Privacy Threshold Analysis (PTA)
For the
Wallops Command and Data Acquisition Station Administrative
Local Area Network (NOAA5032)

Version: 1.0
February 12, 2018
U.S. Department of Commerce Privacy Threshold Analysis
Office of Satellite and Product and Operations (OSPO)

Unique Project Identifier: NOAA5032

Introduction: This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based from the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed in order to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

Description of the information system and its purpose:
(a) The Wallops Command and Data Acquisition Station (WCDAS) Administrative LAN (NOAA5032) is a General Support, office automation system that (b) is located within the WCDAS computer facility in Wallops Island, VA. (c) NOAA5032 relies on the NOAA NOC (NOAA 0200) for e-mail, and VPN access to NSOF (NOAA5044) for Internet connectivity. (d) The WCDAS Administrative LAN supports the NESDIS mission by providing IT resources to WCDAS personnel. Specifically, it is used to support electronic mail, purchasing, logistics, facility management, inventory, human resource, contract administration, general management functions and office automation functions. (e) The WCDAS Administration LAN enables communication among OSPO and various NOAA groups to conduct administrative functions which include daily, weekly, monthly, and annual reports. The WCDAS Administration LAN is used to support electronic mail (GMAIL) through the use of Google, purchasing, logistics, facility management, inventory, human resource, contracts administration, general management functions, and office automation functions. (f) Types of data transiting thru or residing on the WCDAS Administration LAN include administrative email messages, data concerning time and attendance reports, status reports, travel orders, Federal grants, environmental monitoring, budget and capital planning, contingency planning, facilities management, workplace policy, human resources, goods acquisition, and IT infrastructure management. Data transiting or resident on the WCDAS Administrative LAN are typically in the form of e-mail messages, Excel spreadsheets, word processing documents, CAD drawings and simple databases resident on individual workstations. (g) The Users community of the WCDAS Administration LAN include management, technical, operations and administrative staff located at the Wallops Command and Data Acquisition Station. (h) Workstations located in the users’ offices are used by the operational personnel, to log into their own user accounts on the WCDAS Domain where they can perform various administrative functions, and print to local and / or network printers. (i) A
The E-Government Act of 2002 defines “information system” by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: “Information system” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44 U.S.C. § 3502(8).

Questionnaire:

1. What is the status of this information system?

___ This is a new information system. Continue to answer questions and complete certification.

___ This is an existing information system with changes that create new privacy risks. Complete chart below, continue to answer questions, and complete certification.

<table>
<thead>
<tr>
<th>Changes That Create New Privacy Risks (CTCNPR)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Conversions</td>
</tr>
<tr>
<td>b. Anonymous to Non-Anonymous</td>
</tr>
<tr>
<td>c. Significant System Management Changes</td>
</tr>
<tr>
<td>d. Significant Merging</td>
</tr>
<tr>
<td>e. New Public Access</td>
</tr>
<tr>
<td>f. Commercial Sources</td>
</tr>
<tr>
<td>g. New Interagency Uses</td>
</tr>
<tr>
<td>h. Internal Flow or Collection</td>
</tr>
<tr>
<td>i. Alteration in Character of Data</td>
</tr>
</tbody>
</table>

j. Other changes that create new privacy risks (specify):

___ This is an existing information system in which changes do not create new privacy risks, and there is not a SAOP approved Privacy Impact Assessment. Continue to answer questions and complete certification.

_X__ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2015 or later). Continue to answer questions and complete certification.

2. Is the IT system or its information used to support any activity which may raise privacy concerns?

NIST Special Publication 800-53 Revision 4, Appendix J, states “Organizations may also engage in activities that do not involve the collection and use of PII, but may nevertheless raise privacy concerns and associated risk. The privacy controls are equally applicable to those activities and can be used to analyze the privacy risk and mitigate such risk when necessary.” Examples include, but are not limited to, audio recordings, video surveillance, building entry readers, and electronic purchase transactions.

___ Yes. Please describe the activities which may raise privacy concerns.

_X__ No
3. Does the IT system collect, maintain, or disseminate business identifiable information (BII)?
   As per DOC Privacy Policy: “For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as “trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential.” (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. “Commercial” is not confined to records that reveal basic commercial operations” but includes any records [or information] in which the submitter has a commercial interest” and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.).”

   ___ Yes, the IT system collects, maintains, or disseminates BII about:  (Check all that apply.)
   ___ Companies
   ___ Other business entities
   ___X___ No, this IT system does not collect any BII.

4. Personally Identifiable Information
4a. Does the IT system collect, maintain, or disseminate personally identifiable information (PII)?
   As per OMB 07-16, Footnote 1: “The term ‘personally identifiable information’ refers to information which can be used to distinguish or trace an individual’s identity, such as their name, social security number, biometric records, etc... alone, or when combined with other personal or identifying information which is linked or linkable to a specific individual, such as date and place of birth, mother’s maiden name, etc...”

   ___X___ Yes, the IT system collects, maintains, or disseminates PII about:  (Check all that apply.)
   ___X___ DOC employees
   ___Contractors working on behalf of DOC
   ___ Members of the public
   ___X___ No, this IT system does not collect any PII.

If the answer is “yes” to question 4a, please respond to the following questions.

4b. Does the IT system collect, maintain, or disseminate PII other than user ID?

   ___X___ Yes, the IT system collects, maintains, or disseminates PII other than user ID.
   ___X___ No, the user ID is the only PII collected, maintained, or disseminated by the IT system.
4c. Will the purpose for which the PII is collected, stored, used, processed, disclosed, or disseminated (context of use) cause the assignment of a higher PII confidentiality impact level?

Examples of context of use include, but are not limited to, law enforcement investigations, administration of benefits, contagious disease treatments, etc.

____ Yes, the context of use will cause the assignment of a higher PII confidentiality impact level.

__X__ No, the context of use will not cause the assignment of a higher PII confidentiality impact level.

If any of the answers to questions 2, 3, 4b, and/or 4c are “Yes,” a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the approved PIA must be a part of the IT system’s Assessment and Authorization Package.
CERTIFICATION

__X__ I certify the criteria implied by one or more of the questions above apply to the Wallops Command and Data Acquisition Station Administrative Local Area Network and as a consequence of this applicability, I will perform and document a PIA for this IT system.

_____ I certify the criteria implied by the questions above do not apply to the Wallops Command and Data Acquisition Station Administrative Local Area Network and as a consequence of this non-applicability, a PIA for this IT system is not necessary.
