Privacy Threshold Analysis
for the
Cloud Research Environment (CRE)
U.S. Department of Commerce Privacy Threshold Analysis

U.S. Census Bureau/Cloud Research Environment (CRE)

Unique Project Identifier: [Number]

Introduction: This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based from the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed in order to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

Description of the information system and its purpose: Provide a general description (in a way that a non-technical person can understand) of the information system that addresses the following elements:

The E-Government Act of 2002 defines “information system” by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: “Information system” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44 U.S.C. § 3502(8).

a) Whether it is a general support system, major application, or other type of system
Cloud Research Environment (CRE) is a general support system.

b) System location
Amazon Web Services (AWS) Gov Cloud, Seattle, Washington

c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)
CRE connects with the Integrated Research Environment (IRE). CRE and IRE are both within the Associate Directorate for Research and Methodology (ADRM).

d) The purpose that the system is designed to serve
The purpose of this IT system is to provide a research environment in the commercial cloud for Census Bureau ADRM researchers. The objective of the CRE is to provide a modern research computing environment to Census Bureau research users.

e) The way the system operates to achieve the purpose
CRE provides infrastructure and software applications, as well as economic and demographic data to Census Bureau researchers so that they can perform research. Research users utilize the data and software applications furnished to their project by the CRE to develop and execute research models to analyze and answer specific research questions related to their project.
f) A general description of the type of information collected, maintained, used, or disseminated by the system
This information maintained by CRE is obtained personally identifiable information (PII) and business identifiable information (BII) from other Census Bureau program areas. Record linkage using BII and Protected Identification Keys (PIKs) facilitates research to improve and support existing Census Bureau programs and creation of beta data products. These products use innovative techniques that leverage existing data and reduce the burden on respondents. This PII/BII covers members of the public, businesses, contractors and federal employees.

g) Identify individuals who have access to information on the system
Government employees, contractors, and special sworn status employees of the Census Bureau.

h) How information in the system is retrieved by the user
The data files are stored on disk in various formats determined by the statistical software that they are to be processed with (statistical analysis system (SAS), Stata, R, etc.). Users use these statistical software packages to analyze the data. Data may also be stored in relational databases and retrieved through database queries. Retrieval of the data is performed only by authorized Census Bureau staff who have a need to know and are authorized through the Data Management System (DMS).

i) How information is transmitted to and from the system
Information is encrypted in accordance with Commerce requirements and sent using a virtual private network (VPN) between CRE and other Census Bureau IT Systems. The VPN offers the required encryption. All data resides in AWS GovCloud (environment is specific only for Federal customers), and data is protected by disk level encryption and database encryption. In addition, the encryption keys are maintained by the Census Bureau. The cloud provider will not have access to the encryption keys.
Questionnaire:

1. Status of the Information System
   1a. What is the status of this information system?

   ____ This is a new information system. Continue to answer questions and complete certification.

   ____ This is an existing information system with changes that create new privacy risks. Complete chart below, continue to answer questions, and complete certification.

   Changes That Create New Privacy Risks (CTCNPR)

<table>
<thead>
<tr>
<th>a. Conversions</th>
<th>d. Significant Merging</th>
<th>g. New Interagency Uses</th>
</tr>
</thead>
<tbody>
<tr>
<td>b. Anonymous to Non-Anonymous</td>
<td>e. New Public Access</td>
<td>h. Internal Flow or Collection</td>
</tr>
<tr>
<td>c. Significant System Management Changes</td>
<td>f. Commercial Sources</td>
<td>i. Alteration in Character of Data</td>
</tr>
<tr>
<td>j. Other changes that create new privacy risks (specify):</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   ____ This is an existing information system in which changes do not create new privacy risks, and there is not a SAOP approved Privacy Impact Assessment. Continue to answer questions and complete certification.

   ____ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2015 or 01-2017). Continue to answer questions and complete certification.

   __X__ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2019 or later). Skip questions and complete certification.

   1b. Has an IT Compliance in Acquisitions Checklist been completed with the appropriate signatures?

   ____ Yes. This is a new information system.

   ____ Yes. This is an existing information system for which an amended contract is needed.

   ____ No. The IT Compliance in Acquisitions Checklist is not required for the acquisition of equipment for specialized Research and Development or scientific purposes that are not a National Security System.

   __X__ No. This is not a new information system.
2. Is the IT system or its information used to support any activity which may raise privacy concerns?

NIST Special Publication 800-53 Revision 4, Appendix J, states “Organizations may also engage in activities that do not involve the collection and use of PII, but may nevertheless raise privacy concerns and associated risk. The privacy controls are equally applicable to those activities and can be used to analyze the privacy risk and mitigate such risk when necessary.” Examples include, but are not limited to, audio recordings, video surveillance, building entry readers, and electronic purchase transactions.

