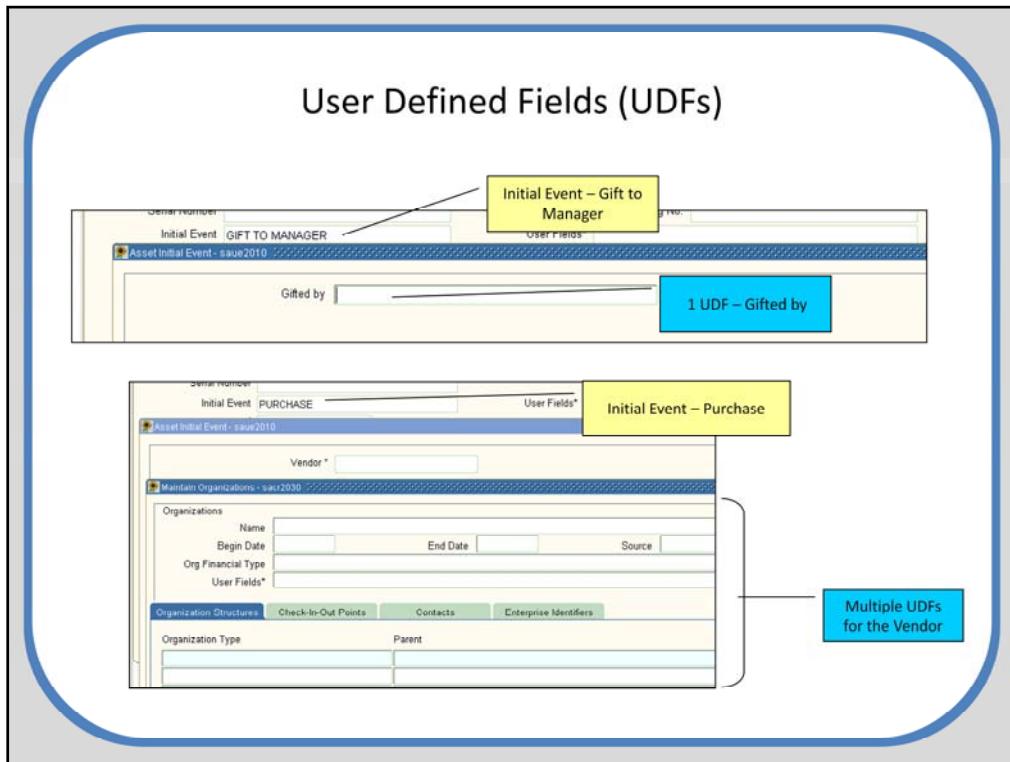

Note: Copy (Ctrl+C) and Paste (Ctrl+V) may also be available.

See Appendix for Job Aid.

A Location is mandatory when creating a property record. Sunflower uses Sites and Structure Levels to define the location of an asset. For the DOC, Sites are geographic locations (e.g. **Aberdeen, MD; Boulder, CO; Washington, DC**). Structure Level 1 is **Buildings** (e.g. **Ronald Reagan**). Structure Level 2 is **Room**. Your Building selection will be based upon the Site chosen; your Room selection will be based upon the Building chosen. **Sites, Buildings, are mandatory** fields and are selected from a List of Values. The **Room** may be selected from the List of Values or may be typed in if it is not in the list; this entry is then saved to the database and appears for all users in the List of Values. Keep in mind that the more specific the location, the easier that asset will be to find during the annual physical inventory process.

For updates to the location lists of values, all DOC staff should contact the help desk or a system administrator.

User Defined Fields (UDFs) are place holders used to define information that is unique to the DOC. Information entered in UDFs will generally be entered manually, but in some cases the system will generate entries automatically. Where appropriate, UDFs may have fields that contain a list of values for you to select your entry. In the above illustrations notice how the UDFs display changes based upon different selection criteria used when you create an initial event for creation of an asset. This UDF is tied directly to the Initial Event field data entry.

Note: Not all UDFs contain information, meaning that these UDFs are not being utilized by the DOC and are therefore not mandatory. If a user attempts to launch these ‘unextended’ UDFs, an error message similar to the following will be displayed: “Context does not extend the field.” This is okay – it just means that there is no information within, so the user can continue entering information on other parts of the record.

## Complex Fields

**Asset Value\***

Asset Value Components			Cap?
Value Type	Asset Value	User Fields*	
ACQUISITION COST	\$2,500.00		No

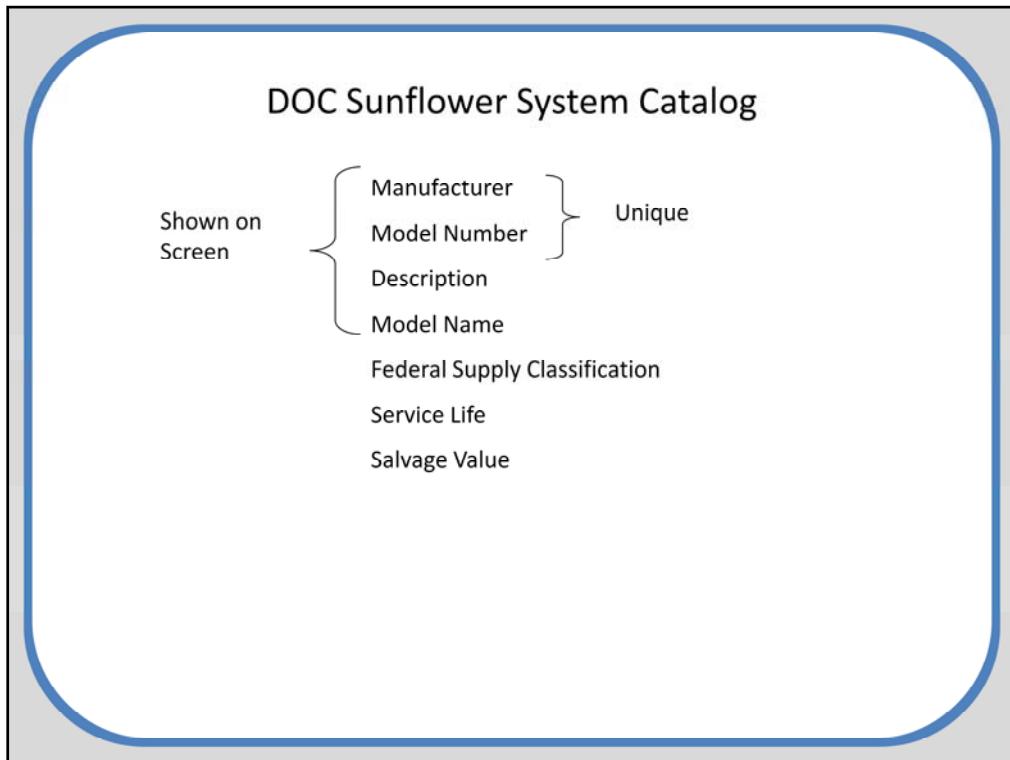

**Locations\***

Locations			
Site	BUILDING	ROOM	Mail Stop
Structure Level 3 Name	GPS 1	GPS 2	GPS 3

A Complex Field is a grouping of related fields that are displayed in the form of a pop-up window due to their tight association with one another. Common complex fields are Location, Asset Value, Names, Catalog, and User Defined Fields. For example, Location is a combination of several fields that include Site, Building, Room etc. All complex fields are represented by their name followed by an asterisk (\*).

Note: Selecting the **Save** button automatically saves and closes complex fields.

**Remember: COMPLEX FIELDS = FIELD NAME + \***

The property catalog stores data common to a property item's **Manufacturer** and **Model** number. The catalog is based on the manufacturer's lists, and is updated frequently to reflect new products. Having a more detailed centralized catalog enables you to have a uniform way to enter **Manufacturer** and **Model** information quickly and precisely, especially when entering multiple assets. This standardization is important when running reports or queries to ensure results are satisfactory.

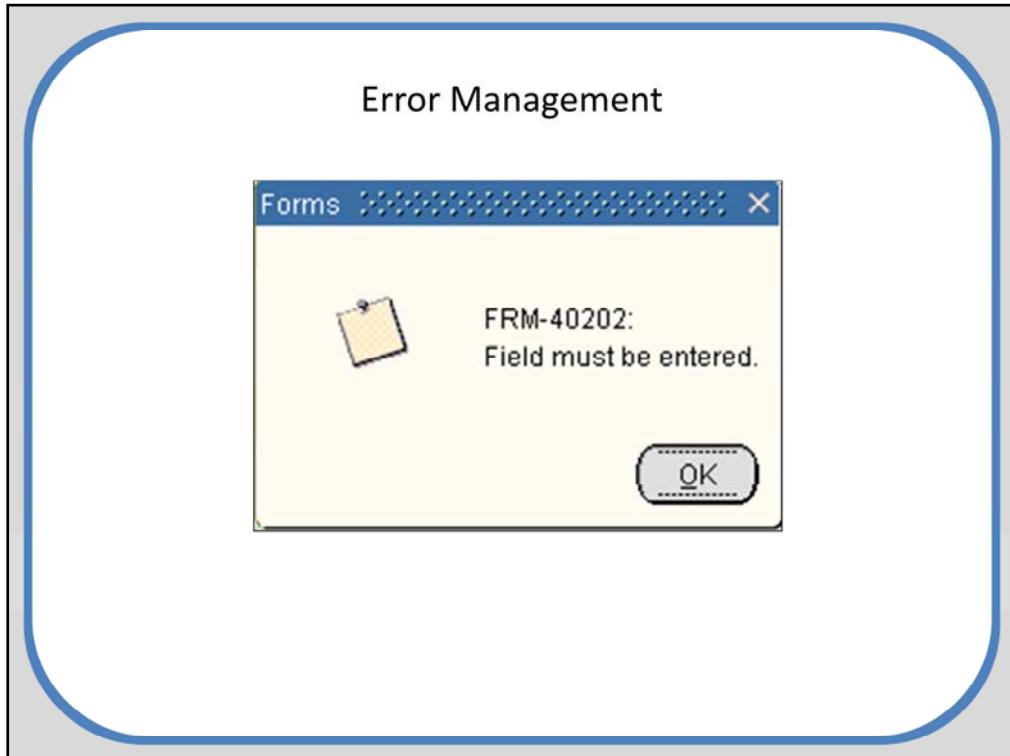

The **Administrator** is the only person able to add a manufacturer and model number to the catalog. Notify the Administrator to request a new entry.

Since the catalog will be centrally controlled by the Administrator, the likelihood of having the following entries will be greatly reduced:

Manufacturer - Palm Computing Inc.  
Manufacturer - Palm Computing Inc.  
Manufacturer - Palm Computing Inc.

Model - PALMV  
Model - PALM V  
Model – PALM 5

The **Official Name**, which is unique to the Manufacturer and Model number, will be populated by the Cataloger as well.

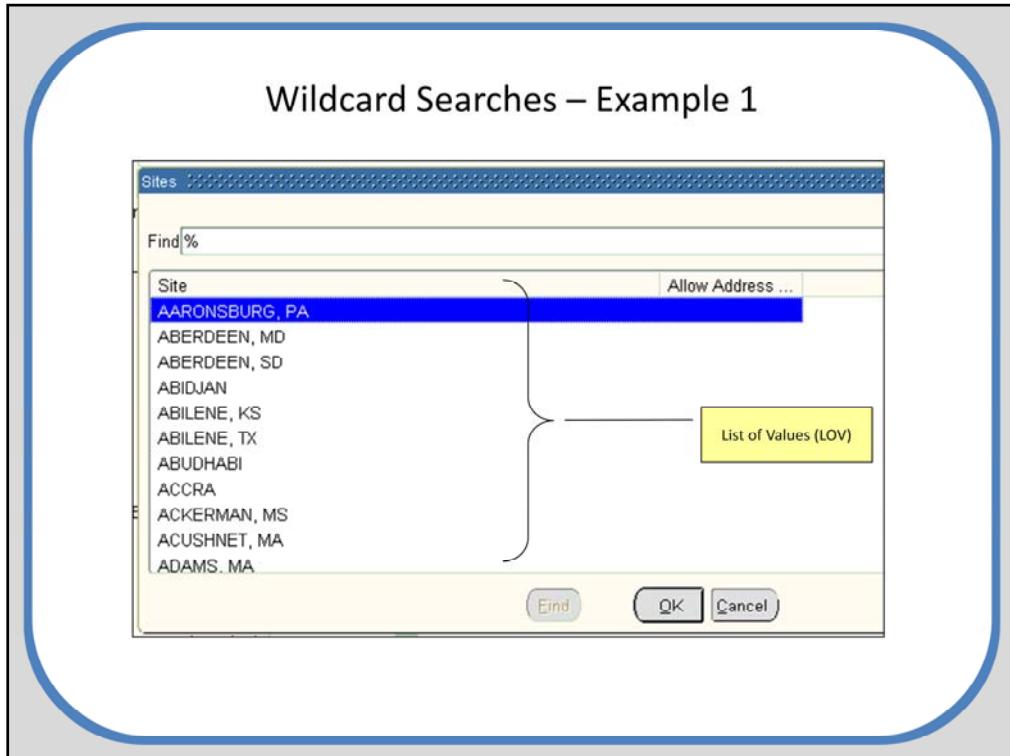

When filling out a form to complete or change a property record, you must complete all the required fields. In the event of a skipped field or an error, the Sunflower System will notify you by displaying an error message. This error message will generally appear when you attempt to save the record. But how do you get back to the field? Sometimes it is not as easy as placing your cursor where you want or need it to be. In these cases, use any of the following short-cut key strokes to back out of a required field.

- Select the **SHIFT + TAB** keys on your keyboard.
- Select the **CLEAR RECORD** button to begin again.

## Error Management (continued)

Sometimes you may not see a ‘pop-up’ error message as shown on the previous page. Depending on which screen you are working in, the **Message** field at the bottom of the screen could show an error instead. In the above example, the message states “You are not a cust area contact for 540J0N110” which means that the user does not have privileges to save the requested changes.

Using the LOV feature in combination with wildcards can save you time and maximize correct data entry without having to memorize or look up valid data for each field. Simply choose data from an online list of values whenever you want. Additionally, you are relying on the Sunflower System to validate your input since you will know right away if your entry does not match an option from the LOV. The combination of the % with a character will display sets of results.

- % - returns the complete list of values (shown above)
- character + % - returns all values that begin with the character(s)
- % + character - returns all values that contain the characters anywhere within the value.

The best way to explain this concept is by example. The following walkthrough will illustrate the wildcard concept. The walkthrough will show a search for sites beginning with and containing **WA**, using the second and third methods described above.

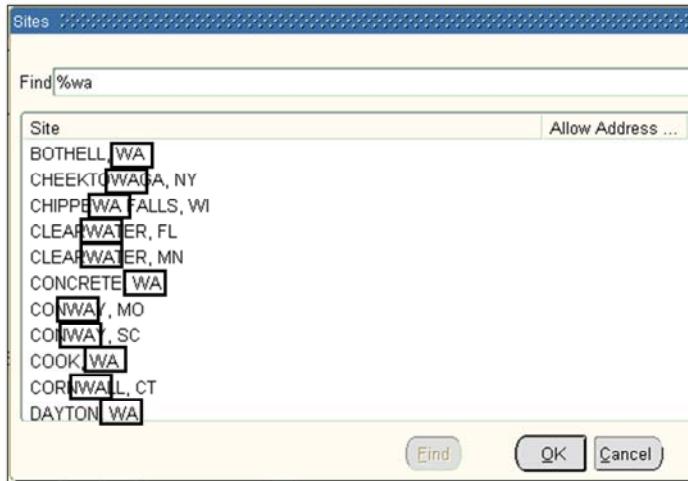

## Wildcard Searches – Example 2

**Example** – character(s) + % - return all values that begin with the character(s).

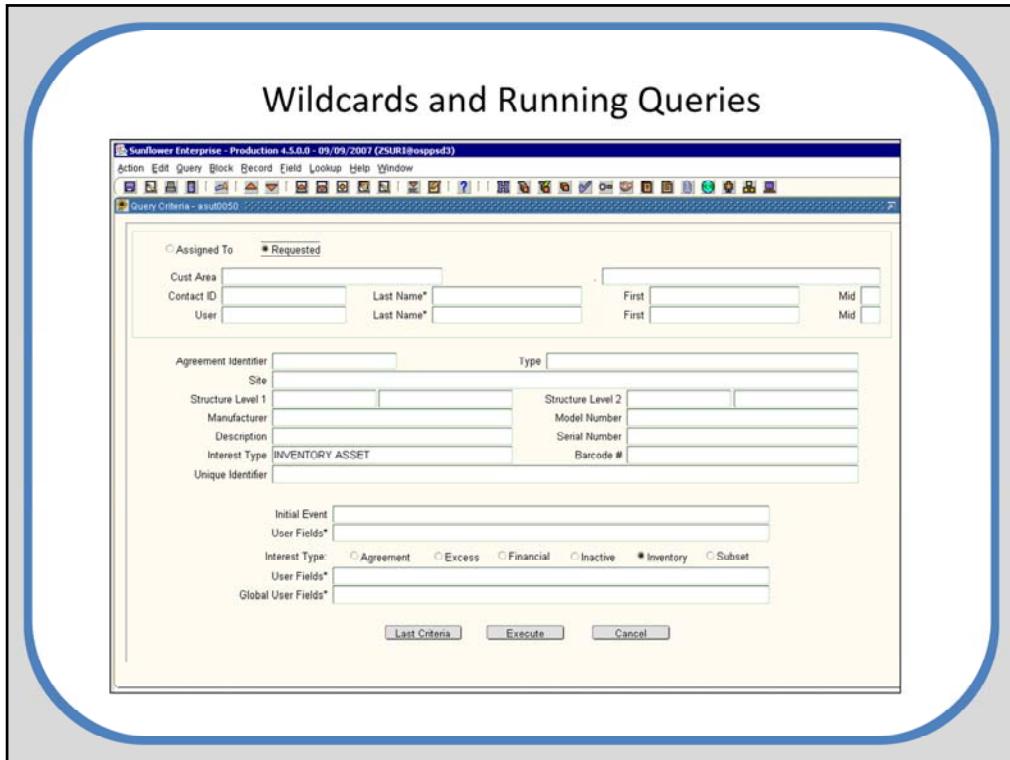

In the above example, a search is performed using the letters **WA**, the wildcard (**%**), and the **Find** button. As you can see, the list of values is limited to only those Sites that begin with **WA**.

### Wildcard Searches – Example 3

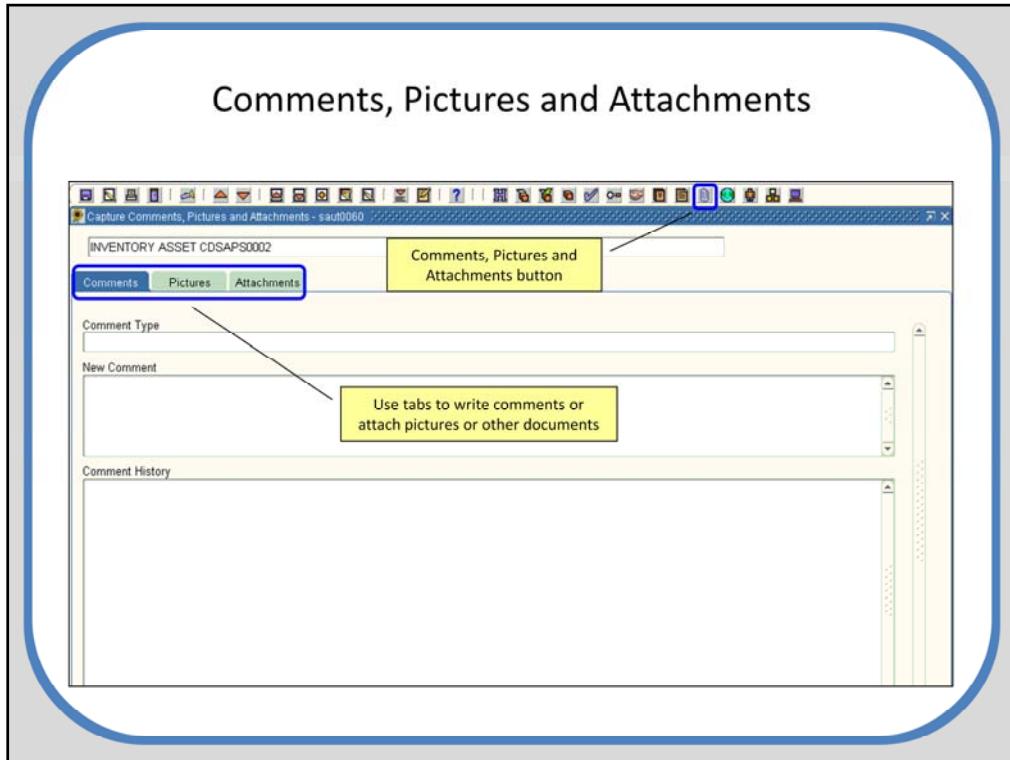

**Example - % + character - return all values that contain the characters anywhere within the value.**

In the above example, a search is performed using the wildcard (**%**), the letters **WA**, and the **Find** button. As you can see, the list of values is limited to only those Sites that have the letters **WA** in their names.

Wildcards are also useful when running queries. If you do not know the complete value of a field, but know what it begins with you may enter the beginning characters followed by the %. For example, in the Cust Area field a PC could enter 55% and Execute the query to return results within Custodial Areas beginning with "55."

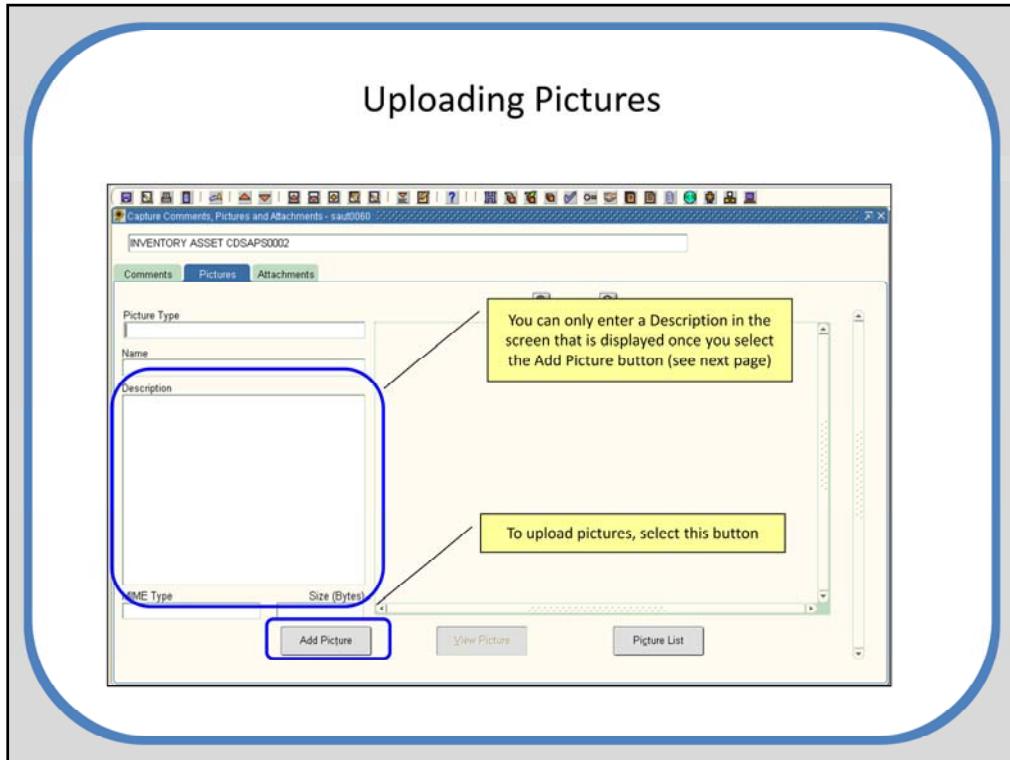

To add comments, pictures, or attachments to a property record, select the **Comments, Pictures and Attachments** button from the toolbar from any of the screens in Sunflower.

Use the **Tabs** within the form to write comments or attach pictures or other documents.  
Use the **Save** button when complete.

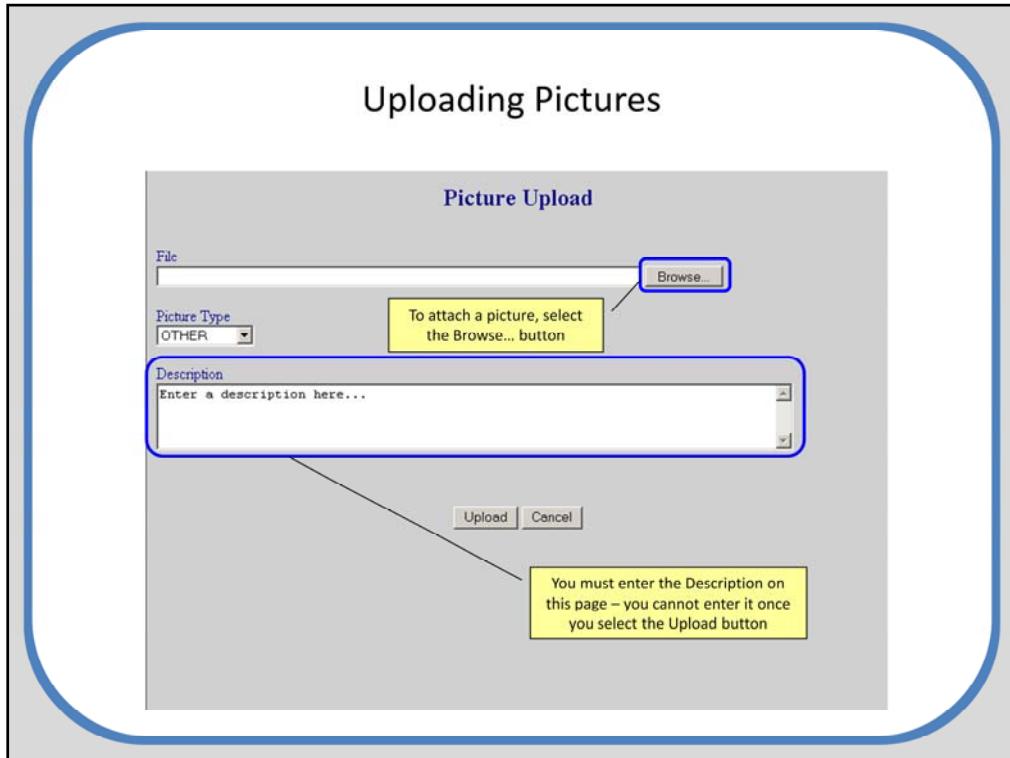

Note: Any **Comments, Pictures, or Attachments** created by the Cataloger *at the Catalog level* will be visible on any property records with that Catalog designation (i.e. Manufacturer/Model Number combination.) PCs can add additional pictures as needed.

See the following pages to learn more about uploading pictures.

To attach a picture of a Catalog item, select the **Add Picture** button. See the next page for more information.

Note: You can only enter a Description in the screen that is displayed once you select the Add Picture button (see next page).

Use the **Browse** button to search for pictures to upload.

Note: You must enter the Description on this page – you cannot enter it after you have selected the **Upload** button.

Select the **Upload** button when you are ready to upload the picture.

Save the record when complete.

## Lesson Summary

- You should now be able to:
  - Explain the Sunflower System's forms (windows)
  - Define key terms
  - Use the toolbar and shortcut keys
  - Describe Sunflower's Location relationships
  - Explain user defined and complex fields
  - Describe the Sunflowers System's Catalog
  - Explain how to manage errors
  - Explain how to conduct wildcard searches
  - Insert comments, pictures and attachments

## Chapter 3: Acquisition and Asset Creation

Sunflower Assets 4.5

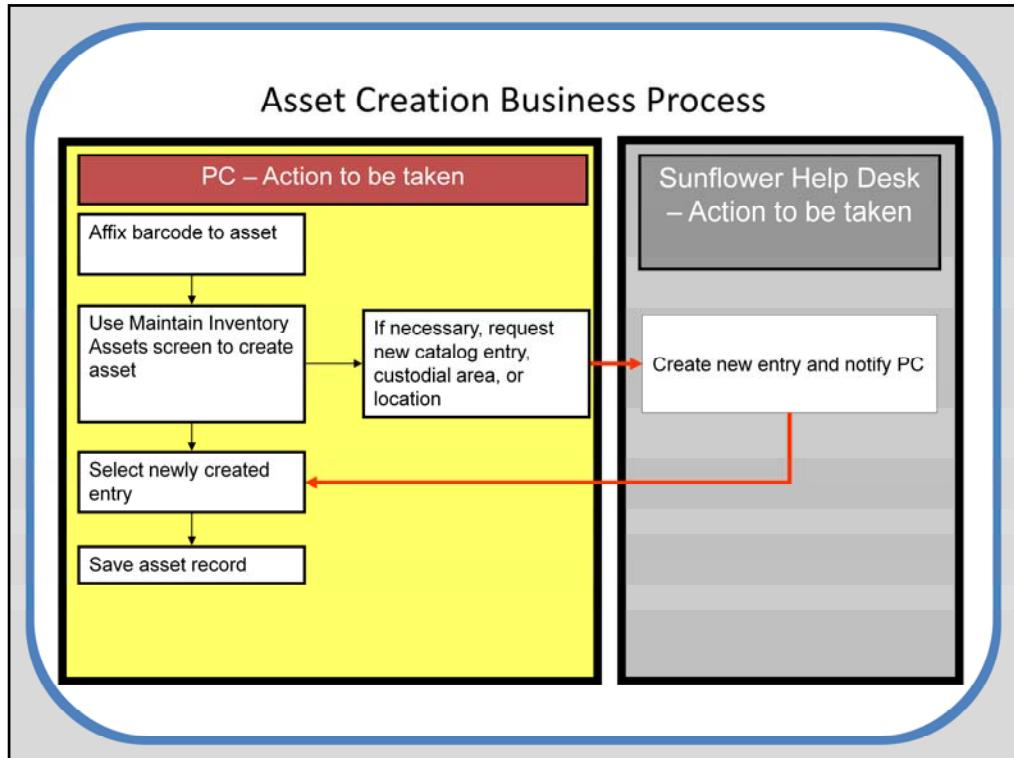

## Lesson Objectives

- After this lesson you should be able to:
  - Recognize the types of asset creation a PC can do
  - Summarize the steps used to add an asset
  - Add an asset
  - Add assets using the ‘duplicate’ feature
  - Run the Hand Receipt Report
  - Search for assets using Serial Number
  - Query assets for common cost
  - Create a commodity asset

## Asset Creation Initial Events

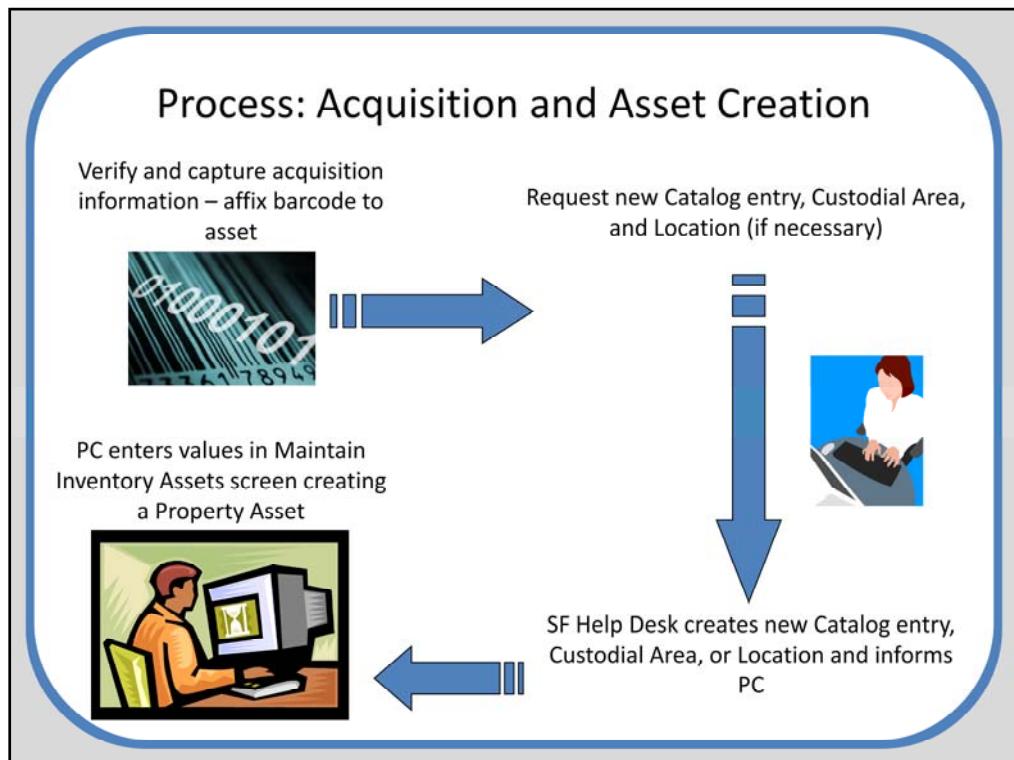

- Purchase Order
- Purchase Card
- Gift to Manager
- Found with Barcode
- Grant to Bureau
- Constructed
- Capital Lease
- Operating Lease
- Transfer in – from another Federal Agency
- Loan to Bureau
- Found – without Barcode
- NOAA Receive Excess Asset
- Acquired by Contractor

The Initial Events describe the circumstances of how the property item was acquired by DOC.

Users receiving assets, must notify the PC so that the PC may collect the supporting documentation. The PC will affix a barcode to the asset (if barcodes are needed, request one from the PAO).

Creating an asset in Sunflower involves documenting all the asset's details: barcode number, manufacturer, model number, serial number, initial event, asset value, bureau or region, custodial area, and location.

It may be necessary to search the Sunflower System using the Serial Number to determine if the property record is already in the system – if so, the asset should be reinstated, not created. To determine the approximate cost of an item, search other similar assets using the Manufacturer and Model Number combination. Both of these actions are described in the NAV documents later in this chapter.

The **Maintain Inventory Assets** screen is used to create assets in Sunflower. This is a very **Tab** sensitive screen, so as much as you can, tab through the screen to enter your information.

**Area 1** Barcode and identify the property item here. The **Model** you select will be driven by the **Manufacturer** you select. Once these have been selected, the **Catalog Identifier** and **Official Name** will autofill.

**Remember:** The **Manufacturer**, **Model**, **Official Name**, and **Model Name** are all catalog driven. If the values you need are not in the LOVs, contact the Sunflower Help Desk to add the information to the system. Once the Sunflower Help Desk has input the new information, you should be notified as such.

**Area 2** Identify how and when the property item was acquired, as well as the cost and condition of the property item.

- **Initial Event:** How the property was acquired. Examples are Purchase Card, Purchase Order, Contract, etc. The **User Fields\*** are “complex” fields (remember to double click), and are driven by the **Initial Event** selected. For example, if an asset has an Initial Event of **Gift to Manager**, the **User Fields\*** would include the **Name of the Donor, Address of the Donor, Name of the Employee, Title of the Employee and Purpose**.
- **Acquisition Date:** The date the asset was received by DOC. If this date is not known (as may be the case with assets found during inventory), use the default date of the date the asset was entered into the Sunflower System.
- **Asset Value:** This field is “complex”, so remember to double click to open up the fields for data entry. The related User Fields\* for Asset Value are required for Capital Assets.
- **Asset Condition:** May be changed as needed.
- **Utilization Code:** This will default to **IN SERVICE** – do not change.
- **Flags:** Double-click to expand this field. There is a list of asset flags that can be marked either “Y” or “N.” All default to “N.” Only change those that apply to “Y.”
- **Activity Type:** Select the appropriate activity type from the list of values. In most cases, an asset is agency owned.

**Maintain Inventory Assets (3)**

The screenshot shows the 'Inventory Assets' form with various fields for asset entry. The highlighted section contains the following data:

Bureau or Region	OS	Property Accountability Office	STOASA
Cust Area	510AOA1TB	Accepted?	<input checked="" type="checkbox"/>
Contact ID	User	Last Name*	
Location*	WASHINGTON, DC__BUILDING__HCHB__ROOM__1311		
Document*			
User Fields*			
Global User Fields*			

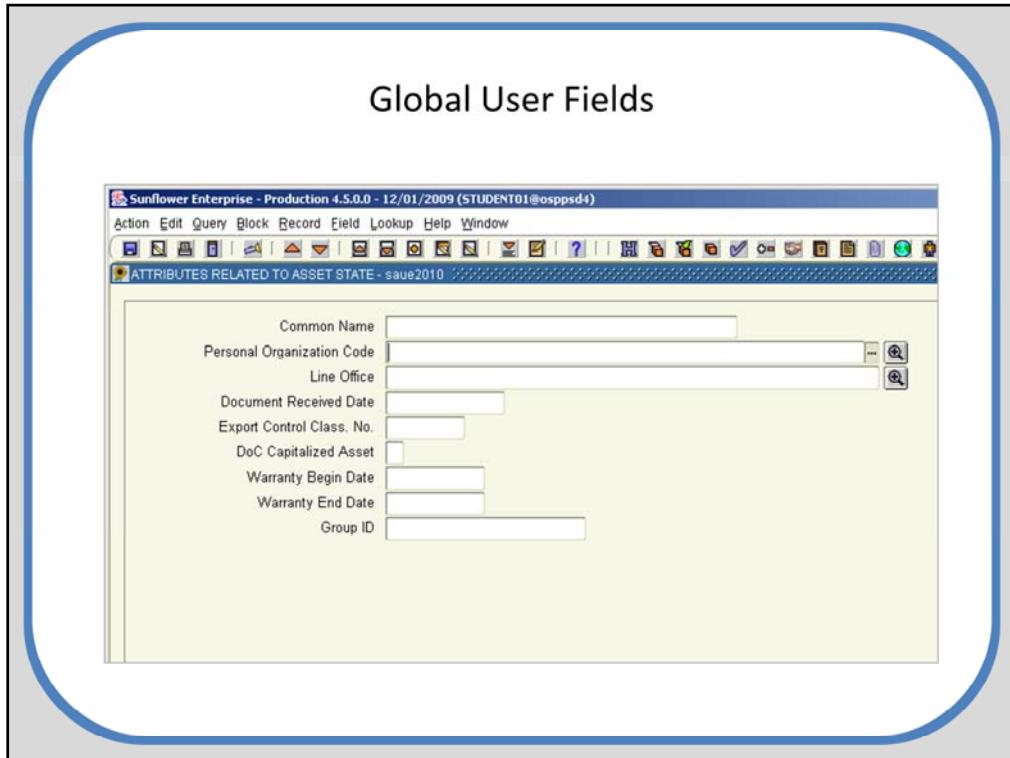

Below the table are buttons for 'Page 2', 'Commodity', 'Comment / Picture / Attachment', and 'Re-Request'.

**Area 3** Identify the Bureau or Region, PAO, Custodial Area (PC will populate automatically based on Custodial Area selected) responsible for the property, as well as the user and the location of the property item in this area.

Remember: The **Location\*** field is a “complex” field, as identified by the asterisk. This means you need to open that field to enter the location information.

The **User** field is not currently required, but it is highly recommended that you enter an asset User.

To enter additional information about the asset, double click on the Global User fields

The Global User fields are optional, but can be used to record additional information about the asset.

For example, the Warranty Begin and End Date fields allow you to capture important information around the warranty for the asset.

NAV: Create an Asset

See Appendix for Job Aid – Quick Step Asset Creation

# Asset Creation

Inventory Clerk

M > Mgmt > Maintain Inventory Assets

Maintain Inventory Assets

The screenshot shows the 'Maintain Inventory Assets' screen in asmn2010. The interface is a standard Windows application with a toolbar at the top and a menu bar. The main area is titled 'Inventory Assets'. It contains numerous input fields for asset information, such as 'Barcode #', 'Default Location\*', 'Catalog Identifier\*', 'Manufacturer', 'Description', 'Serial Number', 'Initial Event', 'Asset Value\*', 'Asset Condition', 'Utilization Code', 'Bureau or Region', 'Cust Area', 'Contact ID', 'User', 'Location\*', 'Document', 'User Fields\*', and 'Global User Fields\*'. There are also several checkboxes and dropdowns, including 'Commodity Asset', 'Existing interest asset', 'Type', 'Barcode #', 'Released?', 'Parents', 'Children', 'C/P/A', 'Model Number', 'Model Name', 'Drawing No.', 'User Fields\*', 'Flags\*', 'Activity Type', 'Property Accountability Office', 'Accepted?', 'Property Custodian', 'First', 'Mid', 'Last Name\*', and 'Last Name\*\*'. At the bottom of the screen, there are buttons for 'Page 2', 'Commodity', 'Comment / Picture / Attachment', and 'Re-Request'. A status bar at the bottom indicates 'The tracking identifier assigned to the interest asset' and 'Record: 1/1'.

1. Enter the mandatory property information in the fields below, and **Tab** through the screen as you go.

Field	Description
<b>Barcode #</b>	Enter the new <b>Barcode Number</b> for the asset.
<b>Manufacturer</b>	Enter the name of the manufacturer of the asset. If a list of values appears, select the applicable standard manufacturer name from the list.
<b>Model Number</b>	Enter the model number for the asset. If a list of values appears on the screen, select the applicable standard model number from the screen. Once you <b>Tab</b> , the <b>Catalog Number</b> and <b>Official Name</b> fields will automatically populate (based on the Manufacturer and Model Number combination.)
<b>Serial Number</b>	Enter the serial number of the asset, if known. Otherwise <b>leave it blank</b> .

2. Complete the information on the source of the asset for the following fields:

<b>Field</b>	<b>Description</b>
<b>Initial Event</b>	Select the appropriate value about how the property was acquired from the LOV.
<b>User Fields*</b>	Enter additional information about the asset the <b>User Fields*</b> and <b>Save</b> . <b>Note:</b> These <b>User Fields*</b> will be driven by the <b>Initial Event</b> selection.
<b>Asset Value*</b>	Enter the acquisition value for the asset and <b>Save</b> . For capital assets be sure to complete the associated user fields: Bureau, FY, Fund Code, Organization, Program, Project, Task, Object Class Code, User Code, Adjust Depreciation From
<b>Acquisition Date</b>	Enter the date the item was received by DOC. If date is not known (as in the case of Found During Inventory, for example), Sunflower requires you to use the date the item was entered in Sunflower.
<b>Responsibility Date</b>	Enter the date the item was received by NIH. The date defaults to the same date as asset creation in Sunflower, however this date can be modified.
<b>Asset Condition</b>	Change if necessary.
<b>Effective Date</b>	The date defaults to the date a particular transaction occurred. For example, if the item was transferred to another PC or retired, the <b>Effective Date</b> will automatically change.

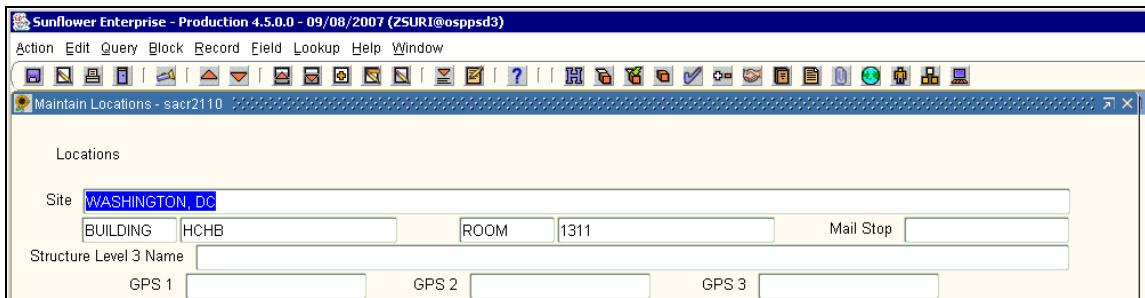

3. Complete the information to identify location and user information or select an option from the LOV for the following fields:

<b>Field</b>	<b>Description</b>
<b>Utilization Code</b>	Will autofill to <b>IN SERVICE</b> . Do not change.
<b>Flags</b>	Use the lookup to change the value, if necessary.
<b>Activity Type</b>	Select from a list of values. Typically assets are <b>Agency Owned</b> .
<b>Bureau or Region</b>	Identifies which Bureau or Region to which the asset is assigned.
<b>Property Accountability Office</b>	Will identify the PAO for the bureau or region selected.
<b>Custodial Area</b>	Enter your custodial area. This selection will automatically populate the <b>Prop Custodian</b> field.
<b>Contact ID</b>	Identifies the secondary Property Custodian for the asset. Select the <b>Last Name</b> from the list of values and then select a <b>First</b> name from the LOV. This will automatically populate the Secondary Custodian's ID in the <b>Contact ID</b> .

