U.S. Department of Commerce
International Trade Administration (ITA)

Privacy Threshold Analysis
for the
ITA Salesforce Platform (ITA_SFPF)
U.S. Department of Commerce Privacy Threshold Analysis

International Trade Administration Salesforce Platform

Unique Project Identifier: 2520

Introduction: This Privacy Threshold Analysis (PTA) is a questionnaire to assist with determining if a Privacy Impact Assessment (PIA) is necessary for this IT system. This PTA is primarily based from the Office of Management and Budget (OMB) privacy guidance and the Department of Commerce (DOC) IT security/privacy policy. If questions arise or further guidance is needed in order to complete this PTA, please contact your Bureau Chief Privacy Officer (BCPO).

Description of the information system and its purpose: Provide a general description (in a way that a non-technical person can understand) of the information system that addresses the following elements:

The E-Government Act of 2002 defines “information system” by reference to the definition section of Title 44 of the United States Code. The following is a summary of the definition: “Information system” means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. See: 44. U.S.C. § 3502(8).

a) Whether it is a general support system, major application, or other type of system
   Major Application

b) System location
   Cloud-hosted system in FedRAMP approved Salesforce Government Cloud

c) Whether it is a standalone system or interconnects with other systems (identifying and describing any other systems to which it interconnects)
   Interconnects with Pay.gov (Privacy Shield App Payment System) and US Exim Bank (Salesforce-to-Salesforce Connection -Elastic Search)

d) The purpose that the system is designed to serve
   ITA Salesforce Platform (ITA SFPF) was designed to create a unified, enterprise-wide view of customers while presenting a single “face” to the customer. It allows all ITA staff across different business units to effectively collaborate and share customer information, regardless of their physical location. Additionally, SFPF enables the Office of Domestic Operations (ODO) and the Office of International Operations (OIO) trade specialists to see client information for all networks and posts in one system.

e) The way the system operates to achieve the purpose
For administrative matters, improvement of Federal services online, to promote information sharing initiatives, and for web measurement and customization technologies (single session/multi-session).

f) A general description of the type of information collected, maintained, used, or disseminated by the system
Salesforce stores/collects information such as: Name, Telephone Number, Email Address, Business Address, Title. These are collected through online entry (via various applications/modules) or manually entered by ITA employees (for CRM purposes). These data types are maintained under standard ITA policy and are only accessible for authorized users.

g) Identify individuals who have access to information on the system
System admins (full Admin rights); Internal Users (limited rights with role-based access); Community Users (limited rights for interaction with ITA)

h) How information in the system is retrieved by the user
Information is retrieved via an online/web connection

i) How information is transmitted to and from the system
Online entry with some automation in use using secure HTTPS Connection (SC-8) - HTTPS security (TLS 1.2) for data transmission.
Questionnaire:

1. Status of the Information System
   1a. What is the status of this information system?

   ___ This is a new information system. *Continue to answer questions and complete certification.*

   ___ This is an existing information system with changes that create new privacy risks. *Complete chart below, continue to answer questions, and complete certification.*

<table>
<thead>
<tr>
<th>Changes That Create New Privacy Risks (CTCNPR)</th>

</thead>
<tbody>
<tr>
<td>a. Conversions</td>
</tr>
<tr>
<td>b. Anonymous to Non-Anonymous</td>
</tr>
<tr>
<td>c. Significant System Management Changes</td>
</tr>
<tr>
<td>j. Other changes that create new privacy risks (specify):</td>
</tr>
</tbody>
</table>

   ___ X ___ This is an existing information system in which changes do not create new privacy risks, and there is not a SAOP approved Privacy Impact Assessment. *Continue to answer questions and complete certification.*

   ___ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2015 or 01-2017). *Continue to answer questions and complete certification.*

   ___ This is an existing information system in which changes do not create new privacy risks, and there is a SAOP approved Privacy Impact Assessment (version 01-2019 or later). *Skip questions and complete certification.*

1b. Has an IT Compliance in Acquisitions Checklist been completed with the appropriate signatures?