____ Yes. *(Check all that apply.)*

<table>
<thead>
<tr>
<th>Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio recordings</td>
</tr>
<tr>
<td>Building entry readers</td>
</tr>
<tr>
<td>Video surveillance</td>
</tr>
<tr>
<td>Electronic purchase transactions</td>
</tr>
<tr>
<td>Other (specify):</td>
</tr>
</tbody>
</table>

__X__ No.

3. Does the IT system collect, maintain, or disseminate business identifiable information (BII)?

As per DOC Privacy Policy: “For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as “trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential.” (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. "Commercial" is not confined to records that reveal basic commercial operations” but includes any records [or information] in which the submitter has a commercial interest” and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.).”

__X__ Yes, the IT system collects, maintains, or disseminates BII.

____ No, this IT system does not collect any BII.

4. Personally Identifiable Information (PII)

4a. Does the IT system collect, maintain, or disseminate PII?

As per OMB 17-12: “The term PII refers to information that can be used to distinguish or trace an individual’s identity either alone or when combined with other information that is linked or linkable to a specific individual.”

__X__ Yes, the IT system collects, maintains, or disseminates PII about: *(Check all that apply.)*

__X__ DOC employees
__X__ Contractors working on behalf of DOC
__X__ Other Federal Government personnel
__X__ Members of the public

____ No, this IT system does not collect any PII.

*If the answer is “yes” to question 4a, please respond to the following questions.*
4b. Does the IT system collect, maintain, or disseminate Social Security numbers (SSNs), including truncated form?

___ Yes, the IT system collects, maintains, or disseminates SSNs, including truncated form.

Provide an explanation for the business need requiring the collection of SSNs, including truncated form.

Provide the legal authority which permits the collection of SSNs, including truncated form.

___ No, the IT system does not collect, maintain, or disseminate SSNs, including truncated form.

4c. Does the IT system collect, maintain, or disseminate PII other than user ID?

___ Yes, the IT system collects, maintains, or disseminates PII other than user ID.

___ No, the user ID is the only PII collected, maintained, or disseminated by the IT system.

4d. Will the purpose for which the PII is collected, stored, used, processed, disclosed, or disseminated (context of use) cause the assignment of a higher PII confidentiality impact level?

Examples of context of use include, but are not limited to, law enforcement investigations, administration of benefits, contagious disease treatments, etc.

___ Yes, the context of use will cause the assignment of a higher PII confidentiality impact level.

___ No, the context of use will not cause the assignment of a higher PII confidentiality impact level.

If any of the answers to questions 2, 3, 4b, 4c, and/or 4d are “Yes,” a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the SAOP approved PIA must be a part of the IT system’s Assessment and Authorization Package.
CERTIFICATION

__X___ I certify the criteria implied by one or more of the questions above apply to the [Cloud Research Environment (CRE)] and as a consequence of this applicability, I will perform and document a PIA for this IT system.

_____ I certify the criteria implied by the questions above do not apply to the [IT SYSTEM NAME] and as a consequence of this non-applicability, a PIA for this IT system is not necessary.

Information System Security Officer or System Owner
Name: Robert Sienkiewicz
Office: CENHQ-5k141
Phone: 301.763.1234
Email: robert.sienkiewicz@census.gov

I certify that this PIA is an accurate representation of the security controls in place to protect PII/BII processed on this IT system.

Signature: Robert T. Sienkiewicz
Date signed: ____________________________

Chief Information Security Officer
Name: Beau Houser
Office: CENHQ-3K106
Phone: 301.763.1235
Email: beau.houser@census.gov

I certify that this PIA is an accurate representation of the security controls in place to protect PII/BII processed on this IT system.

Signature: BEAU HOUSER
Date signed: ____________________________

Privacy Act Officer
Name: Byron Crenshaw
Office: CENHQ-8H021
Phone: 301.763.7997
Email: Byron.crenshaw@census.gov

I certify that the appropriate authorities and SORNs (if applicable) are cited in this PIA.

Signature: BYRON CRENSHAW
Date signed: ____________________________

Agency Authorizing Official
Name: Luis Cano
Office: CENHQ-3H160
Phone: 301.763.3968
Email: luis.j.cano@census.gov

I certify that this PIA is an accurate representation of the security controls in place to protect PII/BII processed on this IT system.

Signature: LUIS CANO
Date signed: ____________________________

Bureau Chief Privacy Officer
Name: Byron Crenshaw
Office: CENHQ-8H021
Phone: 301.763.7997
Email: Byron.crenshaw@census.gov

I certify that the PII/BII processed in this IT system is necessary and this PIA ensures compliance with DOC policy to protect privacy.

Signature: BYRON CRENSHAW
Date signed: ____________________________

Business Authorizing Official
Name: John Eltinge
Office: CENHQ-5K156
Phone: 301.763.9604
Email: john.l.eltinge@census.gov

I certify that this PIA is an accurate representation of the security controls in place to protect PII/BII processed on this IT system.

Signature: JOHN ELTINGE