<b>User</b>	Select the <b>Last Name</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically populate the User's badge number in the <b>User</b> field.
<b>Location</b>	Select the <b>Location</b> of the asset by double clicking into the field.
– <b>Site</b>	Enter or select using the LOV.
– <b>Building</b>	Enter or select using the LOV.
– <b>Room</b>	Enter or select using the LOV.

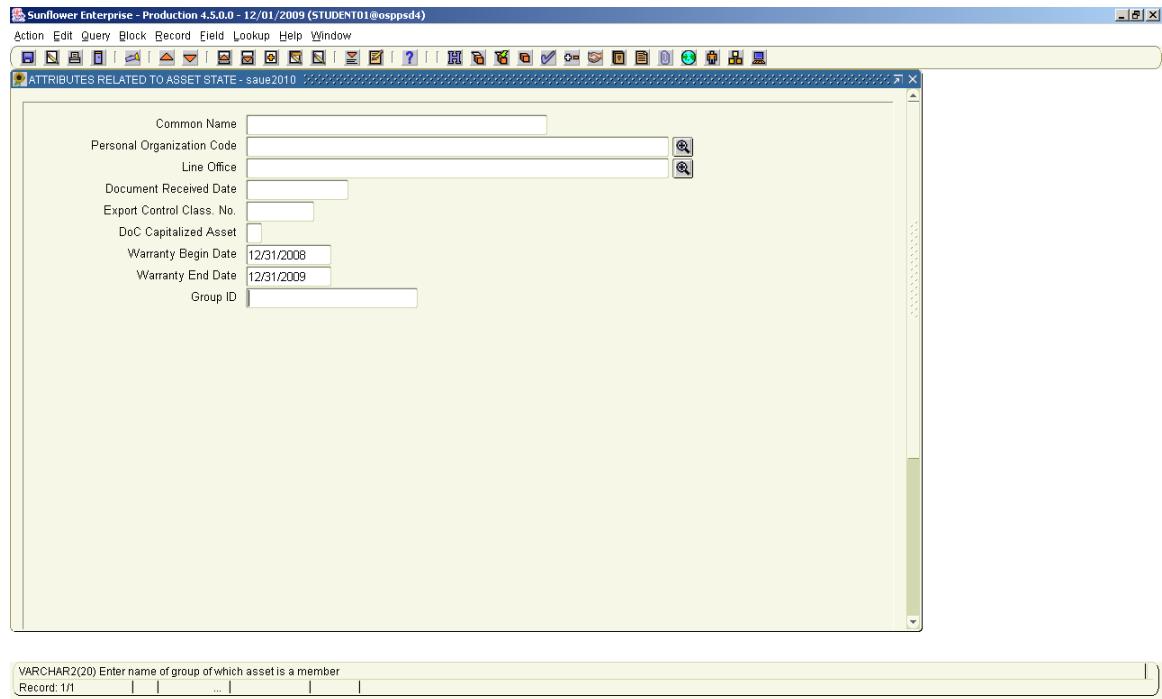

4. Select the **Location\*** field to enter the location information.

**Result:** The **Maintain Locations** window opens:

5. Enter or select **Site** from the LOV.
6. Enter or select from the LOV a **Building** name and **Room** number in the requisite fields. Optionally enter **Mail Stop**.
7. Select the **Save** button from the toolbar to save the **Location** record.
8. Select the **Global User Field\*** to enter the necessary asset Warranty information.

Result: The **Global User Field** window opens:

9. If the asset is under warranty, enter both the **Warranty Begin Date** and the **Warranty End Date** in the correct format (MM/DD/YYYY), or selecting the LOV produces a calendar for populating the dates.
10. Select the **Save** button from the toolbar to save the **Global User Field** record.
11. Optionally, select the **Page 2** button at the bottom of the screen to view the catalog information associated with the manufacturer and model number for the asset.
12. Select the **Save** button from the toolbar to save the **Inventory Asset** record.

Result: The message field at the bottom of the screen will indicate the record is complete.

Example: Below is a complete **Maintain Inventory Assets** window:

## End of activity.

### Asset Creation

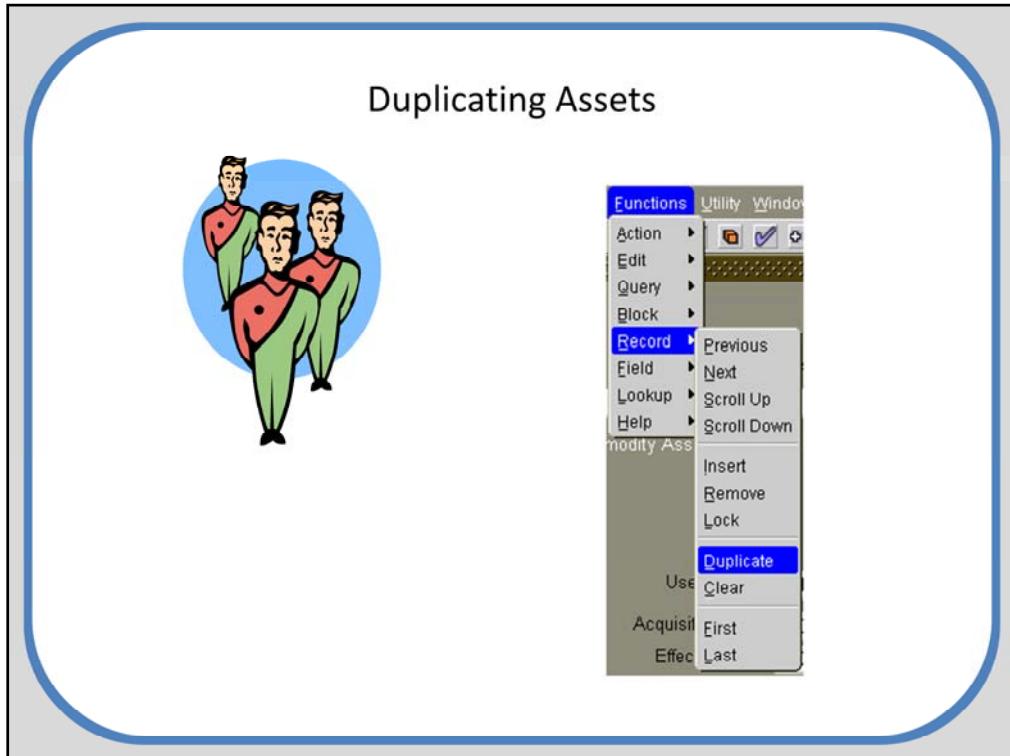

Sunflower Systems © 2009 All Rights Reserved  
 SF 4.5

Create the following asset in Sunflower:

- Dell Laptop: Inspiron 1150
- Model Number: PP08L
- Serial Number: unavailable
- Barcode Number = CD01MMDDYYXX (where MM/DD/YY=Month, Day, Year, and XX=Your student number)
- Assign the asset to ITA as the Bureau (55) and your assigned Custodial Area for class
- For Location, select your office location.
- The Dell laptop was purchased September 5, 2009 and cost \$1399.00

**Barcode #:** \_\_\_\_\_

Occasionally you may have to add several property items of the same type (e.g. 20 Dell Inspiron 1150 laptops). From the **Maintain Inventory Assets** screen, follow the menu path shown above and the instructions on the following pages to barcode duplicate assets.

NAV: Add Assets  
Using Duplication

# Manually Add Assets Using Duplication

## Purpose

Use when you must manually add several assets of the same type (e.g. 20 Dell Inspiron 3500 laptops).

Inventory Clerk/ Inventory Manager

M > Mgmt > Maintain Inventory Assets

Maintain Inventory Assets

The tracking identifier assigned to the interest asset  
Record: 1/1

1. Enter the mandatory property information in the fields below, and **Tab** through the screen as you go.

Field	Description
<b>Barcode #</b>	Enter the new <b>Barcode Number</b> for the asset.
<b>Manufacturer</b>	Enter the name of the manufacturer of the asset. If a list of values appears, select the applicable standard manufacturer name from the list.
<b>Model Number</b>	Enter the model number for the asset. If a list of values appears on the screen, select the applicable standard model number from the screen. Once you <b>Tab</b> , the <b>Catalog Number</b> and <b>Official</b>

	<b>Name</b> fields will automatically populate (based on the Manufacturer and Model Number combination.)
<b>Serial Number</b>	Enter the serial number of the asset, if known. Otherwise <b>leave it blank.</b>

2. Complete the information on the source of the asset for the following fields:

Field	Description
<b>Initial Event</b>	Select the appropriate value about how the property was acquired from the LOV.
<b>User Fields*</b>	Enter additional information about the asset the <b>User Fields*</b> and <b>Save</b> . Note: These <b>User Fields*</b> will be driven by the <b>Initial Event</b> selection.
<b>Asset Value*</b>	Enter the acquisition value for the asset and <b>Save</b> . For capital assets be sure to complete the associated user fields: Bureau, FY, Fund Code, Organization, Program, Project, Task, Object Class Code, User Code, and Adjust Depreciation From.
<b>Acquisition Date</b>	Enter the date the item was received by DOC. If date is not known (as in the case of Found During Inventory, for example), Sunflower requires you to use the date the item was entered in Sunflower.
<b>Responsibility Date</b>	Enter the date the item was received by NIH. The date defaults to the same date as asset creation in Sunflower, however this date can be modified.
<b>Asset Condition</b>	Change if necessary.
<b>Effective Date</b>	The date defaults to the date a particular transaction occurred. For example, if the item was transferred to another PC or retired, the <b>Effective Date</b> will automatically change.

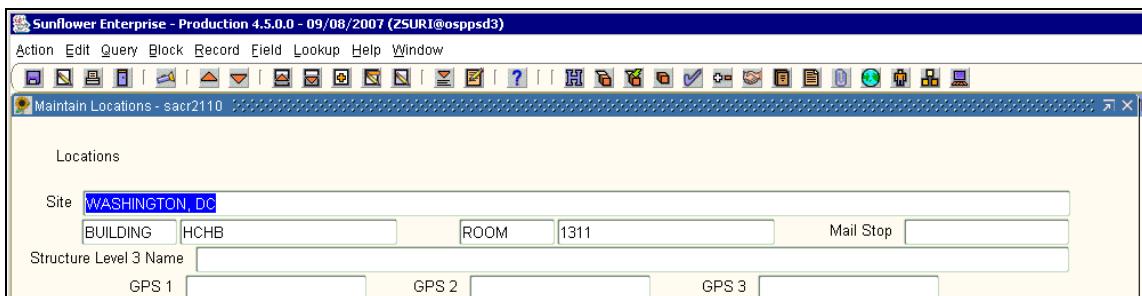

3. Complete the information to identify location and user information or select an option from the LOV for the following fields:

Field	Description
<b>Utilization Code</b>	Will autofill to <b>IN SERVICE</b> . Do not change.
<b>Flags</b>	Use the lookup to change the value, if necessary.
<b>Activity Type</b>	Select from a list of values. Typically assets are <b>Agency Owned</b> .
<b>Bureau or Region</b>	Identifies which Bureau or Region to which the asset is assigned.
<b>Property Accountability Office</b>	Will identify the PAO for the bureau or region selected.
<b>Custodial Area</b>	Enter your custodial area. This selection will automatically

	populate the <b>Prop Custodian</b> field.
<b>Contact ID</b>	Identifies the secondary Property Custodian for the asset. Select the <b>Last Name</b> from the list of values and then select a <b>First</b> name from the LOV. This will automatically populate the Secondary Custodian's ID in the <b>Contact ID</b> .
<b>User</b>	Select the <b>Last Name</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically populate the User's badge number in the <b>User</b> field.
<b>Location</b>	Select the <b>Location</b> of the asset by double clicking into the field.
1. <b>Site</b>	Enter or select using the LOV.
2. <b>Building</b>	Enter or select using the LOV.
3. <b>Room</b>	Enter or select using the LOV.

4. Select the **Location\*** field to enter the location information.

Result: The **Maintain Locations** window opens:

5. Enter or select **Site** from the LOV.
6. Enter or select from the LOV a **Building** name and **Room** number in the requisite fields. Optionally enter **Mail Stop**.
7. Select the **Save** button from the toolbar to save the **Location** record.
8. Optionally, select the **Page 2** button at the bottom of the screen to view the catalog information associated with the manufacturer and model number for the asset.
9. Select the **Save** button from the toolbar to save the **Inventory Asset** record.

Result: The message field at the bottom of the screen will indicate the record is complete.

<b>STATEMENT OF RESPONSIBILITY:</b> I, RICARDO SCOTT ENGINERES, hereby certify that I accept responsibility for all items of accountable personal property within my designated area. I understand that as the current user of government personal property, I am responsible for the proper use, care, and safekeeping of all personal property under my possession, custody, and control. I understand that personal property used by government employees must only be for Government purposes, and not for personal or private use. I understand that I must account by Property Control before any changes are initiated such as: transfer to another user, excess property, or disposal. I understand that I must return Government property to its original location or to another Government employee if property is lost, missing, damaged, destroyed, and/or stolen under my possession, custody, and/or control. I understand it is my responsibility to notify my supervisor or Property Control if I am leaving the Government service and/or upon my transfer or separation from the Government. I understand it is my responsibility to notify my supervisor or Property Control if I am returning Government property from a Federal building, or receive a property pass. Upon doing so, I officially release these responsibilities and all other responsibilities outlined in the Government's Personal Property Management Manual until formally relieved.							
CUSTODIAL AREA: RICARDO CURRENT USER: RICARDO SCOTT ENGINERES SIGNATURE _____ DATE _____ PROPERTY CUSTODIAN: FRANCIS-VERONICA APRIL CYRAN SIGNATURE _____ DATE _____							

The hand receipt is the complete inventory listing of items within one designated custodial area, and it is used to ensure accountability through a chain of custody.

- The chain of custody provides records that illustrate the location of accountable property and the individuals responsible for its care and safekeeping.
- This accounting must be continuous, from the time of ordering and acquisition, until the ultimate consumption or disposal of the property.
- The PMO physically signs the equipment down to one or more Property Accountability Officers (PAOs) on what is known as a hand receipt. PAOs then distribute this property down to the different custodial areas to Property Custodians (PCs) on hand receipts. PCs then finalize this process by hand receipting this equipment down to the end user (the person who actually uses the piece of equipment).

## NAV: Run the Hand Receipt Report

This NAV “Run the Hand Receipt Report” shows the step-by-step instructions for running the Hand Receipt Report.

This report should be run whenever custody for an asset is established. Both the user and the PC should sign the Hand Receipt to acknowledge the responsibilities associated with custody of the asset.

## But What if...?

- Question:  
What if I enter an asset and receive a message that states an asset with that Serial Number for the Manufacturer and Model Number already exists?
  - Answer:  
*Query Asset Using Serial Number*
- Question:  
What if I don't have any acquisition information for an asset?
  - Answer:  
*Query Item to Find Common Cost*

**Query Asset Using Serial Number** is useful for determining if another asset exists in Sunflower with the same **Manufacturer + Model Name + Serial Number** combination. Sunflower will not allow a duplicate combination of these three fields to exist. If an error is received indicating another asset already contains those values, a PC may use the steps in the NAV “*Query Asset Using Serial Number*” to identify which asset it is and determine if it is the same asset or a different asset. An example of a time this might happen is when conducting the Review Campaign and the PC finds an asset and then tries to add it to Sunflower.

**Query Item to Find Common Cost** is an option to help determine an asset's value. For example, during the Review Campaign, the PC may find assets that have not been entered into Sunflower. The PC should then barcode these *Found During Inventory* assets and add them to Sunflower. If the acquisition documentation is not available, the PC may use the steps in the NAV “*Query Item to Find Common Cost*” to help determine cost.

## NAV: Query Asset Using Serial Number

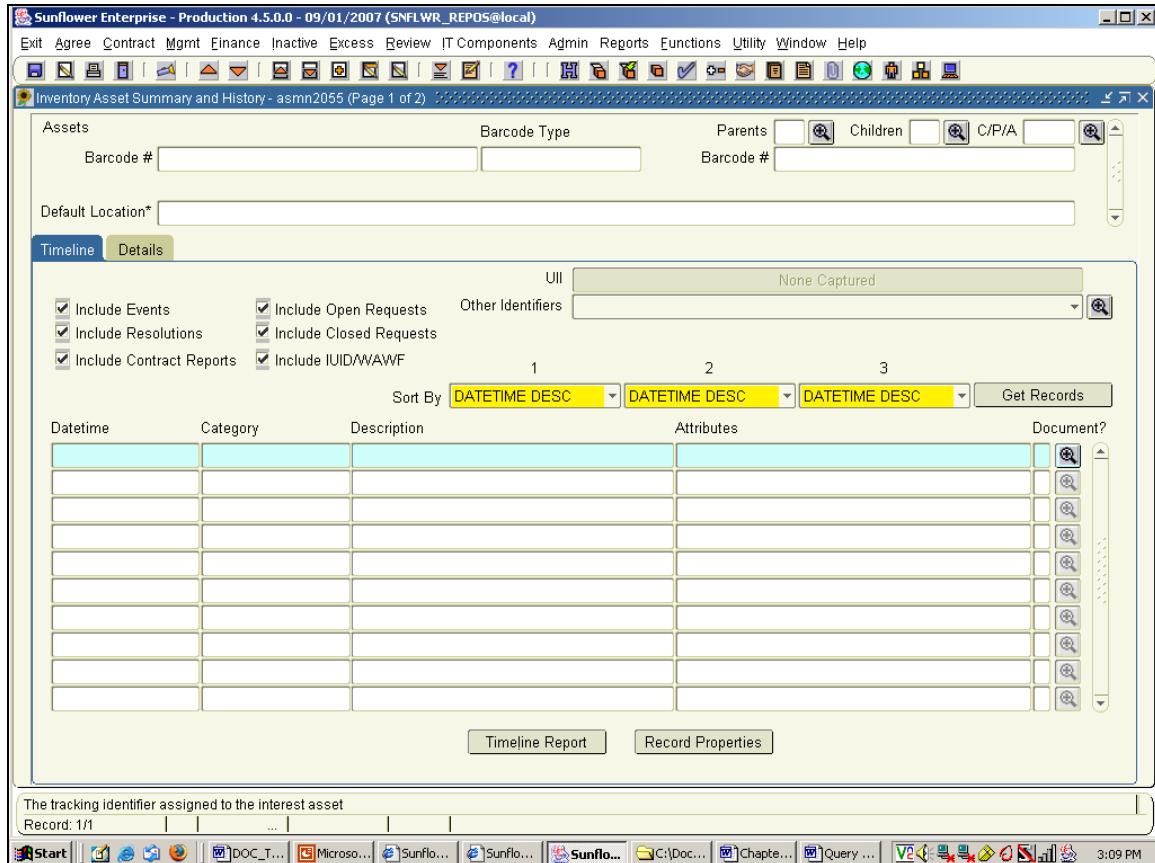

This NAV “*Query Asset Using Serial Number*” is useful for determining if another asset exists in Sunflower with the same **Manufacturer + Model Name + Serial Number** combination. Sunflower will not allow a duplicate combination of these three fields to exist. If an error is received indicating another asset already contains those values, a PC may search to identify which asset it is and determine if it is the same asset or a different asset. An example of when this might happen is when conducting the Review Campaign and the PC “finds” an asset and then tries to add it to Sunflower.

# Query Asset Using Serial Number

Inventory Clerk/ Inventory Manager

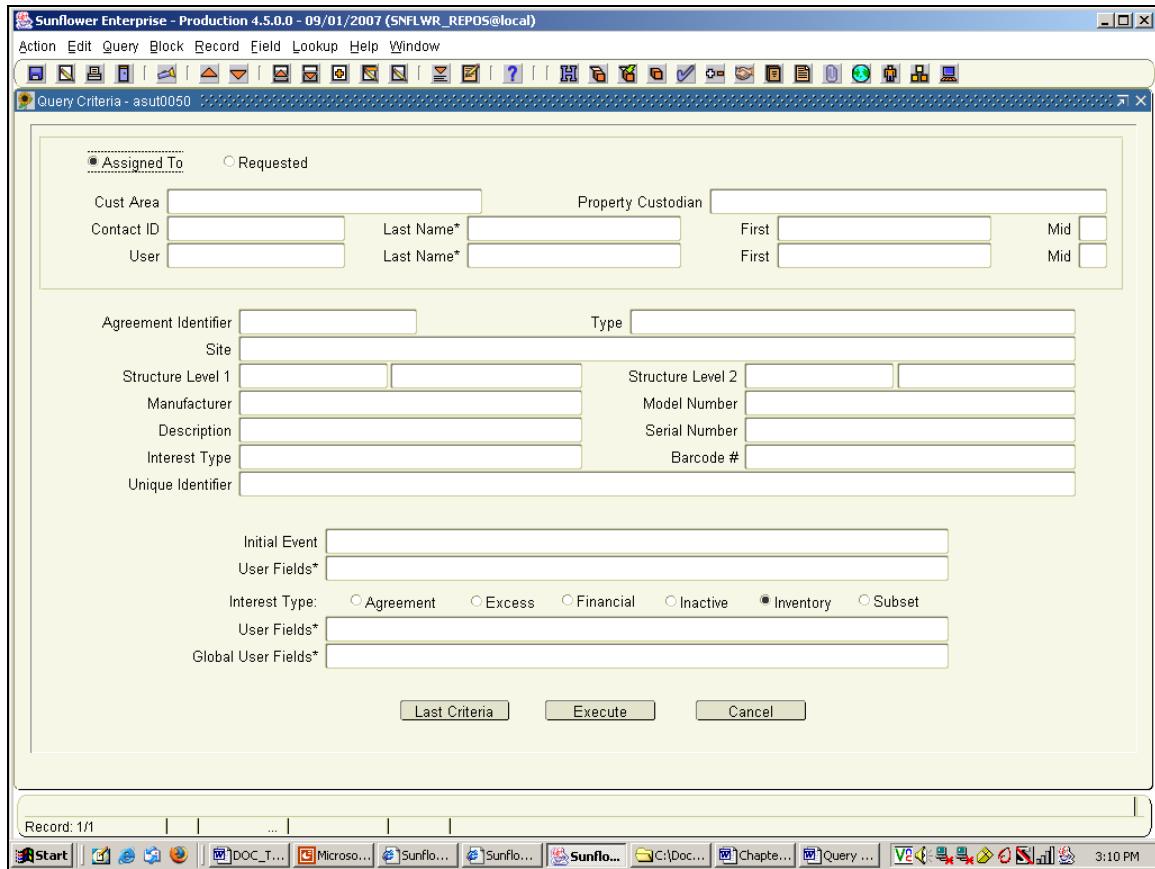

M > Mgmt > Inventory Asset Summary and History

Inventory Asset Summary and History

1. Select the **Find** button from the toolbar to bring up the **Query Criteria** screen.

Result: The **Query Criteria** window displays.

2. Enter the serial number of the asset in the **Serial Number** field.
3. Select the **Find** button from the toolbar once more.

**Result:** The asset information is populated to the **Inventory Asset and Summary History** screen and displays the timeline of the asset history.

## NAV: Query Item to Find Common Cost

During the Review Campaign, the PC may find assets that have not been entered into Sunflower. The PC should then barcode these *Found During Inventory* assets and add them to Sunflower. If the acquisition documentation is not available, the PC may use the steps in this NAV “*Query Item to Find Common Cost*” to help determine an asset’s value.

## Query Item to Find Common Cost

Inventory Clerk/ Inventory Manager

M > Mgmt > Asset Search

Asset Search

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/12/2007 (ZSUR1@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. The toolbar below the menu bar contains various icons for file operations like Open, Save, Print, and Database. The main window is titled "Asset Search - asmn2130". It has a "Search Criteria" section with fields for Manufacturer, Model Number, Description, Model Name, Serial Number, Fed. Supply Group, Asset Value, Minimum Acquisition Date, and FSC. Below these are several checkboxes: Agreement Assets, Excess Assets, Financial Assets, Inactive Assets, Inventory Assets, and Subset Assets. A large table titled "Assets" lists columns for Barcode #, Manufacturer, Model Number, and Description. At the bottom of the table is a "Report" button.

1. Enter at least one field on which to query assets. Use the **LOV** button to look up valid values.

Note: When searching for costs of assets of the same type, search on **Manufacturer** and **Model Number**.

2. Select the **Inventory Assets** checkbox to search all assets currently in DOC inventory.
3. Select the **Report** button at the bottom to view the assets in a report format with property record details, including costs.

Result: The Asset Search report fields displays.

## End of activity.

The **Maintain Inventory Assets** screen is also used to create commodity assets in Sunflower. This is a very **Tab** sensitive screen, so as much as you can, tab through the screen to enter your information.

**Area 1** Enter a . (period) in the **Barcode #** field and **Tab**, and the system will automatically generate a barcode number. Check the **Commodity Asset** checkbox next to the **Catalog Identifier** field.

Complete the rest of the record as you would for an accountable property asset. Note the Asset Value field is NOT complex for a Commodity Asset

**Area 2** Click on the **Commodity** button at the bottom of the form.

Complete the Commodity details and select the **OK** button when you are finished.

Select the **Save** button to save the commodity record.

NAV: Create a  
Commodity Asset

# Commodity Asset Creation

Inventory Clerk

M > Mgmt > Maintain Inventory Assets

Maintain Inventory Assets

The screenshot shows the 'Maintain Inventory Assets' window with the title 'Inventory Assets'. The window has a toolbar at the top with various icons. The main area contains several input fields and checkboxes. Key fields include:

- Barcode # (highlighted in yellow)
- Type (checkboxes: Existing interest asset, Released?)
- Default Location\*
- Catalog Identifier\* (checkbox: Commodity Asset)
- Manufacturer
- Description
- Serial Number
- Initial Event
- Asset Value\*
- Asset Condition
- Utilization Code
- Bureau or Region
- Cust Area
- Contact ID
- User
- Last Name\*
- Flags\*
- User Fields\*
- Acquisition Date
- Effective Date
- Responsibility Date (highlighted in yellow)
- Expected Return Date
- Activity Type
- Property Accountability Office
- Accepted? (checkbox)
- Property Custodian
- First
- Mid
- Location\*
- Document\*
- User Fields\*
- Global User Fields\*

At the bottom of the form, there are buttons for 'Page 2', 'Cgmodity', 'Comment / Picture / Attachment', and 'Re-Request'. A status bar at the bottom left says 'The tracking identifier assigned to the interest asset' and 'Record: 1/1'.

1. Enter a . (period) in the **Barcode #** field and **Tab**.

**Result** – The system will automatically generate a barcode number.

Add Information   Commodity   Comment / Picture / Attachment   Re-Request

The document supporting this action  
Record: 1/1

2. Check the **Commodity Asset** checkbox next to the **Catalog Identifier** field.
3. Enter the mandatory property information in the fields below, and **Tab** through the screen as you go.

Field	Description
<b>Manufacturer</b>	Enter <b>NON-BARCODED</b> as the Manufacturer.
<b>Model Number</b>	Enter the model number for the asset. (Can be furniture, monitors, typewriters, etc.) Once you <b>Tab</b> , the <b>Catalog Number</b> and <b>Description</b> fields will automatically populate (based on the Manufacturer and Model Number combination.)
<b>Serial Number</b>	Enter the serial number of the asset, if known. Otherwise <b>leave it blank</b> .

4. Complete the information on the source of the asset for the following fields:

Field	Description
<b>Initial Event</b>	Select the appropriate value about how the property was acquired from the LOV.
<b>User Fields*</b>	Enter additional information about the asset the <b>User Fields*</b> and <b>Save</b> . <u>Note:</u> These <b>User Fields*</b> will be driven by the <b>Initial Event</b> selection.

<b>Asset Value</b>	Enter the acquisition value for the asset. <u>Note:</u> For Commodity Assets, the Asset Value field is <b>not</b> a complex field.
<b>Acquisition Date</b>	Enter the date the item was received by DOC. If date is not known (as in the case of Found During Inventory, for example), Sunflower requires you to use the date the item was entered in Sunflower.
<b>Responsibility Date</b>	Enter the date the item was received by DOC. The date defaults to the same date as asset creation in Sunflower, however this date can be modified.
<b>Asset Condition</b>	Change if necessary.
<b>Effective Date</b>	The date defaults to the date a particular transaction occurred. For example, if the item was transferred to another PC or retired, the <b>Effective Date</b> will automatically change.

5. Complete the information to identify location and user information or select an option from the LOV for the following fields:

<b>Field</b>	<b>Description</b>
<b>Utilization Code</b>	Will autofill to <b>IN SERVICE</b> . Do not change.
<b>Flags</b>	Set the <b>Non Accountable</b> flag to <b>Y</b> .
<b>Activity Type</b>	Select from a list of values. Typically assets are <b>Agency Owned</b> .
<b>Bureau or Region</b>	Identifies which Bureau or Region to which the asset is assigned.
<b>Property Accountability Office</b>	Will identify the PAO for the bureau or region selected.
<b>Custodial Area</b>	Enter your custodial area. This selection will automatically populate the <b>Prop Custodian</b> field.
<b>Contact ID</b>	Identifies the secondary Property Custodian for the asset. Select the <b>Last Name</b> from the list of values and then select a <b>First</b> name from the LOV. This will automatically populate the Secondary Custodian's ID in the <b>Contact ID</b> .
<b>User</b>	Select the <b>Last Name</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically populate the User's badge number in the <b>User</b> field.
<b>Location</b>	Select the <b>Location</b> of the asset by double clicking into the field.
– <b>Site</b>	Enter or select using the LOV.
– <b>Building</b>	Enter or select using the LOV.
– <b>Room</b>	Enter or select using the LOV.

6. Select the **Location\*** field to enter the location information.

Result: The **Maintain Locations** window opens:

7. Enter or select **Site** from the LOV.
8. Enter or select from the LOV a **Building** name and **Room** number in the requisite fields. Optionally enter **Mail Stop**.
9. Select the **Save** button from the toolbar to save the **Location** record.
10. Select the **Commodity** button at the bottom of the screen.

**Result – The Commodity Information window opens:**

11. Enter the **Quantity** of the assets. (e.g. **12**).
12. Enter the **Unit of Measure** (e.g. **Box**).
13. Enter a **Long Description** (e.g. **Office Furniture**). If necessary, type over the default information (i.e. the Description of the asset).
14. Select the **Ok** button.

**Result:** You are returned to the **Maintain Inventory Assets** screen.

## Lesson Summary

- You should now be able to:
  - Recognize the types of asset creation a PC can do
  - Summarize the steps used to add an asset
  - Add an asset
  - Add assets using the ‘duplicate’ feature
  - Run the Hand Receipt Report
  - Search for assets using Serial Number
  - Query assets for common cost
  - Create a commodity asset

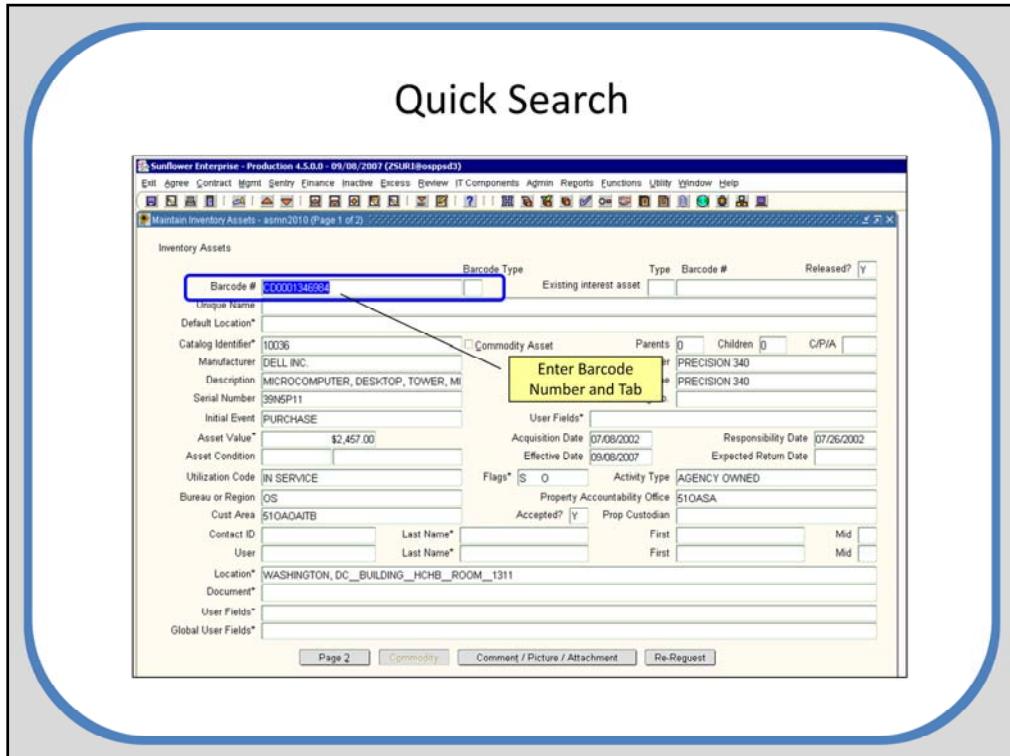

## Chapter 4: View Property Records

Sunflower Assets 4.5

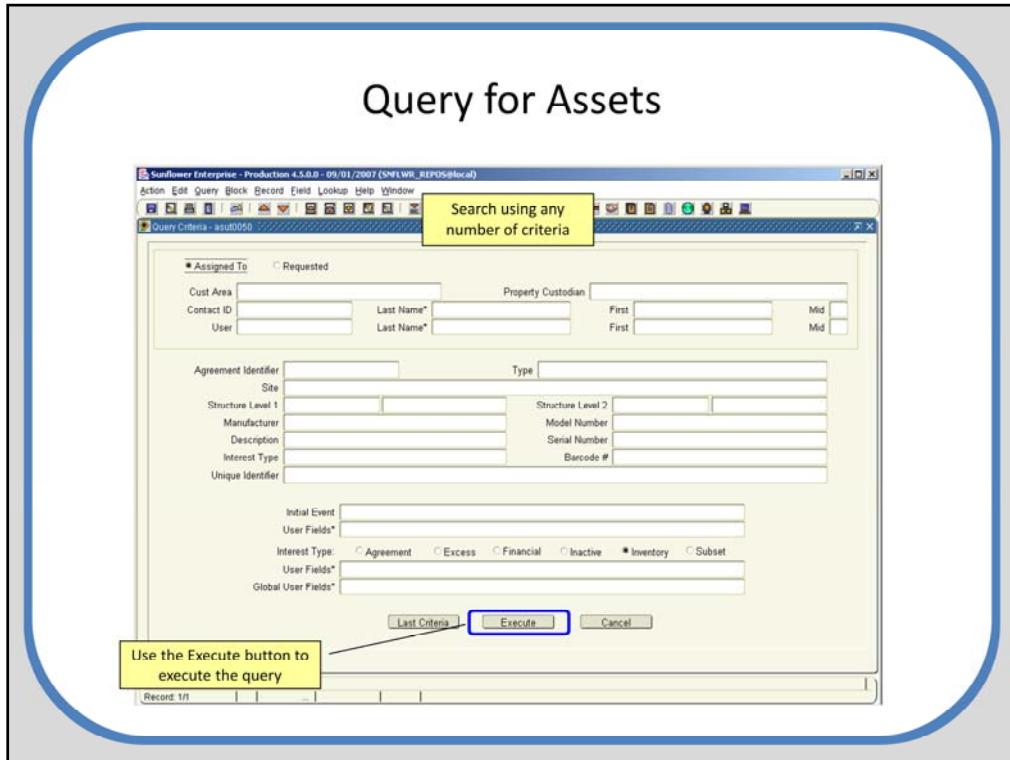

## Lesson Objectives

- After this lesson you should be able to:
  - Perform a quick search using the Maintain Inventory Assets screen
  - Perform a quick search using the Query Criteria screen
  - View the current status of a property record
  - View the timeline details of a property record
  - Perform a barcode number search to view the entire history of a property record
  - View the creator information of a property record
  - View the property record's Catalog information
  - Run reports listing the history of property records

Use the **Maintain Inventory Assets** screen to get a quick glance at all of your custodial area's assets.

You can perform a quick search by typing the Barcode Number and selecting the **Tab** key to see the remaining asset information. Also, using the **Find** button from this screen, you can query all of your custodial area's assets and scroll through them one by one (see next page for an example of this query).

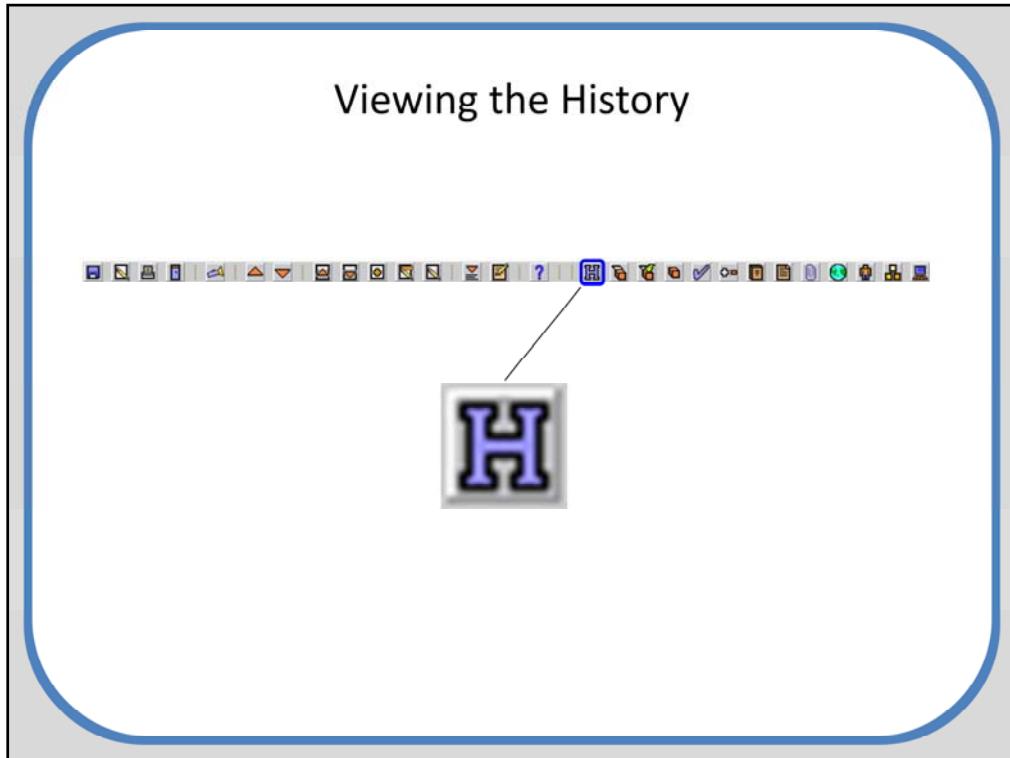

If you don't know a property record's Barcode Number, or if you want to view all of your custodial code's assets, from the **Maintain Inventory Assets** screen select the **Find** button from the toolbar.

Result: The **Query Criteria** window is displayed, as shown above.

Enter any criteria and select the **Execute** button to look up the property record.

Result: The **Maintain Inventory Assets** screen displays the record information (see previous page for example).

So, if you want to review all the assets for your custodial area, use this screen, then use the arrow keys on your keyboard to scroll through the assets.

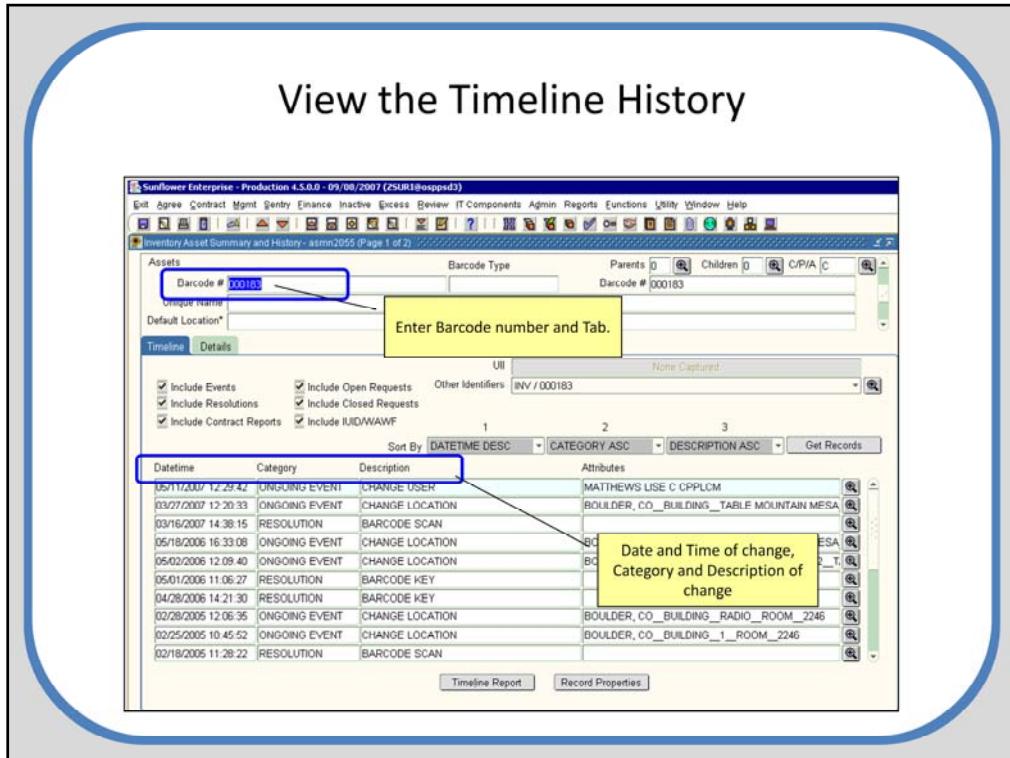

By viewing an asset's summary and history, you can determine:

- The current status of an asset
- The history of an asset
- The creator information of an asset (Name of creator, time of asset creation)
- An asset's Catalog information (Manufacturer, Model Number, Official Name, FSC, Object Class, Life Expectancy, Sensitive Flag)

An asset's history can be viewed in two ways:

- 1.From any screen in the NBS Property System with a Barcode Number by selecting the **Summary & History** button from the toolbar, as shown above; or
- 2.Using the **Inventory Asset Summary and History** screen, discussed on the next page.

**Important:** The **Inventory Asset Summary and History** screen discussed in this chapter of the student guide is a *view only* screen. Updates cannot be made through this screen.

Use the **Inventory Asset Summary and History** screen to perform a barcode number search on the current status of any custodial area's property records.

Enter the **Barcode Number** and select the **Tab** key. The timeline information will display.

In the above screen shot, note the columns showing the history of changes for the property record:

- Datetime – records the date and time the change/update was made
- Category – describes the type of change related to the asset lifecycle
- Description – brief description of change/update
- Attributes – the field and entry change/update
- Lookup – drill down to other associated forms identifying the change/update

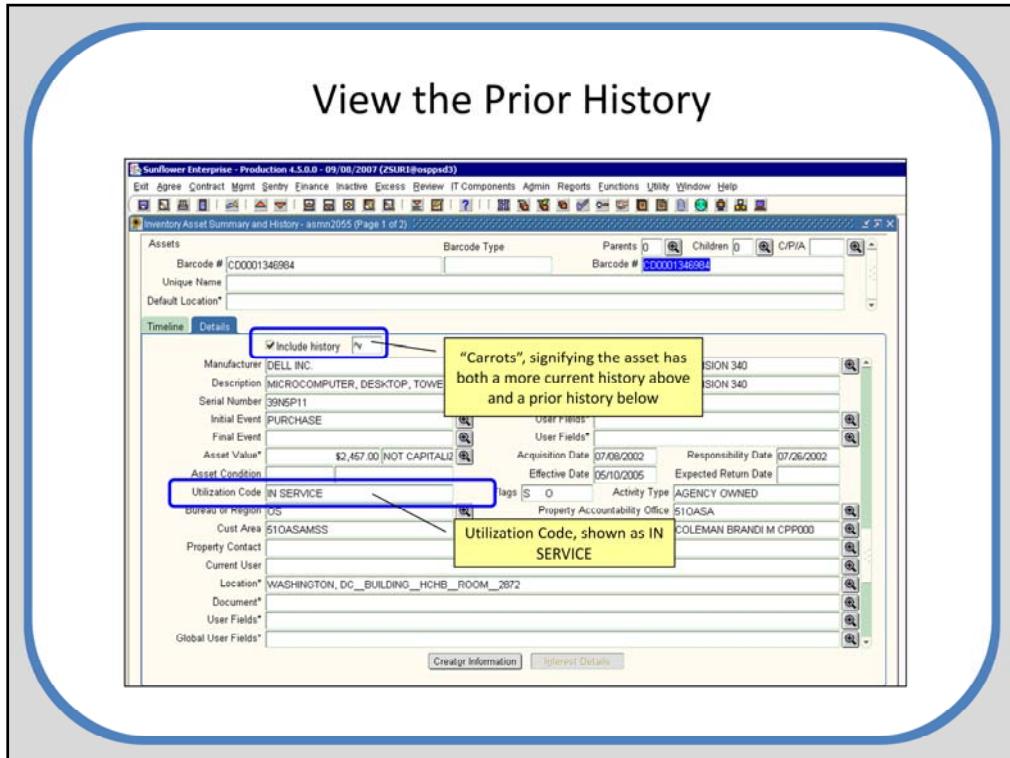

To view all details of the property record history, clear the form, then select the **Details** tab. Select the **Include History** checkbox. Enter the **Barcode Number** and tab. Notice the **Include History** display box is populated.

