# FEDERAL RENEWABLE ENERGY WORKSHOP

## "Meeting Federal Renewable Energy Goals"

April 29, 2004

Seattle, WA

Learn your best options for pursuing on-site renewable energy projects and renewable power purchases to help your agency meet the 2.5% renewable energy goal. This workshop was developed by U.S. Department of Energy, Federal Energy Management Program (FEMP). Information will be presented to give background on the renewable energy goal, update on progress by Federal agencies, and opportunities and implementation options for renewable energy projects and power purchases. Gain the knowledge to succeed in meeting your agencies' goals! There will also be a "provider panel" with information on resources you can use to pursue a renewable power purchase.

**Target audience:** Federal energy managers, state and local government managers, utilities, energy service companies, building owners and operators.

### **Registration:**
