11. Were all Disclosure Review Board rules/requirements followed? Note that if there are any questions about how to correctly perform the required disclosure avoidance procedures, please contact the Center for Disclosure Avoidance Research for help. Briefly summarize the disclosure avoidance procedures used to protect these data.

Yes. We employed a variety of techniques, including:

- with certain exceptions, rounding all estimates and counts to four significant digits
- topcoding match rates
- verifying cell count thresholds
- redacting certain estimates

12. After performing the disclosure avoidance procedures, how was the quality of the resulting data examined? For example, comparing cross tabulations of the data before and after disclosure avoidance, auditing programs for suppression, checks for inconsistencies in the data if certain values were altered.

The scope of this disclosure avoidance review did not result in any alterations to the data to audit.

13. After completion, the checklist must be attached to a copy of the request and the Disclosure Review Board approval memo. The Disclosure Avoidance Officer must ensure that his or her division/program area maintains a copy of this documentation. Location of this information:

No DRB checklist since it went through DAO bypass.