Also, the downwards pointing “carrot” signifies the asset has a prior history. Since the “carrot” only points down, that means we are looking at the most current information for this asset.

**Note 1:** Use the **arrow keys** on the keyboard, the **Next Record** button on the toolbar, or the **Vertical Scrollbar** to scroll and view the asset’s history.

**Note 2:** When scrolling through the history of the asset, the warning “At first record” means you have reached the most current history of the asset. Conversely, the warning “At last record” actually means you have reached the very first (i.e. the oldest) history of the asset.

**Note 3:** When switching between assets, a pop-up window warning appears reminding you that a different asset will appear.

In this example, note both the upwards pointing “carrot” and the downwards pointing “carrot”, which signifies the asset has both a more current history above and a prior history below.

Also, note the **Utilization Code**, which shows the asset as being **IN SERVICE**.

Note: The **Effective Date** will change based on when certain information on the property record is changed, for example Bureau, User, Location, and Custodial Area.

## View the Oldest History

Inventory Asset Summary and History - asmn2055 (Page 1 of 2)

Assets	Barcode Type	Parents <input type="button" value=""/>	<input type="button" value=""/>	Children <input type="button" value=""/>	<input type="button" value=""/>	C/P/A <input type="button" value=""/>	<input type="button" value=""/>
Barcode # <input type="text" value="CD0001346984"/>		Barcode # <input type="text" value="CD0001346984"/>					
Unique Name							
Default Location*							
<input checked="" type="radio"/> Timeline <input type="radio"/> Details		<div style="border: 1px solid black; padding: 5px;">           "Carrot", signifying the asset has a more current history above         </div>					
Manufacturer <input type="text" value="DELL INC."/>	Description <input type="text" value="MICROCOMPUTER, DESKTOP, TOWER, 39N5P11"/>	Serial Number <input type="text" value="39N5P11"/>	Model Number <input type="text" value="PRECISION 340"/>	Model Name <input type="text" value="PRECISION 340"/>	Drawing No. <input type="text" value=""/>	<input type="button" value=""/>	
Initial Event <input type="text" value="PURCHASE"/>	Final Event <input type="text" value=""/>	User Fields* <input type="text" value=""/>	User Fields* <input type="text" value=""/>	Acquisition Date <input type="text" value="07/08/2002"/>	Responsibility Date <input type="text" value="07/26/2002"/>	<input type="button" value=""/>	
Asset Value* <input type="text" value="\$2,557.00 NOT CAPITALIZ"/>	Asset Condition <input type="text" value="IN SERVICE"/>	Effective Date <input type="text" value="08/29/2002"/>	Expected Return Date <input type="text" value=""/>	<input type="button" value=""/>			
Utilization Code <input type="text" value="IN SERVICE"/>	Bureau or Region <input type="text" value="OS"/>	Flags <input type="radio"/> S <input type="radio"/> O	Activity Type <input type="text" value="AGENCY OWNED"/>	<input type="button" value=""/>			
Cust Area <input type="text" value="510AOALIB"/>	Property Contact <input type="text" value=""/>	Property Accountability Office <input type="text" value="510AOA"/>					
Current User <input type="text" value=""/>	Location <input type="text" value="WASHINGTON, DC BUILDING_HCHB"/>	Property Custodian <input type="text" value=""/>					
<b>Creator Information</b> <small>08/01/2002</small>		<div style="border: 1px solid black; padding: 5px;">           Utilizatin Code, shown as IN SERVICE         </div>					
Global User Fields* <input type="text" value=""/>		<input type="button" value="Creategr Information"/> <input type="button" value="Interest Details"/>					

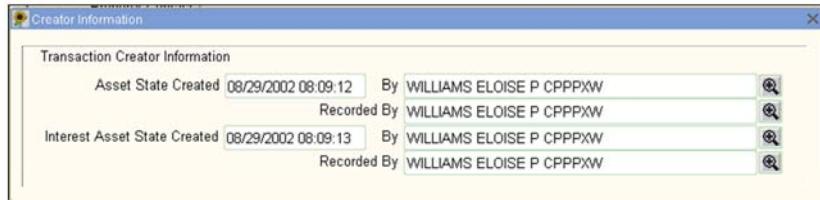

In this example, note the upwards pointing “carrot”, which signifies the asset has more current history above. Since the “carrot” only points up, that means we are looking at the oldest information for this asset.

Also, note the **Act Status/Type**, which shows the asset as being **IN SERVICE**.

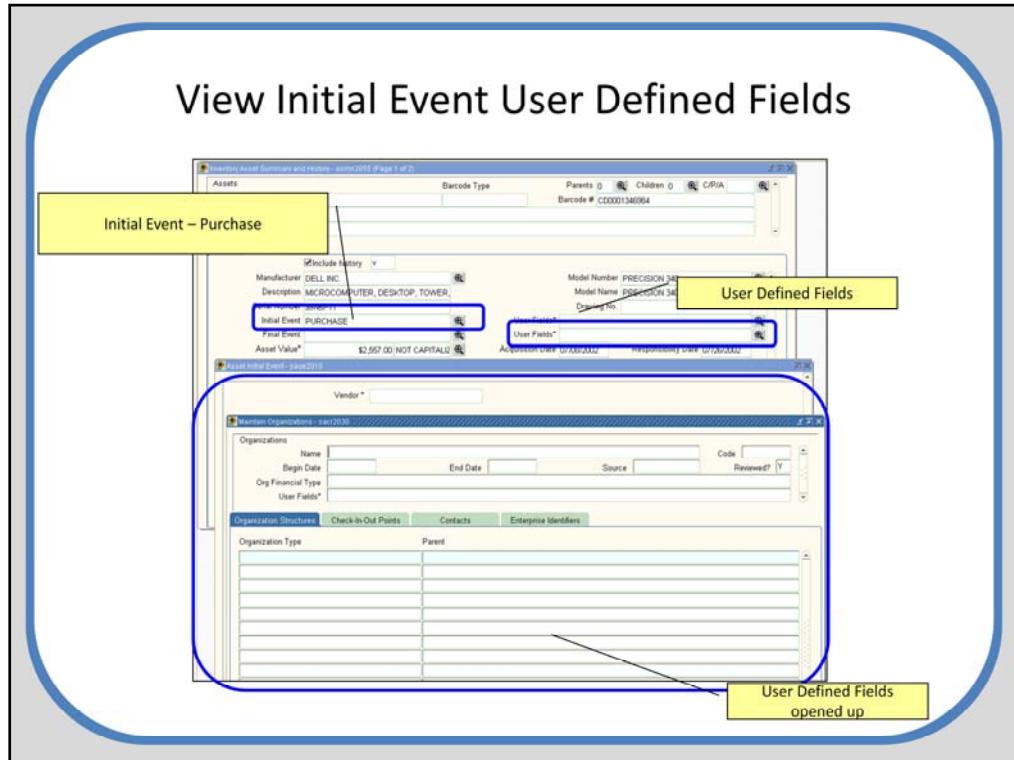

To read about viewing the **Creator Information**, see the next page.

Note: If an asset has, in the past, been retired and reinstated, the most recent history of the record will show the newest Initial Event but no Final Event (since it is currently an active asset). As you scroll back in the history, the record will show the previous Initial Events and Final Events.

## View the Creator Information

When you select the **Creator Information** button as shown on the previous page, you can view who created the record along with the date the record was created. You can also view who last updated the record.

To view more information about the purchase of an item, open the **User Fields\*** next to the **Initial Event**.

Above is an example of a capital asset with all the required fields completed.

## View the Details

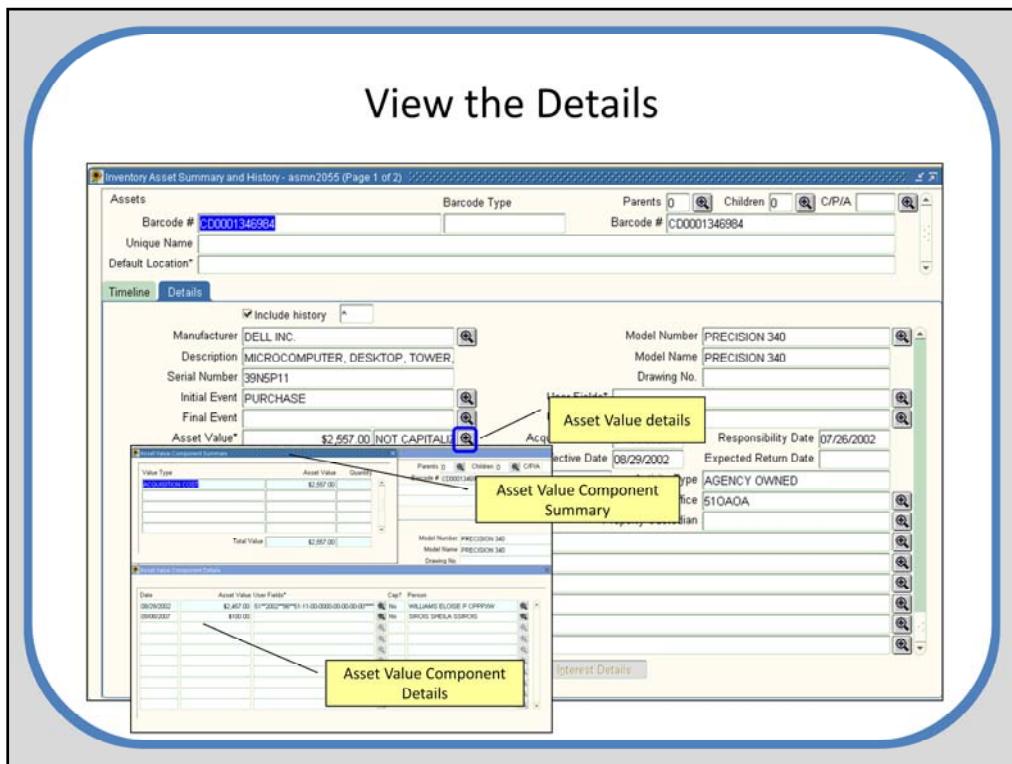

The screenshot shows two windows of a software application. The top window is titled 'Inventory Asset Summary and History - asmn2055 (Page 1 of 2)' and contains fields for Assets, Barcode Type, Parents, Children, and C/P/A. It displays manufacturer information (DELL INC.), a description (MICROCOMPUTER, DESKTOP, TOWER), a serial number (39N5P11), and initial and final events (PURCHASE and OWNED). The bottom window is titled 'Inventory Asset Summary and History - asmn2055 (Page 2 of 2)' and shows interest details, including a barcode (INV-C00001346984), agreement/subset, starting date (08/29/2002 08:09:13), and ending date. A yellow box highlights the 'Next Block' button on the toolbar of the top window, and another yellow box highlights the text 'INV = Inventory Asset' in the bottom window.

To view specific details about when the property's status changed, select the **Next Block** button from the toolbar.

In this example, the **Inventory Asset** (property record) was created on 08/29/2002. This means the asset was barcoded on 08/29/2002.

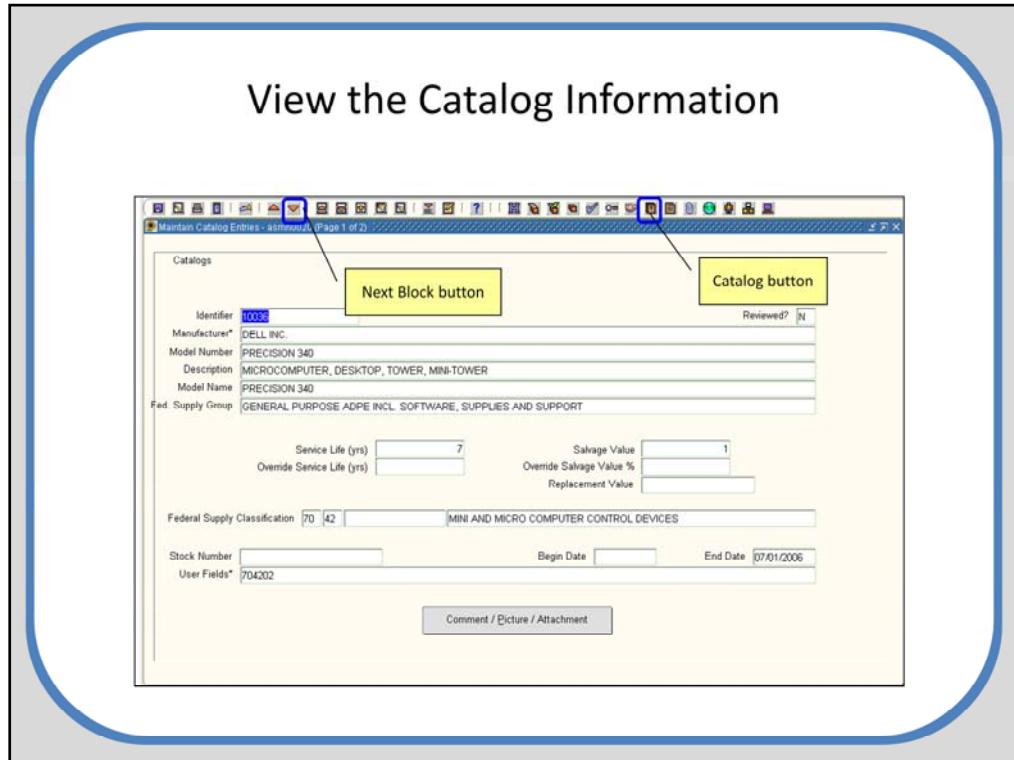

**Note:** If an asset is given a final event (retired) and then reinstated, the history of the asset *before* reinstatement will always show the final event associated with the retirement. Only the history *after* reinstatement will have no final event shown.

## View the Details

To view specific details about a property detail, select the **Details (plus sign)** button next to the field.

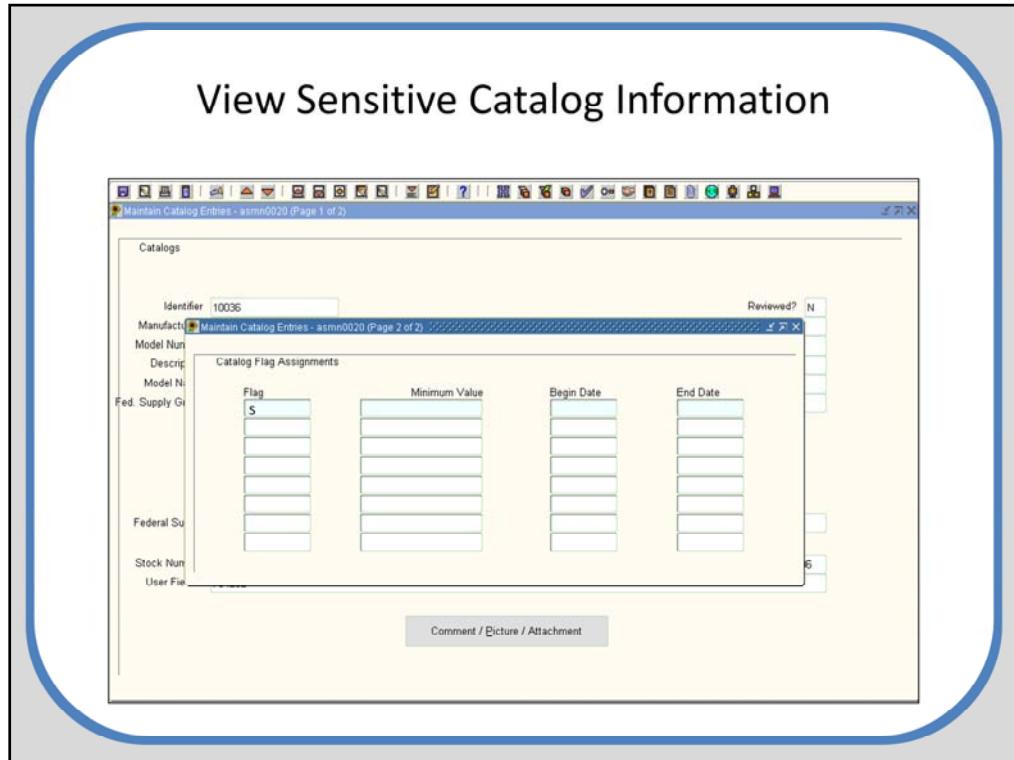

In this example, the **Asset Value** was updated on 09/08/2007.

A property record's catalog information can be viewed by selecting the **Catalog** button from the toolbar from any screen in the Sunflower System.

**Note:** To view whether or not the Catalog item is **Sensitive**, select the **Next Block** button from the toolbar (see example on next page.)

**Remember:** Contact the Administrator for catalog updates.

This view shows whether or not the catalog item is **Sensitive**.

**Note:** If the **Sensitive** flag on the Catalog is changed, it will not be reflected on the property records with those Catalog items until a transaction occurs on each of those records.

5. Conduct a search using any one of the following criteria. You may choose one for a broad search or many for a narrower search:

Field	Description
<b>Custodial Area</b>	Enter your custodial code. This selection will automatically populate the <b>Prop Custodian</b> field.
<b>Contact ID</b>	Identifies the secondary Property Custodian for the asset. Select the <b>Last Name</b> from the list of values and then select a <b>First</b> name from the LOV. This will automatically populate the Secondary Custodian's ID in the <b>Contact ID</b> .
<b>User</b>	Select the <b>Last Name</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically populate the User's badge number in the <b>User</b> field.
<b>Location</b>	The location of the asset (Site, Structure Level 1 and Structure Level 2).
<b>Manufacturer</b>	The manufacturer of the asset.
<b>Model</b>	The model of the asset.
<b>Description</b>	The official name of the asset.
<b>Serial Number</b>	The serial number of the asset.
<b>Interest Type</b>	Select Agreement, Excess, Financial, or Inventory.
<b>Initial Event</b>	The initial event of the asset.

View Asset Timeline History

The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. Below the menu is a toolbar with various icons. The main window is titled "Inventory Asset Summary and History - asmn2055 (Page 1 of 2)". It displays detailed information for asset record 000183. The "Assets" section shows the barcode number (000183), unique name, and default location. The "Details" tab is selected, showing fields such as Manufacturer (DELL INC.), Description (MICROCOMPUTER, DESKTOP, TOWER), Serial Number (UXH2G), Initial Event (PURCHASE), Final Event, Asset Value (\$2,462.00 NOT CAPITALIZED), Asset Condition (4 USED - MAJOR REPAIRS), Utilization Code (IN SERVICE), Bureau or Region (NTIA), Cust Area (61NTIA\_01), and Property Contact (MATTHEWS LISE C CPPLCM). Other sections include Model Number (XPS-T450 DIMENSION), Model Name (DIMENSION), Drawing No., User Fields, Acquisition Date (04/01/1999), Effective Date (05/11/2007), Responsibility Date, Expected Return Date, Flags (S O), Activity Type (AGENCY OWNED), Property Accountability Office (61NTIA\_), and Property Custodian (MATTHEWS LISE C CPPLCM). Buttons at the bottom include "Create Information" and "Interest Details".

11. Continue scrolling through records as needed.

**End of activity.**

Search the timeline history for asset with the following barcode number:  
CD0001346984

Search the summary and history information for the asset with the barcode number:  
CD0001346984

## Reports

To view history information in a report format, one of three reports may be used:

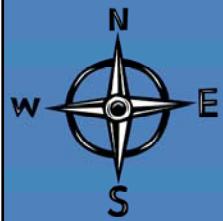

- Inventory Asset Timeline Report
- Inventory Asset History
- Inventory Assets (Global Information)

These reports may be run to view the history and details of property records. Since reports display real time data, as soon as a record is changed, the new information is reflected in the report.

- Inventory Asset Timeline – displays timeline activities by asset identifier
- Inventory Asset History – Shows the detailed changes and who made them
- Inventory Assets (Global Information) – Shows detailed and summary information of assets

If you have trouble displaying reports you may need to disable your popup blocker or enable Sunflower as a pop-up execution. One method to disable your pop-up blocker is listed below. Always check with your IT support.

1. On the Internet Explorer menu bar, select **Tools>Internet Options**.
2. Select the **Privacy** tab.
3. Uncheck **Block the pop-ups** checkbox.
4. Select the **Apply** button.
5. Select the **OK** button.

- Enter the search criteria in the fields provided.

Note: The more information entered, the more specific your search will be.

- Tab** out of the fields.

- Check the appropriate fields in the **Include Which of the Following?** section.

Note: At least one field must be checked.

- Change the sort criteria as needed in the **How Would You Like the Timeline Activities to be Sorted?** section.

- Select the **Submit** icon.

Result: A confirmation and output page displays.

The screenshot shows a Microsoft Internet Explorer window with the title bar "Production 4.5.0.0 - 09/08/2007 (ZSUR1@osppsd3) - Microsoft Internet Explorer". The address bar contains the URL "http://libra24/pls/snflwr\_04050000\_report\_osppsd3/as\_owa\_management.form\_1". The main content area displays the "SunflowerEnterprise" logo and the heading "Sunflower Enterprise - Production 4.5.0.0 Management Reports". Below this, it says "ASMN6030 Inventory Assets (Global Information)". A blue header bar says "Choose an output format" with three options: "Acrobat" (selected), "HTML", and "Text file export (Excel, Lotus 1-2-3, Access...)". Below this, a note says "Press execute to run the report with the following parameters". A table titled "Selection Criteria: 175175" lists various criteria with their values:

Selected by	Value
Bureau or Region	51
Property Accountability Office	
Cust Area	
Include the Cust Area's child Organizations	N
Description	
Manufacturer	
Model Number	
Property Contact	
Current User	
Agreement	
Location	
Assets As Of	
Inventory Asset Report #	

At the bottom left is a "Done" button, and at the bottom right is a "Local intranet" link.

7. Select the **Acrobat** radio button.
8. Review the criteria and select **eXecute**.

**Note:** You may select the back button to change any criteria selected.

**Result:** The Inventory Asset (Global Information) report displays.

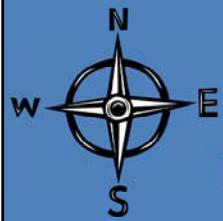

The screenshot shows a Microsoft Internet Explorer window displaying a Sunflower Enterprise report. The title of the report is "INVENTORY ASSETS (GLOBAL INFORMATION)". Below the title, it says "Run by SIROIS SHEILA SSIROIS". It also shows the "Run date" as "09/09/2007 22:19" and the "Selection Criteria" as "175175". The report lists various search parameters in pairs:

Bureau or Region :	51	Barcode # :

**End of activity.**

To run the reports use the following information:

- **Inventory Asset Timeline Report**
  - Use Barcode Number: CD0001346984
- **Inventory Asset History Report**
  - Use Barcode Number: CD0001346984
- **Inventory Assets (Global Information) Report**
  - Use Bureau: 55 (ITA)

## Lesson Summary

- You should now be able to:
  - Perform a quick search using the Maintain Inventory Assets screen
  - Perform a quick search using the Query Criteria screen
  - View the current status of a property record
  - View the timeline details of a property record
  - Perform a barcode number search to view the entire history of a property record
  - View the creator information of a property record
  - View the property record's Catalog information
  - Run reports listing the history of property records

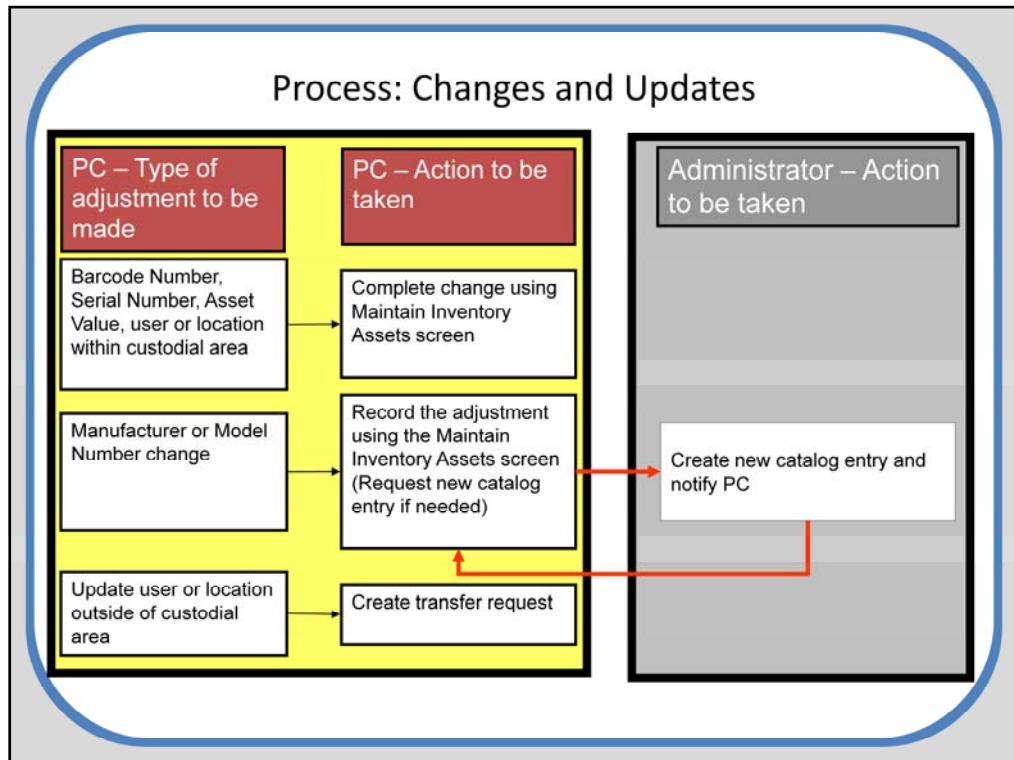

## Chapter 5: Changes and Updates

Sunflower Assets 4.5

## Lesson Objectives

- After this lesson you should be able to:
  - Summarize the steps used to update the property record
  - Update Serial Number, Manufacturer, Model, Barcode number
  - Update Contact ID, User, and Location within Custodial Area
  - Update the Asset Value

Depending upon the adjustment the property record needs, the PC may make the changes directly or may have to request a new catalog entry to be made.

- Barcode number changes should only be made if entered incorrectly or if an asset is being retagged.
- Any manufacturer, model number, and serial number changes require supporting documentation to prove the necessity of the change. These should only be changed if they were initially entered incorrectly.
- Changes and Updates are made using the **Maintain Inventory Assets** screen.
- Request a new catalog entry from the administrator. The new entry must be created before the manufacturer or model may be changed.
- To make updates to the user or location within your custodial area use the Maintain Inventory Assets screen.
- To make updates to the user or location outside of your custodial area follow the transfer process (see Chapter 7 Transfer Assets).

## Maintain Inventory Assets Screen

The screenshot shows the 'Maintain Inventory Assets' screen in Sunflower Enterprise. The interface includes a menu bar with options like Exit, Agree, Contract, Mgmt, Entry, Finance, Inactive, Review, IT Components, Admin, Reports, Functions, Utility, Window, Help. The main area is titled 'Inventory Assets' and contains several input fields. Handwritten numbers 1 through 5 are overlaid on the form to indicate specific areas of focus:

- 1**: Barcode # (C00001346984)
- 2**: Catalog Identifier (134693), Manufacturer (DELL INC), Description (LAPTOP COMPUTER), Serial Number (3N6SP11)
- 3**: Asset Value (\$2,457.00)
- 4**: Cust Area (S10AQ01TB), Contact ID (User), Last Name (Last Name), Location (WASHINGTON, DC, BUILDING\_1110\_ROOM\_100C3)
- 5**: Comment / Picture / Attachment button

PCs can make changes to the property record. To update barcode number, manufacturer, model, serial number, asset value, user in custodial area or location in custodial area simply enter the **Maintain Inventory Assets** screen.

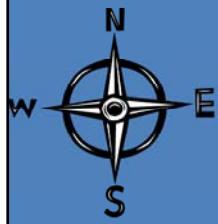

**Area 1** Enter the barcode number of the asset in the **Barcode Number** field, then **Tab**.  
Result: The remaining asset information autofills.

**Area 2** Make the required changes for **Catalog information** in this field.

**Area 3** Make the required changes for **Asset Value** in this area.

**Area 4** Make the required changes for **Custodian**, **User**, and **Location** in this area. If these fall outside of your custodial area, follow the transfer process. Note that if you are accepting a transfer from another Bureau or PAO, you **MUST** update these fields.

**Area 5** Use the **Comment / Picture / Attachment** button to attach any supporting documentation for higher level authorities or auditors. If no documentation can be attached, enter in the Comments field where the supporting hard copy documentation can be found.

# Update a Property Record

Inventory Clerk/ Inventory Manager

M > Mgmt > Maintain Inventory Assets

Maintain Inventory Assets

The screenshot shows the 'Maintain Inventory Assets' application window. At the top, there's a toolbar with various icons. Below the toolbar, the title bar reads 'Maintain Inventory Assets - asmn2010 (Page 1 of 2)'. The main area is titled 'Inventory Assets'. It contains several input fields and checkboxes:

- Barcode # (highlighted in yellow)
- Type (checkbox)
- Barcode # (checkbox)
- Released? (checkbox)
- Default Location\* (checkbox)
- Catalog Identifier\* (checkbox)
- Manufacturer (checkbox)
- Description (checkbox)
- Serial Number (checkbox)
- Initial Event (checkbox)
- Asset Value\* (checkbox)
- Asset Condition (checkbox)
- Utilization Code (checkbox)
- Bureau or Region (checkbox)
- Cust Area (checkbox)
- Contact ID (checkbox)
- User (checkbox)
- Location\* (checkbox)
- Document\* (checkbox)
- User Fields\* (checkbox)
- Global User Fields\* (checkbox)
- Barcode Type (checkbox)
- Existing interest asset (checkbox)
- Commodity Asset (checkbox)
- Parents (checkbox)
- Children (checkbox)
- C/P/A (checkbox)
- Model Number (checkbox)
- Model Name (checkbox)
- Drawing No. (checkbox)
- User Fields\* (checkbox)
- Acquisition Date (checkbox)
- Effective Date (checkbox)
- Flags\* (checkbox)
- Activity Type (checkbox)
- Property Accountability Office (checkbox)
- Accepted? (checkbox)
- Property Custodian (checkbox)
- First (checkbox)
- Mid (checkbox)
- Expected Return Date (checkbox)
- Responsibility Date (checkbox)

At the bottom of the form, there are buttons for 'Page 2', 'Cgmodity', 'Comment / Picture / Attachment', and 'Re-Request'. A status bar at the bottom left says 'The tracking identifier assigned to the interest asset' and 'Record: 1/1'.

1. Enter the barcode number of the item to be updated in the **Barcode Number** field and **Tab**.

**Result:** The remainder of the property record auto-populates.

The screenshot shows the Sunflower Enterprise software interface for managing inventory assets. The main window title is "Maintain Inventory Assets - asmn2010 (Page 1 of 2)". The form is titled "Inventory Assets". It includes fields for barcode, type, and release status. Detailed information about the asset is provided, including manufacturer (DELL INC.), model number (PRECISION 340), and description (MICROCOMPUTER, DESKTOP, TOWER, MI). The asset was purchased for \$2,457.00. The location is listed as WASHINGTON, DC\_BUILDING\_HCHB\_ROOM\_1311. The user interface includes tabs for "Commodity", "Comment / Picture / Attachment", and "Re-Request".

2. Update any necessary fields.

Field	Description
<b>Barcode #</b>	Enter the new <b>Barcode Number</b> for the asset.
<b>Manufacturer</b>	Enter the new name of the manufacturer of the asset. If a list of values appears, select the applicable standard manufacturer name from the list.
<b>Model Number</b>	Enter the new model number for the asset. If a list of values appears on the screen, select the applicable standard model number from the screen. Once you <b>Tab</b> , the <b>Catalog Number</b> and <b>Official Name</b> fields will automatically populate (based on the Manufacturer and Model Number combination.)
<b>Serial Number</b>	Enter the serial number of the asset, if known. Otherwise <b>leave it blank</b> .
<b>Contact ID</b>	Update only if in your custodial area.
<b>User</b>	Update only if in your custodial area.
<b>Location</b>	Update only if in your custodial area.

Note: To update complex fields such as **Location**, remember to double click to launch the fields, and **Save** the information you've entered.

Remember: You may only make changes to the Bureau or Region, Custodial Area, Contact ID, User and Location if they fall within your Custodial Area. For changes outside the Custodial area, you will need to complete a transfer.

3. Select the **Save** button from the toolbar to save the record.

## End of activity.

## LAB: Update a Property Record

Update the Model Name for the Laptop that you created with Barcode #: CD01MMDDYYXX (where MM=Month, DD=Day, YY=Year, and XX=your student number) to **Inspiron 3500**.

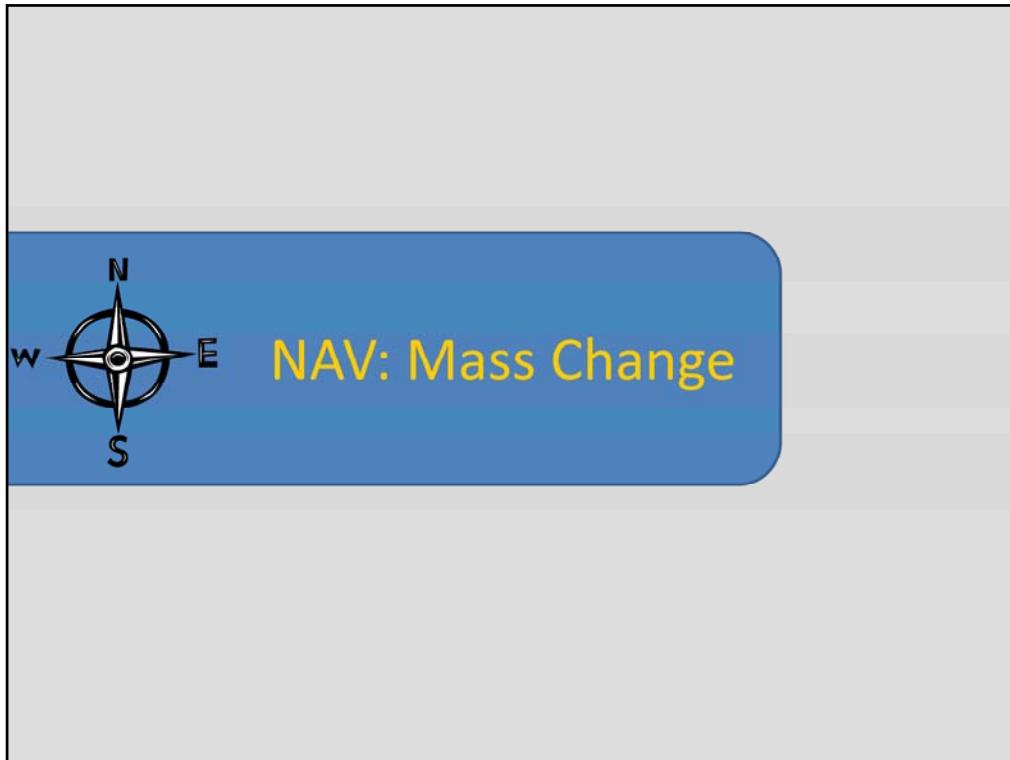

To make the same changes to more than one asset at a time, use the **Change Inventory Asset Information** screen (e.g. all assets are being changed from one location to another within your custodial area).

All changes will apply to the assets listed and all the updates must fall within your custodial area.

**Area 1** Enter the new information in this section. You may update the Custodial Area, Contact ID, User, and Location here.

**Area 2** List all assets to which to apply the changes listed in area 1.

# Mass Change

The purpose of this document is to explain how to update several assets of a Custodial Area with the same asset information (e.g., Contact ID, User, and Location.)

Inventory Clerk / Inventory Manager  
M > Mgmt > Change Inventory Asset Information  
Change Inventory Asset Information

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/08/2007 (2SURI@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, Help. The toolbar has various icons for file operations. The main window title is "Change Inventory Asset Information - asmn2020". The "New Information" section contains fields for Cust Area, Contact ID, User, Location, Document, Last Name, First Name, Mid Name, and checkboxes for Expected Return Date and Effective Date (set to 09/08/2007). The "Assets" section lists barcode numbers and manufacturer names, with the first row having a checked checkbox. A message field is at the bottom.

1. Update the following information, as needed, with the new asset information.

Field	Description
Cust Area	The number of the new custodial area
Contact ID	The name of the new secondary custodian
User	The new user
Location	The new location

2. Place the cursor in the **Barcode Number** field.

**If you know the barcode numbers of the assets you wish to update , goto task #3.  
Otherwise, goto task#4.**

3. Enter the barcode numbers of the assets you will be updating.

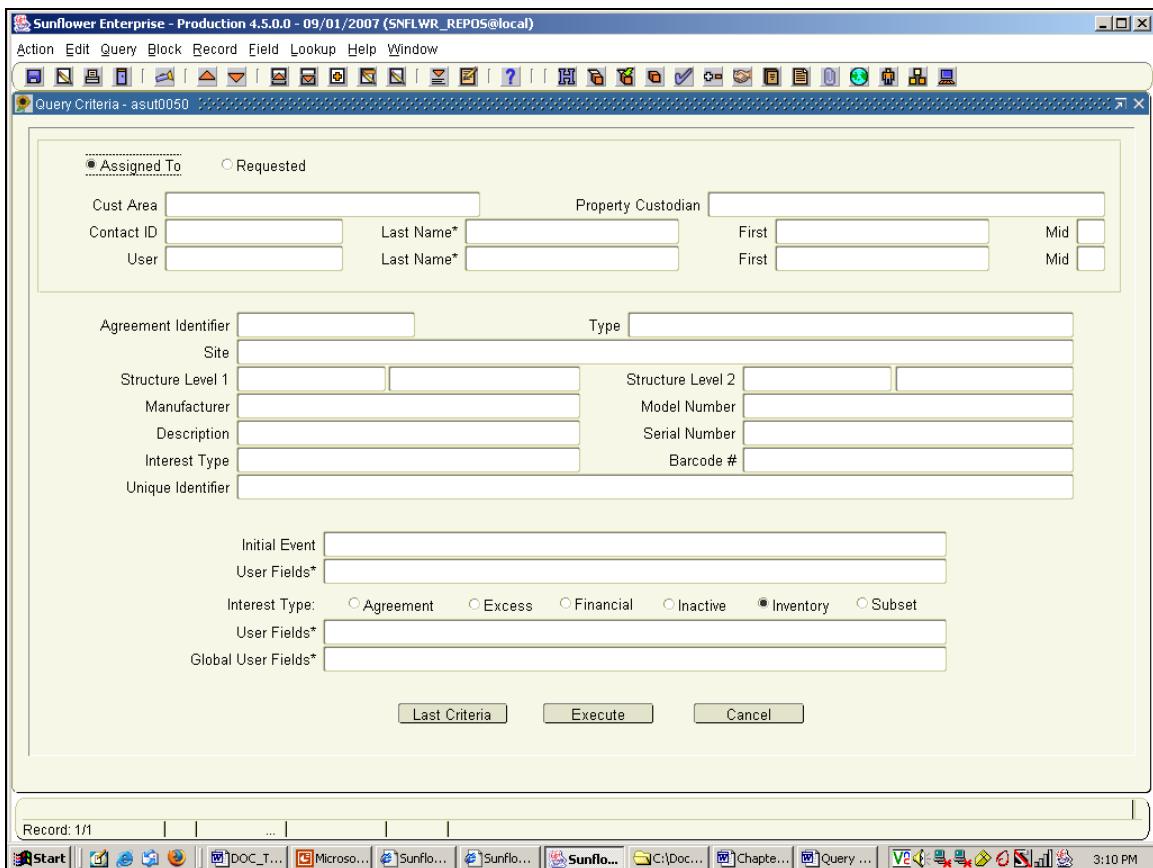

Mass Change

Mass Change

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

Update all the assets in your assigned Custodial Area for training (see your Login Information card) to the User field to you. Use the Last Name field to lookup your last name and select your last name, first name from the list.

## Value Adjustments

A PC may update the asset value of a property record using the **Maintain Inventory Asset** screen. The Asset Value should not be changed, but rather updated. The initial acquisition cost should stay the same. A value may be added or subtracted to represent a betterment to the asset or some other value related addition or subtraction.

Use the **Maintain Inventory Assets** screen to make a value adjustment to a specific asset.

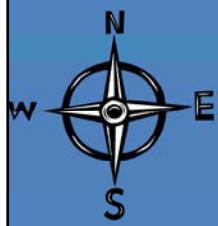

**Area 1** Enter the barcode number in this area.

**Area 2** The current value of the asset is shown here. Double click this field to adjust the asset value.

**Area 3** Use the next available line to enter the amount of value added or subtracted.

- The **Type** field allows you to choose the type of the adjustment from the LOV. (Acquisition Cost, Discount, Installation, Shipping, Trade-In)
  - The **User Fields\*** are required for capital assets

Note: To decrease the value of an asset, enter a *negative* (-) amount in the **(+/-) Dollar Value** field.

Buttons at the bottom include: Page 2, Commodity, Comment / Picture / Attachment, and Re-Request.

A status bar at the bottom left says: 'The tracking identifier assigned to the interest asset' and 'Record: 1/1'.

1. Enter the barcode number of the item to be updated in the **Barcode Number** field and **Tab**.

Result: The remainder of the property record auto-populates.

