Enhancement Request     Bug/Fix  
 Enhancement Request     Bug/Fix

\*Sequence Number: ICR00005  
 \*Type of Change Needed:  Enhancement Request     Bug/Fix  
 \*Initiated By: Robin MacMillan  
 \*Date Initiated: 11/21/2007  
 \*Title/Name: Add global UDF on the "Create new asset request" form.  
 \*Description: (Enter the general description of the enhancement request OR bug/fix) Allow user to enter global UDF on the CD50/52 "Create new asset request" form.  
 \*Current Impact: (Describe the impact that this bug or need for enhancement currently has on the system. Include significant impact descriptions for month end, or year end closing, etc) Currently user has no way of entering global UDF fields while submitting a request to create a new asset. They have to wait until the asset is created and then enter those fields later.  
 Month End Closing Affected     Year End Closing Affected  
 \*Analysis: (Include background information that is Sunflower specific to help identify the root of the problem) When custom forms were created, the ability to enter specific global UDF information on the "create new asset" form did not exist, however it did on the "change asset detail." It makes sense to be able to add this information upon asset creation rather than waiting for creation, approval and then making changes to the asset. The documentation needed to complete the global UDF is more readily available during asset creation anyway, so it is also more convenient for the user.

<p><b>Solution Overview:</b> (Describe the solution and how it meets the business requirements)</p>	
<p><b>Solution Impact:</b> (Describe the end result/impact that the change will make on the system)</p>	<p>Create button and logic for "Refresh global UDF" button.</p>
<p><b>Backout Plan (if necessary):</b> (Describe what will be done if the change does not work or effects the system negatively)</p>	<p>User can enter complete asset data including UDF when requesting the asset creation.</p>
<p><b>Reference File and Revision Number:</b> (Insert the file name and file path for the change script/code)</p>	<p>Restore EXT_OWA_CD5052_REQUEST_ASSET package.</p>
	<p>EXT_OWA_CD5052_REQUEST_ASSET package.</p> <p>*****Signature page follows*****</p>
<p>Insert any screen shots or code samples here. Use an additional page if necessary. For screen shots, save the screen shot as a .jpg, .bmp, .gif and insert it here using Insert --&gt; Picture --&gt; From File... and select the appropriate picture. Resize so it fits in the page blocks.</p>	

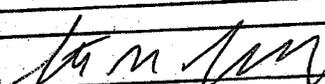

The above change request has been tested by the Department of Commerce.
