National Telecommunications and Information Administration (NTIA)

Privacy Threshold Analysis
for the
NTIA-005 Headquarters NTIA Network
General Support System
U.S. Department of Commerce Privacy Threshold Analysis

NTIA GSS-005

Unique Project Identifier: FISMA NTIA005

Introduction: This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based from the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed in order to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

Description of the information system and its purpose: Provide a general description (in a way that a non-technical person can understand) of the information system that addresses the following elements:

The E-Government Act of 2002 defines “information system” by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: “Information system” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44. U.S.C. § 3502(8).

a) Whether it is a general support system, major application, or other type of system
b) System location
c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)
d) The purpose that the system is designed to serve
e) The way the system operates to achieve the purpose
f) A general description of the type of information collected, maintained, use, or disseminated by the system
g) Identify individuals who have access to information on the system
h) How information in the system is retrieved by the user
i) How information is transmitted to and from the system

The purpose of the General Support System (GSS), headquartered at 1401 Constitution Avenue in Washington, DC (HCHB), and a remote field office in Gettysburg, PA (FFO), is to provide network services, e-mail services, file sharing, Internet/Intranet connectivity, client-server connectivity, web-enabled applications, and office automation tools to all users in an unclassified environment that ensures confidentiality, integrity, and availability. Additionally, the GSS is utilizing cloud-based systems to enable ubiquitous, on-demand access to configurable computing resources to enhance the user experience at NTIA while maintaining a secure environment.
Most users of the GSS work with commercial off the shelf (COTS) software loaded onto their Windows workstation to process business information for administrative purposes and scientific information for mission purposes. As information is newly created, there is a need to share this data with other staff members. Users exchange data in various means:

a) Printed Form: Users print the data either to a local printer or to a network printer and physically give the data to other staff members.

b) E-mail: Messages are created and sent to addresses requesting needed information.

c) Digital Collaboration Platforms: Information is exchanged through approved workplace chat, web conferencing, and file storage applications.

d) Intranet/Internet:
   i. Data is posted on internal web pages, for users to be informed about various topics. Users access the web pages with their web browsers.
   ii. Data is posted on a public internet site for the purpose of communicating the work of the institute, which is a part of its mission.
   iii. Data is posted on a secure, restricted internet site for the use of NTIA Government sponsors, a service that is a part of its mission.

e) Network Backup: Data is saved to network drives with replication to an alternate storage site for data restoration.

**Questionnaire:**

1. What is the status of this information system?

   ____ This is a new information system. *Continue to answer questions and complete certification.*

   ____ This is an existing information system with changes that create new privacy risks. *Complete chart below, continue to answer questions, and complete certification.*

   **Changes That Create New Privacy Risks (CTCNPR)**

<table>
<thead>
<tr>
<th>Changes That Create New Privacy Risks (CTCNPR)</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Conversions</td>
<td>d. Significant Merging</td>
<td>g. New Interagency Uses</td>
</tr>
<tr>
<td>b. Anonymous to Non-Anonymous</td>
<td>e. New Public Access</td>
<td>h. Internal Flow or Collection</td>
</tr>
<tr>
<td>c. Significant System Management Changes</td>
<td>f. Commercial Sources</td>
<td>i. Alteration in Character of Data</td>
</tr>
<tr>
<td>j. Other changes that create new privacy risks (specify):</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   ____ This is an existing information system in which changes do not create new privacy risks, and there is not a SAOP approved Privacy Impact Assessment. *Continue to answer questions and complete certification.*

   ____ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2015). *Continue to answer questions and complete certification.*
This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2017 or later). Skip questions and complete certification.

2. Is the IT system or its information used to support any activity which may raise privacy concerns?

NIST Special Publication 800-53 Revision 4, Appendix J, states “Organizations may also engage in activities that do not involve the collection and use of PII, but may nevertheless raise privacy concerns and associated risk. The privacy controls are equally applicable to those activities and can be used to analyze the privacy risk and mitigate such risk when necessary.” Examples include, but are not limited to, audio recordings, video surveillance, building entry readers, and electronic purchase transactions.

Yes. (Check all that apply.)

<table>
<thead>
<tr>
<th>Activities</th>
<th>Building entry readers</th>
<th>Electronic purchase transactions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio recordings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Video surveillance</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other (specify):</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

No.

3. Does the IT system collect, maintain, or disseminate business identifiable information (BII)?

As per DOC Privacy Policy: “For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as “trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential.” (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. "Commercial" is not confined to records that reveal basic commercial operations” but includes any records [or information] in which the submitter has a commercial interest” and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.).”

Yes, the IT system collects, maintains, or disseminates BII.

No, this IT system does not collect any BII.

4. Personally Identifiable Information (PII)
4a. Does the IT system collect, maintain, or disseminate PII?

As per OMB 17-12: “The term PII refers to information that can be used to distinguish or trace an individual’s identity either alone or when combined with other information that is linked or linkable to a specific individual.”

Yes, the IT system collects, maintains, or disseminates PII about: (Check all that apply.)

DOC employees
National Institute of Standards and Technology Associates
Contractors working on behalf of DOC
Other Federal Government personnel
Members of the public
No, this IT system does not collect any PII.

If the answer is “yes” to question 4a, please respond to the following questions.

4b. Does the IT system collect, maintain, or disseminate Social Security numbers (SSNs), including truncated form?

Yes, the IT system collects, maintains, or disseminates SSNs, including truncated form.

Provide an explanation for the business need requiring the collection of SSNs, including truncated form.

The collection of SSNs is for the new employee onboarding human resources (HR) process and the access approval process for the FFO field site.

Provide the legal authority which permits the collection of SSNs, including truncated form.

No, the IT system does not collect, maintain, or disseminate SSNs, including truncated form.

4c. Does the IT system collect, maintain, or disseminate PII other than user ID?

Yes, the IT system collects, maintains, or disseminates PII other than user ID.

No, the user ID is the only PII collected, maintained, or disseminated by the IT system.
4d. Will the purpose for which the PII is collected, stored, used, processed, disclosed, or disseminated (context of use) cause the assignment of a higher PII confidentiality impact level?

Examples of context of use include, but are not limited to, law enforcement investigations, administration of benefits, contagious disease treatments, etc.

____ Yes, the context of use will cause the assignment of a higher PII confidentiality impact level.

___x___ No, the context of use will not cause the assignment of a higher PII confidentiality impact level.

*If any of the answers to questions 2, 3, 4b, 4c, and/or 4d are “Yes,” a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the approved PIA must be a part of the IT system’s Assessment and Authorization Package.*
CERTIFICATION

I certify the criteria implied by one or more of the questions above apply to the NTIA005 HQ’s NTIA GSS and as a consequence of this applicability, I will perform and document a PIA for this IT system.

I certify the criteria implied by the questions above do not apply to the [IT SYSTEM NAME] and as a consequence of this non-applicability, a PIA for this IT system is not necessary.