## LAB: Update Asset Value

Update the asset value of the laptop you have created with Barcode # CD01MMDDYYXX (where MM=Month, DD=Day, YY=Year, and XX=your student number) and updated to Inspiron 3500. **Add \$450 to its value.**

## Lesson Summary

- You should now be able to:
  - Summarize the steps used to update the property record
  - Update Serial Number, Manufacturer, Model, Barcode number
  - Update Contact ID, User, and Location within Custodial Area
  - Update the Asset Value

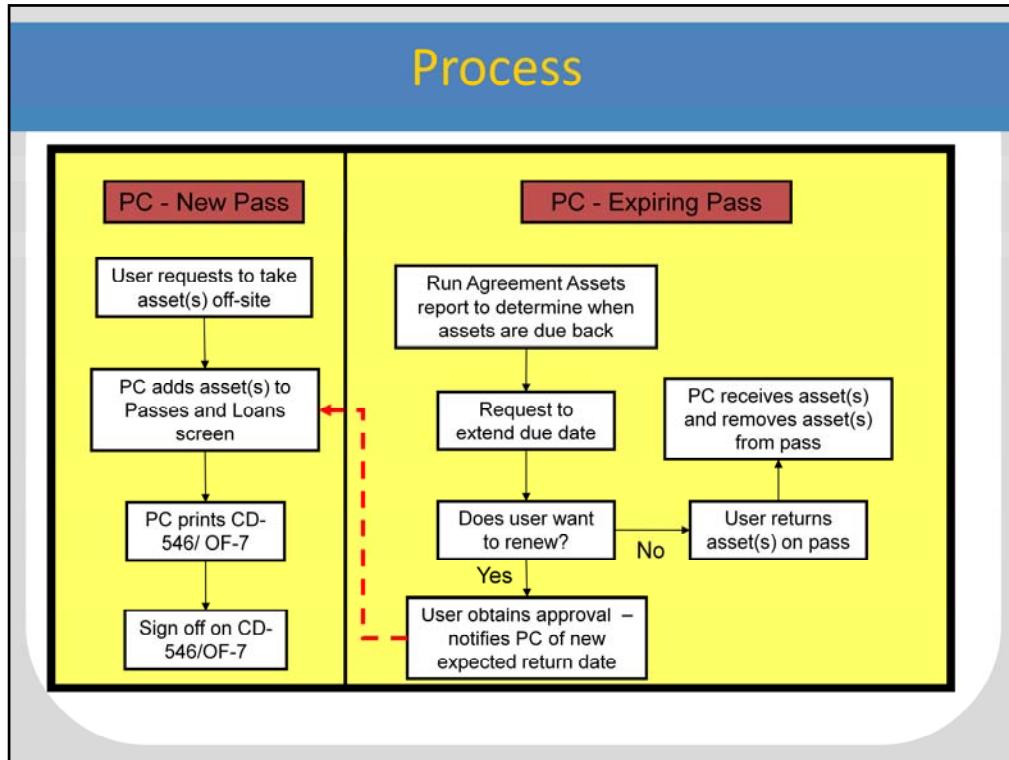

## Chapter 6: Passes and Loans (CD-546 and OF-7)

Sunflower Assets 4.5

## Lesson Objectives

- After this lesson you should be able to:
  - Explain the process behind passes and loans
  - Add items to passes and loans
  - Print the CD-546 and OF-7 documents
  - Modify passes and loans
  - Remove items from passes and loans
  - Determine if an item is currently on pass or loan
  - Run a report to determine which items are on pass or loan

To increase audit traceability and reduce manual paperwork processing, a new Passes and Loans screen has been added to Sunflower. This screen will be used to place items on passes and loans, print the CD-546 and OF-7, and remove items from passes and loans. Sunflower's Summary and History will reflect each transaction, and Sunflower's standard reports can be used to determine which items are out on pass. The above process describes how PCs will use this screen.

Notes:

- All Pass types will be assigned a system-generated **Pass Number**; this value can be used to query passes and run reports
- Users can create multiple passes per person or organization. For example, one pass may be created for a user where the asset is due back in one month. That same user takes another asset which is due back in one year - in this case the PC may want to create two passes for that one person since the items are due back several months apart.

**Passes and Loans**

The **Passes and Loans** screen is used to add assets to passes/loans, remove assets from passes/loans, and update existing passes/loans.

#### **Property Passes** - Used with DOC employees only

- Must have a **Person** name – if the person's name is not filled out, you will not be able to save
- **Person** name must match the name of the **User** on the asset record – if this does not match, you will not be able to save
  - However, for 'shared' property such as laptop pools, Sunflower users may prefer to keep one person's name as the **User** on each asset record. In this case, that person's name could go on the Property Pass, and the actual borrower's name could go in the **Loan Purpose** field.
- When complete, both the CD-546 and the OF-7 will be available for printing
- **Contact Name** and **Telephone** information are not needed

#### **Repair Passes** - Used when sending an item to an external organization for repair

- Must have an **Organization** – if this is not filled out, you will not be able to save
- **Contact Name** and **Telephone** information should be provided
- When complete, only the CD-546 will be available for printing

**CD-546**

Form CD-546 (10-99) LF	PERSONAL PROPERTY DIVISION LOAN AGREEMENT/RECEIPT	U.S. DEPARTMENT OF COMMERCE Office of Administrative Operations	
DATE LOANED:	20-NOV-09	RETURN DUE DATE:	20-JAN-10

Passes and Loans

The screenshot shows a Windows application window titled "Passes and Loans - excd0546". The interface is organized into three main sections:

- Pass:** Contains fields for "Pass Type" (dropdown menu), "Pass Number" (text box), "Loan Purpose" (text box), "Loan Date" (text box), and "Due Date" (text box).
- Borrower:** Contains fields for "Person" (Identifier, Last, First, Mid) and "Organization" (OS, Street, City, State, Zip, Office, Room Number, Telephone, Contact Name).
- Assets:** A grid table with columns for "Barcode", "Manufacturer", "Model", and "Serial#". The grid has 8 rows and 4 columns.

At the bottom of the window are two buttons: "Print CD-546" and "Print OF-7".

1. Depending upon the type of pass, pick **Property Pass**, **Repair Pass**, or **Loan** from the **Type of Pass** list of values
2. Enter the **Purpose of Loan** (e.g. Working from home, item is broken, research project, etc.)
3. Enter the date the pass is issued in **Loan Date**
4. Enter the date the item is due back in **Due Date**
5. Enter **Organization** (Repair Pass or Loans only)
6. Enter the **Person Last Name** and hit the tab key (Property Pass and Loans only)
7. Select the **First Name** of the borrower
8. Enter the address of the borrower, using **Street, City, State, and Zip**

Add Assets to Pass

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

9. Enter the **Office** and **Room Number** of the borrower (Property Pass only)
  10. Enter the **Contact Name** and the **Telephone** number of the contact person (Repair Pass and Loans only)
  11. Enter the Barcode Number(s) in the **Assets** section
  12. Hit the **Save** button

Result: The Status bar at the bottom of the screen should show the “Transaction complete: X records applied and saved”.

13. Hit each **Print** button to print both the **CD-546** and the **OF-7**

Result: You will be taken to the printed passes – print as needed

Note: If there are multiple assets on pass, each pass will have its own CD-546 or OF-7 page.

Passes and Loans

The screenshot shows a Windows application window titled "Passes and Loans - excd0546". The interface is organized into three main sections: "Pass", "Borrower", and "Assets".  
The "Pass" section contains fields for "Pass Type" (a dropdown menu), "Pass Number" (a text input field), "Loan Purpose" (a text input field), "Loan Date" (a text input field), and "Due Date" (a text input field).  
The "Borrower" section contains fields for "Person" (Identifier, Last, First, Mid) and "Organization" (OS, Street, City, State, Zip, Office, Room Number, Telephone).  
The "Assets" section is a grid table with columns for "Barcode", "Manufacturer", "Model", and "Serial#".  
At the bottom of the window are two buttons: "Print CD-546" and "Print OF-7".

1. Hit the **Find** button.

Result: The screen will be placed in query mode.

2. Depending on which parameter you want to query by, enter one or more of the following parameters. Enter:

Field Name	Purpose
<b>Pass Type</b>	To pull up all passes of a specific type (Property Pass, Repair Pass, Loan)
<b>Pass Number</b>	To pull up a specific pass
<b>Loan Date &amp; Due Date</b>	To pull up passes issued on a specific date or assets due back on a specific date, respectively
<b>Person</b>	To pull up all passes used to a specific person
<b>Organization</b>	To pull up all passes issued to a specific organization
<b>Office</b>	To pull up all passes issued within a specific DOC office

3. Hit the **Find** button again.

Result: Any passes meeting the query criteria will display.

The screenshot shows a software interface titled "Passes and Loans - excd0546". The main window displays a single pass record with the following details:

- Pass:**
  - Pass Type: PROPERTY PASS
  - Pass Number: CPPTB1-00002
  - Loan Purpose: WORKING FROM HOME
  - Loan Date: 11/20/2009
  - Due Date: 01/20/2010
- Borrower:**
  - Identifier: CPPTB1
  - Last Name: BRUNSON
  - First Name: TAMY
  - Middle Name: (empty)
  - Person: (empty)
  - Organization: (empty)
  - Street: 1441 L STREET NW
  - City, State, Zip: WASHINGTON, DC 20230
  - Office: BEA

The **Agreement Assets** report can be used to determine which assets are out on pass or loan. In short, this report shows who has assets out on loan/pass, which assets are out on loan/pass, and when assets are due back. This report can be run by:

**Agreement Identifier** - a number unique to each pass (i.e. the system generated **Pass Number**)

**Agreement Type** - run report for only Property Passes, Repair Passes, or Loans

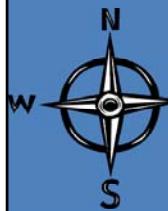

**Organization With** – to view passes out with a specific organization

**Person Last Name and First Name** - to view passes out with a specific person

**Cust Area** – to view all assets on pass or loan in your Custodial Area

**Only Agreements Scheduled to End Between** – to view assets due back within a specified time frame

Multiple parameters can be selected to narrow the search criteria. Other parameters are available, as well.

[Done](#)

2. Depending on what you want to view, enter one or more of the following parameters (or use any other parameters as appropriate). Enter:

Field Name	Purpose
The <b>Agreement Identifier</b> (Pass Number) or the <b>Agreement Type</b> (Property Pass, Repair Pass, Loan Pass)	To view specific passes or types of passes
The <b>Organization With</b> organization	To view passes out with a specific organization
The <b>Person Last Name</b> and <b>First Name</b>	To view passes out with a specific person
Your <b>Cust Area</b> (Custodial Area)	To view all assets on pass or loan in your Custodial Area
The <b>Only Agreements Scheduled to End Between</b> fields	To view assets due back within a specified time frame

3. Optionally check the **Asset Details** box towards the bottom of the screen to see additional information about the assets on pass

4. Hit the **Submit** button

Result: A confirmation and output page displays.

The screenshot shows a Microsoft Internet Explorer window titled "Agreement Assets (Repository Owner) - Microsoft Internet Explorer". The address bar shows the URL: [http://sflwrdocstest.oas.doc.gov/pls/sflwr\\_04050000\\_report\\_osppsd3/as\\_owa\\_agreement.form\\_1](http://sflwrdocstest.oas.doc.gov/pls/sflwr_04050000_report_osppsd3/as_owa_agreement.form_1). The main content area is titled "SunflowerEnterprise" and "Sunflower Enterprise - Production 4.5.0.0 Agreement Reports". Below this, it says "ASAG6010 Agreement Assets". A blue header bar says "Choose an output format". Underneath, there are two radio buttons: " Acrobat" and " HTML". Below these buttons is a note: "Press **Execute** to run the report in this window or Press **Background** to run the report in the background". Another blue header bar says "Selection Criteria: 363104". Below this is a table with columns "Selected by" and "Value". The table rows are: "Agreement Identifier", "Agreement Type" (Value: PROPERTY PASS), "Organization By", "Sponsor", "Organization With", "Person With", and "Assets As Of". At the bottom left of the table is the word "Done".

5. Select **Acrobat** as the output format

6. Hit the **Execute** button

Result: The **Agreement Assets** report displays. Scroll to the third page to view the results.

Lab:  
Print Report to View  
Assets on Pass

## Lesson Summary

- You should now be able to:
  - Explain the process behind passes and loans
  - Add items to passes and loans
  - Print the CD-546 and OF-7 documents
  - Modify passes and loans
  - Remove items from passes and loans
  - Determine if an item is currently on pass or loan
  - Run a report to determine which items are on pass or loan

## Chapter 7: Transfer Assets

Sunflower Assets 4.5

## Lesson Objectives

- After this lesson you should be able to:
  - Summarize the steps used to transfer assets
  - Request a transfer
  - Generate a report to determine whether or not there are any open requests for transfers to your custodial code
  - Accept a transfer coming from within the same Bureau or Region
  - Accept a transfer for assets coming from outside the Bureau or Region for redeployment of excess assets
  - Withdraw a transfer request
  - Deny a transfer

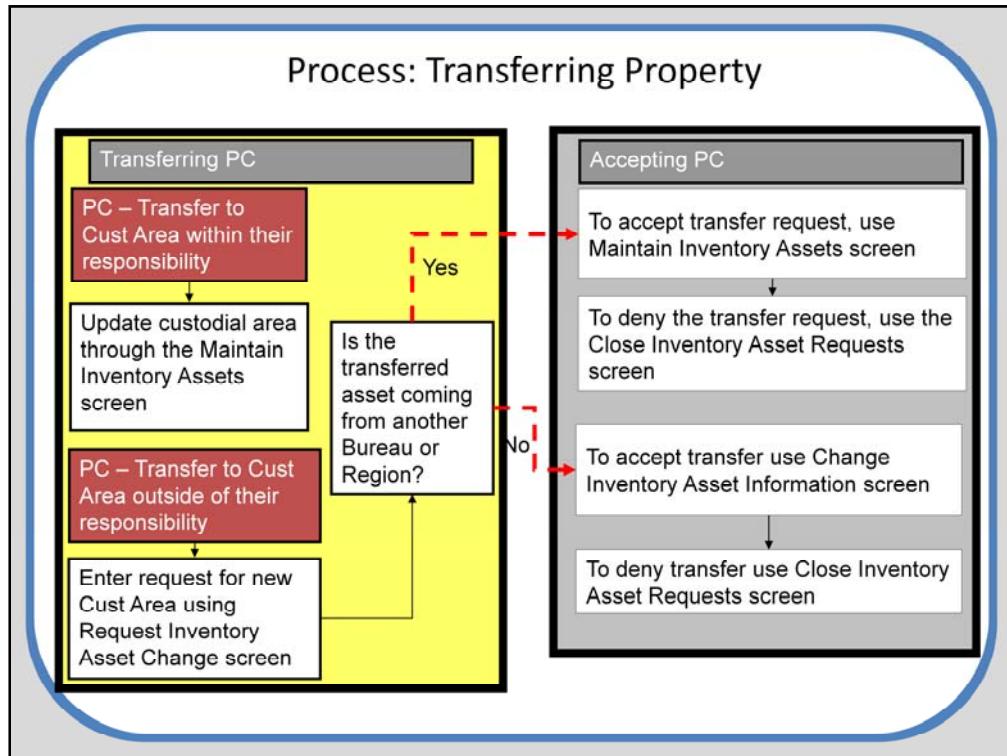

## Sunflower Transfer Capabilities

The Sunflower Property system provides the capability to:

- Update the property record of assets that are pending transfer (Property Custodian, Contact ID, User, Location);
- Reject transfer requests;
- Transfer and accept an unlimited number of assets at once; and
- Allow the PC to withdraw transfer requests for the transfer of assets so that the assets may be utilized elsewhere within the custodial area.

In order to provide inter-organizational transfers, the Sunflower software uses a request/accept/deny model (“handshake”), which ensures that asset accountability is not transferred without the consent of both parties. This “handshake” permits users to request that another user become accountable for an asset. If the second party agrees to the transfer, the request is accepted and accountability is transferred without further action on the part of the requesting party. If the second party disagrees, the request is denied.

### Transfer tips:

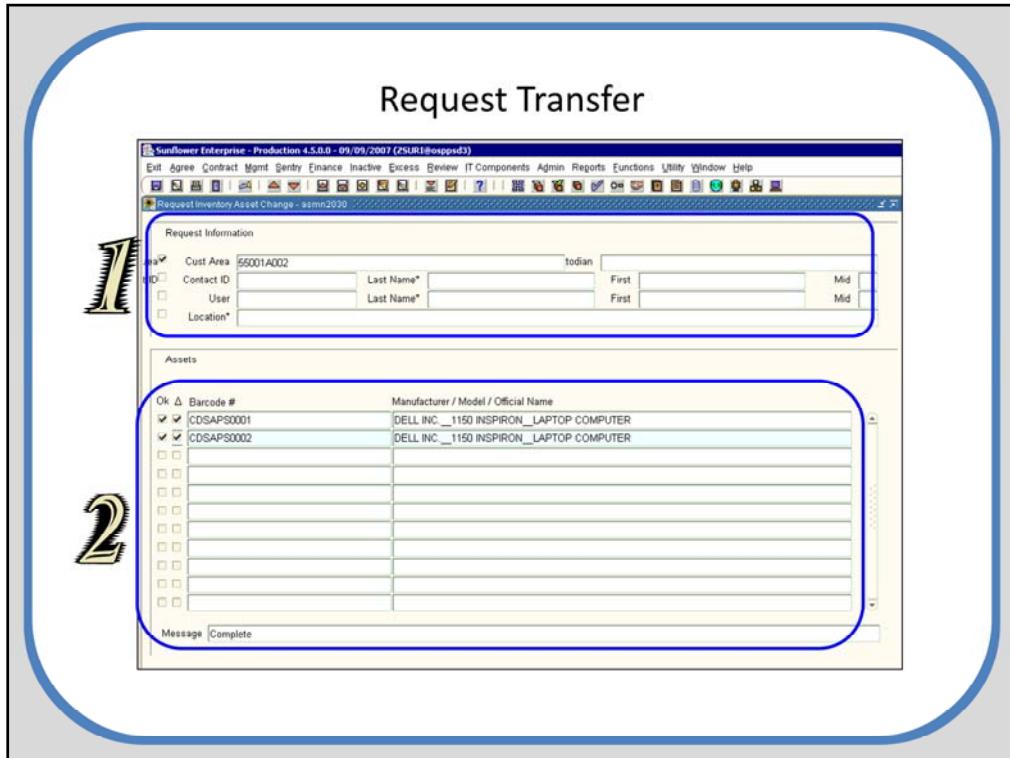

#### Owning PC

- If the owning PC is also the PC of the new custodial area, then the owning PC can update the custodial area on either the **Maintain Inventory Assets** screen or **Change Inventory Asset Information** screen.
- If the owning PC is *not* the PC of the new custodial area, then the PC enters a request for transfer using the **Request Inventory Asset Change** screen.

#### Accepting PC

- The accepting PC decides whether or not to accept the transfer request.
- There are two methods used to accept a transfer, one for assets within the Bureau or Region, and one for assets from another Bureau or Region

**Note 1:** If needed, the PC can also withdraw the transfer request using the **Close Inventory Asset Requests** screen. See the page entitled *Withdraw or Deny Transfer* for details.

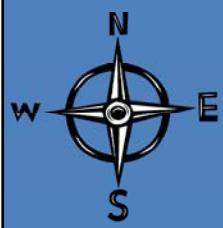

Use the **Request Inventory Asset Change** screen to request transfers.

**Area 1 Request Information** – To enter the information about where/who you want the asset transferred to, fill in the fields in the **Request Information** portion of the screen. If you do not know the exact **Contact ID**, **User**, or **Location**, simply fill in the new **Cust Area**. The accepting PC can then update the other information upon accepting the request.

**Area 2 Assets** – Enter any assets to be transferred in this portion of the screen. You can enter as many assets as you need.

**Examples:**

- To transfer all of your assets to another custodial area, select the **Barcode Number** field and select the **Find** button from the toolbar. Enter your custodial area to query, then select the **Execute** button on the bottom of the query screen. This will populate all of your custodial area's assets on the above screen.
- To transfer all assets from one location, select the **Barcode Number** field and select the **Find** button from the toolbar. Enter the current location of the assets in the **Location** fields, then select the **Execute** button on the bottom of the query screen. This will populate all of that location's assets on the above screen.

Request Inventory Asset Change

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSUR1@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. The toolbar below the menu bar contains various icons for file operations like Open, Save, Print, and Database. The main window title is "Request Inventory Asset Change - asmn2030". The form is divided into sections: "Request Information" which includes fields for Cust Area (Custodian), Contact ID, User, and Location; and "Assets" which lists assets by barcode number and manufacturer/model name. A message field is also present at the bottom.

1. To enter the information about where/who you want the asset transferred to, fill in the below fields in the **Request Information** portion of the screen.

Note: You do not have to enter all of the information below – only the information you know.

Field	Description
<b>Cust Area</b>	Enter the Custodial Area where the asset will be transferred to and <b>Tab</b> . <b>Note:</b> The requested Custodial Area must be different than the Custodial Area currently listed on the record. You will not be able to save the record if these are the same.
<b>Property Custodian</b>	Defaults based on the Custodial Area entered
<b>Contact ID</b>	If known, select the <b>Last Name</b> from the list of values, and then

	select a <b>First</b> name from the LOV. This will automatically populate the Contact ID's badge number in the <b>Custodian</b> field. <u>Note:</u> The requested Custodian must be different than the Custodian currently listed on the record. You will not be able to save the record if these are the same.
<b>User</b>	If known, select the <b>Last Name</b> of the <b>User</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically populate the User's badge number in the <b>User</b> field. <u>Note:</u> The requested User must be different than the User currently listed on the record. You will not be able to save the record if these are the same.
<b>Location</b>	If known, select this field to launch the <b>Location</b> sub-form
- Site	Select the new site (e.g., Washington, DC) where the asset is located from the LOV
- Building	Select the name of the building from the LOV
- Room	Select the room number from the LOV
- Mail Stop	Enter the mail stop for the room number (if applicable)

2. Select the blue-highlighted **Barcode Number** field in the **Assets** portion of the screen.
3. Enter the barcode number of the property record to be changed, and then **Tab** out of the field.

Result: The following fields will be autofilled based upon the decal number selected.

<b>Field</b>	<b>Description</b>
<b>Manufacturer</b>	The standard manufacturer name
<b>Model Number</b>	The applicable standard model number
<b>Official Name</b>	The Official Name assigned to the asset's Manufacturer/Model Number combination in the property catalog

4. Enter additional barcode numbers in the **Barcode Number** fields if more than one asset is being transferred to the same custodial area.
5. Select the **Save** button from the toolbar to save your work.

Result: The transfer request will be sent to the PC who will be receiving the asset.

6. Review the **Message** field at the bottom of the screen to ensure that the request was successfully completed without errors.

Example: Below is a complete Request Inventory Asset Change screen:

# Accept Transfer within Bureau or Region

Inventory Clerk

M > Mgmt > Change Inventory Asset Information

Change Inventory Asset Information

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/08/2007 (ZSUR1@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. A toolbar with various icons is at the top. The main window title is "Change Inventory Asset Information - asmn2020". The "New Information" section contains fields for Cust Area (with a dropdown menu), Contact ID, User, Location, and Document. It also includes fields for Last Name, First Name, Mid Name, and checkboxes for Expected Return Date and Effective Date (set to 09/08/2007). The "Assets" section has a table with columns for Ok, Delta, Barcode #, and Manufacturer / Model / Official Name. The Barcode # column has several rows, each with a checkbox and a text input field. A message box at the bottom right says "Message".

1. Enter the Custodial Area for the PC receiving the asset(s) in the **Cust Area** field and **Tab**. Optionally select the other information below as needed – as long as that information applies to all the assets being transferred:

Field	Description
Contact ID	The name of the new contact
User	The name of the new user
Location	The new location

2. Place the cursor in the **Barcode Number** field.

If you know the barcode numbers of the assets you will be accepting, goto task #3. Otherwise, goto task 4.

3. Enter the barcode numbers of the assets you will be accepting.

**Goto task #9**

Accept Transfer within Bureau or Region  
Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

- Select the **Find** button from the toolbar.

Result: You are taken to the Query Criteria screen.

The screenshot shows the 'Query Criteria' screen in Sunflower Enterprise. The top bar displays the application name and version (4.5.0.0 - 09/09/2007) and the user (ZSURI@osppsd3). The toolbar contains various icons for actions like Action, Edit, Query, Block, Record, Field, Lookup, Help, and Window. The main panel has sections for 'Assigned To' (radio buttons for 'Requested' or 'Not Requested'), 'Cust Area' (dropdown), 'Contact ID' (text box), 'User' (text box), 'Last Name\*' (text box), 'First' (text box), 'Mid' (checkbox), 'Agreement Identifier' (text box), 'Type' (text box), 'Site' (dropdown), 'Structure Level 1' (text box), 'Manufacturer' (text box), 'Description' (text box), 'Interest Type' (dropdown set to 'INVENTORY ASSET'), 'Structure Level 2' (text box), 'Model Number' (text box), 'Serial Number' (text box), 'Barcode #' (text box), 'Initial Event' (text box), 'User Fields\*' (text box), 'Interest Type' (radio buttons for Agreement, Excess, Financial, Inactive, Inventory, Subset, selected), 'User Fields\*' (text box), and 'Global User Fields\*' (text box). At the bottom are buttons for 'Last Criteria', 'Execute', and 'Cancel'.

- Click the **Requested** radio button in the top-left part of the screen.

Note: The resulting query will display only assets that have been requested for transfer to the Custodial Area selected. It will not display all the assets that belong to that Custodial Area.

- Enter the Custodial Area for the PC receiving the asset(s) in the **Cust Area** field.
- Select the **Find** button from the toolbar.

Result: You will be taken back to the **Change Inventory Asset Information** screen, and any barcode numbers that have been requested for transfer to that Custodial Area will be displayed.

8. Uncheck any assets you do not want transferred.
  9. Select the **Save** button from the toolbar.

**Result:** The **Message** field will indicate the record is **Complete**, and all assets that were checked will now belong to the new Custodial Area.

Accept Transfer within Bureau or Region

Maintain Inventory Assets

The screenshot shows the 'Maintain Inventory Assets' screen in the asmn2010 application. The interface is a standard Windows-style window with a toolbar at the top and a menu bar. The main area contains several groups of input fields:

- Barcode:** A large yellow rectangular field labeled 'Barcode #' is highlighted. To its right are dropdown menus for 'Barcode Type' (set to 'Type'), 'Barcode #' (empty), and 'Released?' (unchecked).
- Asset Details:** Fields for 'Default Location\*', 'Catalog Identifier\*', 'Manufacturer', 'Description', 'Serial Number', 'Initial Event', 'Asset Value\*', 'Asset Condition', 'Utilization Code', 'Bureau or Region', 'Cust Area', 'Contact ID', 'User', 'Location\*', 'Document', 'User Fields\*', and 'Global User Fields\*'.
- Commodity and Accountability:** A checkbox 'Commodity Asset' is unchecked. To its right are fields for 'Parents', 'Children', 'C/P/A', 'Model Number', 'Model Name', 'Drawing No.', 'User Fields\*', 'Flags\*', 'Activity Type', 'Property Accountability Office', 'Accepted?', 'Property Custodian', 'First', 'Mid', and 'Last Name\*' (repeated).
- Timeline:** Fields for 'Acquisition Date', 'Effective Date', 'Responsibility Date' (highlighted in yellow), 'Expected Return Date', and 'Flags\*'.
- Buttons:** At the bottom are buttons for 'Page 2', 'Commodity', 'Comment / Picture / Attachment', and 'Re-Request'.

At the very bottom of the screen, there is a status bar with the text 'The tracking identifier assigned to the interest asset' and 'Record: 1/1'.

1. Enter the barcode number of the asset you will be accepting in the **Barcode Number** field and **Tab**.

**Result:** The remainder of the property record auto-populates.

## End of activity.

The **Close Inventory Asset Requests** screen is used to withdraw or deny transfer requests.

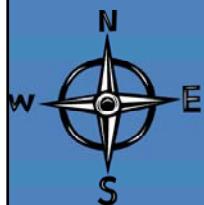

**Area 1** Enter the barcode number of the asset in the **Barcode Number** field, then **Tab**.

**Area 2** Deny or Withdraw the transfer request in this portion of the screen using the appropriate checkboxes.

Note 1: You may only withdraw transfers you have initiated.

Note 2: If you are withdrawing or denying several requests at once, first conduct a search using your custodial area; save each record, then scroll through the other records using the arrow keys, saving each time.

Note 3: Transfers can also be accepted through this screen, however they can only be accepted one asset at a time. To accept multiple assets, use the **Change Inventory Asset Information** screen.

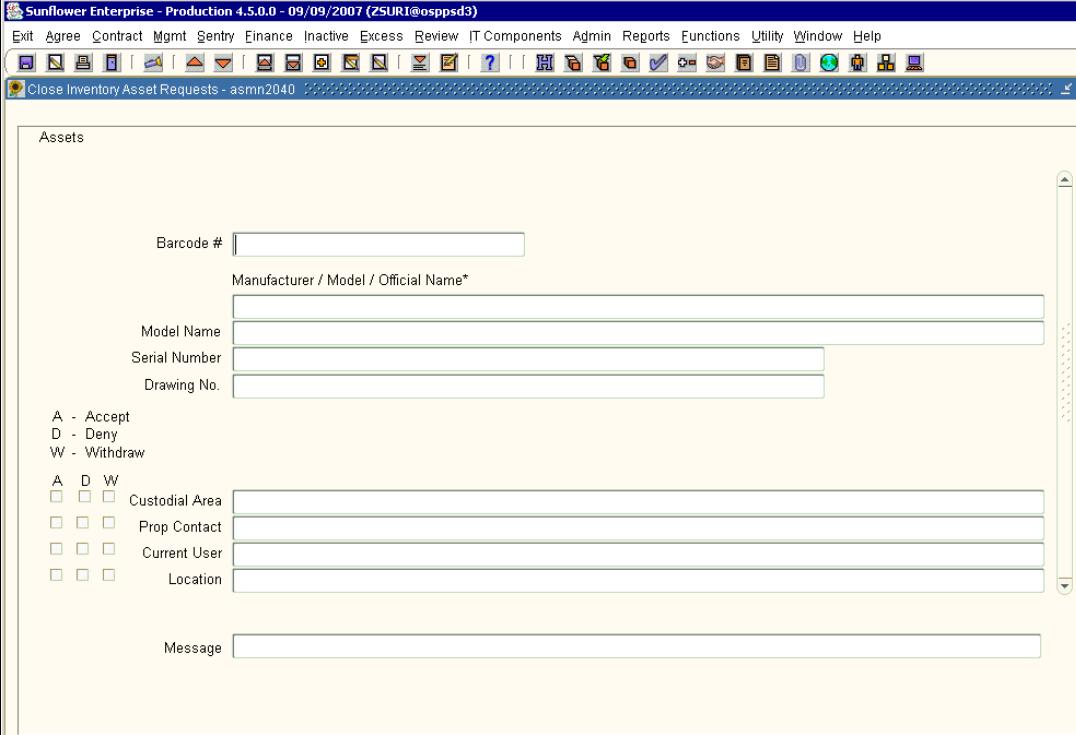

NAV: Withdraw or Deny

Inventory Clerk

M > Mgmt > Close Inventory Asset Requests

Close Inventory Asset Requests

1. In the **Barcode Number** field, enter the barcode number of the asset to be transferred and **Tab** out of the field.

Result: The following fields will be autofilled based upon the decal number selected.

Field	Description
<b>Manufacturer/Model/Official Name</b>	The manufacturer, model number and official name of asset.
<b>Model Name</b>	The model name of the asset.
<b>Serial Number</b>	The serial number assigned by the manufacturer.
<b>Drawing No.</b>	The drawing number of the asset.

2. Select the appropriate checkbox next to each of the below rows.

Select:

- **D** to Deny
- **W** to Withdraw

Withdraw or Deny Transfer

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

<b>Field</b>	<b>Description</b>
<b>Custodial Area</b>	The applicable custodial area for the PC receiving the asset.
<b>Property Contact</b>	The name of the new property contact.
<b>User</b>	The name of the new user.
<b>Location</b>	Select this field to launch the <b>Location</b> sub-form.

3. Select the **Save** button from the toolbar to save your work.

**Result:** The transfer request is withdrawn/ denied.

4. Review the **Message** field at the bottom of the screen to ensure that the action (withdraw or deny) was successfully completed without errors.

**End of activity.**

**Lab #1:** Transfer your Inspiron Laptop Barcode # CD01MMDDYYXX (where MM=Month, DD=Day, YY=Year, and XX=your student number) to the custodial area 55002A013.

**Lab #2:** Generate the Report for Inventory Assets with Requests to identify assets being transferred to the custodial area assigned to you for training (see your Login Information card). Take note of the first two barcode numbers listed coming from **Current Custodial Code beginning with 55** – you will need them for the next lab.

Barcode #1: \_\_\_\_\_

Barcode #2: \_\_\_\_\_

**Lab #3:** Accept the first two barcode # for transfer from Custodial Area 55002A013 and update the custodial area to the one assigned to you for training (see your Login Information card). Update the Location as your current office.

**Lab #4:** Withdraw the transfer request for the asset from the first lab - Inspiron Laptop Barcode # CD01MMDDYYXX (where MM=Month, DD=Day, YY=Year, and XX=your student number).

## Lesson Summary

- You should now be able to:
  - Summarize the steps used to transfer assets
  - Request a transfer
  - Generate a report to determine whether or not there are any open requests for transfers to your custodial code
  - Accept a transfer coming from within the same Bureau or Region
  - Accept a transfer for assets coming from outside the Bureau or Region for redeployment of excess assets
  - Withdraw a transfer request
  - Deny a transfer

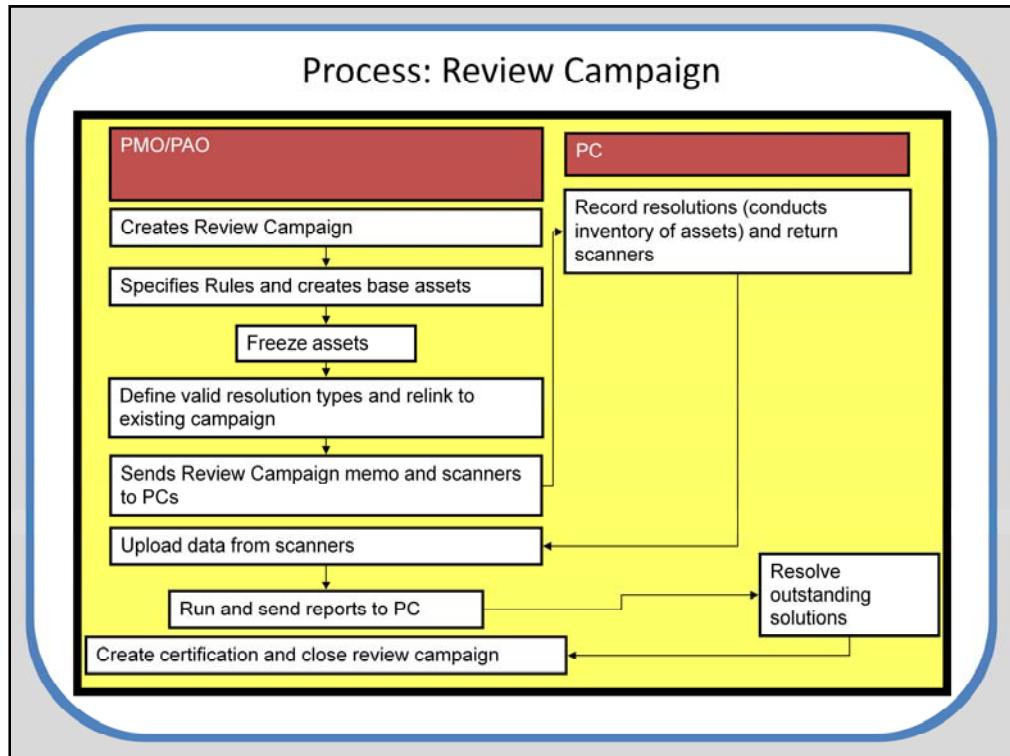

## Chapter 8: Manage a Review Campaign (PMO and PAO)

Sunflower Assets 4.5

## Lesson Objectives

- After this lesson you should be able to:
  - Define Roles involved in a review campaign
  - Set up a review campaign
  - Use MobileTrak to upload data to scanners
  - Use MobileTrak to download data to Sunflower
  - Run reports to review campaign details and status
  - Close a review campaign

This chapter focuses on the role of the **PMO** and **PAO** during the review campaign.

## Roles Involved in the Review Campaign

<b>DOC Role:</b>	Property Management Officer (PMO) Property Accountability Officer (PAO) Property Custodian (PC)
<b>Sunflower System Responsibilities:</b>	Inventory Clerk Agreement Clerk Administrator <b>Review Manager</b> <b>Review Clerk</b>

PMOs will be set up as Review Managers and PAOs and PCs will be set up as Review Clerks.

Review Managers have access to and can manipulate the physical inventory process throughout the organization.

- Create
- Manage
- Close

Review Clerk can only perform management functions related to the review campaign for the custodial area to which they are assigned. The administrator must set at what level within DOC the Review Clerk can work with the assets.

## Set up a Review Campaign

- Steps to setting up a review campaign:
  - Establish rules
  - Create a baseline of assets
  - Freeze the baseline of assets
  - Establish valid date ranges for the review campaign
  - Set up valid resolutions
  - Relink existing resolutions with review campaign

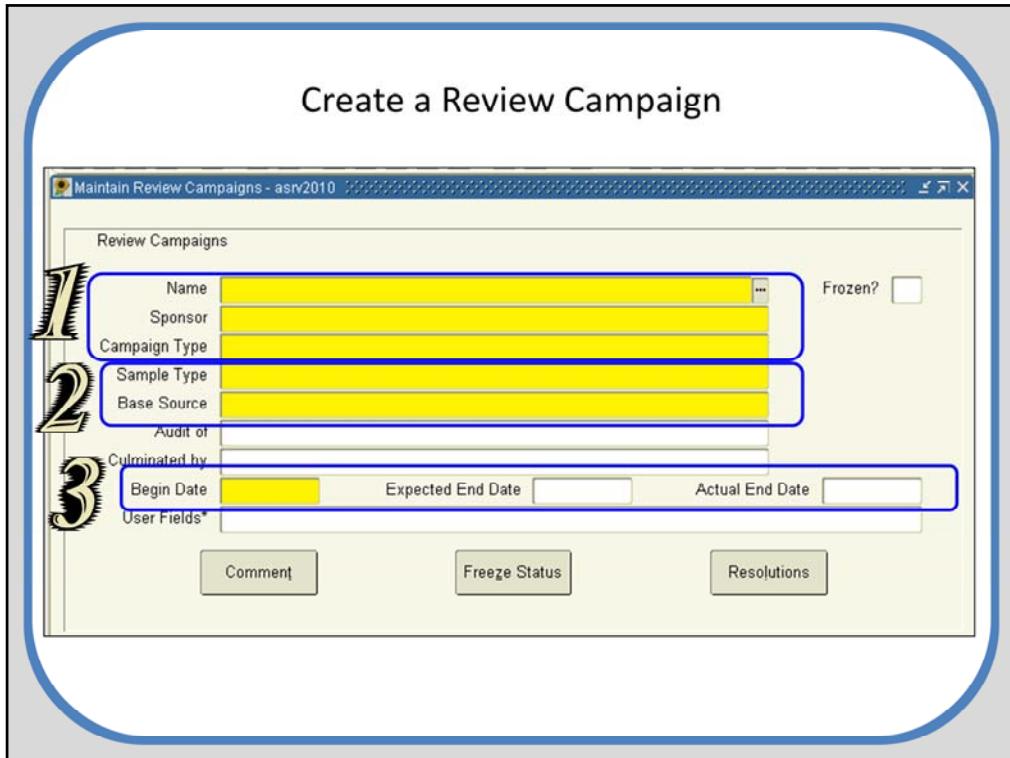

The PMO/PAO creates the review campaign in Sunflower.

Rules govern which assets will be included in the review campaign. DOC may include all assets or use rules to allow only a subset of assets to be inventoried. (For example, all capital assets or all assets within a particular bureau or region).

By creating and freezing a baseline of assets, the assets added to Sunflower after the freezing of the baseline, will not be included in the review campaign. This allows for a set inventory to search for rather than always aiming at a moving target.

Dates can be used to identify the start and expected end of the review campaign. They can also be used to establish when certain forms of resolutions will be accepted (e.g., barcode scanning of assets is available throughout the review campaign, but online resolution of assets is only available 30 days after the start of the review campaign).

Setting up valid resolutions states the ways in which assets will be reconciled with the review campaign. It is possible to allow certain roles to use some resolution types, while preventing others.

**Area 1:** Name the review campaign and identify the sponsor (who's paying for the review campaign). The campaign type identifies Inventory (all assets currently active) or Inactive (assets in storage). DOC will only use the Inventory selection in the Campaign Type field.

**Area 2:**

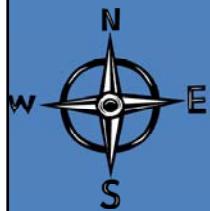

- Using the Population sample is comprehensive and allows for a complete inventory of all assets. Random Sample is used to audit a previous campaign.
- The base source identifies which assets from the Population or Random Sample to include. This screen identifies which of these methods will be used, but will be defined later.

**Area 3:**

- The **Begin Date** is the start of the review campaign. This can be the date it is being entered or a date in the future.
- The **Expected End Date** is the date the review campaign is scheduled to end.
- The **Actual End Date** is the date the review campaign ends. Leave blank until the review cycle is completed.

**Best Practices Recommendation:**

- Conduct a *Population* review thereby conducting a wall-to-wall inventory
- Include the year and Bureau or Region in the Review Campaign name

NAV: Create a  
Review Campaign

## Create a Review Campaign

Review Manager

M > Review > Maintain Review Campaigns

Maintain Review Campaigns

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSURI@osppsd3)". The menu bar includes Exit, Agree, Contract Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, and Window. Below the menu is a toolbar with various icons. The main window title is "Maintain Review Campaigns - asrv2010". The form contains fields for "Name", "Sponsor", "Campaign Type", "Sample Type", "Base Source", "Audit of", "Culminated by", "Begin Date", "Expected End Date", and "Actual End Date". There is also a "User Fields\*" field and a "Frozen?" checkbox. At the bottom are buttons for "Comment", "Freeze Status", and "Resolutions".

1. Enter a unique **Name** for the Review Campaign.

Note: The naming convention for this field should be followed as YYYY\_Bureau or Region\_Specific Name (if any).

2. In the **Sponsor** field, use the LOV to select the name of the organization sponsoring the Review Campaign.

Note: Select the Bureau or Region Name.

3. In the **Campaign Type** field, use the LOV to select **Inventory** as the type of campaign being performed.

4. In the **Sample Type** field, use the LOV to select **Population**.

5. In the **Base Source** field, use the LOV to select **Rule Generated**.
6. Complete the following optional fields, if applicable (i.e. if auditing a prior Review Campaign):

<b>Field Name</b>	<b>Description/Explanation</b>
<b>Audit of</b>	Specify the name of a prior Campaign Review for which you are performing an audit.
<b>Culminated by</b>	Refers to the population campaign that will be used to validate this campaign. Use when the sample type = <i>random sample</i> .

7. Enter or select the **Begin Date** for the Review Campaign.
8. Enter or select the **Expected End Date** for the Review Campaign.
9. Select the **Save** button from the toolbar to save your work.

**Result:** The message field at the bottom of the screen will indicate the record is complete.

**Example:** Below is a complete **Maintain Review Campaigns** window:

Name	2007_ITA_TRAINING	Frozen?	<input type="checkbox"/>
Sponsor	55001A		
Campaign Type	INVENTORY		
Sample Type	POPULATION		
Base Source	RULE GENERATED		
Audit of			
Culminated by			
Begin Date	09/09/2007	Expected End Date	01/31/2008
User Fields*			
<b>Comment</b>		<b>Freeze Status</b>	<b>Resolutions</b>

### **End of activity.**

## LAB: Create a Review Campaign

Create a Review Campaign with the following parameters:

Name = Type in Your Student ID number + today's date (e.g., Student0109152007)

Sponsor = ITA (or 55)

Campaign Type = Inventory

Sample Type = Population

Base Source = Rule Generated

Begin Date = 05/30/2009

End Date = 11/15/2009

The screenshot shows the 'Maintain Review Base - asrv2040' window titled 'Create a Baseline of Assets'. The window is divided into several sections:

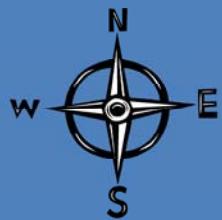

- Review Campaigns:** This section contains fields for 'Name' (SP2007), 'Sponsor' (01-FIELD OFFICE), 'Sample Type' (POPULATION), and 'Base Source' (RULE GENERATED). A blue box highlights this area.
- Base Rules:** This section includes a 'Base Rule Details - Criteria' table. A blue box highlights the first row of this table, which shows 'ASSET VALUE' as the Attribute, ' $\geq$ ' as the Operator, and '25000' as the Operand. A large blue circle surrounds this entire section.
- Numbered Labels:** Three large, stylized numbers are overlaid on the interface: '1' is next to the 'Review Campaigns' section, '2' is next to the 'Base Rules' section, and '3' is positioned to the left of the 'Base Rule Details' table.

- **Area 1:** This information was previously identified when creating the review. The **Maintain Review Base** form opens in query mode allowing the user to enter the name of the campaign and then select **Find**.
- **Area 2:** Each **Base Rule** will have its own unique identifier established by the user. There can be multiple base rules for a campaign. To enter additional base rules, use the **Insert Record** icon on the toolbar.
- **Area 3:** The **Base Rule Details** define the Base Rule. There may be multiple base rule details per base rule.

