# Standards for Success — Red Standard, Yellow Standard, Green Standard

## Scope 1&2 GHG Emission Reduction Target
- **GREEN:** On track to achieve agency’s proposed 2025 GHG Scopes 1&2 emissions reduction target.
- **YELLOW:** Less than a year behind glide path to achieve agency’s 2025 target for GHG Scopes 1&2.
- **RED:** More than a year behind glide path to achieve agency’s 2025 target for GHG Scopes 1&2.

## Scope 3 GHG Emission Reduction Target
- **GREEN:** On track to achieve agency’s proposed 2025 GHG Scope 3 emissions reduction target.
- **YELLOW:** Less than a year behind glide path to achieve agency's 2025 target for GHG Scope 3.
- **RED:** More than a year behind glide path to achieve agency's 2025 target for GHG Scope 3.

## Reduction in Energy Intensity
- **GREEN:** Reduced energy intensity (Btu/GSF*) in EISA goal-subject facilities by at least 2.5 percent compared with 2015 (or is on track to meet 47.5% reduction compared to 2003, if applicable).
- **YELLOW:** Reduced energy intensity (Btu/GSF) in EISA goal-subject facilities by less than 2.5% compared with 2015 (or, if applicable, reduced Btu/GSF but is not on track to meet 47.5% reduction compared with 2003).
- **RED:** Increased energy intensity (Btu/GSF) in EISA goal-subject facilities compared with 2015.

## Use of Renewable Electricity
- **GREEN:** Uses at least 10 percent electricity from renewable sources as a percentage of facility electricity use and is on track for 30% by 2025.
- **YELLOW:** Uses at least 7.5 percent electricity from renewable sources as a percentage of facility electricity use.
- **RED:** Did not use at least 7.5 percent electricity from renewable sources as a percentage of facility electricity use.

## Use of Clean Energy
- **GREEN:** At least 10% of federal building electric energy and thermal energy is clean energy and is on track for 25% by 2025.
- **YELLOW:** At least 7.5% of federal building electric energy and thermal energy is clean energy.
- **RED:** Less than 7.5% of federal building electric energy and thermal energy is clean energy.

## Reduction in Potable Water Intensity
- **GREEN:** Reduced water intensity by at least 18 percent from 2007 baseline and is on track for 36 percent reduction by 2025.
- **YELLOW:** Reduced water intensity by at least 16 percent from final approved 2007 baseline.
- **RED:** Did not reduce water intensity by at least 16 percent from final approved 2007 baseline.

## Green Buildings
- **GREEN:** Demonstrates compliance with 2008 and/or 2016 Guiding Principles for Federal Leadership in High Performance and Sustainable Buildings (GP) for its buildings by GSF or number of buildings of at least 15 percent or at least a 2 percentage point increase over the prior year.
- **YELLOW:** Reports less than 15 percent of its buildings/GSF meeting the GP in FRPP and less than a 2 percentage point increase from previous year, but has developed a plan to incorporate 2016 GP into all new design contracts.
- **RED:** Agency has not demonstrated an increase in compliance with GP from prior year or has not developed a plan to achieve 15 percent by 2025 using 2016 Guiding Principles.

*GSF = Gross Square Footage*
