for the  
Landon IP Information System**

# U.S. Department of Commerce Privacy Threshold Analysis

## USPTO Landon IP Information System

**Unique Project Identifier: PTOC-019-00**

**Introduction:** This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based from the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed in order to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

**Description of the information system and its purpose:** *Provide a general description of the information system in a way that a non-technical person can understand.*

The E-Government Act of 2002 defines “information system” by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: “Information system” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44. U.S.C. § 3502(8).

The Landon IP Information System (LIPIS) is an infrastructure information system that is designed to support the USPTO international application or PCT application process. LIPIS is located at the CoreSite Data Center, 12100 Sunrise Valley Drive, Reston, VA 20191. The Patent Cooperation Treaty (PCT) provides a unified procedure for filing patent applications to protect inventions in each of its Contracting States. The LIPIS facilitates PCT searches and enables Landon IP employees to submit an accompanying written opinion regarding the patentability of the invention in question.

Landon IP is under contract with the USPTO to perform work related to PCT applications. Landon IP receives PCT application data from the USPTO via SFTP, a secure file transfer system based on the SSH protocol. Utilizing this data, Landon IP conducts searches and develops opinion papers for the USPTO.

In support of this contract with the USPTO, Landon IP has implemented the LIPIS. The LIPIS is the automated information system comprised of the Landon IP network environment that supports the USPTO. The LIPIS was developed to provide a comprehensive set of security controls to adequately protect USPTO data. The LIPIS is a networked system of servers, equipment, and applications that meet the requirements for the General Support System/Infrastructure System.

**Questionnaire:**

1. What is the status of this information system?

- This is a new information system. *Continue to answer questions and complete certification.*
- This is an existing information system with changes that create new privacy risks. *Complete chart below, continue to answer questions, and complete certification.*

Changes That Create New Privacy Risks (CTCNPR)					
a. Conversions		d. Significant Merging		g. New Interagency Uses	
b. Anonymous to Non-Anonymous		e. New Public Access		h. Internal Flow or Collection	
c. Significant System Management Changes		f. Commercial Sources		i. Alteration in Character of Data	
j. Other changes that create new privacy risks (specify):					

- This is an existing information system in which changes do not create new privacy risks, and there is not a SAOP approved Privacy Impact Assessment. *Continue to answer questions and complete certification.*
- This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2015 or later). *Skip questions and complete certification.*

2. Is the IT system or its information used to support any activity which may raise privacy concerns?

NIST Special Publication 800-53 Revision 4, Appendix J, states “Organizations may also engage in activities that do not involve the collection and use of PII, but may nevertheless raise privacy concerns and associated risk. The privacy controls are equally applicable to those activities and can be used to analyze the privacy risk and mitigate such risk when necessary.” Examples include, but are not limited to, audio recordings, video surveillance, building entry readers, and electronic purchase transactions.

- Yes. *Please describe the activities which may raise privacy concerns.*
- No

3. Does the IT system collect, maintain, or disseminate business identifiable information (BII)?

As per DOC Privacy Policy: "For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as "trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential." (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. "Commercial" is not confined to records that reveal basic commercial operations" but includes any records [or information] in which the submitter has a commercial interest" and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.)."

Yes, the IT system collects, maintains, or disseminates BII about: *(Check all that apply.)*

Companies

Other business entities

No, this IT system does not collect any BII.

4. Personally Identifiable Information

4a. Does the IT system collect, maintain, or disseminate personally identifiable information (PII)?

As per OMB 07-16, Footnote 1: "The term 'personally identifiable information' refers to information which can be used to distinguish or trace an individual's identity, such as their name, social security number, biometric records, etc... alone, or when combined with other personal or identifying information which is linked or linkable to a specific individual, such as date and place of birth, mother's maiden name, etc..."

Yes, the IT system collects, maintains, or disseminates PII about: *(Check all that apply.)*

DOC employees

Contractors working on behalf of DOC

Members of the public

No, this IT system does not collect any PII.

***If the answer is "yes" to question 4a, please respond to the following questions.***

4b. Does the IT system collect, maintain, or disseminate PII other than user ID?

Yes, the IT system collects, maintains, or disseminates PII other than user ID.

No, the user ID is the only PII collected, maintained, or disseminated by the IT system.

4c. Will the purpose for which the PII is collected, stored, used, processed, disclosed, or disseminated (context of use) cause the assignment of a higher PII confidentiality impact level?

Examples of context of use include, but are not limited to, law enforcement investigations, administration of benefits, contagious disease treatments, etc.

- Yes, the context of use will cause the assignment of a higher PII confidentiality impact level.
- No, the context of use will not cause the assignment of a higher PII confidentiality impact level.

***If any of the answers to questions 2, 3, 4b, and/or 4c are “Yes,” a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the approved PIA must be a part of the IT system’s Assessment and Authorization Package.***

### CERTIFICATION

I certify the criteria implied by one or more of the questions above **apply** to the Landon IP Information System and as a consequence of this applicability, I will perform and document a PIA for this IT system.

I certify the criteria implied by the questions above **do not apply** to the Landon IP Information System and as a consequence of this non-applicability, a PIA for this IT system is not necessary.

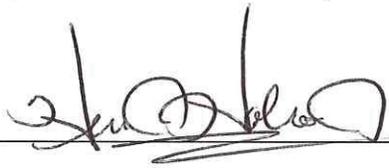

Name of System Owner (SO): Blaine Copenheaver

Signature of SO: Blaine Digitally signed by Users, Copenheaver, Blaine  
Date: 2019.03.26 08:59:38 -04'00' Date: 03/26/2019

Name of Senior Information Security Officer (SISO): John Pardun

Signature of SISO:  Date: 3-27-2019