All conditions (Base Rule Details) for the Base Rule constitute an **AND**. If multiple Base Rules are used, they constitute an **OR**. For example if Base Rule #1 states asset value  $\geq$  25000 AND custodial area = 50 then assets must meet **both** of those conditions to be included. However if Base Rule #1 states asset value  $\geq$  25000 and Base Rule #2 states custodial area = 50 then assets may meet **either** of those conditions to be included.

**Best Practices Recommendation:**

- Include all inventory assets in the review campaign
- Establish the specific Bureau or Region here

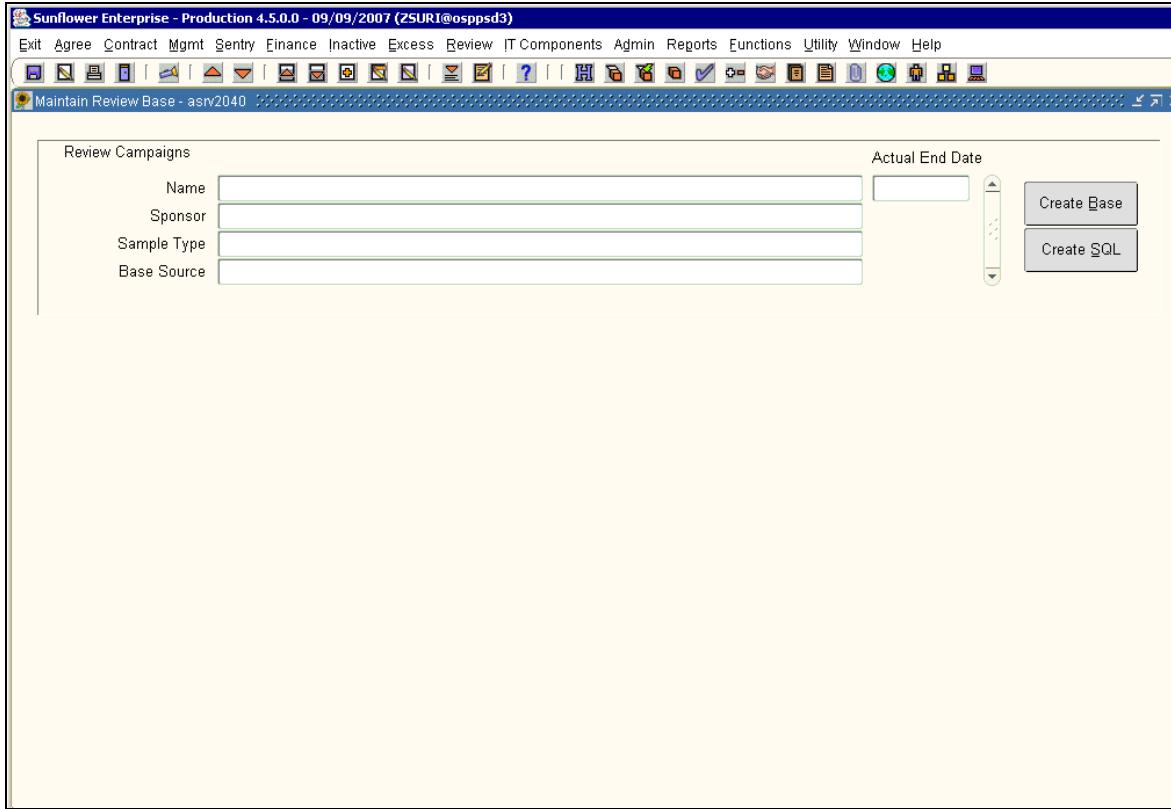

NAV: Create a  
Baseline

## Create a Baseline

Review Manager

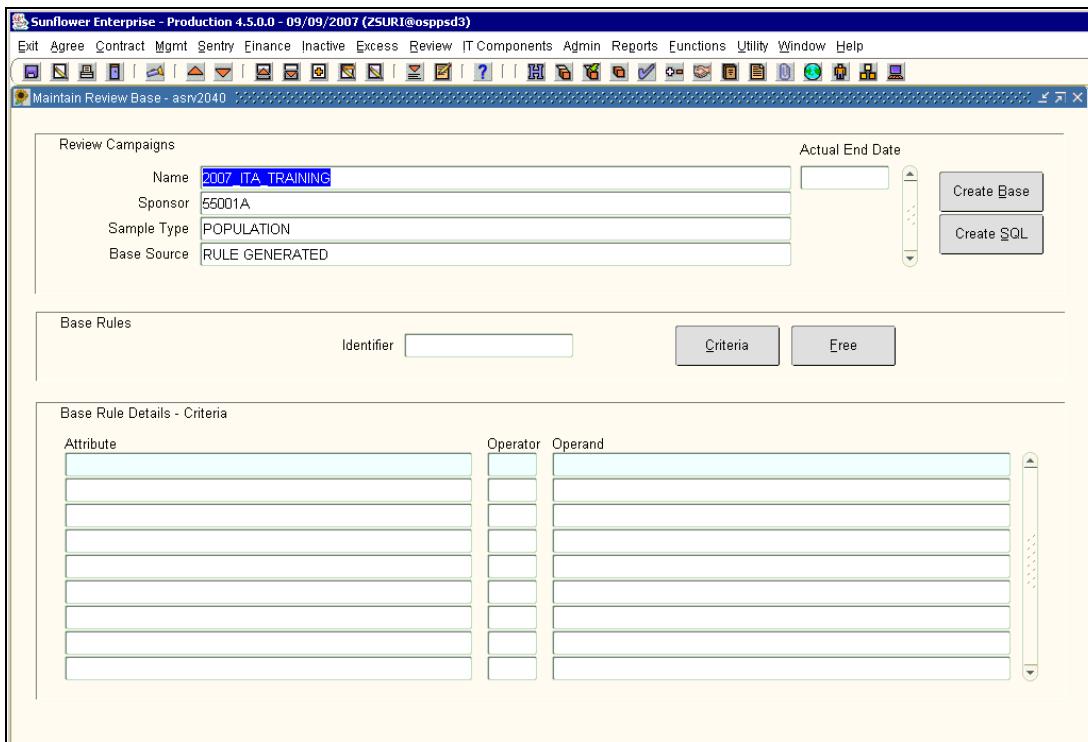

M > Review > Maintain Review Base

Maintain Review Base

1. Enter the Review Campaign Name in the **Name** field.
2. Select the **Find** icon to execute the query.

Result: The review campaign properties autofill.

3. Enter a unique Base Rule Identifier in the **Identifier** field.
4. In the **Attribute** field, enter or select **INTEREST ASSET TYPE**.
5. In the **Operator** field, enter or select the = sign.
6. In the **Operand** field, enter or select **INVENTORY ASSET**.
7. In the next blank **Attribute** field, enter or select **Manager**.
8. In the **Operator** field, enter or select the = sign.
9. In the **Operand** field, enter or select the **Bureau or Region**.

**Note 1:** This means that you are creating a review campaign for all assets assigned to the Interest Asset Type: Inventory Asset **and** a specific Bureau or Region (e.g., ITA).

10. Select the **Save** button from the toolbar to save your work.

**Result:** The assets to be included in the baseline have been selected.

11. Select the **Create Base** button.

**Result:** This will create a base for all assets assigned to you, and will also save the baseline.

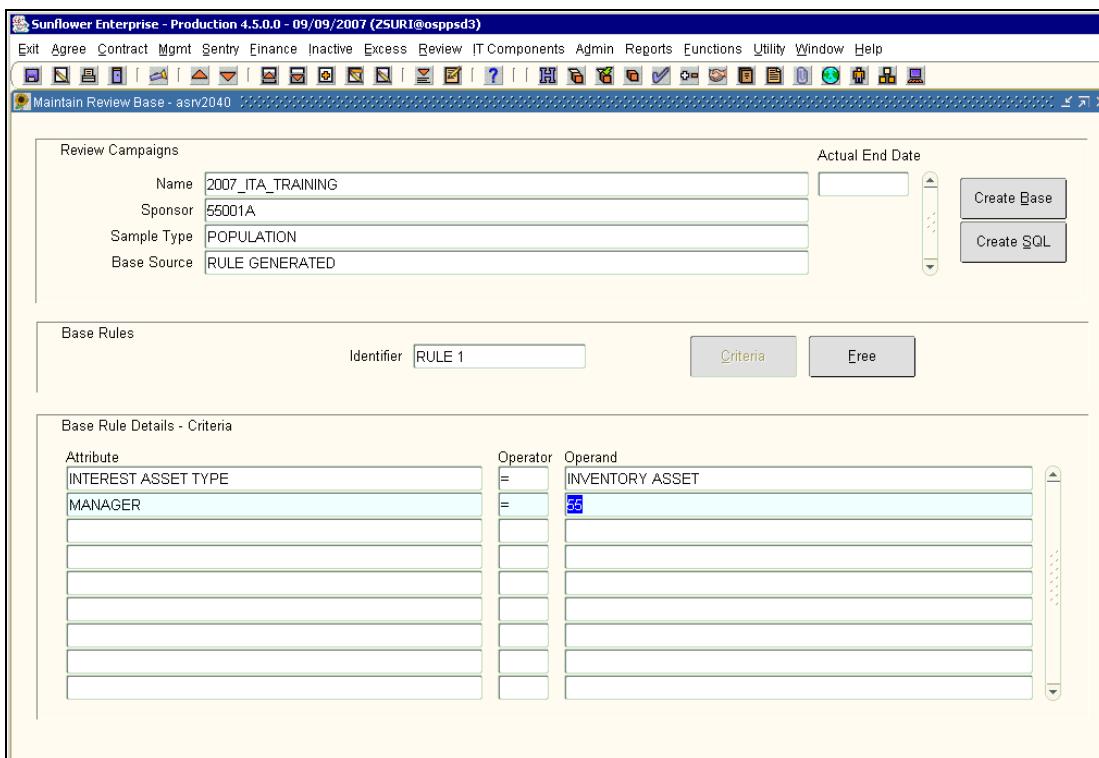

#### Create a Baseline

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

**Result:** A pop-up window appears displaying how many baseline assets were created based on the Base Rules.

12. Select the **OK** button.

**Example:** Below is a complete **Maintain Review Base** window:

**End of activity.**

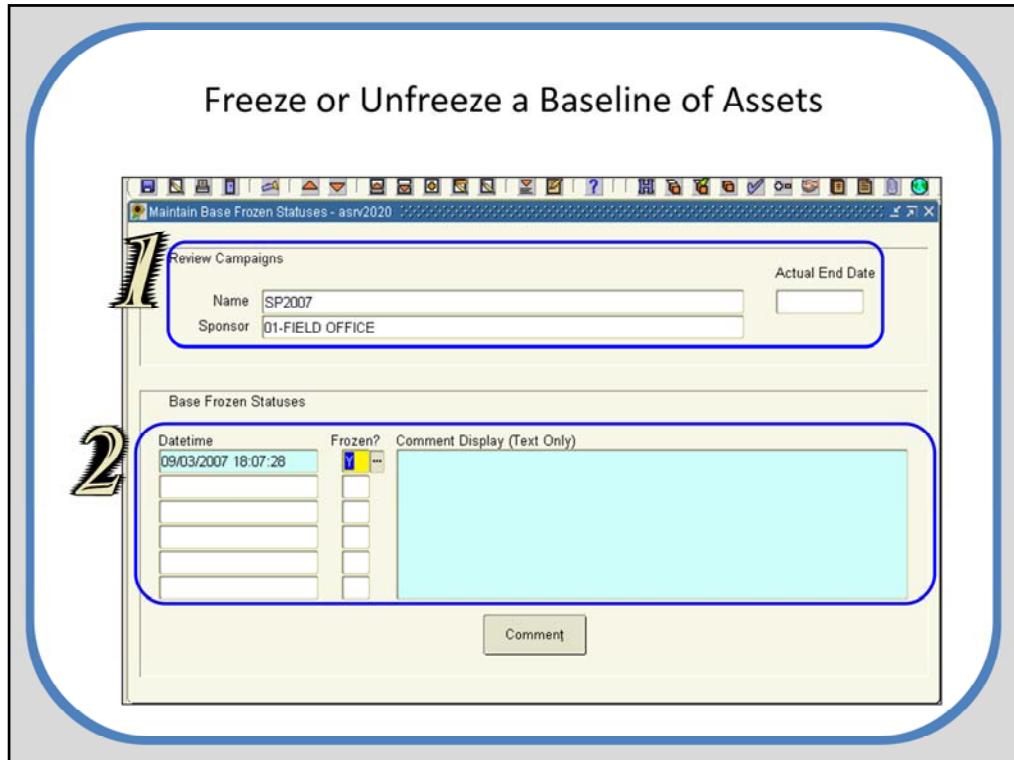

Create a Baseline

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

## LAB: Create a Baseline

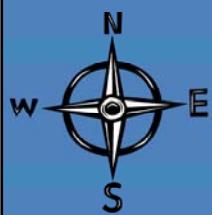

Search for and use the review campaign you created with the name **Student ID number + today's date** (e.g., Student0109152009). Create the baseline following the instructions in the NAV, Create a Baseline on the preceding pages.

By freezing your campaign you are establishing a set inventory to easily identify lost assets and assets found during inventory. If you did not freeze your campaign your inventory would be a constant moving target. It may be necessary to unfreeze a campaign (for example, a change in the Base Rules) to add or remove inventory assets from your review campaign.

**Area 1:** This information was previously identified when creating the review. The **Maintain Base Frozen Status** form opens in query mode allowing the user to enter the name of the campaign and then select find.

**Area 2:** The **Datetime** defaults to the current date and time. This may be changed based on your review campaign parameters. Enter **Y** to freeze the base assets for the specified campaign. Enter a **N** to unfreeze assets. Always use a new line, do not change a line that has already been saved. Comments may be included as necessary.

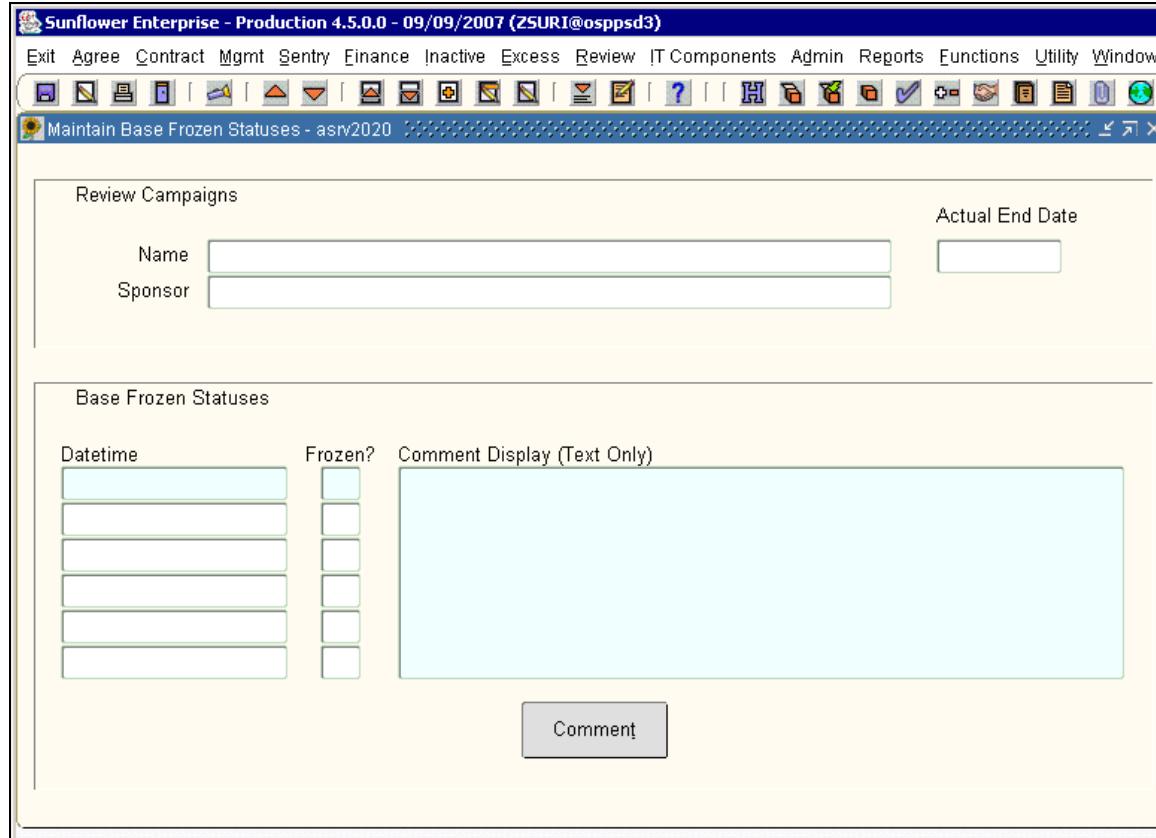

NAV: Freeze or Unfreeze  
Baseline Assets

## Freeze or Unfreeze Baseline Assets

Review Manager

M > Review > Maintain Base Frozen Statuses

Maintain Base Frozen Statuses

1. Enter the Review Campaign Name in the **Name** field.
2. Select the **Find** icon to execute the query.

Result: The remaining fields autopopulate.

If freezing this review campaign for the first time, goto task #3. Otherwise, goto task #4.

3. Enter a **Y** in the **Frozen?** field next to the first **Datetime** entry.

**Goto task #5**

4. Whether Freezing or Unfreezing, under **Datetime**, select an empty row, then **Tab**.
  - To *Freeze* the base: Under **Frozen**, select **Y**.

- To *Unfreeze* the base: Under **Frozen**, select **N**.
5. Select the **Save** button from the toolbar to save the record.

Result: The message on the status bar displays that the record was saved successfully.

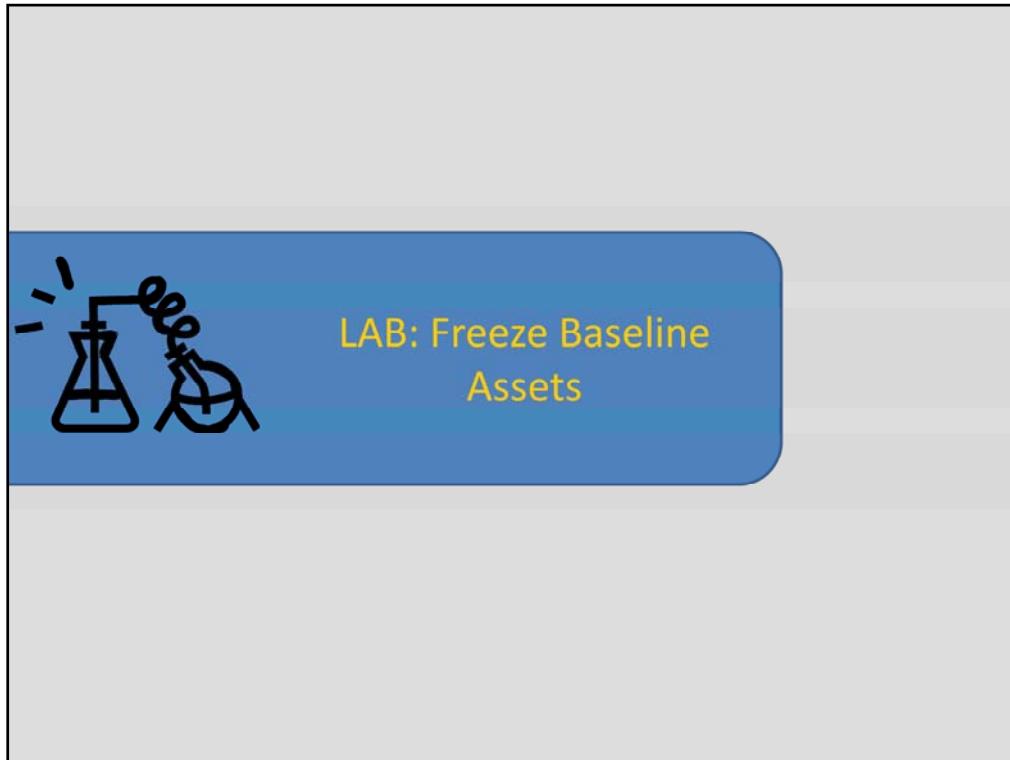

Example: Below is a sample of a completed **Maintain Base Frozen Statuses** window:

The screenshot shows the Sunflower Enterprise application window titled "Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSURI@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, and Window. The toolbar contains various icons for file operations like Open, Save, Print, and Database management. The main window title is "Maintain Base Frozen Statuses - asrv2020".

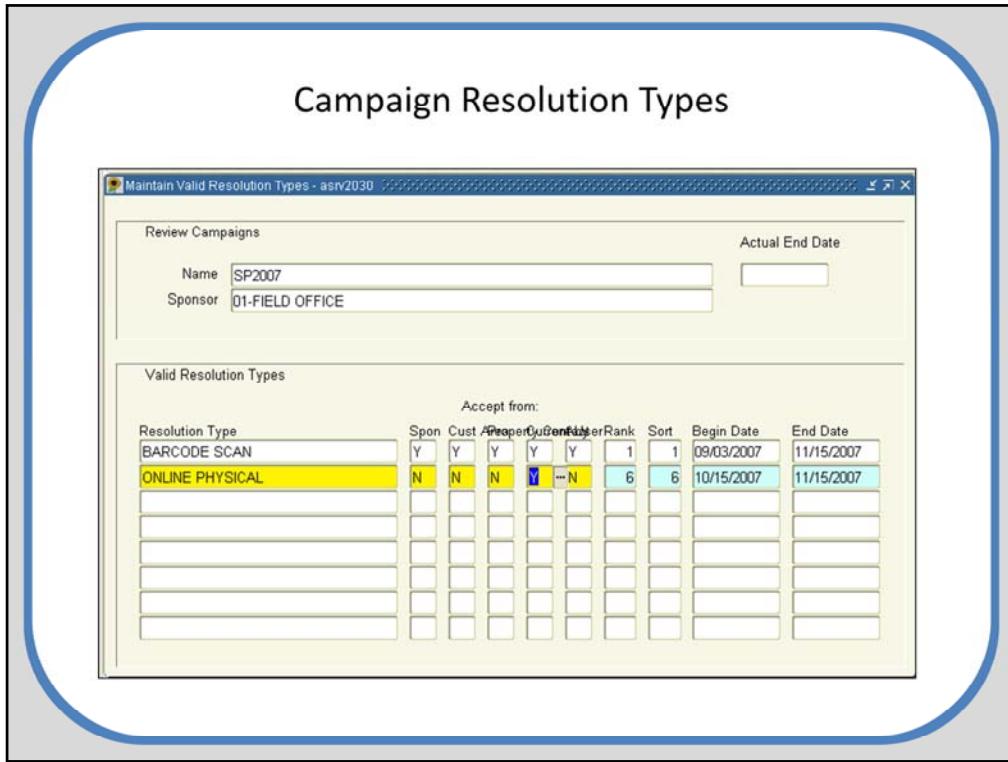

The window is divided into two main sections:

- Review Campaigns:** Contains fields for Name (2007\_ITA\_TRAINING) and Sponsor (55001A). There is also a placeholder for Actual End Date.
- Base Frozen Statuses:** A table with columns: Datetime, Frozen?, and Comment Display (Text Only). The first row shows a Datetime of 09/09/2007 11:31:32, a Frozen? status of Y (Yes), and an empty comment area. A "Comment" button is located below this row.

**End of activity.**

Freeze the baseline assets for the review campaign you created with the name **Student ID number + today's date** (e.g., Student0109152009).

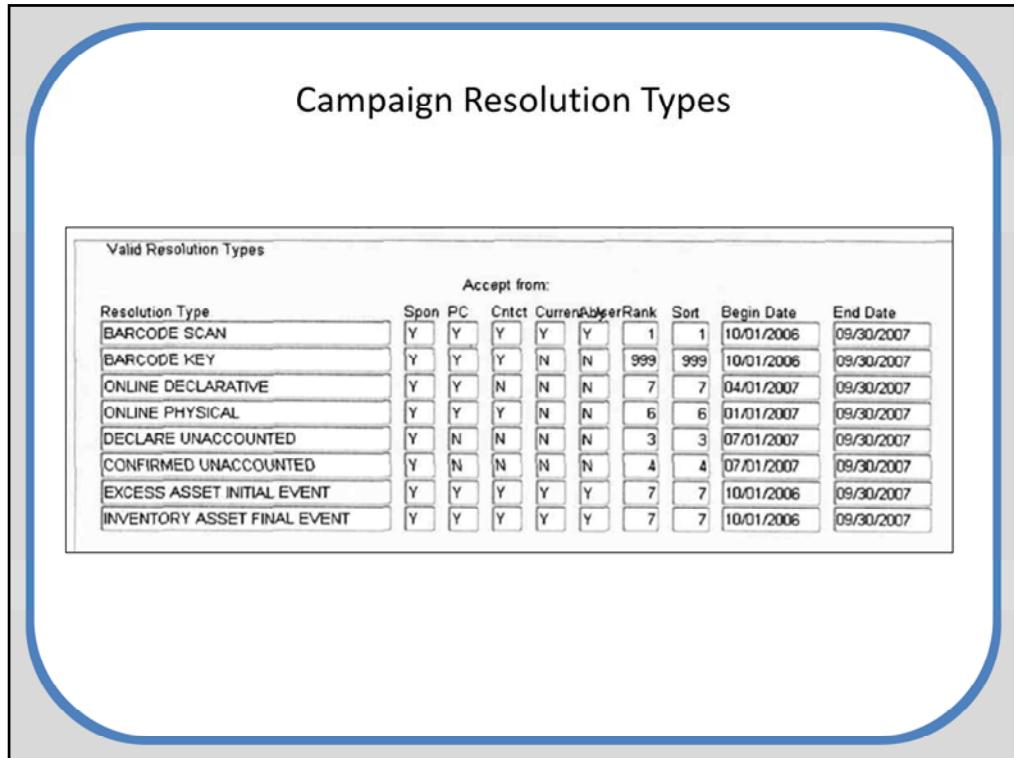

The PMO/PAO determines which resolution types are valid for the review campaign.

- Barcode Scan – physically find and scan the asset
  - Barcode Key – physically find the asset and key in the barcode
  - Confirmed Unaccounted – indicates asset not in your possession (transfer, repair, etc.)
  - Declared Unaccounted – remove an open item from the reporting cycle
  - Online Declarative – know the asset exist but cannot see it (orbiting satellite)
  - Online Physical – can not scan asset but can see and attest to physical location
  - Excess Asset Initial Event – when an excess asset is created
  - Inventory Asset Final Event – when an asset is given a final event (e.g., retired)

For each resolution type used at the Department of Commerce, you will need to establish:

- **Accept From:** Identifies which user may use this resolution type during the review (e.g., every user may use the Barcode Scan, but only the PC can do Online Physical resolutions)
  - **Rank:** Defaults to 1. If using more than one resolution type, ranking resolutions helps determine which type takes precedence over another.
  - **Sort:** Determines the order of which the resolutions appear in a report.
  - **Begin Date** and **End Date:** Defines the date range during which the resolution type is acceptable. For example, Barcode Scans are acceptable throughout the inventory campaign, but Online Physical is only acceptable for the last 30 days of a review campaign.

The above screen shot shows the best types of resolutions to select when conducting a review campaign. Note that not all users are allowed to enter all types of resolutions and the date range is also limited for some resolution types. It is a good idea to allow all users the ability to scan and allow scanned assets to be accepted throughout the campaign.

NAV: Enter Valid  
Resolution Types

## Enter Valid Resolution Types

Review Manager

M > Review > Maintain Valid Resolution Types

Maintain Valid Resolution Types

The screenshot shows the Sunflower Enterprise interface with the title bar "Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (Z5URI@osppsd3)". The menu bar includes Exit, Agree, Contract Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, and Window. The toolbar below has various icons for file operations like Open, Save, Print, etc. The main window title is "Maintain Valid Resolution Types - asrv2030". The interface is divided into sections: "Review Campaigns" with fields for Name and Sponsor, and "Valid Resolution Types" which contains a table with columns for Resolution Type, Spon, PC, Cntct, Current, Abbr, Sort, Begin Date, and End Date.

1. Enter the Review Campaign Name in the **Name** field.

2. Select the **Find** icon from the toolbar to execute the query.

Result: The Sponsor populates.

3. Select the **Resolution Type** field in the Valid Resolution Types section.

Note: The **Resolution Types** outline the types of resolutions, or finds, that are acceptable for the assets in your Review Campaign base.

4. Select a **Resolution Type** from the LOV and **Tab** to the next field. The following table describes the types of resolutions:

Field	Description	Required?
<b>BARCODE SCAN</b>	An asset is given this resolution type when the item's decal is scanned using the barcode reader. This is an automatic process.	Yes
<b>BARCODE KEY</b>	An asset is given this resolution type when the item's decal number is manually keyed into the scanner (barcode may be damaged, for example.) This is an automatic process.	Yes
<b>ONLINE DECLARATIVE</b>	An asset is given this resolution type when you cannot see the asset but know it to exist (e.g., a satellite in orbit).	Yes
<b>ONLINE PHYSICAL</b>	An asset is given this resolution type when you cannot scan an asset but you can see and attest to the location of where it exists. You <b>must</b> provide a location in this case. This must be a manual entry.	Yes
<b>DECLARED UNACCOUNTED</b>	An asset is given this resolution type when the asset needs to be removed from the inventory.	
<b>CONFIRMED UNACCOUNTED</b>	An asset is given this resolution type when the item is confirmed to be out of your possession. This must be a manual entry.	Yes
<b>EXCESS ASSET INITIAL EVENT</b>	An asset is given this resolution type when an excess asset is created.	Yes
<b>INVENTORY ASSET FINAL EVENT</b>	An asset is given this resolution type when an asset is accepted as a final event. (e.g., an asset is retired).	Yes

Note: Additional **Resolution Types** can also be selected if needed.

5. **Tab** to the next field.
6. Use the **Accept from:** fields to update the people resolutions will be accepted from to accord with the following table:

Resolution Type	Spon	PC	Contact	User	Any
<b>BARCODE SCAN</b>	Y	Y	Y	Y	Y
<b>BARCODE KEY</b>	Y	Y	Y	Y	Y
<b>ONLINE DECLARATIVE</b>	Y	Y	N	N	N
<b>ONLINE PHYSICAL</b>	Y	Y	Y	N	N
<b>DECLARE UNACCOUNTED</b>	Y	N	N	N	N
<b>CONFIRMED UNACCOUNTED</b>	Y	N	N	N	N
<b>EXCESS ASSET INITIAL EVENT</b>	Y	Y	Y	Y	Y
<b>INVENTORY ASSET FINAL EVENT</b>	Y	Y	Y	Y	Y

Enter Valid Resolution Types

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

7. Enter the first date the resolutions will be accepted in the **Begin Date** field.

Note: If a begin date is not selected, any resolutions from previous Review Campaigns could be linked to the current Review Campaign.

Note 2: Barcode Scan, Barcode Key, Excess Asset Initial Event, and Inventory Asset Final Event should be accepted for the duration of the Review Campaign. The remaining resolution types should be limited in their duration, usually after allowing a minimum of three months for an initial review period.

8. Select the **Save** button from the toolbar to save your work.

Note: The message on the status bar will indicate that the record was successfully saved.

Example: Below is an example of a completed **Maintain Valid Resolution Types** window:

The screenshot shows the Sunflower Enterprise software interface with the title 'Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSURI@osppsd3)'. The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, and Window. The toolbar below has various icons for file operations like Open, Save, Print, etc. The main window is titled 'Maintain Valid Resolution Types - asrv2030'. It displays two sections: 'Review Campaigns' and 'Valid Resolution Types'.

**Review Campaigns** section:

Name	2007_ITA_TRAINING	Actual End Date
Sponsor	55001A	

**Valid Resolution Types** section:

Resolution Type	Accept from:							
	Spon	PC	Cntct	Current	Abber	Sort	Begin Date	End Date
BARCODE SCAN	Y	Y	Y	Y	Y	1	10/01/2007	09/30/2008
BARCODE KEY	Y	Y	Y	N	N	999	10/01/2007	09/30/2008
ONLINE DECLARATIVE	Y	Y	N	N	N	7	04/01/2008	09/30/2008
ONLINE PHYSICAL	Y	Y	Y	N	N	6	01/01/2008	09/30/2008

INVENTORY ASSET FINAL EVENT	Y	Y	Y	Y	Y	7	10/01/2007	09/30/2008

**End of activity.**

Enter Valid Resolution Types

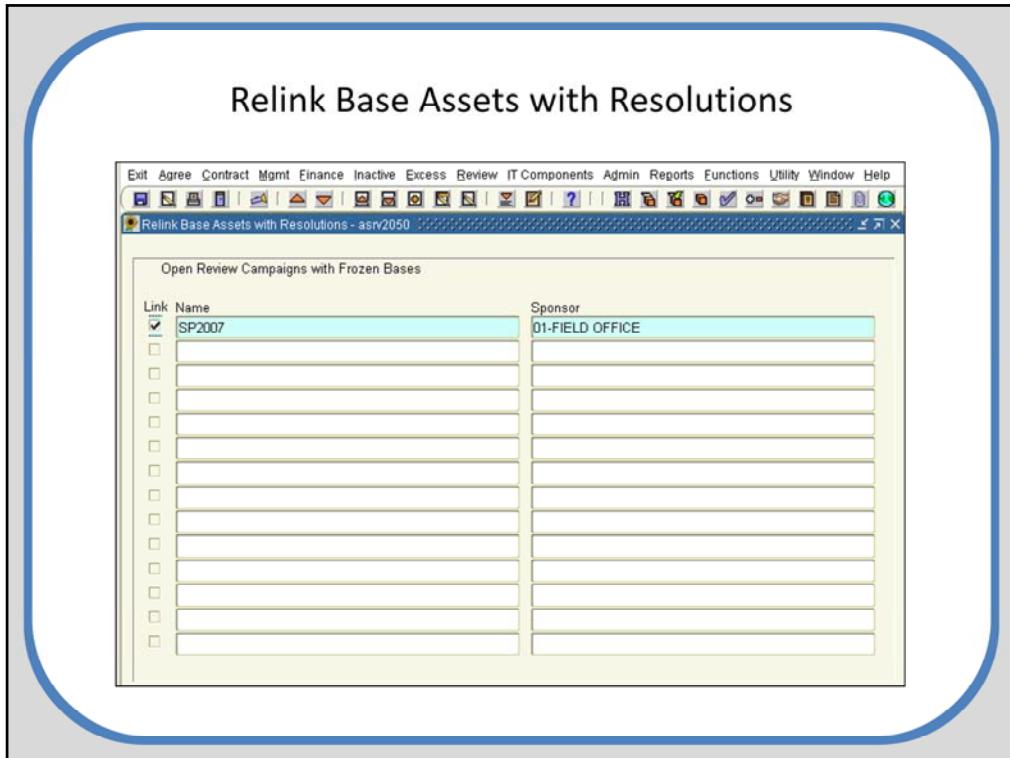

Sunflower Systems © 2009, All Rights Reserved

SF 4.5

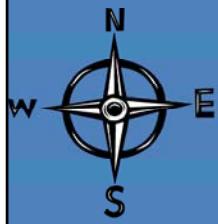

LAB: Enter Valid  
Resolution Types

Create Valid Resolution Types for the review campaign you created with the name **Student ID number + today's date** (e.g., Student0109152009).

Every time a base is frozen OR anything on the valid resolution types is changed then you should re-link any resolutions for that review campaign. Re-linking resolutions accounts for any resolutions that already exist for the base of the review campaign but are not associated (linked) with that review campaign.

Any new resolution that is created is checked against the valid resolution types of each review campaign that the asset is a part of its base. If the asset is part of the base of a review campaign and if the resolution type, date and recorded by are valid according to the rules of the valid resolution types of a review campaign then that resolution will be automatically linked with that review campaign. But any old resolution that is already recorded in the past and is valid based on the valid resolution types of a review campaign will not be linked with that review campaign until you do the re-link step.

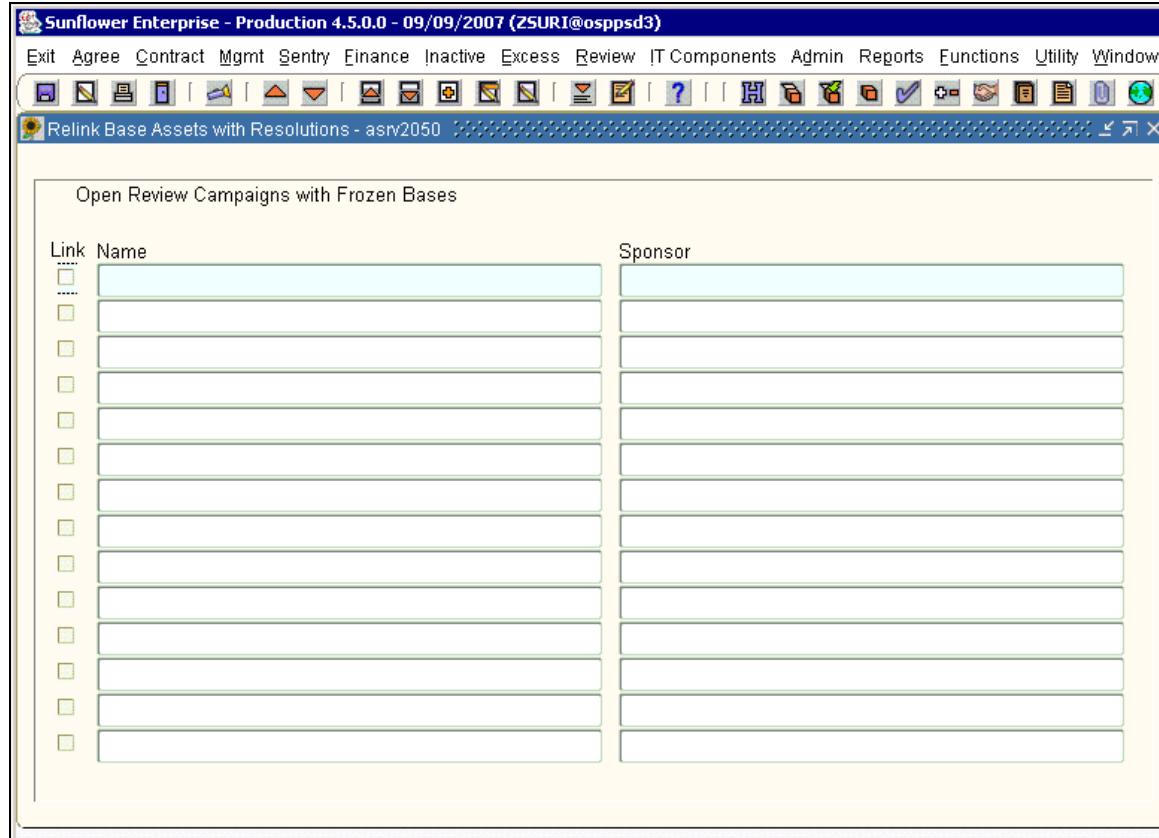

NAV: Relink Base Assets  
with Resolutions

## Relink Base Assets with Resolutions

SF 4.5

**Example:** Below is a sample window of campaigns with relinked resolutions:

**End of activity.**

### LAB: Relink Base Assets with Resolutions

Relink the base assets with resolutions for the review campaign you created with the name **Student ID number + today's date** (e.g., Student0109152009).

## Memo to PCs

- Includes the Review Campaign Plan
- Begin and End Dates of the Review Campaign
- Dates that each campaign resolution type (barcode scan, online resolution) will be accepted
- Some PCs will also receive a barcode scanner

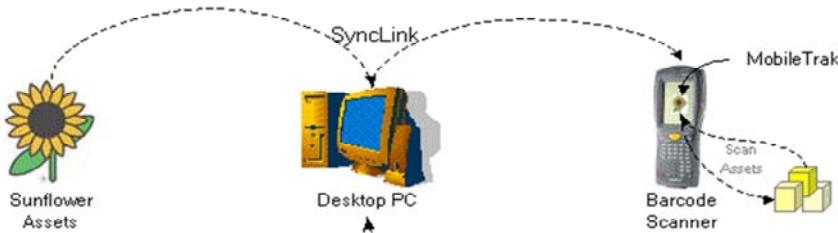

## Sunflower MobileTrak™

- Sunflower Assets inventory management tool.
- Deployed via a fully integrated barcode reader that records and delivers asset information to your Sunflower Assets database.
- Supports the physical inventory (review) process in multiple locations whether the assets are located in one building, across town, or across the country.

MobileTrak includes all of the files needed to perform a physical inventory with your barcode scanner. It is downloaded with all of DOC's asset data which includes values in the List of Values fields. Identification of an asset for physical inventory begins by defining a review campaign in Sunflower Assets. Once the campaign is defined, the data is downloaded from Sunflower Assets to the scanner. The scanner can then be used to locate and scan the asset's barcode, the asset identifier.

## Barcode Scanner Software Suite

- Sunflower SyncLink™ runs on your PC and transfers data from the server to the scanner and from the scanner back to the server.
- Sunflower MobileTrak™ runs on your scanner and is used to collect inventory data.
- Sunflower Bar Code Installer is used to install SyncLink™ and MobileTrak™.

## MobileTrak™ - Overview

- Transfer Asset Records (SFA to the Scanner)
- Setup MobileTrak
- Create Resolutions (Scan and Key)
- Transfer Resolutions (Scanner to SFA)

## MobileTrak - Download and Upload Assets

- Before you begin to use MobileTrak you will need to download reference data; consisting of lookups, reference files, and assets from your Sunflower Assets database to your barcode scanner.
- After all assets have been scanned, the data will then be uploaded back to Sunflower.

Inventory asset data is downloaded to the barcode scanners including all values in the LOVs which allows users to update information using the scanners as they are conducting the Review Campaign.

The scanned asset information uploaded to Sunflower is used to compare what was scanned to the assets in the Review Campaign. This information is used to generate reports detailing any errors with scanning assets, identifying any assets found during inventory, and provide a listing of assets still unaccounted for.

NAV: Send Asset  
Records to Scanner

## Send Asset Records to Scanner

Review Manager

I > SyncLink > MobileTrak

Sunflower SyncLink

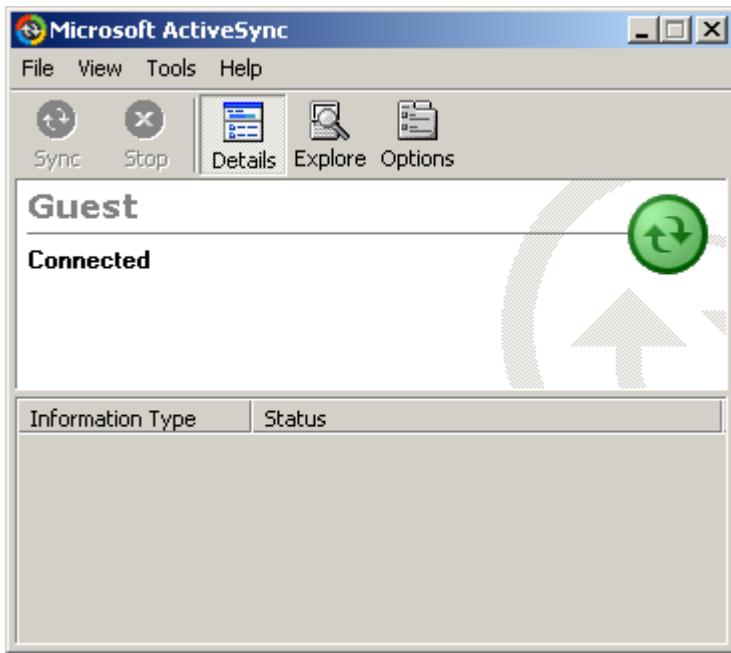

1. Place the scanner in its cradle.

Result: A dialog box for **Microsoft ActiveSync** appears, as shown in the example below:

2. Select **Guest Partnership**.
3. Select **Next**.
4. Review the **Microsoft ActiveSync** dialog box to ensure that you are connected.