   ___ Yes. This is a new information system.

   ___ Yes. This is an existing information system for which an amended contract is needed.

   ___ No. The IT Compliance in Acquisitions Checklist is not required for the acquisition of equipment for specialized Research and Development or scientific purposes that are not a National Security System.

   ___ X ___ No. This is not a new information system.
2. Is the IT system or its information used to support any activity which may raise privacy concerns?

NIST Special Publication 800-53 Revision 4, Appendix J, states “Organizations may also engage in activities that do not involve the collection and use of PII, but may nevertheless raise privacy concerns and associated risk. The privacy controls are equally applicable to those activities and can be used to analyze the privacy risk and mitigate such risk when necessary.” Examples include, but are not limited to, audio recordings, video surveillance, building entry readers, and electronic purchase transactions.

___ Yes. (Check all that apply.)

<table>
<thead>
<tr>
<th>Activities</th>
<th></th>

<tr>
<td>Video surveillance</td>
<td>Electronic purchase transactions</td>
</tr>
<tr>
<td>Other (specify):</td>
<td></td>
</tr>
</tbody>
</table>

___ No.

3. Does the IT system collect, maintain, or disseminate business identifiable information (BII)?

As per DOC Privacy Policy: “For the purpose of this policy, business identifiable information consists of (a) information that is defined in the Freedom of Information Act (FOIA) as "trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential." (5 U.S.C.552(b)(4)). This information is exempt from automatic release under the (b)(4) FOIA exemption. "Commercial" is not confined to records that reveal basic commercial operations” but includes any records [or information] in which the submitter has a commercial interest” and can include information submitted by a nonprofit entity, or (b) commercial or other information that, although it may not be exempt from release under FOIA, is exempt from disclosure by law (e.g., 13 U.S.C.).”

___ Yes, the IT system collects, maintains, or disseminates BII.

___ No, this IT system does not collect any BII.

4. Personally Identifiable Information (PII)

4a. Does the IT system collect, maintain, or disseminate PII?

As per OMB 17-12: “The term PII refers to information that can be used to distinguish or trace an individual’s identity either alone or when combined with other information that is linked or linkable to a specific individual.”

___ Yes, the IT system collects, maintains, or disseminates PII about: (Check all that apply.)

___ DOC employees
___ Contractors working on behalf of DOC
___ Other Federal Government personnel
___ Members of the public

___ No, this IT system does not collect any PII.
If the answer is “yes” to question 4a, please respond to the following questions.

4b. Does the IT system collect, maintain, or disseminate Social Security numbers (SSNs), including truncated form?

____ Yes, the IT system collects, maintains, or disseminates SSNs, including truncated form.

Provide an explanation for the business need requiring the collection of SSNs, including truncated form.

Provide the legal authority which permits the collection of SSNs, including truncated form.

_X___ No, the IT system does not collect, maintain, or disseminate SSNs, including truncated form.

4c. Does the IT system collect, maintain, or disseminate PII other than user ID?

_X___ Yes, the IT system collects, maintains, or disseminates PII other than user ID.

____ No, the user ID is the only PII collected, maintained, or disseminated by the IT system.

4d. Will the purpose for which the PII is collected, stored, used, processed, disclosed, or disseminated (context of use) cause the assignment of a higher PII confidentiality impact level?

Examples of context of use include, but are not limited to, law enforcement investigations, administration of benefits, contagious disease treatments, etc.

____ Yes, the context of use will cause the assignment of a higher PII confidentiality impact level.

_X___ No, the context of use will not cause the assignment of a higher PII confidentiality impact level.

If any of the answers to questions 2, 3, 4b, 4c, and/or 4d are “Yes,” a Privacy Impact Assessment (PIA) must be completed for the IT system. This PTA and the SAOP approved PIA must be a part of the IT system’s Assessment and Authorization Package.
CERTIFICATION

__X__ I certify the criteria implied by one or more of the questions above apply to the ITA Salesforce Platform and as a consequence of this applicability, I will perform and document a PIA for this IT system.

_____ I certify the criteria implied by the questions above do not apply to the ITA Salesforce Platform and as a consequence of this non-applicability, a PIA for this IT system is not necessary.