Example: Below is a sample of this connection:

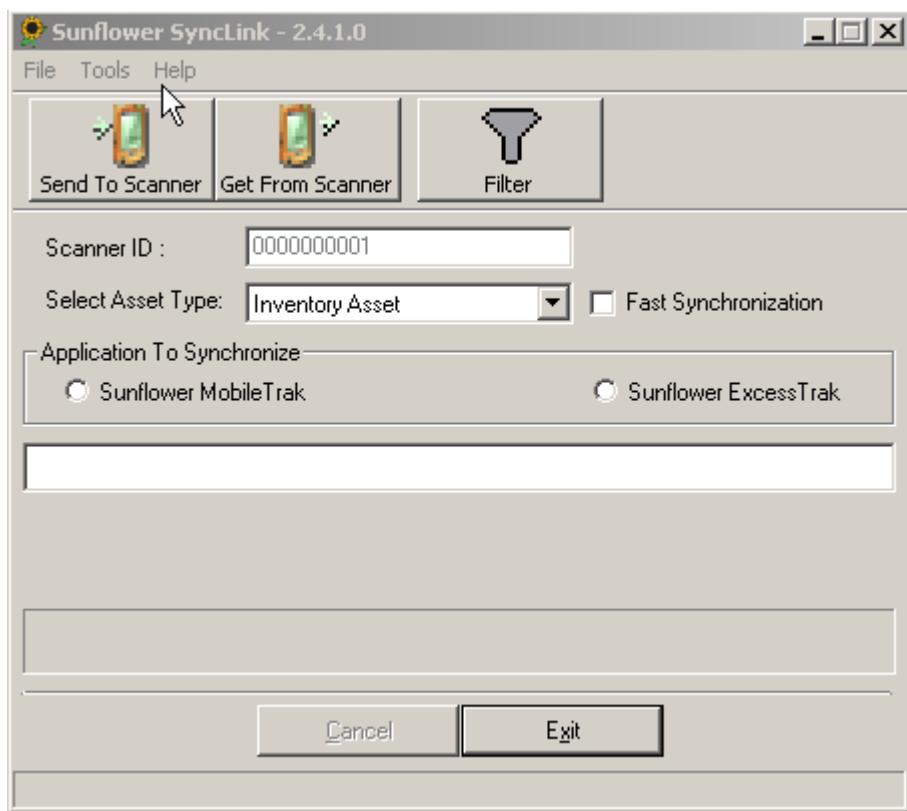

5. Select the **Minimize** button to minimize the window.
6. Select the **Synclink icon** on your desktop.

7. Enter your login information.

**Result:** The Sunflower **Synclink** window appears, as shown in the example below:

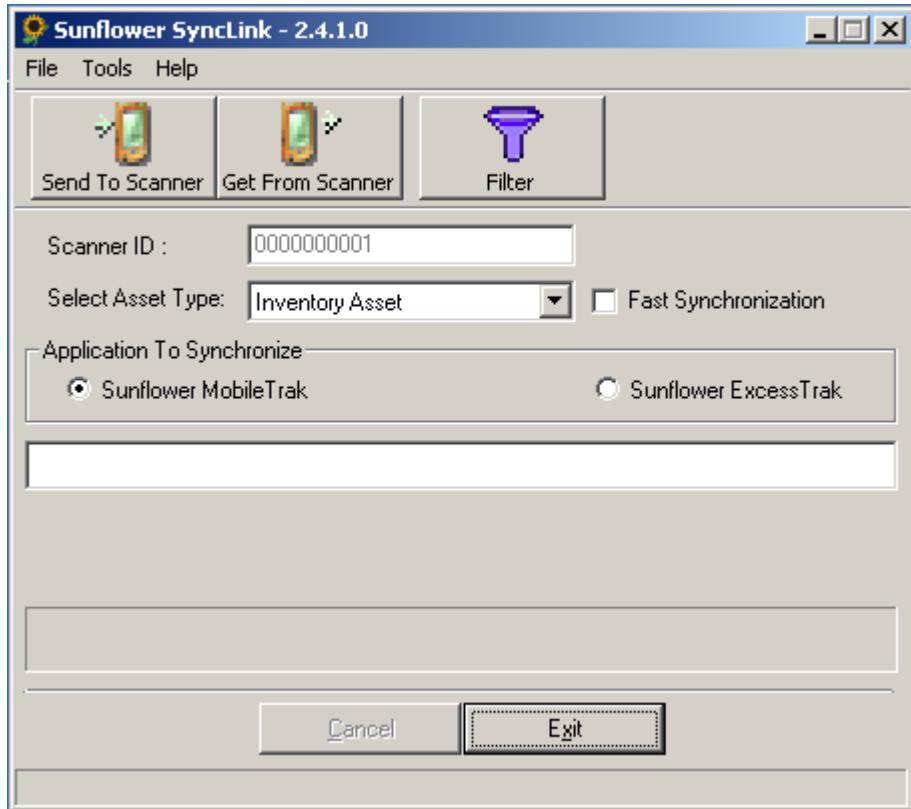

8. In the **Select Asset Type:** field, select **Inventory Asset**.
9. In the **Application to Synchronize** section of the screen, select **Sunflower MobileTrak**.
10. Select the **Filter** button.

**Result:** The SyncLink – Download Filter window is displayed.

11. Select the **Review Campaigns** tab.
12. Select the name of the Review Campaign whose assets you wish to send to the scanner.
13. Select the **Apply** button.
14. Select the **OK** button.

**Result:** The SyncLink Download filter window is closed and you are returned to the Sunflower SyncLink main window.

Note: The **Filter** button is now enabled indicating a filter is being used.

15. Select the **Send to Scanner** button to begin uploading the reference files of assets from the Sunflower Assets database based on the filter criteria selected.

Result: The window will display the progress. When completed, a window will appear indicating the download is complete.

16. Select the **OK** button.
17. To validate the downloading of the assets to the scanner, refer to NAV document *Validate Review Campaign Base Assets*.

Note: The number of assets in MobileTrak should be equal to or greater than the number of assets in the Review Campaign Base Assets report. If it is greater than the number in the report, it means that some new asset records are pending in the

inventory assets interface table either because they were never processed or because there was some error.

**End of activity.**

## LAB: Send Asset Records to Scanner

*Check with your instructor to determine if scanners are available for conducting this Lab.*

NAV: Upload  
Resolutions from  
Scanner

## Upload Resolutions from Scanner

I > SyncLink

Sunflower SyncLink

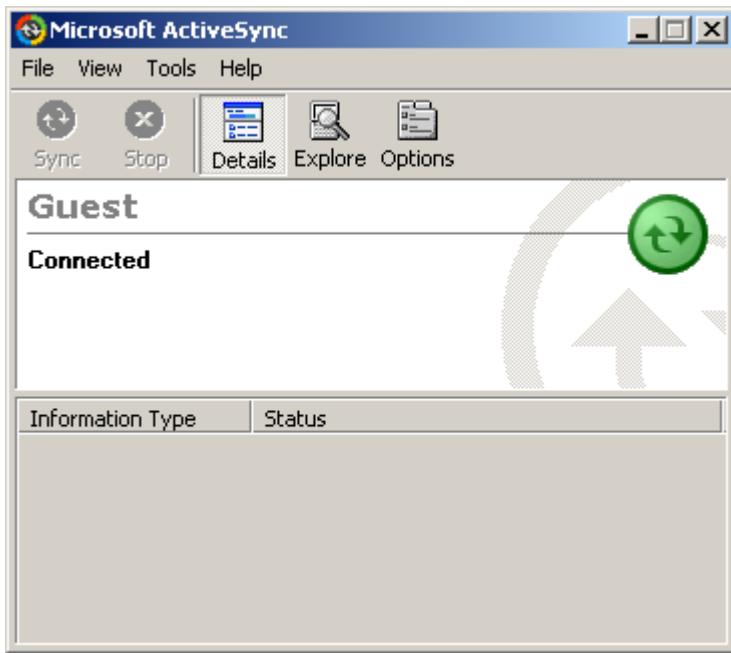

1. Place the scanner in its cradle.

Result: A dialog box for **Microsoft ActiveSync** appears, as shown in the example below:

2. Select **Guest Partnership**.
3. Select **Next**.
4. Review the **Microsoft ActiveSync** dialog box to ensure that you are connected.

Example: The screen shot below shows an example of being connected:

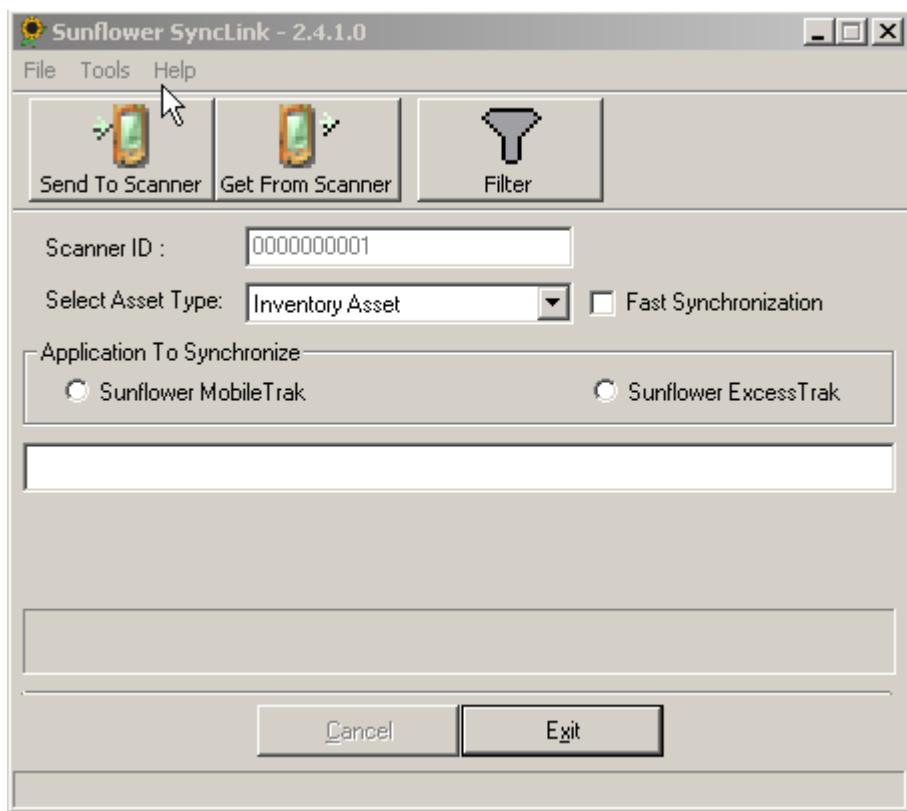

5. Select the **Minimize** button to minimize the window.
6. Select the **Synclink icon** on your desktop.

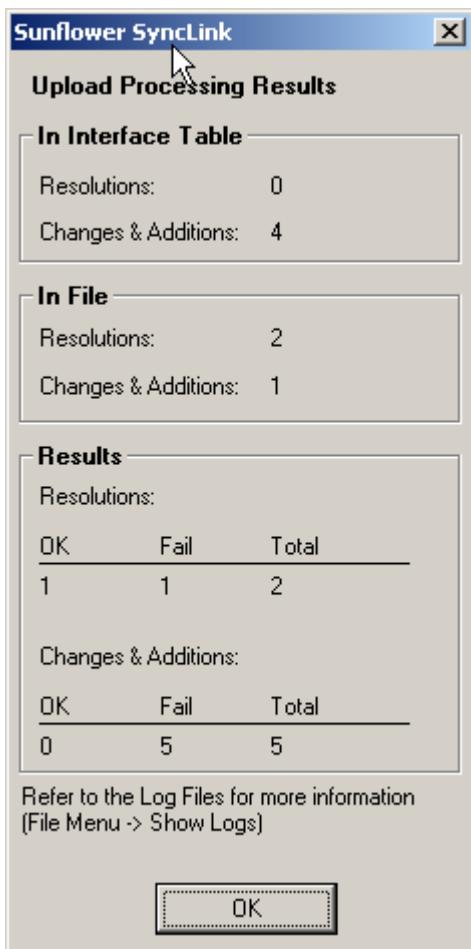

7. Enter your login information.

**Result:** The Sunflower **Synclink** window appears, as shown in the example below:

8. Select the **Sunflower MobileTrak** radio button.
9. Select the **Get From Scanner** button to begin uploading the files of assets from MobileTrak into the Sunflower Assets database.
10. When the upload is complete, **SyncLink** generates and displays an **Upload Processing Results** screen for verification, as shown in the example below.

- **In Interface Table** shows records pending processing in the interface table prior to loading from the scanner.
  - **In File** shows records that will be transferred from the scanner into the interface table.
  - **Results** shows results of processing *all* records in the interface table, which includes all existing interface records prior to loading from scanner and the records loaded from the scanner.
11. When asked if you would like to **Delete Upload Files from Barcode Reader**, select **Yes**, as shown in the example below.

12. When told to **Restart MobileTrak**, select **OK**, as shown in the example below.

13. When told to **Upload Processing Results**, select **OK**.

**End of activity.**

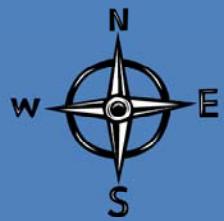

## LAB: Upload Resolutions from Scanner

*Check with your instructor to determine if scanners are available for conducting this Lab.*

## Review Scanned Resolutions

- Goal: to have all resolutions accepted
- Three primary reasons why a scanned resolution will fail:
  - New asset not created successfully and is sent to auxiliary resolution table
  - One of the location fields was entered incorrectly (site or building)
  - Person entering resolutions incorrectly entered their ID

Run this report based on the scanner code and after the data from the scanner has been transferred (uploaded) to Sunflower.

At the bottom of the grid, there are two buttons: "Previously Run Report" and "Reports Main Menu".

1. Select **Inventory Asset Interface Processing Results**.

**Result:** The **Inventory Asset Interface Processing Results** parameters window displays:

2. In the **Load Group LOV**, select the Load Group number.
3. Select **Submit**.

Result: A window displays that allows you to review the report parameters:

Selected by	Value
Load Group	

4. Select the **Acrobat** radio button.

Generate Report of Assets Found During Inventory  
 Sunflower Systems © 2009, All Rights Reserved  
 SF 4.5

**5. Select eXecute.**

Result: The report displays in a separate window, allowing you to review the results of the inventory asset interface processing.

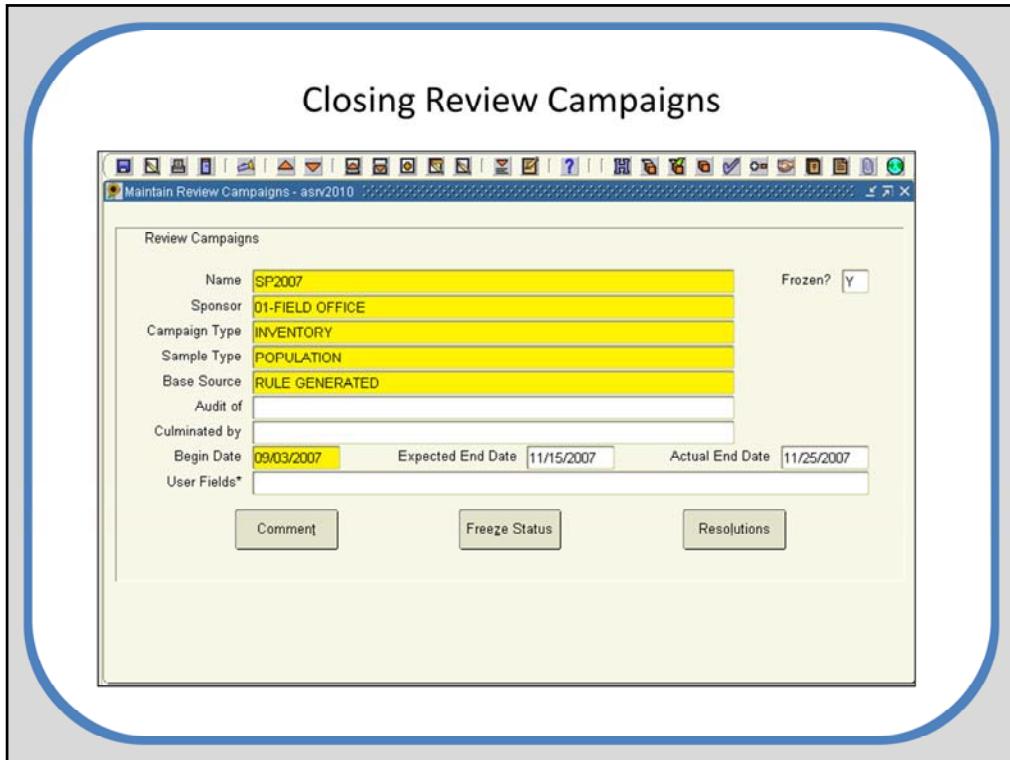

The Report is sorted as follows:

- The first group shows the found inventory assets that were created successfully.
- The second group shows the failed inventory asset records that could not be created due to some error.

**End of activity.**

## Campaign Certification

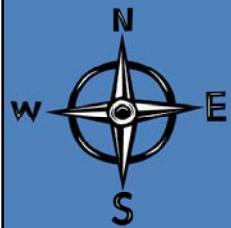

- Letter to PC
- Includes number of assets found
- Includes number of assets missing
- PC reviews and verifies information and signs certification

Closing a campaign is the final step in the review cycle. This occurs after all assets in your baseline have been accounted for, outstanding assets have been declared, and the report of survey is reconciled.

To end the review campaign, specify the **Actual End Date**. This date may be equal to, earlier or later than the Expected End Date.

Closing a Review Campaign does not prohibit an asset from being inventoried after the end of the campaign. If an asset is found after the review campaign closes, the PC may still use the online resolution form to inventory the asset.

## LAB: Close Review Campaigns

**Complete this lab AFTER you have completed all the labs in Chapter 8: Conduct a Review Campaign (PC)**

Close the review campaign that you created with the name **Student ID number + today's date** (e.g., Student0109152009).

Enter the closing date of 11/30/2009.

*(Note: Typically you would not enter the actual end date until that date. However for the purposes of training, we will leave the review campaign open until after all classes so that PCs may complete the labs in Chapter 8 in later training sessions.)*

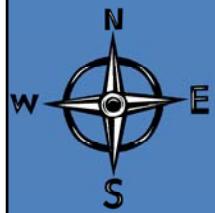

## Review Campaign Reports

- Review the details of the review campaign
- Review percentage of assets found, open, and declared unaccounted
- Review a summary of assets by resolution type
- Review campaign assets with resolutions

Running reports at the end of a review campaign will list all assets included in the campaign and their status.

- Review Campaign Properties – displays details of the campaign parameters, (e.g., setup, base rules, and valid resolution types)
- Review Resolution Summary – displays open and found assets and how they were found
- Executive Review Resolution Summary – summary of the progress of your review campaign and status
- Review Campaign Base Assets with Resolution Information – check the box to include suspicious resolutions to view assets that were retired (the steps for this report are included earlier in the chapter)

The NAVs are included as a reference for the reports listed above.

Executive Review Resolution Summary

The screenshot shows a Microsoft Internet Explorer window titled "Review Reports (Sheila Sirois) - Microsoft Internet Explorer". The address bar shows the URL: "http://libra24/pls/snflwr\_04050000\_report\_osppsd3/as\_owa\_review.main?p\_session=F3BBF29E8F5D40D8C794C4F704F36A06FEBAD9BB36E4". The main content area displays the "SunflowerEnterprise" logo and "Sunflower Enterprise - Production 4.5.0.0". Below the logo, it says "ASRV6000 Review Reports". A blue header bar contains the text "To run a report, click one of the links below.". Below this, there is a grid of six links:

<a href="#">Base Asset Interface Processing Results</a>	<a href="#">Review Campaign Base Assets</a>
<a href="#">Current Resolutions at Different Location than Asset</a>	<a href="#">Review Campaign Base Assets with Resolution Information</a>
<a href="#">Executive Review Resolution Summary</a>	<a href="#">Review Campaign Properties</a>
<a href="#">Resolution Interface Processing Results</a>	<a href="#">Review Resolution Summary</a>
<a href="#">Review Accruals</a>	<a href="#">Review Resolution Summary by Person</a>

At the bottom of the grid, there are two additional buttons: "Previously Run Report" and "Reports Main Menu".

1. Select the **Executive Review Resolution Summary** link.

**Result:** The query criteria window is displayed.

The screenshot shows a Microsoft Internet Explorer window with the title "Executive Review Resolution Summary (Student 01) - Microsoft Internet Explorer". The address bar shows the URL: [http://sfwrdocstest.ocs.doc.gov/pls/sfnwr\\_04050000\\_report\\_ospssd4/as\\_owa\\_review.form\\_5?p\\_application\\_name=Sunflower+Enterprise++Production++4.5.0.0&p\\_return\\_to\\_name=Review+Reports&p\\_return\\_to\\_procedure](http://sfwrdocstest.ocs.doc.gov/pls/sfnwr_04050000_report_ospssd4/as_owa_review.form_5?p_application_name=Sunflower+Enterprise++Production++4.5.0.0&p_return_to_name=Review+Reports&p_return_to_procedure). The main content area displays the "SunflowerEnterprise" logo and the "ASRV6050 Executive Review Resolution Summary". Below this, a blue header bar reads "How Would You Like to Select the Assets that Appear on the Report?". The form contains several input fields: "Review Campaigns" (dropdown menu listing options like "2003 EDA YEAR END", "2003 MDOA YEAR END", etc.), "Interest Type" (dropdown menu showing "INVENTORY ASSET" as the selected option), "Bureau or Region" (text input field), "Property Accountability Office" (text input field), "Cust Area" (text input field), a checkbox for "Include the Cust Area's child Organizations", and a "Location" section with dropdown menus for "Site/Off-Site Type" (set to "BUILDING") and "Stv1 Type" and "Stv1 Identifier" (both empty). A second blue header bar at the bottom reads "How Would You Like the Assets to be Grouped?".

2. Select the desired Review Campaign report in the **Review Campaign** box.

This screenshot is identical to the one above, except the "Interest Type" dropdown menu now has "INVENTORY ASSET" selected, while the other fields remain the same.

3. Select the asset **Interest Type** from the pull down menu on which to report.

6. Group the assets as you desire using the **How Would You Like the Assets to be Grouped?** (Drop down LOV).

7. Select the **Submit** button to run the report.

Result: The review screen appears displaying the report criteria entered.

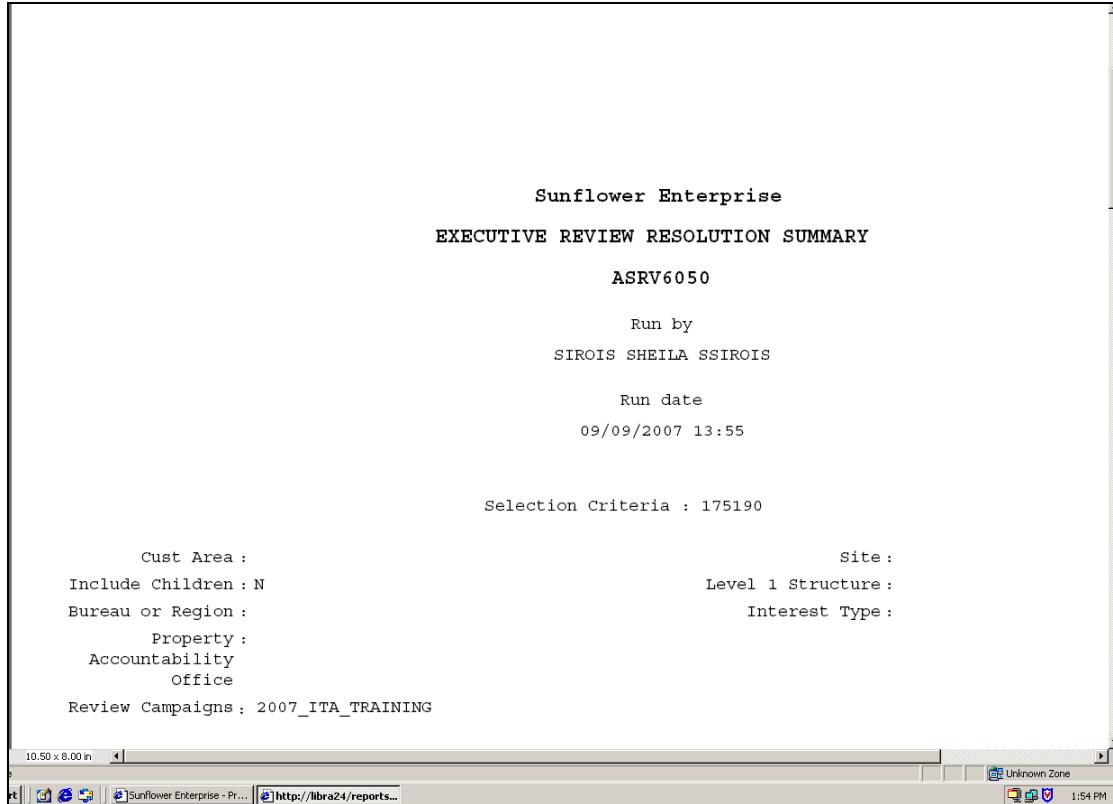

The screenshot shows a web-based reporting interface. At the top, it says "Sunflower Enterprise - Production 4.5.0.0 Review Reports" and "ASRV6050 Executive Review Resolution Summary". Below this is a section titled "Choose an output format" with three radio buttons: "Acrobat" (selected), "HTML", and "Text file export (Excel, Lotus 1-2-3, Access...)". A note below says "Press execute to run the report with the following parameters". Under "Selection Criteria: 175190", there is a table with columns "Selected by" and "Value". The table rows are: Review Campaign (2007\_ITA\_TRAINING), Interest Type (empty), Bureau or Region (empty), Property Accountability Office (empty), Cust Area (empty), Include Cust Area child Organizations (N), Location (empty), Grouped by (empty), and Group #1 (NONE). At the bottom left is a link "Review Reports".

NOTE: Click **Back** in Explorer to adjust or re-enter the report criteria

8. Select the **Acrobat** radio button.
9. Select the **execute** button to run the report.

Result: The report displays.

Below is a cover page of the **Executive Review Resolution** report:

**End of activity.**

## Lesson Summary

- You should now be able to:
  - Define Roles involved in a review campaign
  - Set up a review campaign
  - Use MobileTrak to upload data to scanners
  - Use MobileTrak to download data to Sunflower
  - Run reports to review campaign details and status
  - Close a review campaign

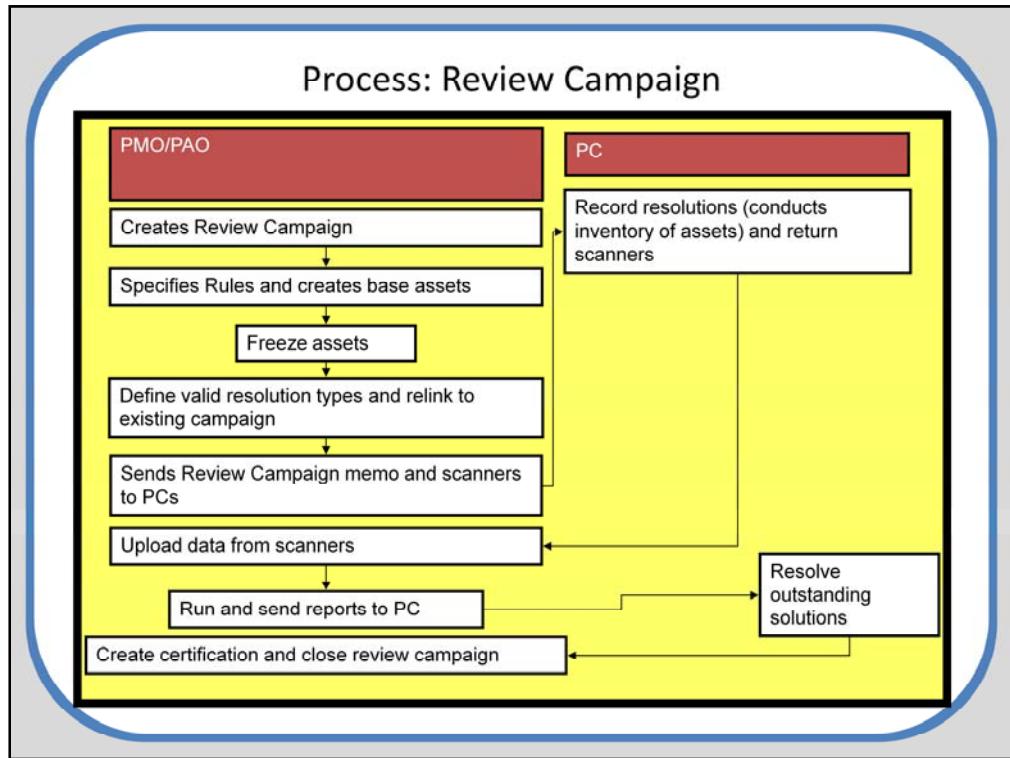

## Chapter 9: Conduct a Review Campaign (PC)

Sunflower Assets 4.5

## Lesson Objectives

- After this lesson you should be able to:
  - Use MobileTrak to create resolutions
  - Use Online Forms to create resolutions
  - Resolve outstanding resolutions

This chapter focuses on the role of the **PC** during the review campaign.

## Roles Involved in the Review Campaign

<b>DOC Role:</b>	Property Management Officer (PMO) Property Accountability Officer (PAO) Property Custodian (PC)
<b>Sunflower System Responsibilities:</b> 	Inventory Clerk Agreement Clerk Administrator <b>Review Manager</b> <b>Review Clerk</b>

PMOs will be set up as Review Managers and PAOs and PCs will be set up as Review Clerks.

Review Managers have access to and can manipulate the physical inventory process throughout the organization.

- Create
- Manage
- Close

Review Clerk can only perform management functions related to the review campaign for the custodial area to which they are assigned. The administrator must set at what level within DOC can the Review Clerk work with the assets.

## Review Campaign Memo

- Receive from PMO/PAO
- Includes the Review Campaign Plan
- Begin and End Dates of the Review Campaign
- Dates that each campaign resolution type (barcode scan, online resolution) will be accepted
- Some PCs will also receive a barcode scanner

PCs may also review the Review Campaign Properties Report to see all the details of a particular Review Campaign.

## Create Resolutions

- Mobile Devices
- Online

Any user that is part of the physical inventory process can create resolutions for the assets in the review campaign. Users may use a mobile device (i.e., barcode scanner) or an online Sunflower Form to record resolutions.

When creating resolutions be sure that you are using the correct resolution type (barcode scanner or online form) during the allowed time period. Otherwise it may not be recorded correctly and the asset may still show as “missing” when the campaign is closed.

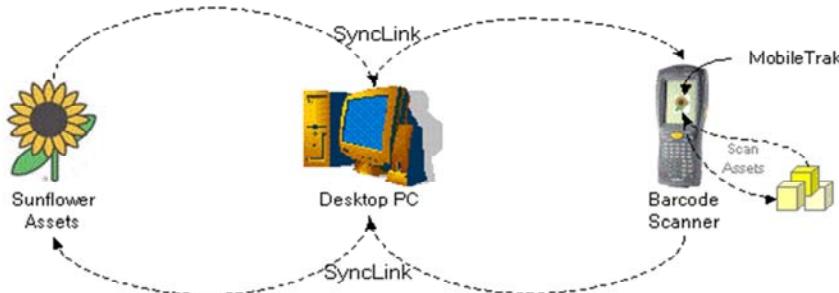

## Sunflower MobileTrak™

- Sunflower Assets inventory management tool.
- Deployed via a fully integrated barcode reader that records and delivers asset information to your Sunflower Assets database.
- Supports the physical inventory (review) process in multiple locations whether the assets are located in one building, across town, or across the country.

MobileTrak includes all of the files needed to perform a physical inventory with your barcode scanner. It is downloaded with all of DOC's asset data which includes values in the List of Values fields. Identification of an asset for physical inventory begins by defining a review campaign in Sunflower Assets. Once the campaign is defined, the data is downloaded from Sunflower Assets to the scanner. The scanner can then be used to locate and scan the asset's barcode, the asset identifier.

## Barcode Scanner Software Suite

- Sunflower SyncLink™ runs on your PC and transfers data from the server to the scanner and from the scanner back to the server.
- Sunflower MobileTrak™ runs on your scanner and is used to collect inventory data.
- Sunflower Bar Code Installer is used to install SyncLink™ and MobileTrak™.

## MobileTrak™ - Overview

- Transfer Asset Records (SFA to the Scanner)
- Setup MobileTrak
- Create Resolutions (Scan and Key)
- Transfer Resolutions (Scanner to SFA)

## MobileTrak - Download and Upload Assets

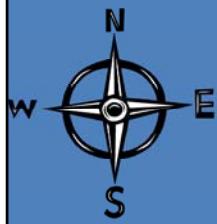

- Before you begin to use MobileTrak you will need to download reference data; consisting of lookups, reference files, and assets from your Sunflower Assets database to your barcode scanner.
- After all assets have been scanned, the data will then be uploaded back to Sunflower.

Inventory asset data is downloaded to the barcode scanners including all values in the LOVs which allows users to update information using the scanners as they are conducting the Review Campaign.

The scanned asset information uploaded to Sunflower is used to compare what was scanned to the assets in the Review Campaign. This information is used to generate reports detailing any errors with scanning assets, identifying any assets found during inventory, and provide a listing of assets still unaccounted for.

The PMO/PAO will conduct these steps prior to handing off the Barcode Scanners to the PC.

NAV: Scan Assets to  
Create Resolutions

## Scan Assets to Create Resolutions

No Sunflower Role

M > Start > MobileTrak

MobileTrak

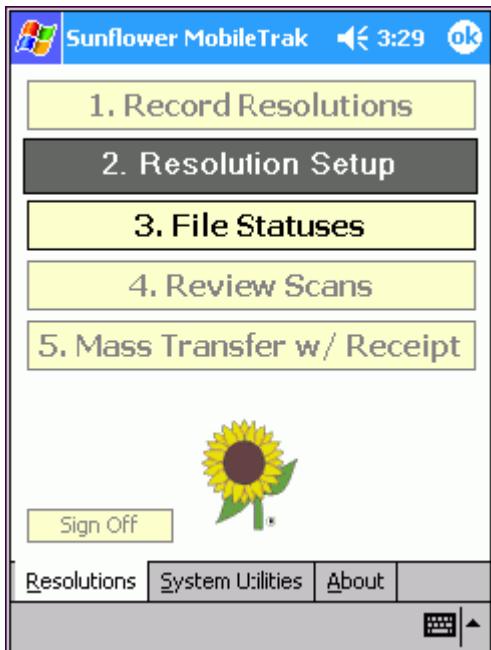

1. Select Start.

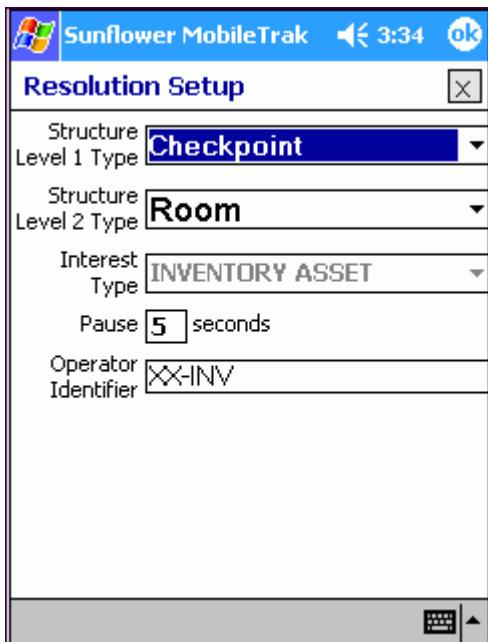

2. Select **MobileTrak**.

Result: The **MobileTrak** main menu appears.

3. Select **2. Resolution Setup**.

Result: The **Resolution Setup** window displays, and looks similar to the screenshot below:

4. Select **Building** from the **Structure Level 1 Type** field.

Scan Assets to Create Resolutions  
Sunflower Systems © 2007, All Rights Reserved  
SF 4.5

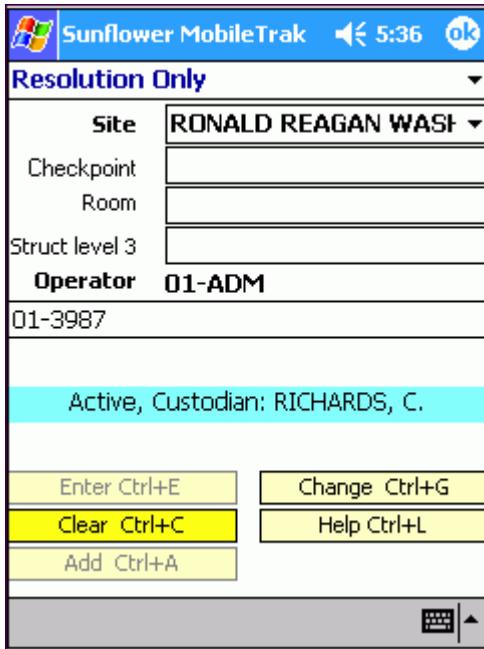

5. Select **Room** from the **Structure Level 2 Type** field.
6. In the **Pause** field, select the number of seconds of waiting time between each scan (0 = no pause, 9 = indefinite pause).
7. Enter your Employee/Badge Number in the **Operator Identifier** field.
8. Select **OK**.

Result: You are returned to the MobileTrak main menu.

9. Select **1. Record Resolutions**.

Result: The **Record Resolutions** window displays, and looks similar to the screenshot below:

10. Select Resolution and Location Update from the LOV at the top of the screen (above the Site field).

**Result:** Selecting this option will update the location of the asset if the asset location in Sunflower is different than what is in the resolution record.

**Note:** When recording a resolution, specify your current location for the scanning activity. Each resolution is captured at the current location that you establish on this screen. As you move from room to room, return to this screen to update the barcode scanner's location.

11. Select the site of the building where you are going to scan assets from the **Site** field.
12. Select the building from the **Building** field.
13. Enter or scan the room number in the **Room** field.
14. Select the empty asset identifier field, below the **Operator** identifier.
15. Scan the asset's barcode number.

**If the Message Line shows “Not found in reference file”, goto task #17. Otherwise, goto task #16.**

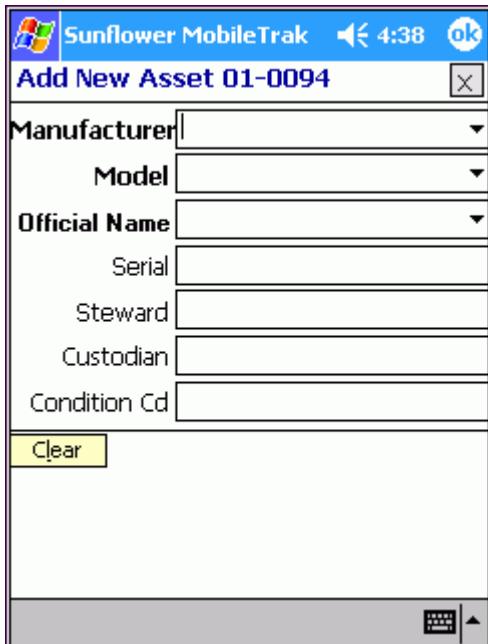

16. If the asset's reference data is found in the scanner, then the **Message Line** shows asset status and PC or Contact ID. If this is the case, select the **Clear Ctrl+C** button and move on to the next asset.

Note: If you are going to be scanning assets in other rooms, remember to change the room information.

**If you have more items to scan in the same room, goto task #15. Otherwise, goto task #24.**

17. From the **Record Resolutions** screen, select the **Add Ctrl+A** button to add an asset.

Result: The **Add New Asset** screen appears.

18. Enter the manufacturer's name in the **Manufacturer** field, or scan the manufacturer from a printed list of common manufacturer barcodes.
19. Enter the model number in the **Model** field, or scan the model number from a printed list of common model number barcodes.
20. Enter the description in the **Description** field, or scan the description from a printed list of common description barcodes.
21. Enter the serial number in the **Serial** field, or scan the serial number of the asset.

Note: Skip the **Steward** and **Custodian** fields.

22. Enter the condition code of the asset in the **Condition Cd** field.
23. Select **OK** to save the record.

**Result:** The asset is recorded in the bar code reader and you are returned to the **Record Resolutions** screen.

If you have more items to scan in the same room:

**Goto task #15**

**If you have more items to scan in different rooms, goto task #9. Otherwise, goto task #24.**

24. When finished, select **OK** to exit out of MobileTrak.

25. Select **Yes** to exit MobileTrak.

**End of activity.**

*Check with your instructor to determine if scanners are available for conducting this Lab.*

## Review Scanned Resolutions

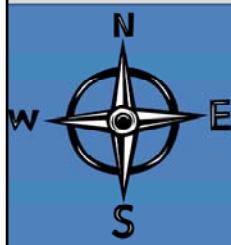

- Review Resolution Interface Processing Results
  - Goal: to have all resolutions accepted
- Inventory Resolution Results
  - Identifies assets found during inventory

**Resolution Interface Processing Results** – Run report after assets have been barcode scanned and data transferred (uploaded) to Sunflower. Identifies any errors with data that was scanned. Three primary reasons why a scanned resolution fails are:

- New asset not created successfully and is sent to auxiliary resolution table
- One of the location fields was entered incorrectly (site or building)
- Person entering resolutions incorrectly entered their ID

Run report based on Inventory plus the scanner identifier

**Inventory Asset Interface Processing Results** – This report should be run after online resolutions are entered. It will highlight all assets that were found during inventory.

- The first group shows the resolution records that were processed successfully.
- The second group shows the failed resolution records that could not be processed due to some error. Any errors should be investigated and fixed accordingly.
- The third group shows the unmatched resolution records that are stored in as\_auxiliary\_load\_resolutions table to be processed later on when the found asset is successfully created in Sunflower Asset.

### **End of activity.**

## LAB: Review Resolution Interface Processing Results

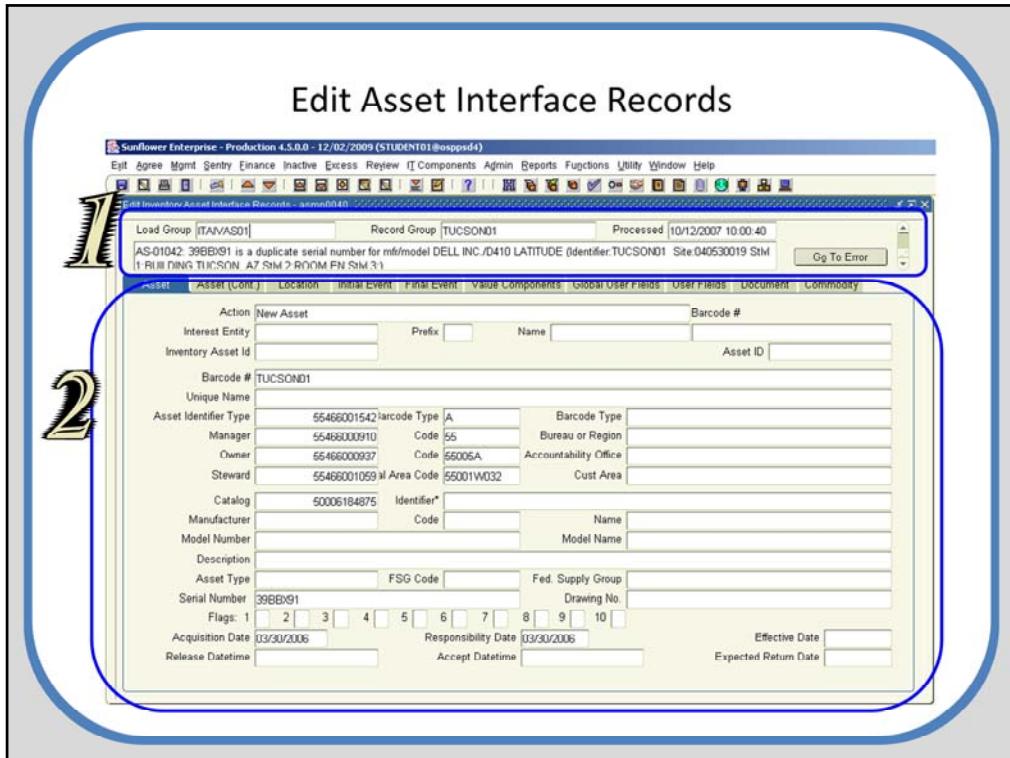

*Check with your instructor to determine if scanners are available for conducting this Lab.*

## Manage Uploaded Data

- If Inventory Management assets were added, you may need to use the ***Edit Inventory Assets Interface Records*** form to edit the asset data and add additional details in order to create a valid asset that can be saved to the database.
- If resolution errors were indicated, you may need to use the ***Edit Resolution Interface Records*** form to edit the resolution data in order to create a valid resolution.
- If no additions or changes were made to scanned assets, then you may simply want to review the assets by using the ***Lookup Inventory Assets Resolutions*** form.

After the MobileTrak data is scanned, one of three actions may need to occur:

- Enter additional data for assets found during inventory
- Fix errors (location entered incorrectly, user entering assets incorrectly signed in)
- Review all assets

The Edit Inventory Interface Records form enables you to modify records that enter Sunflower Assets from MobileTrak. Anytime a new asset is added using MobileTrak, the new asset will require additional details not available within MobileTrak. You will be able to use the Edit Inventory Interface Records form in order to amend the asset data and save the new asset to the database. Additionally, this form is useful to update details to an asset record should there be errors in the data related to the asset. Once corrections have been successfully saved, the error is now removed from the interface records and will not appear in here in subsequent queries.

**Area 1:** With your cursor in the **Load Group** field, click the Find button, enter the scanner ID (this ID starts with RS, for example: RS0000000012), and then click the Find button again.

Result: All the failed records will appear (use the down arrow on the keyboard to scroll though and see all the different errors)

The message field directly under the Scanner ID field describes the type of error that occurred.

**Area 2:** Use the necessary fields to update the data for the added assets or to correct errors. Use the tabs at the top to navigate to additional asset record details.

4. The description of the error appears in the window below the Load Group field.
5. The description indicates the data and related data field where the error has occurred, or
6. Select the **Go To Error** button to place the cursor in the field requiring correction
7. Update any information as needed.
8. Select the **Tabs** across the top of the screen to access additional property field details to update.
9. Select the **Save** button from the toolbar.

Result 1: The message on the status bar will indicate that the record was successfully saved.

Result 2: The record is removed from the interface table, and the property record will be updated with the new information.

10. Continue to scroll through the records, repeating steps 4-7, until there are no more errors.

### End of activity.

### Most Common Error Messages on the Edit Resolution Interface Records Table

Error Message	Meaning	Action
SA-00108: Insufficient privilege to perform INS on SA_STRUCTURE_LEVEL_1...	The role of the user does not allow him/her to create a new building. The scanner operator entered an invalid building code in the Structure Level 1 field.	Delete the building from the Stlv1 field and select a building from the LOV.
SA-01074: Instance 50000015700 of SA_STRUCTURE_LEVEL_1 is inactive...	The scanner operator entered a building code that is no longer active in the Structure Level 1 field.	Delete the building from the Stlv1 field and select a building from the LOV.
SA-01090: Unable to determine value for AS_RESOLUTION.ASSET_ID from value 'Interest Type' ...	Asset not found in Sunflower should be added to spreadsheet given to each property officials to record items that failed to scan.	The custodian should create new acquisitions in Sunflower for all assets that have not been entered into Sunflower.
AS-001125: Identifier CD000XX also appears on source_record_group 00030XX	The resolution exists in another load group.	Lookup the resolution by the record group number provided in the error message to determine the other load group. Coordinate with the other person to ensure one person processes the resolution. The second instance will be deleted.
SA-00110: Unique constraint RS_AS_RSTP_REC_DTTM_UK of AS_RESOLUTION is not satisfied...	A duplicate resolution. This results when the files from the scanner are uploaded more than once. NOTE: Click the Yes button to delete file from scanner after uploading.	Delete the duplicate record. Click the <b>Remove Record</b> icon to delete the record.

Error Message	Meaning	Action
AS-01015: Insufficient privilege to set/change the location for the given asset (Identifier:INV - CD0000641557 Type:Date/Time:05/22/2008 14:35:41 Site:53585 Stlvl 1:BUILDING NTIS Stlvl 2:ROOM 1021 Stlvl 3:)	The person who processed the upload through SyncLink from the scanner did not have privileges to update the asset record	The Property Custodian or PAO of the asset should try to process the resolution by clicking the Save icon

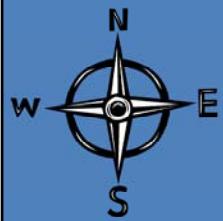

*Check with your instructor to determine if scanners are available for conducting this Lab.*

## Assets Found During Inventory

- Assets scanned, but not currently in Sunflower
- Need to update the information in Sunflower to create a complete property record

The **Inventory Asset Interface Processing Results** report will identify these records.

Management Reports

The screenshot shows the Sunflower Enterprise Management Reports interface. At the top, it displays "SunflowerEnterprise" and "Sunflower Enterprise - Production 4.5.0.0". Below that, it says "ASMN6000 Management Reports". A blue header bar contains the text "To run a report, click one of the links below.". The main area is a grid of report links:

<a href="#">Inventory Assets (Global Information)</a>	<a href="#">Inventory Asset Summary by Asset Flag</a>
<a href="#">Asset Search</a>	<a href="#">Inventory Asset Summary by Asset Type</a>
<a href="#">Asset Structure</a>	<a href="#">Inventory Asset Timeline</a>
<a href="#">Inventory Asset Activity Summary by Asset Flag</a>	<a href="#">Inventory Asset Utilization</a>
<a href="#">Inventory Asset Activity Summary by Asset Type</a>	<a href="#">Inventory Assets Pending Acceptance by Age</a>
<a href="#">Inventory Asset Final Events</a>	<a href="#">Inventory Assets Pending Release by Age</a>
<a href="#">Inventory Asset History</a>	<a href="#">Inventory Assets with Recently Denied Requests</a>
<a href="#">Inventory Asset Initial Events</a>	<a href="#">Inventory Assets with Requests</a>
<a href="#">Inventory Asset Interface Processing Results</a>	<a href="#">Purchase Order Aging Report</a>
<a href="#">Inventory Asset Ongoing Events</a>	<a href="#">High Volume Shipping Interface Processing Results</a>

At the bottom of the grid, there are two buttons: "Previously Run Report" and "Reports Main Menu".

1. Select **Inventory Asset Interface Processing Results**.

**Result:** The **Inventory Asset Interface Processing Results** parameters window displays:

2. In the **Load Group LOV**, select the Load Group number.
3. Select **Submit**.

Result: A window displays that allows you to review the report parameters:

Selected by	Value
Load Group	

4. Select the **Acrobat** radio button.

Generate Report of Assets Found During Inventory  
 Sunflower Systems © 2009, All Rights Reserved  
 SF 4.5

**5. Select eXecute.**

Result: The report displays in a separate window, allowing you to review the results of the inventory asset interface processing.

The Report is sorted as follows:

- The first group shows the found inventory assets that were created successfully.
- The second group shows the failed inventory asset records that could not be created due to some error.

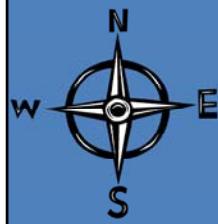

**End of activity.**

As the review campaign continues, the PAO/PMO will run reports identifying assets still not "found" during inventory. They will distribute the **Base Assets with Resolution Information** report to the PCs. This worksheet identifies all open assets and includes an area for the PC to note the location where the asset was found. The PC will then complete an Online Resolution form to input the information.

The PC may also take the initiative and run this report at any point during the campaign.

7. Select the **Acrobat** radio button.
8. Select the **eXecute** button to run the report.

**Result:** The report displays.

Below is a cover sheet of the **Review Campaign Base Assets with Resolution Information** report:

**End of activity.**

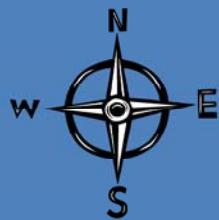

**Area 1:** Select the Resolution Type to be applied. When creating Online Resolutions, the following types of resolutions may be recorded:

- Confirmed Unaccounted – indicates asset not in your possession (transfer, repair, etc.) (*PMO/PAO only*)
- Declared Unaccounted – remove an open item from the reporting cycle (*PMO/PAO only*)
- Online Declarative – know the asset exist but cannot see it (e.g., an orbiting satellite) (*PC*)
- Online Physical – can not scan asset but can see and attest to physical location (*PC*)

The remaining fields in **Area 1** depend upon the type of resolution selected. In the above example, Online Physical was selected which allows the user to update the location, identify the location where the asset was found and enter who is recording the resolution. In this situation, the **Update Location** checkbox is automatically populated. This allows the location to be updated automatically on the property record. If a *Review Clerk without Inventory Clerk* responsibilities leaves this box checked an error message will appear stating "Insufficient privileges to perform the operation." Double-click the location field to enter where the asset was found. This is a required field, even if the **Update Location** checkbox is unchecked.

Select the LOV for the **Last Name** field and select the last name, first name of the person recording the resolution.

**Area 2:** Resolutions may be created for one or more assets at a time. All assets listed in Area 2 will have the resolution type in Area 1 applied.

The 'Manufacturer' column is empty. The 'Model Number' column is empty. The 'Description' column is empty.
- Message:** A text field containing the word 'Complete'.

**End of activity.**

Record Online Resolutions

Sunflower Systems © 2009, All Rights Reserved  
SF 4.5

Create an Online Physical Resolution for the laptop you created with the barcode # CD01MMDDYYXX (where MM/DD/YY=Month, Day, Year, and XX=Your student number).

## Retire Unlocated Assets

- Asset still missing?
- Follow process in Chapter 11: Retire Assets  
(Lost, Damaged, Destroyed)

## Lesson Summary

- You should now be able to:
  - Use MobileTrak to create resolutions
  - Use Online Forms to create resolutions
  - Resolve outstanding resolutions

## Chapter 10: Dispose (Excess) Assets

Sunflower Assets 4.5

## Lesson Objectives

- At the end of this lesson you should be able to:
  - Recognize the major differences between the HCHB, Domestic and International processes when disposing assets
  - Summarize the steps used to create an excess request
  - Generate transfer requests for HCHB Moving Contractor and Central Locations
  - Generate excess requests for property
  - Generate Excess/Inactive Receipt Form (Report)
  - Generate Assets with Pending Excess/Inactive Requests Report
  - Withdraw excess requests
  - Review excess assets available for redeployment
  - Reserve excess asset for redeployment
  - Accept excess asset for redeployment

## Sunflower Excess Capabilities

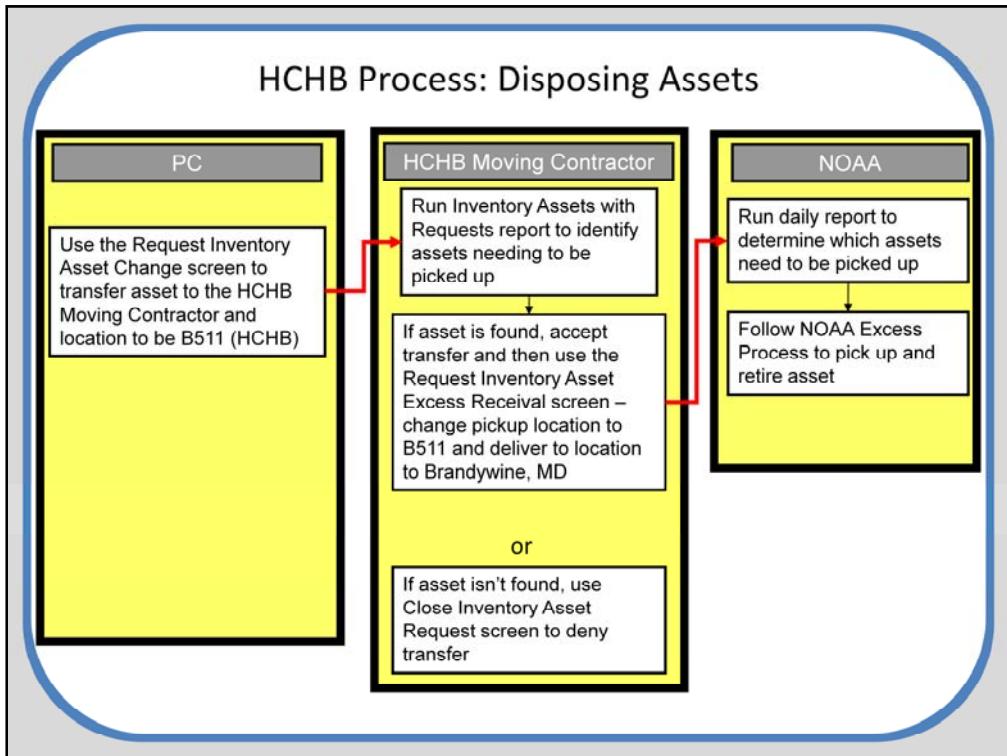

### 04 - USABLE

In Sunflower Systems, the process of disposing an asset is referred to as **excess**. In Sunflower Systems, PCs in the HCHB and Domestic offices generate a transfer request, which kicks off a series of events ending in the asset going to the NOAA Warehouse (either being picked up by NOAA or shipping the asset to NOAA). The NOAA Warehouse process involves scanning the asset which transfers responsibility for the item from the transferring Custodial Area to the NOAA Warehouse. The NOAA Warehouse creates an Excess asset within Sunflower. The Sunflower System provides the capability to:

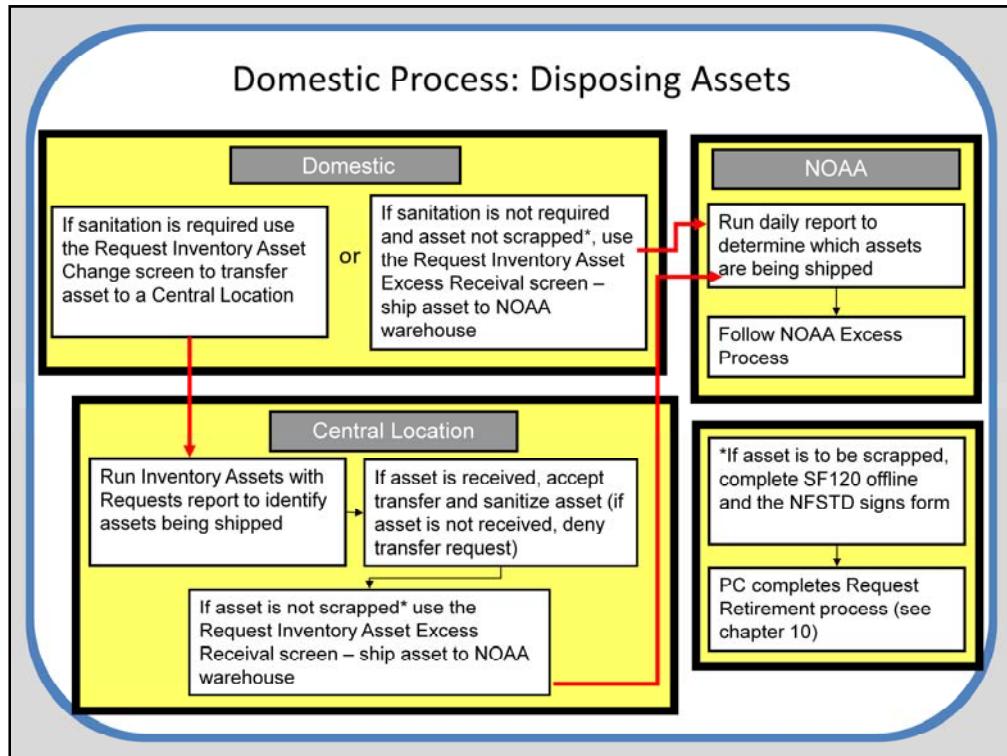

- Deny excess requests;
- Withdraw requests so that the assets may be utilized elsewhere within the DOC;

Additionally if the asset being disposed is located in the International offices, the PC completes the CD52 to request the asset be retired with the supporting documentation regarding sale or scrap and the PMO then approves the request which retires the asset.

### HCHB:

The PC will follow the **Transfer Request** process to request a transfer of the asset being disposed to HCHB Moving Contractor in B511. HCHB Moving Contractor runs daily reports to determine assets needing to be picked up. If the asset is found, they then accept the transfer request and complete the Request Inventory Asset Excess Receival request screen to have NOAA pick up the asset for excess. If the asset is not found, then HCHB Moving Contractor denies the transfer request. Once NOAA picks up the asset and follows their excess process, the asset is picked up and excessed and the property record in Sunflower is updated with the appropriate information.

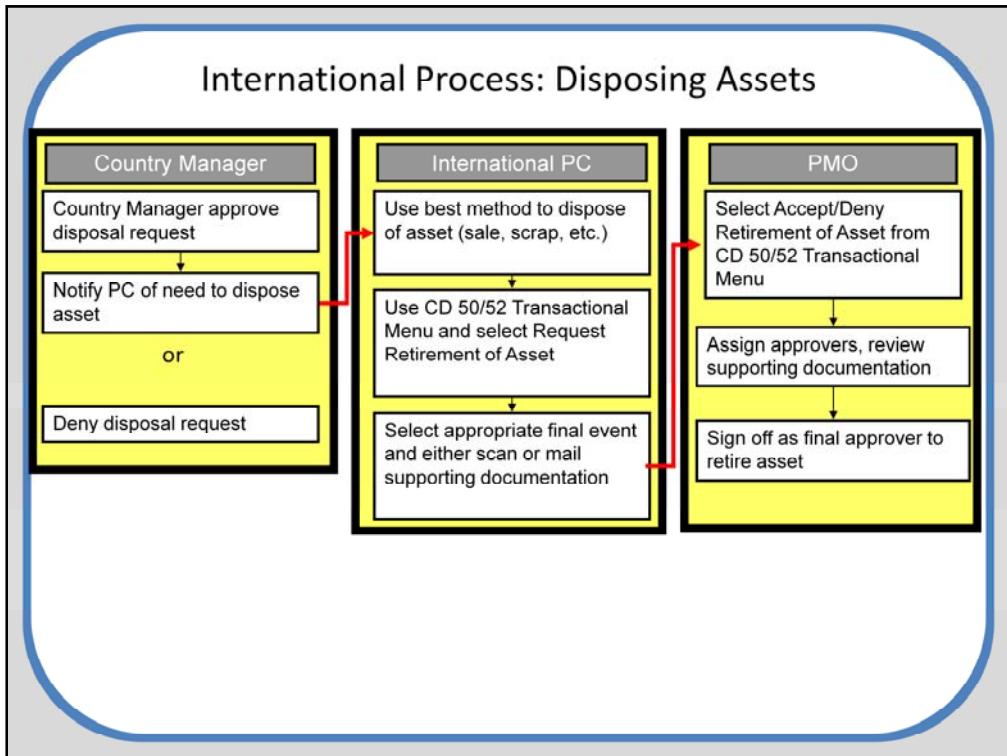

### **Domestic:**

If asset needs to be sanitized the PC requests a transfer of the asset to the Central Location responsible for sanitizing assets and then ships the asset. The Central Location will deny the transfer request if the asset is not received. Once the asset is sanitized the Central Location completes the Request Inventory Asset Excess Receipt screen and ships the asset to the NOAA warehouse.

If the asset does not require sanitation and will be scrapped locally, then the PC should first complete the SF-120 form and have the director of the National Field Services Team sign and approve the form. The PC must remove all government tags and markings and properly dispose of the asset. There is also a Disposition Certification form that the PC must complete to certify that the above has been done. These documents should be either attached to the retirement request or sent under a separate cover to the PMO for review.

Once the asset has been received at the NOAA Warehouse, they follow their Excess process to complete the Excess Request. The property record in Sunflower will be updated with the appropriate information.

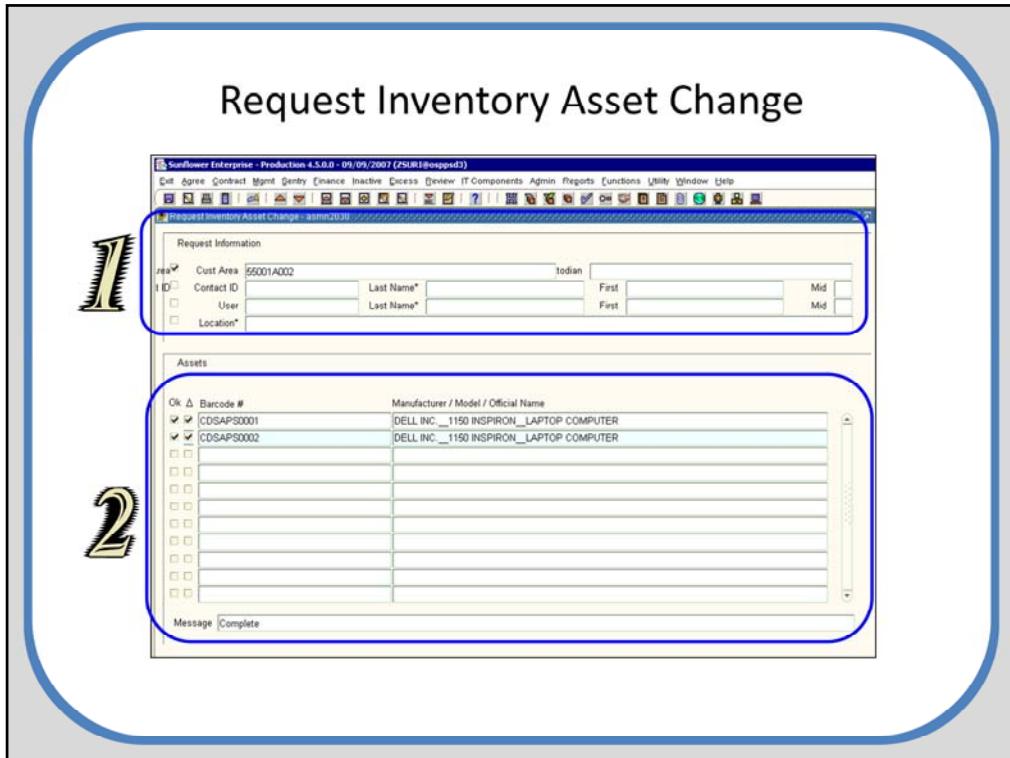

### International:

The Country Manager must first approve the request to dispose of an asset. If he/she denies the request they notify the user.

The PC is responsible for disposing of the asset using the best method (sale, scrap, etc.). The PC will use the CD 50/52 Transactional Menu in Sunflower to select Retirement of Asset. The PC will enter the barcode number and other necessary information. If the PC can scan and attach the supporting documentation, he/she will do so, otherwise the PC will mail the supporting documentation.

The PMO will then use the CD 50/52 Transactional menu in Sunflower and select Accept/Deny Retirement of Asset. Once they have selected approvers and reviewed the supporting documentation, they will approve the disposal of the asset. The property record in Sunflower is then updated to reflect the new status.

For the steps on **Requesting Retirement of Asset** and **Accept/Deny Retirement Request**, please refer to “[Chapter 11: Retire Assets \(Lost, Damage, Destroyed\)](#).”

Use the Request Inventory Asset Change screen to transfer assets to HCHB Moving Contractor or Central Locations.

#### Area 1

For **HCHB**, enter the **HCHB Moving Contractor Custodial Area** in Area 1. Enter the location as **B511**.

For **Domestic**, enter the **Central Location's custodial area** in Custodial Area and enter the related location.

#### Area 2

Enter the **Barcode number** of the assets being excessed.

# Request Inventory Asset Change for Excess

Inventory Clerk

M > Mgmt > Request Inventory Asset Change

Request Inventory Asset Change

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSURI@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. The toolbar below the menu bar contains various icons for file operations like Open, Save, Print, etc. The main window is titled "Request Inventory Asset Change - asmn2030". It has two main sections: "Request Information" and "Assets". The "Request Information" section contains fields for Cust Area (Custodian), Contact ID, User, and Location\*. The "Assets" section contains a table with columns for OK, Barcode #, and Manufacturer / Model / Official Name. A message field is also present at the bottom.

1. To enter the information about where/who you want the asset transferred to, fill in the below fields in the **Request Information** portion of the screen.

Note: You do not have to enter all of the information below – only the information you know.

Field	Description
Cust Area	Enter the Custodial Area where the asset will be transferred to and <b>Tab</b> . Note: For HCHB, select <b>HCHB Moving Contractor</b> . For Domestic, select the appropriate <b>Central Location</b> .
Property Custodian	Defaults based on the Custodial Area entered
Contact ID	If known, select the <b>Last Name</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically

	populate the Contact ID's badge number in the <b>Custodian</b> field. <u>Note:</u> The requested Custodian must be different than the Custodian currently listed on the record. You will not be able to save the record if these are the same.
<b>User</b>	If known, select the <b>Last Name</b> of the <b>User</b> from the list of values, and then select a <b>First</b> name from the LOV. This will automatically populate the User's badge number in the <b>User</b> field. <u>Note:</u> The requested User must be different than the User currently listed on the record. You will not be able to save the record if these are the same.
<b>Location</b>	Select this field to launch the <b>Location</b> sub-form. For HCHB select <b>B511</b> . For Domestic, select the appropriate <b>Central Location</b> .

2. Select the blue-highlighted **Barcode Number** field in the **Assets** portion of the screen.
3. Enter the barcode number of the property record to be changed, and then **Tab** out of the field.

Result: The following fields will be autofilled based upon the decal number selected.

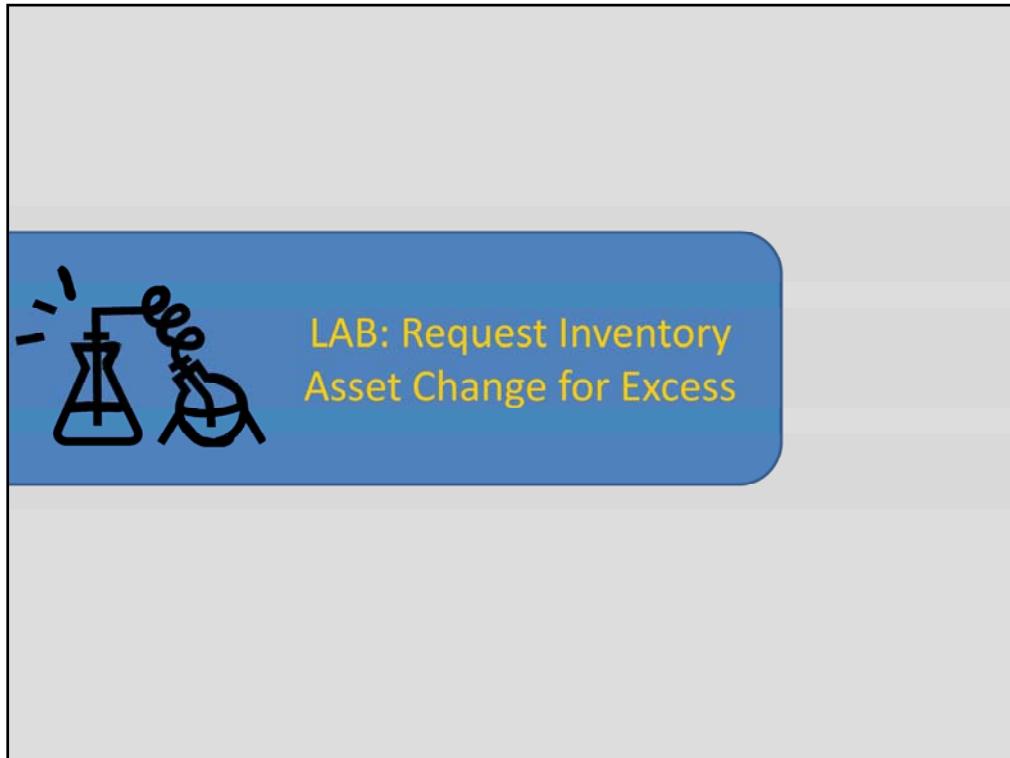

<b>Field</b>	<b>Description</b>
<b>Manufacturer</b>	The standard manufacturer name
<b>Model Number</b>	The applicable standard model number
<b>Official Name</b>	The Official Name assigned to the asset's Manufacturer/Model Number combination in the property catalog

4. Enter additional barcode numbers in the **Barcode Number** fields if more than one asset is being excessed.
5. Select the **Save** button from the toolbar to save your work.

Result: The transfer request will be sent to either the HCHB Moving Contractor or Central Location who will be receiving the asset.

6. Review the **Message** field at the bottom of the screen to ensure that the request was successfully completed without errors.

## **End of activity.**

Request to transfer the Dell Inspiron 3500 laptop, barcode # CD01MMDDYYXX (where MM=Month, DD=Day, YY=Year and XX=Student Number) to the HCHB Moving Services custodial area.

Close Inventory Asset Requests

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSURI@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. The toolbar below the menu bar contains various icons for file operations like Open, Save, Print, etc. The main window title is "Close Inventory Asset Requests - asmin2040". The form has a section titled "Assets" with fields for "Barcode #", "Manufacturer / Model / Official Name\*", "Model Name", "Serial Number", and "Drawing No.". Below these are radio buttons for "A - Accept", "D - Deny", and "W - Withdraw". There are also four dropdown menus for "Custodial Area", "Prop Contact", "Current User", and "Location", each with three options. A "Message" field is at the bottom.

1. In the **Barcode Number** field, enter the barcode number of the asset to be transferred and **Tab** out of the field.

Result: The following fields will be autofilled based upon the decal number selected.

Field	Description
<b>Manufacturer/Model/Official Name</b>	The manufacturer, model number and official name of asset.
<b>Model Name</b>	The model name of the asset.
<b>Serial Number</b>	The serial number assigned by the manufacturer.
<b>Drawing No.</b>	The drawing number of the asset.

2. Select the appropriate checkbox next to each of the below rows.

Select:

- **A** to Accept

- **D** to Deny (select if asset is not available for pickup or asset was never received)

Field	Description
<b>Custodial Area</b>	The applicable custodial area for the HCHB Moving Contractor or the Central Location receiving the asset.
<b>Property Contact</b>	The name of the new property contact.
<b>User</b>	The name of the new user.
<b>Location</b>	The new location.

3. Select the **Save** button from the toolbar to save your work.

Result: The transfer request is accepted/ denied.

4. Review the **Message** field at the bottom of the screen to ensure that the excess request was successfully completed without errors.

**End of activity.**

The HCHB Moving Contractor and Central Locations will use the **Request Inventory Asset Excess Receipt** screen to request an asset be excessed.

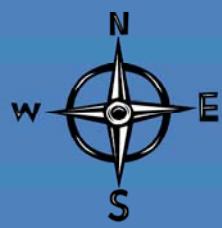

**Area 1** Enter information about where the asset should be picked up. Only change this field if it is different than what is currently on the property record.

- For HCHB, select the Pick-up Location as B511 and the Deliver-to Location as Brandywine, MD.
- For Domestic, select the Pick-up Location as the Domestic Location (if no sanitization is required) or the Central Location (if sanitization is required) and the Deliver-to Location as Brandywine, MD.

**Area 2** Enter the **Barcode Number**, **Asset Condition**, and **Comments** here (an example of a comment might be: "Contact Tina Sedgwick at 202-555-1212 for important information about this asset.") The **Request Number** will be automatically generated once the record is saved.

**Important Note:** Take note of the **Request Number** once you save the record. This number will be used to generate the **Excess Receipt Report**. If you do not note the request number, however, you can run the **Assets with Pending Excess/Inactive Requests** report to determine which assets are pending excess pickup.

**Note:** You cannot print an Excess Receipt Report Form directly from this screen. You must run the report **Excess/Inactive Receipt Form** to print the request. (The request number can be used to filter the report.) This form may be required in the future to be attached to the property item in order for the item to be picked up.

Request Inventory Asset Excess Receival

The screenshot shows the Sunflower Enterprise Production 4.5.0.0 interface from 09/09/2007. The window title is "Request Inventory Asset Excess Receival - asex2120". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, and Window. The toolbar has various icons for file operations like Open, Save, Print, and Help. The main form is titled "Request Information" and contains fields for "Excess in-place?" (checkbox), "Pick-up Location \*" (dropdown), and "Deliver-to Location \*" (dropdown). Below this is a section titled "Assets" with columns for "Ok", "Barcode #", "Manufacturer", "Model Number", and "Description". A row shows a checkbox (checked) next to a barcode field, followed by empty manufacturer, model number, and description fields. Below this are fields for "Request No.", "Asset Condition", "Comment", and a large "Message" area with a scroll bar. At the bottom is a "Message" input field.

1. Double click on the **Pick-up Location** field and enter the Location. **Save** the Location record when complete.

Note: For HCHB, select B511. For Domestic, select the appropriate Domestic Location or Central Location (if asset needed to be sanitized).

2. Double click on the **Deliver-to Location** field and enter Brandywine, MD. **Save** the location record when complete.
3. In the **Barcode Number** field, enter the decal number of the asset that is to be excessed and **Tab**.

Result: The catalog and condition details will be autofilled.

4. Optionally, use the **Asset Condition** field to change the condition of the asset by selecting a value from the LOV.

5. Optionally, enter **Comments** (e.g. instructions to the driver, special handling instructions, etc.)
6. Select the **Save** button from the toolbar to save your work.
7. Review the **Message** field at the bottom of the screen to ensure that the request was successfully completed without errors.
8. Make a note of the **Request Number** so you can keep track of the request.

**Note:** You will use the Request Number to print the Excess Receipt Form.

The main content area displays the "SunflowerEnterprise" logo and the title "Sunflower Enterprise - Production 4.5.0.0 Excess Reports". Below this, it says "ASMN6100 Assets with Pending Excess/Inactive Requests". A blue header bar says "Choose an output format" with options "Acrobat" (selected) and "HTML". Below this, a message says "Press execute to run the report with the following parameters". A blue header bar at the bottom says "Selection Criteria: 175179". A table below lists various selection criteria with their values:

Selected by	Value
Cust Area	
Include Cust Area's child Organizations	N
Property Contact	
Current User	
Requester	
Interest Type to Print With Request	INVENTORY ASSET
Include Only Assets With This Interest	Y
Include Only Assets With an Active Interest	Y
Include Excess Receival Requests	Y
Include Inactive Receival Requests	N
Include Inactive Redeployment Requests	N
Include In-place Receival Requests	N
Requests Recorded Between	09/07/2007 and 09/09/2007
Include Request Comment	N

5. Select the **Acrobat** radio button.
6. Review your parameters and select the **eXecute** button.

**Result:** A report is opened in a separate window.

The Asset Search Report in the Excess Menu allows users to search for available excess assets. These assets may then be requested for redeployment within your custodial area. When an asset is requested, the NOAA Warehouse Property Custodian, Debra Pickering, retires the excess asset with a final event of Redeploy. This sets the asset back as an Inventory Asset. Debra Pickering will then transfer the asset to the PC requesting the excess asset.

# Excess Asset Search Report

Inventory Clerk

M > Excess > Asset Search

Asset Search

The screenshot shows the Sunflower Enterprise software interface. The title bar reads "Sunflower Enterprise - Production 4.5.0.0 - 09/12/2007 (ZSURI@osppsd3)". The menu bar includes Exit, Agree, Contract, Mgmt, Sentry, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, and Help. A toolbar with various icons is at the top. The main window is titled "Asset Search - asmn2130". It has a "Search Criteria" section with fields for Manufacturer, Model Number, Description, Model Name, Serial Number, Fed. Supply Group, Asset Value, Minimum Acquisition Date, and FSC. Below this are checkboxes for Agreement Assets, Excess Assets, Financial Assets, Inactive Assets, Inventory Assets, and Subset Assets. A large grid table below is titled "Assets" and has columns for Barcode #, Manufacturer, Model Number, and Description. At the bottom is a "Report" button.

1. Enter at least one field in the **Search Criteria** section on which to query assets. Use the **LOV** button to look up valid values.

Note: When searching for specific assets, search on **Manufacturer** and **Model Number**.

2. Select the **Excess Assets** checkbox to search all excess assets available for redeployment.
3. Select the **Report** button at the bottom to view the assets in a report format with property record details, including asset value.

Result: The Asset Search report fields displays.

7. Review the Report for excess assets available for redeployment within your Custodial Area.

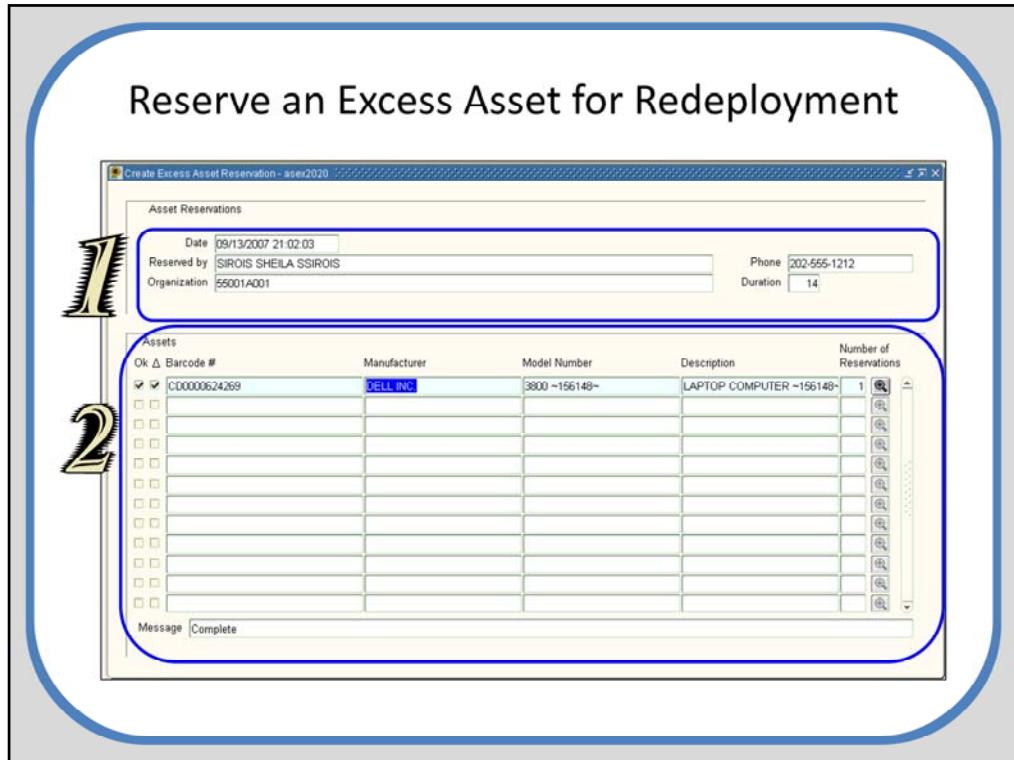

### End of activity.

Run the report to search for assets available.

Make note of one of the Barcode Numbers of excess assets available. You will need this for a later Lab.

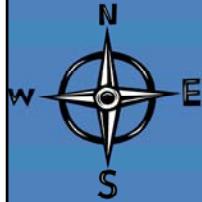

**Barcode #:** \_\_\_\_\_

The **Create Excess Asset Reservation** screen is used to request an excess asset for redeployment.

**Area 1** The PC includes his/her contact information and the length of time in days he/she is willing to wait for an asset in the **Duration** field.

**Area 2** The barcode numbers of the excess assets being requested are listed. More than one asset may be requested at once by using the next available row and entering the additional barcode numbers.

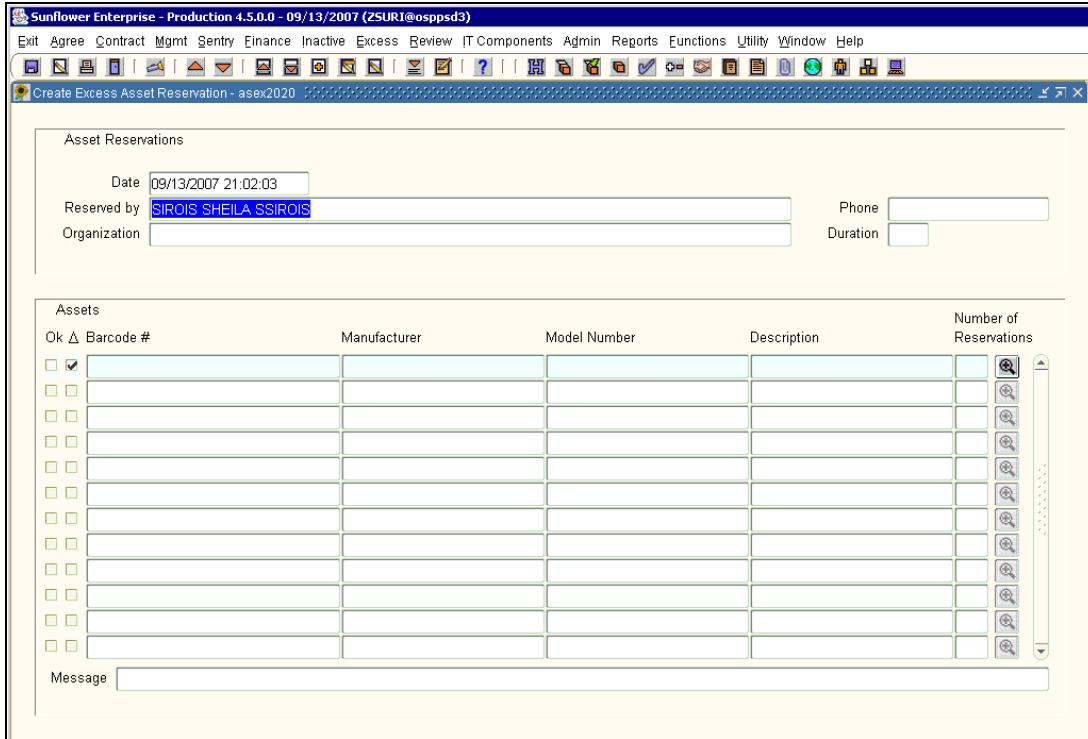

NAV: Reserve an Excess  
Asset for Redeployment

## Reserve Excess Asset for Redeployment

Inventory Clerk

M > Excess > Create Excess Asset Reservation

Create Excess Asset Reservation

1. The **Reserved by** field defaults as the user currently signed into the application. Change as necessary.
2. Enter the phone number of the PC reserving the asset in the **Phone** field and **Tab**.
3. Select the PC's custodial area in the **Organization** field and **Tab**.
4. Enter the number of days that the PC is willing to wait for the asset in the **Duration** field.
5. In the Assets section, enter the barcode numbers of the asset being reserved in the **Barcode #** field and **Tab**.

Note: The remaining property details populate.

6. Enter any additional assets to reserve on the next available blank row.
7. Select the **Save** icon on the toolbar to save the Excess Asset Reservation.

Reserve Excess Asset for Redeployment

## LAB: Reserve an Excess Asset for Redeployment

Make a request to reserve one of the assets from the Asset Search report.

## Accept Excess Asset for Redeployment

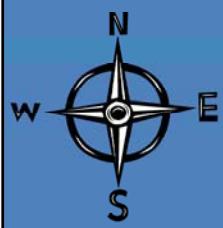

The screenshot shows the 'Sunflower Enterprise - Production 4.5.0.0 - 09/09/2007 (ZSUR1@ospmed3)' application window. The main title bar has options like Exit, Agree, Contract, Mgmt, Send, Finance, Inactive, Excess, Review, IT Components, Admin, Reports, Functions, Utility, Window, Help. The menu bar includes File, Edit, View, Insert, Format, Tools, Options, Window, Help. The toolbar has icons for New, Open, Save, Print, Copy, Paste, Find, Replace, Cut, Copy, Paste, Delete, Undo, Redo, etc. The title 'Maintain Inventory Assets - asmt010 (Page 1 of 2)' is at the top. The form contains fields for Barcode # (COSAPS0005), Unique Name, Default Location, Catalog Identifier (ITA-165397), Manufacturer (DELL INC.), Description (MICROCOMPUTER, RACKMOUNT), Serial Number, Initial Event (PURCHASE), Asset Value (\$3,500.00), Asset Condition (4 - USED - MAJOR REPAIRS N), Utilization Code (IN SERVICE), and various dates like Acquisition Date (09/08/2007), Effective Date (09/09/2007), Responsibility Date (09/08/2007), and Expected Return Date. There are also sections for User Fields and Global User Fields. A large blue circle highlights the 'Bureau or Region' section, which includes fields for Cust Area (55001A002), Contact ID (269333), User (269333), Location (WASHINGTON, DC, BUILDING, RONALD REAGAN, ROOM, B800), Property Accountability Office (55001A), Accepted? (checked), Prop Custodian, First (CHRIS), and Mid (Mid). A large number '2' is overlaid on the left side of the screen.

The only time a PC will accept a transfer coming from outside his/her Bureau is when he/she has requested an excess asset be redeployed for use in their Custodial Area. The NOAA Warehouse will reinstate the asset (changes the excess asset back to an inventory asset) and use the Transfer Request process to transfer responsibility to the requesting PC. (See Chapter 7 for the Transfer Request process the NOAA Warehouse will use.)

When this happens, the PC may prefer to use the **Maintain Inventory Asset** screen because along with the custodial area changing, the PC will also have to change the bureau/region and the Property Accountability Office. All of this can be changed in the Maintain Inventory Assets screen, while using the Change Inventory Asset Information screen only allows up to the custodial area level to be changed and an extra step would be required to change the bureau/region and the Property Accountability Office.

**Area 1** Enter the barcode number of the asset in the **Barcode Number** field, then **Tab**.

**Area 2** Update the **Bureau or Region** and the **Property Accountability Officer**. Change the **Custodial Area**, **User**, and **Location** as necessary.

NAV: Accept Excess Asset  
for Redeployment

# Accept Excess Asset for Redeployment

Inventory Clerk

M > Mgmt > Maintain Inventory Assets

Maintain Inventory Assets

The screenshot shows the 'Maintain Inventory Assets' screen in the asmn2010 application. The interface is a standard Windows-style window with a toolbar at the top and a menu bar. The main area contains several groups of input fields:

- Barcode:** A large yellow rectangular field labeled 'Barcode #' is highlighted. To its right are fields for 'Barcode Type', 'Type', 'Barcode #', and 'Released?'. A checked checkbox 'Existing interest asset' is also present.
- Location and Asset Details:** Fields for 'Default Location\*', 'Catalog Identifier\*', 'Manufacturer', 'Description', 'Serial Number', 'Initial Event', 'Asset Value\*', 'Asset Condition', 'Utilization Code', 'Bureau or Region', 'Cust Area', 'Contact ID', 'User', 'Location\*', 'Document', 'User Fields\*', and 'Global User Fields\*' are arranged in a grid-like fashion.
- Commodity and Accountability:** Fields for 'Commodity Asset', 'Parents', 'Children', 'C/P/A', 'Model Number', 'Model Name', 'Drawing No.', 'User Fields\*', 'Flags\*', 'Activity Type', 'Property Accountability Office', 'Accepted?', 'Property Custodian', 'First', 'Mid', and 'Last Name\*' are grouped together.
- Timeline and Dates:** Fields for 'Acquisition Date', 'Effective Date', 'Responsibility Date', 'Expected Return Date', and 'Flags\*' are located in this section.
- Buttons:** At the bottom of the form are buttons for 'Page 2', 'Commodity', 'Comment / Picture / Attachment', and 'Re-Request'.

A status bar at the bottom displays the message 'The tracking identifier assigned to the interest asset' and 'Record: 1/1'.

1. Enter the barcode number of the asset you will be accepting in the **Barcode Number** field and **Tab**.

**Result:** The remainder of the property record auto-populates.

## End of activity.

## Lesson Summary

- You should now be able to:
  - Recognize the major differences between the HCHB, Domestic and International processes when disposing assets
  - Summarize the steps used to create an excess request
  - Generate excess requests for property
  - Generate Excess/Inactive Receipt Form (Report)
  - Generate Assets with Pending Excess/Inactive Requests Report
  - Withdraw excess requests
  - Review excess assets available for redeployment
  - Reserve excess asset for redeployment
  - Accept excess asset for redeployment

## Chapter 11: Retire Assets (Lost, Damaged and Destroyed)

Sunflower Assets 4.5

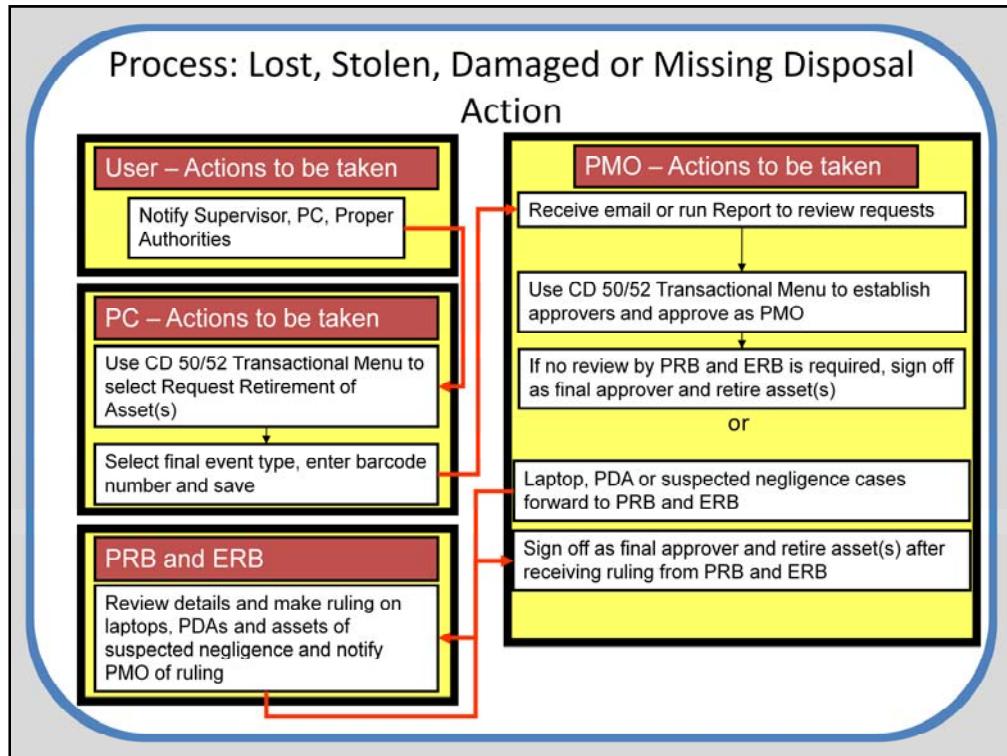

## Lesson Objectives

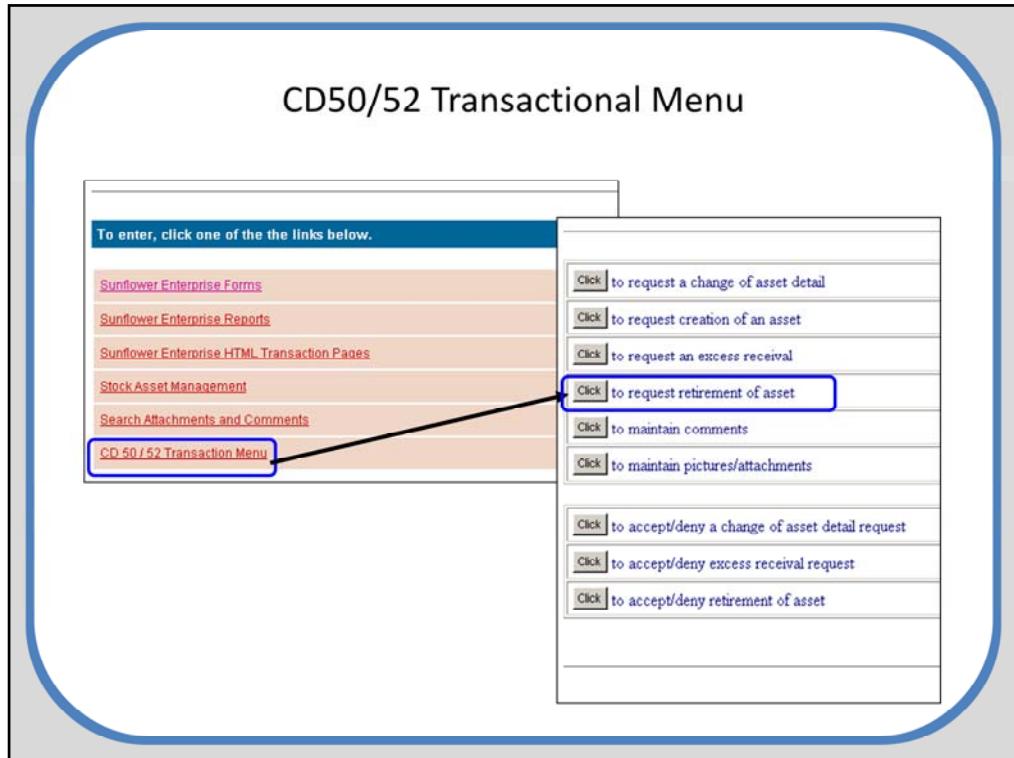

- After this lesson you should be able to:
  - Summarize the steps used to retire assets
  - Complete the CD 50 / 52 Retirement Request Form
  - Run a report to determine which assets have open retirement requests
  - Establish an approver path for retiring assets
  - Approve and Retire assets

## Final Events

- Lost
- Stolen
- Missing
- Damaged
- Destroyed
- Abandoned

If an asset is either a laptop, PDA or if negligence is suspected, the information is forwarded to the Property Review Board (PRB) and the Executive Review Board (ERB) for review and investigation.

Select the CD 50 / 52 Transaction Menu from the Sunflower screen. On the CD 50 / 52 Transaction Menu, the PC selects the Request Retirement of Asset.

**Area 1** In the **Final Event Request** section, PCs select the Final Event Type. Enter supporting details in the **Detailed Circumstance and Justification** field as to why the asset is being retired. The **Document Number** will link all assets on that request to that number, so that several assets can be retired at once – this will default but can be changed. Use the **Attachments** button to attach multiple supporting documents to this request. Finally, the **Print CD-52** button can be used to print out the paper CD-52. (Note: Information will only appear on the printed CD-52 when a request is saved).

**Area 2** The barcode number of the asset being retired is entered in the **Manually List Assets** section. More than one asset may be retired as long as the circumstances above pertain to all assets listed. The Interest Type defaults to **Inventory Asset** and should not be changed.

**Area 3** Save the Retirement Request in the **Actions** section.

**Area 4** Upon successfully saving the Retirement Request, the result **OK** will appear and a **Request Number** is created. This Request Number will be used by the PMO to pull up the request. (Alternatively, the Document Number can be used to view multiple Request Numbers – this will be explained later). Once saved, the **Print CD-52** button can be used to print the document.

**Document Number**

**Final Event Request**

Request Date	12/02/2009	Event Type	ABANDONED
Detailed Circumstance and Justification		<input type="button" value="Attachment"/>	
Document Number	2455168-42		

**Attachments**

**Final Event Request**

Request Date	12/02/2009	Event Type	ABANDONED
Detailed Circumstance and Justification		<input type="button" value="Attachment"/>	
Document Number	2455168-42		

The **Document Number** will be tied to each assets' Request Number. For example, if requesting retirement on three assets, this Document Number can be used when accepting the request to accept retirement on all three assets; rather than using three separate Request Numbers to accept retirement on all three assets.

Using the new **Attachments** button, users can attach multiple attachments. (See next page for more details).

**Attachments (continued)**

Maintain Pictures/Attachments						
DOC	Identifier	121509-3		Add		
File	<input type="file"/>			Browse...		
Type	OTHER (ATTACHMENT)					
Description	<input type="text"/>					
View Pictures/Attachments						
DOC	Identifier	121509-3		List		
Save	Delete?	Catalog?	Type	Name	Description	MIME Type
<input type="button" value="View"/>	<input type="checkbox"/>	<input type="checkbox"/>	OTHER	CD-52test1.doc	TEST DOCUMENT 1	application/msword
<input type="button" value="View"/>	<input type="checkbox"/>	<input type="checkbox"/>	OTHER	CD-52test25.doc	TEST DOCUMENT 25	application/msword

Note that the Attachments functionality includes the ability to attach multiple attachments to retirement requests. Any attachments added to a request will apply to every asset on that request. For example, if two attachments are placed on a request with three assets, those two attachments will be linked to all three assets. **Attachments** can be deleted, as well.

Email is sent to the PMO when a PC requests retirement of an asset. The PMO may also run a User Defined Report – **Assets with Final Event Requests** - to identify any retirement requests. The report displays the Request Number, Identifier (Barcode Number) and details of the asset. It will also display who made the request and when. Any comments the PC entered on the Request Retirement form also appear here.

50133	CD52122309-01	DELL INC.	100L LATITUDE	Closed																											

The PMO or other approver uses the **CD 50 / 52 Transactional Menu** and selects the option **click to Accept/Deny Retirement Requests** to approve or deny a user's request to retire an asset.

When adding Approvers and accepting/denying requests, users can enter either the **Document Number** or the **Request Number**. Either way, all requests pertaining to that Document Number will appear, and can be retired one-by-one. (Note that the only difference is the value entered in the field – either way any assets relating to a single request – i.e. assets tied to a Document Number – will appear).

**Establish Approvers**

**Request Information**

Request Number	45546	Date	06/13/2007
Barcode #	CD0000690360	Event Type	SCRAPPED - NOT SOLD
PMO	SURI ZUBAIR ZSURI	Fair Market Value	0
Detailed Circumstance and Justification	OBSOLETE, NON-REPAIRABLE OR USABLE LAPTOP COMPUTERS AND PALM COMPUTERS

**Approvers Information**

Assign Approvers

No. of Approvers:

Email Message: CD50 final event request has been created

Accept	Deny	Notify	Remove	Last Name	First Name	Middle Name	ID	Comment
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	HENSLEY	SHELA	K	S106	

Request Status: OPEN

Save

**Area 1** Information relating to the individual retirement **Request Number** shows here.

**Area 2** At this point the PMO can either add approvers or deny the request. If they are going to approve the request, they first enter the number of approvers (including themselves). Who and how many approvers are assigned depends upon the Bureau as well as the situation. Remember, if the Property Review Board and Executive Property Review Board members are users of Sunflower, they may also review and approve or deny requests electronically rather than via a hard-copy document review and signature.

**Area 3** A row appears for the total number of approvers entered in the **No. of Approvers** field. The PMO now selects the Last Name, First Name from the pull-down list to select the approvers for this request. Once approvers have been established, the PMO clicks the Save button which generates an email notification to the approvers – the PMO can add text to the email message prior to saving. Remember, all approvers may also run the report **Assets with Final Event Requests** if they wish. Additionally, the PMO may select the **Notify** checkbox which also sends email notification to the approver requesting they review the retirement request.

Note: Any person listed as an approver can be removed from the list by the PMO if deemed necessary.

LAB: Approve Requests  
and Retire Inventory Asset

## Lesson Summary

- You should now be able to:
  - Summarize the steps used to retire assets
  - Complete the CD 50 / 52 Retirement Request Form
  - Run a report to determine which assets have open retirement requests
  - Establish an approver path for retiring assets
  - Approve and Retire assets

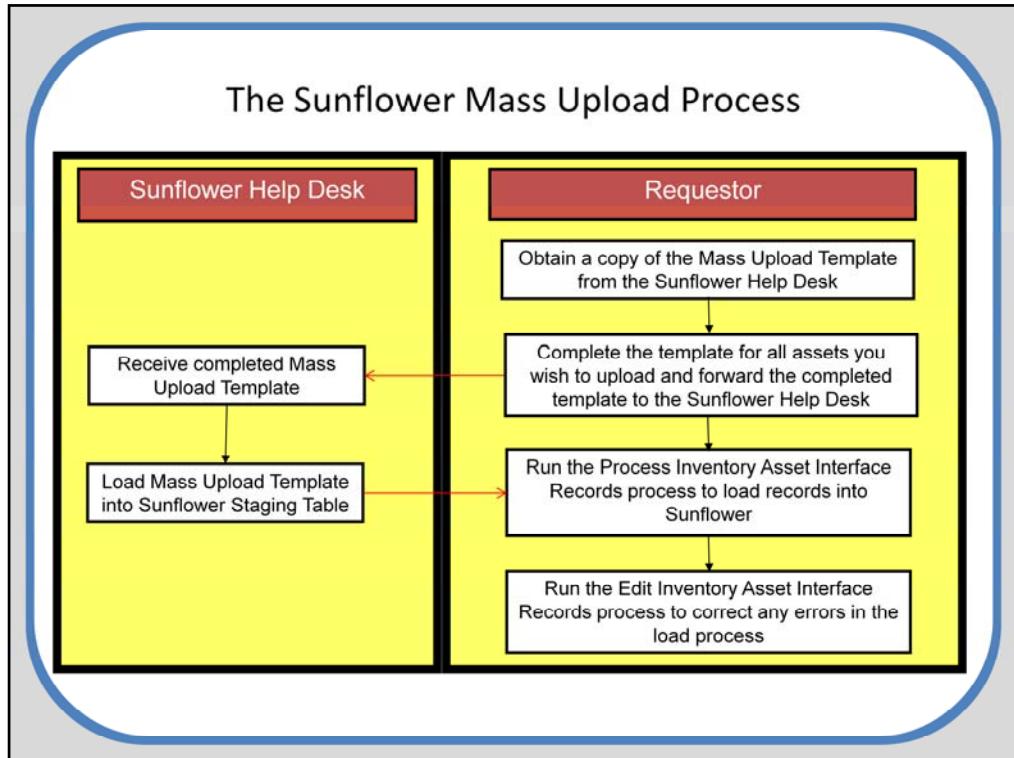

## Chapter 12: Mass Uploads

Sunflower Assets 4.5

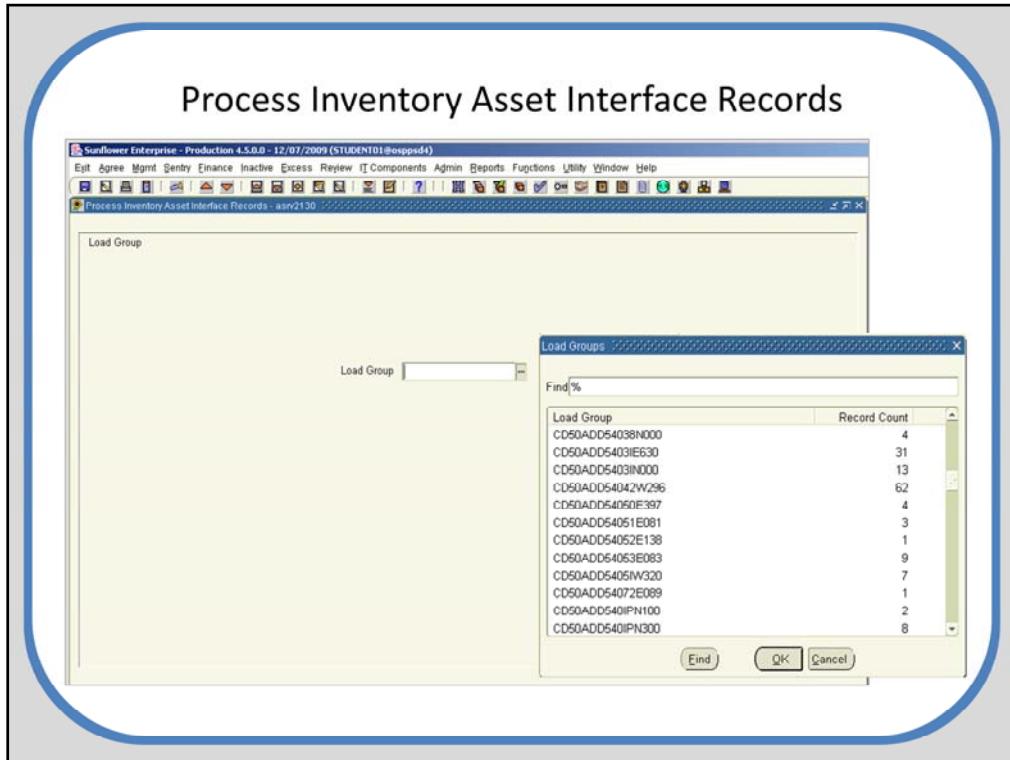

## Lesson Objectives

- After this lesson you should be able to:
  - Understand the process for performing mass uploads
  - Process Inventory Asset Interface Records
  - Correct errors using the Edit Inventory Asset Interface Records form

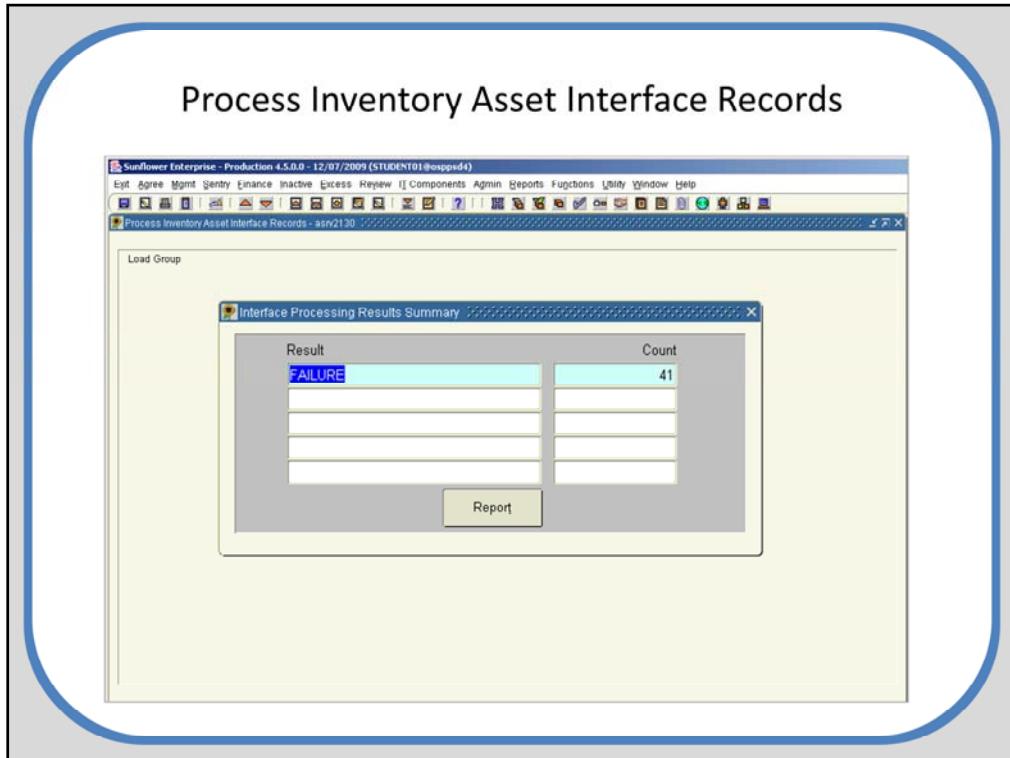

- The mass upload process enables users to upload a group of assets into Sunflower at one time. This process should be used when a large number of assets needs to be added to the system.
- The standard Mass Upload Template must be used to complete a mass upload. This template must be filled out completely in order to process the mass upload. If information is missing or invalid, the records will error out and will not be uploaded into Sunflower.
- If reference data values or catalog entries do not exist in Sunflower, the user must request these values be added to Sunflower prior to processing the mass upload.
- When saving the template, please be sure you assign a unique name, such as your initials and the date you are submitting the template to the help desk.
- Upon receiving the template, the Sunflower Help Desk will load the spreadsheet into the Sunflower staging table for processing.
- The user will then need to process the mass upload and correct any errors that occur when the assets are loaded into Sunflower.

You will use the **Process Inventory Asset Interface Records** form to import mass uploads into Sunflower.

1. Click on the Load Group List of Values
2. Select the Load Group you want to process and then select the **OK** button (this should be the file name you gave the template when you saved it).
2. Select the **Save** button on the toolbar to process your load group.

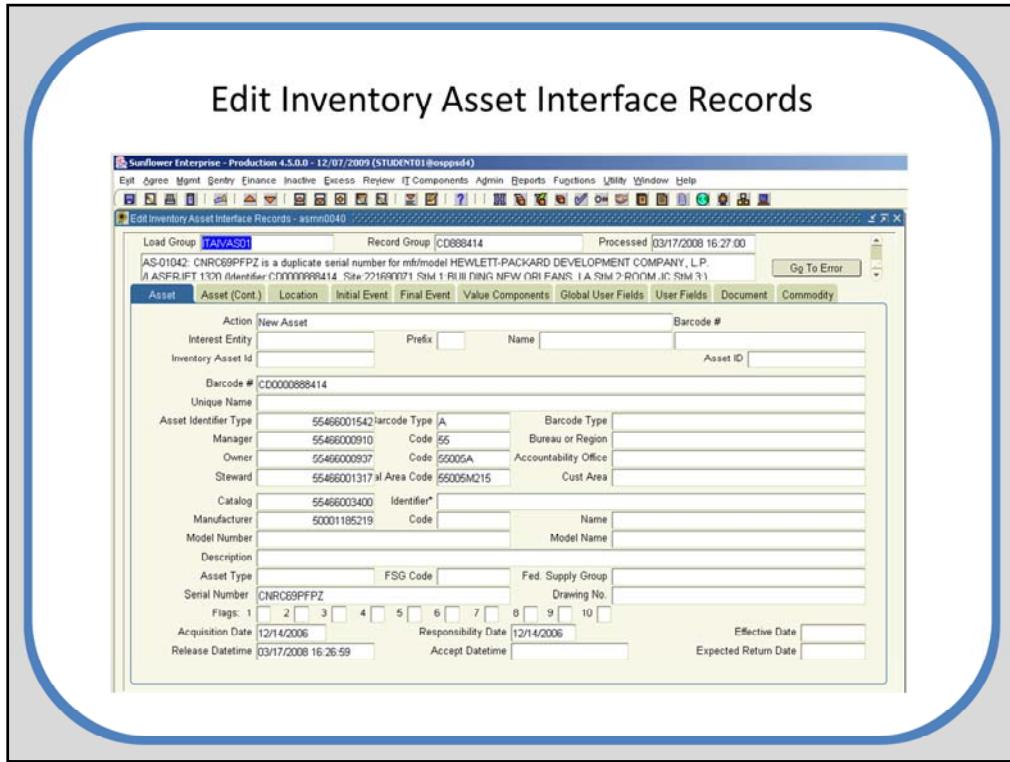

Once the process runs, you will receive a Process Results Summary message, which will indicate the number of records successfully processed and whether there are any failures.

Failures can result from:

- Reference data values on the spreadsheet are not valid values in Sunflower
- A duplicate serial number already exists for the asset

Select the **Report** button to see a more detailed description of the error records.

You will use the **Edit Inventory Asset Interface Records** form to identify and correct errors encountered during the spreadsheet load process.

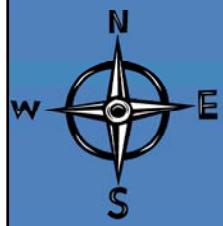

To search for errors:

1. Click on the **Find** button on the toolbar.
  2. Enter the name of your Load Group in the Load Group field.
  3. Click on the **Find** button again.

All errors for the load group will be displayed. Use the **Next Record/Previous Record** buttons or the arrow up/down keys to scroll through the records.

The error message at the top of the form indicates why the record did not process. Select the **Go To Error** button to place the cursor in the field that generated the error.

The record details will be displayed in the bottom block of the form.

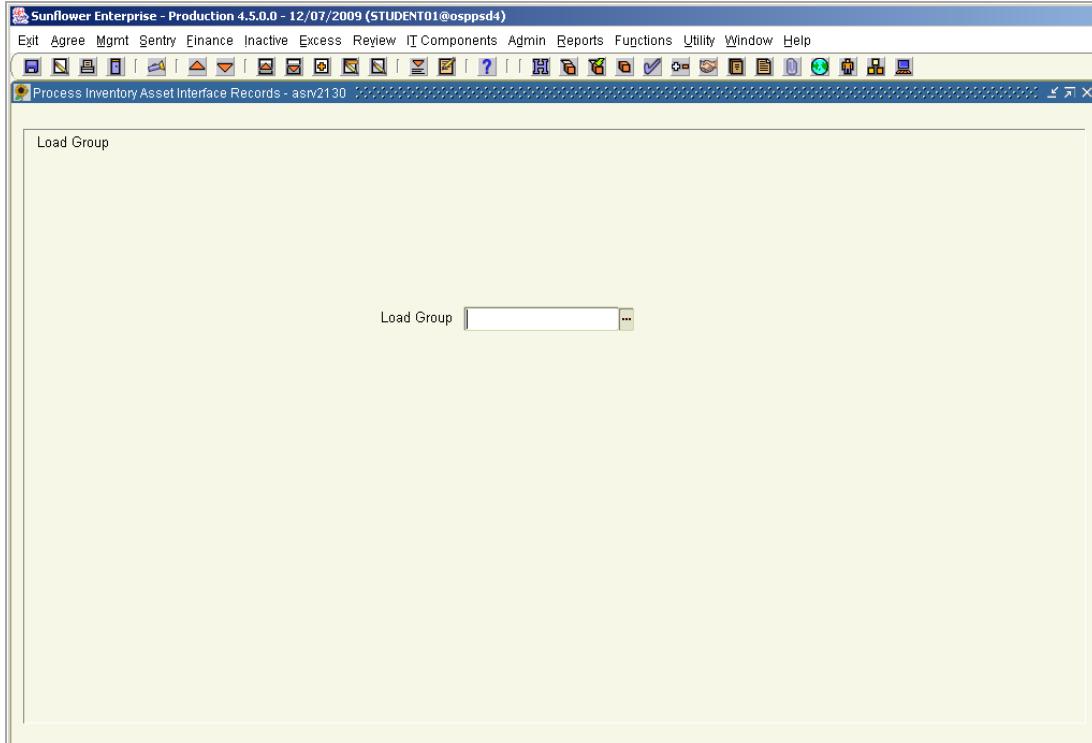

NAV: Process  
Inventory Asset  
Interface Records

## Process Inventory Asset Interface Records

Inventory Manager

M > Manage > Process Inventory Asset Interface Records

Process Inventory Asset Interface Records

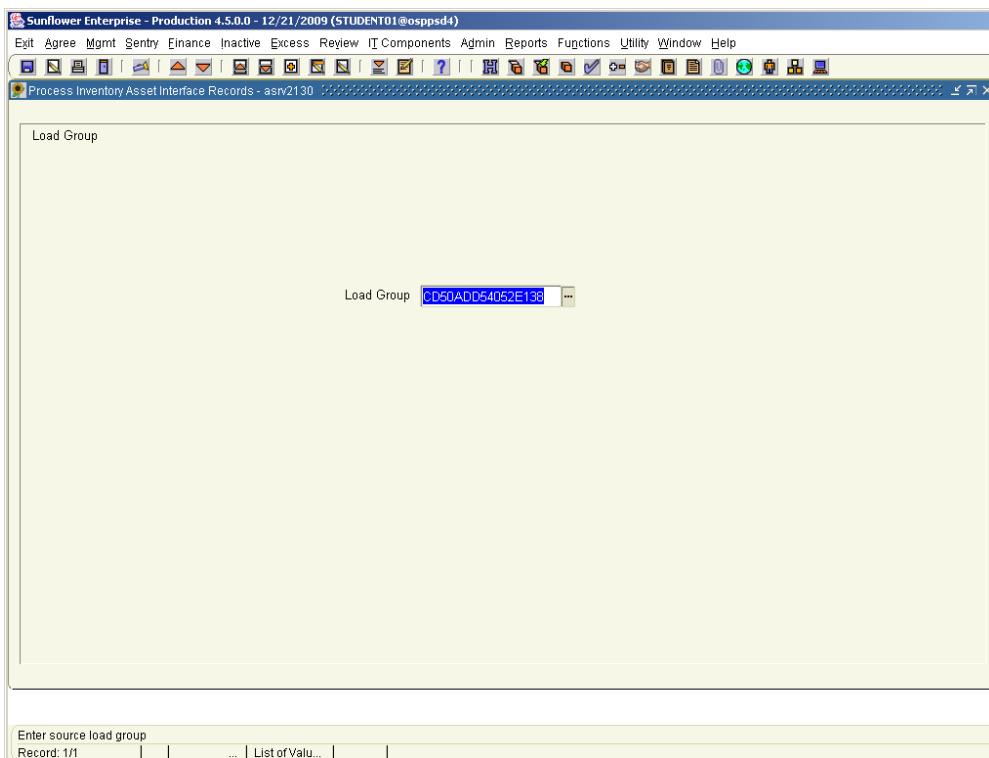

1. Click on the List of Values (LOV) for the Load Group field.

Result: The list of Load Groups will display.

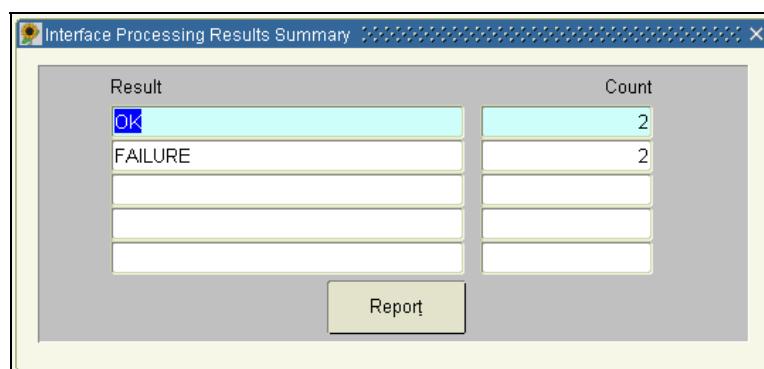

2. Select the name of the spreadsheet you submitted to the Sunflower Help Desk from the List of Values and then select the **OK** button.

Result: The Load Group will appear in the Load Group field:

3. Select the **Save** button on the toolbar to process the load group.

**Result:** The **Interface Processing Results Summary** message displays:

4. To see a detailed listing of errors, select the **Report** button.
5. If any errors are encountered, follow the steps in the **Edit Inventory Asset Interface Records** Navigation Instruction.
6. Click on the **Close box (X)** of the Interface Processing Results Summary message.

**End of activity.**

1. Place your cursor in the **Load Group** field.
2. Select the **Find** button from the toolbar.
3. Enter the **Load Group** you processed during the Process Inventory Asset Interface Records step.
4. Select the **Find** button from the toolbar to pull up your Load Group.

**Result:** The first Load Group error record is displayed.

5. Select the **Go To Error** button to search through the errors.

**Result:** The cursor is placed in the field with the error.

6. Update any information as needed.
7. Select the **Tabs** across the top of the screen to access additional property details to update.
8. Select the **Save** button from the toolbar.

**Result 1:** The message on the status bar will indicate that the record was successfully saved.

**Result 2:** The record is removed from the interface table, and the property record will be updated with the new information.

9. Continue to scroll through the records, repeating steps 5-8, until there are no more errors.

**End of activity.**

## Lesson Summary

- You should now be able to:
  - Understand the process for performing mass uploads
  - Process Inventory Asset Interface Records
  - Correct errors using the Edit Inventory Asset Interface Records form

## Chapter 13: Review & Sunflower Help

Sunflower Assets 4.5

## Lesson Objectives

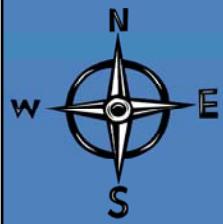

- After this lesson you should be able to:
  - Set Email Notifications
  - Describe help available to users
  - Identify forms to complete for help

## Email Notifications

- Open Asset Requests
- Closed Asset Requests
- Ongoing Assets Events

Email notifications will be established for Sunflower Users. Sunflower allows for the Custodial Area (PC), Property Contact and User to be notified when events happen. For Open and Closed Asset Requests notifications can be established for current and requested PC, Property Contact and User. For Ongoing Events notifications can be sent prior to the event and after the event.

Sunflower will be configured initially, but users may change their settings if they desire using the HTML Transaction Pages.

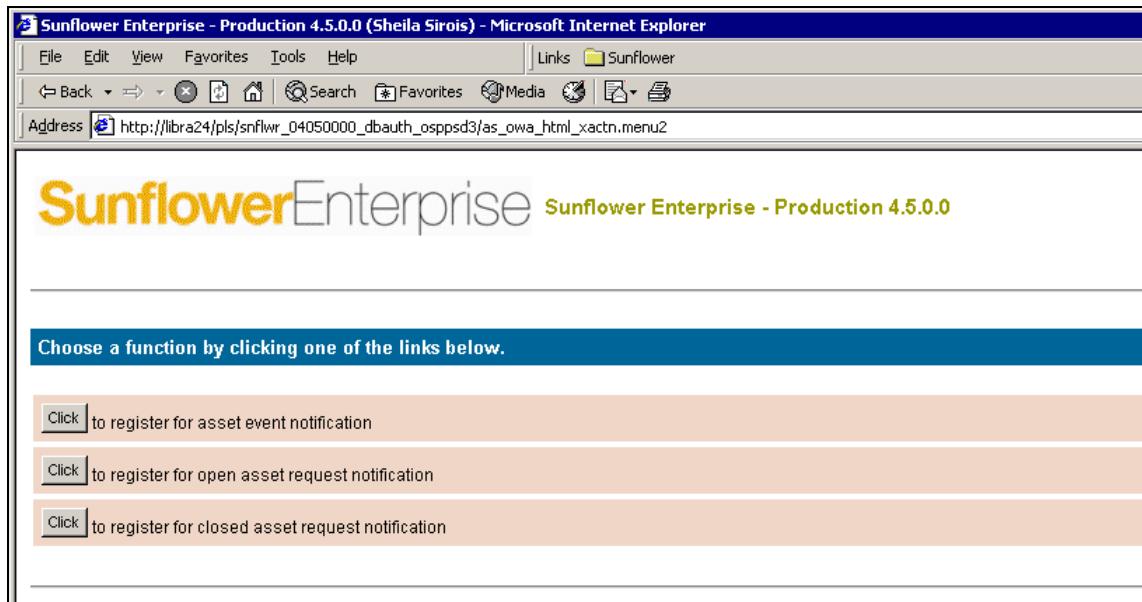

NAV: Select Asset Event  
Email Notifications

## Select Asset Event Email Notifications

<b>User</b>	Receive email notification for assets that list you as the current user.						
<b>Any Asset</b>	Never select this column. If selected you will receive email notification for action being taken on any asset in the DOC regardless of Bureau or Custodial Area.						

3. Select the **Save** button to save your selection.

**Result:** Your closed asset requests email notification selections have been saved and a message appears at the top of the screen.

## Helpful Resources

Help! Who can answer my questions???!!!!

## Sunflower Help Desk

- The Sunflower Help Desk is available to assist with user questions.
- The Help Desk has a maximum 24 hour response time. Ask your question today, get assistance by the next day.
- Phone Number: 202-482-4110
- Email: [sunflowerhelpdesk@doc.gov](mailto:sunflowerhelpdesk@doc.gov)
- Website: [www.osec.doc.gov/oas/ppmd](http://www.osec.doc.gov/oas/ppmd)

## Types of Requests for the Help Desk

- General How-to questions
- Create People Records and User Requests
- Organization Requests
- Location Requests
- Other Requests

For general how-to questions, the help desk will be able to assist you. For requests to update information in the Sunflower System, users are required to complete a form with more detailed information.

All forms can be found on the PPMD website  
<http://www.osec.doc.gov/oas/ppmd/ppmd/forms.htm>

## People Records and User Requests

- Establish Person Record
- Establish a user
- Request User ID
- Establish or modify Organization contact

**Person Record:** Sunflower Help Desk will manually maintain the People table. The information in this table allows Sunflower users to be created and anyone listed in this table may be assigned as a user of an asset.

**Users:** The Sunflower Help Desk will create, modify or delete a user ID for individuals using the Sunflower System. This will establish the roles of a user and assign them to the correct organization. The different roles a user may be assigned include: Administrator, Inventory Clerk, and User.

## User ID and Person Record Forms

- Sunflower PPMS Create Person Record & User ID Request Form
- Sunflower PPMS Modify/Retire Person Record Details Form
- Sunflower PPMS Organization Contact Request Form EST FORM

Users will need to complete forms to send to the Sunflower Help Desk when requiring assistance.

**SUNFLOWER PPMS CREATE PERSON RECORD & USER ID REQUEST FORM** – This form is used to add users and assign a user ID to them to allow access to the Sunflower System.

**SUNFLOWER PPMS MODIFY/RETIRE PERSON RECORD DETAILS FORM** – This form is used to add or remove employees to the Sunflower system. This allows the PC to assign an employee as a user of a piece of property.

**SUNFLOWER PPMS ORGANIZATION CONTACT REQUEST FORM** – This form is used to add, modify or remove an Organization Contact.

## Organization Requests

- New Custodial Area
- Modify Custodial Area
- Retire Custodial Areas

Organizations within the DOC Sunflower instance have been defined to follow the DOC hierarchy. Beneath the department are 13 bureaus. Beneath each bureau is at least one property accountability office. Beneath each property accountability office are multiple custodial areas. Each of these divisions is given an organization value within Sunflower. Each custodial area is then assigned a PC. This establishes the area that a user can transact on property records.

**New Custodial Area:** Essential information includes the name of the new organization, the parent organization, and the organization contact.

**Modify Custodial Area:** Generally used when custodial areas are being merged into one or split into at least two areas.

**Retire Custodial Area:** When no longer using a custodial area, the helpdesk will end date it so the area may no longer be selected. The assets that were previously assigned to this area will maintain that information in its history records.

## Organization Form

- Sunflower PPMS Maintain Organizations Form

Users will need to complete forms to send to the Sunflower Help Desk when requiring assistance.

The **SUNFLOWER PPMS MAINTAIN ORGANIZATIONS FORM** is used to add, modify or retire an organization from Sunflower. In other words when a new custodial area is created, merged with another or simply removed. The primary property custodian and any secondary custodians for the organization are also added, modified or retired using this form.

## Location Requests

- Add new Sites and Buildings
- Modify Sites and Buildings
- Retire Sites and Buildings

Given the size of the department, it is likely there will be frequent changes to buildings and possibly sites. In order to maintain records that accurately reflect the state of the assets, it is important to update the list of values as quickly as possible when a location is changed.

## Buildings and Sites Forms

- Sunflower PPMS Maintain Sites Form
- Sunflower PPMS Maintain Buildings Form

Users will need to complete forms to send to the Sunflower Help Desk when requiring assistance.

**SUNFLOWER PPMS MAINTAIN SITES FORM** – This form is used to add, modify or retire sites from Sunflower.

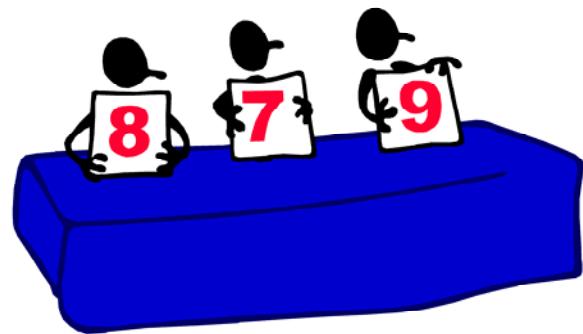

**SUNFLOWER PPMS MAINTAIN BUILDINGS FORM** – This form is used to add, modify or retire buildings from Sunflower.

## Other Requests

- Catalog entries
- Manufacturers
- User Defined Fields

There are a number of other values that may require modification in Sunflower. Such fields may include User Defined Fields, manufacturers, and catalog entries, among others. Changes to these lists will most likely be very infrequent. However, these changes can impact all bureaus, and therefore will need universal acceptance.

## Survey

- Your instructor will provide information about any surveys to be completed for the course.

## Lesson Summary

You should now be able to:

- Set Email Notifications
- Describe help available to users
- Identify forms to complete for help

15. Enter **Property Accountability Office**
16. Enter **Custodial Area**
17. Enter **Prop Custodian**
18. Select **Contact ID Last Name, First**
19. Select **User Last Name, First**
20. Double click **Location**
21. Select **Site**
22. Select **Building**
23. Select or Type **Room**
24. Select **Save location**
25. Select **Save asset**

The figure consists of three vertically stacked screenshots of the Sunflower Enterprise software interface, specifically the 'Maintain Inventory Assets' module.

- Top Window:** Shows the main asset creation screen with fields for Barcode # (CD0001346964), Manufacturer (DELL INC.), Model (PRECISION 340), and Serial Number (39N5P11). It also displays the Initial Event (PURCHASE), Asset Value (\$2,457.00), and various dates (Acquisition, Effective, Responsibility, Expected Return).
- Middle Window:** Shows the 'Asset Value Components' section where the Asset Value is set to \$2,457.00. It includes fields for Asset Value User Fields (e.g., 51\*\*2002\*\*98\*\*51-11-00-0000-00-00-00\*\*\*00-00-00-00\*\*0124000\*\*000\*\*31-), Cap? (No), and other related fields like Utilization Code (IN SERVICE) and Activity Type (AGENCY OWNED).
- Bottom Window:** Shows the 'Locations' screen where a location is being selected. Fields include Site (WASHINGTON, DC), Building (HCHB), Room (1311), and GPS coordinates (GPS 1, GPS 2, GPS 3). A 'Mail Stop' field is also present.

Each window has numbered callouts (1 through 25) pointing to specific fields or buttons, indicating the sequence of data entry and configuration steps for asset creation.

For more detailed instructions:

Refer to the NAV: Asset Creation
